## Some Suggestions From Prof. Carlyle.

Prof. W. L. Carlyle, of the University of Wisconsin Experiment Station, who judged the live stock at the last California State Fair with such eminent success and satisfaction, has written a letter to Assistant Secretary Lowden in regard to Eastern stock breeders making exhibitions in California at the fair of 1903, which Mr. Lowden sends us for publication. It contains some excellent suggestions and shows how the State Fair grounds at Sacramento impress an Eastern live stock judge who has visited all the great shows in America. The letter is as follows:

To H. Lowden, Assistant Secretary California State Board of Agriculture, Sacramento, Cal.—Dear Sir: I have your kind favor of recent date asking for suggestions concerning the California State Fair for the coming year. I know that you will pardon my delay in not replying to this letter, as I have been from home for the last ten days in attendance at the greatest livestock show on earth, which is the International of Chicago.

While at that exposition I met a number of stock men from the West, including three large Shorthorn breeders from Oregon, one from Washington and two or three from your own State. From all of these men I had the assurance that they were fitting their herds to make an exhibition at the California State Fair next year, provided that suitable accommodations could be provided for the proper care of their live stock while in attendance at your fair.

In conversation with them I had to express my opinion of the conditions prevailing on your fair grounds, and was sorry to say that I had to tell them that the conditions there were very unsatisfactory indeed. Now, I would suggest to your Board that if possible, I think it would be wise to remove all the trotting horses from that portion of the ground where the other live stock is now housed. If all these herds of cattle, sheep and swine that have indicated their intention of being present make an exhibition at your fair all of that space now given to the speed horses will be utilized for the cattle and sheep.

Would it not be possible for you to have your speed stables on the opposite side of the race track, somewhere away from the other livestock. Then by removing some of the buildings and overhauling and refitting others you could make a very comfortable arrangement for stabling all the livestock that would come to your fair.

I have the greatest faith in California as a livestock and dairy State, and I believe that your State Board of Agriculture has a great work to do in encouraging the introduction of improved breeds of livestock. The livestock department at your State Fair, if properly conducted, can be made one of the greatest educational factors of your whole State. At present it is apparent to the casual visitor that the energies of the association in the past have been devoted to amusement and entertainment rather than to educational features.

You have a magnificent race track and grand stand for the comfort of visitors who may be interested in the races, but you do not have any suitable accommodations for the very valuable cattle, sheep and swine that are to be exhibited at your State Fair, nor do you have a single seat where the visitor who is interested in livestock may sit down while he is inspecting, judging and listening to the remarks made concerning the decisions rendered in the various classes. Your exhibit grounds should be provided with a suitable judging pavilion, with comfortable seats, resembling somewhat your grand stand, where these visitors who are interested in livestock may be comfortable while they are inspecting it.

I have been so exceedingly busy since returning from my visit to the West that I have not had time as yet to revise your premium list as you suggested, nor to make up suggestions concerning your rules and regulations. I hope to be able to do this in the next two or three days, and will forward it to you without delay. I sincerely trust that you will be furnished with abundant means by your great State of California to carry on some few improvements on your exhibition grounds along the lines suggested.

I am certain there is nothing which will do more to favor the introduction and breeding of improved live stock in your State than the money spent in improving the facilities for exhibiting and inspecting the live stock at your State Fair.

I received the express package in good order and am very grateful, indeed, to your State Board for your courteous treatment and the warm hospitality with which you entertained me while I was your guest at your State Fair.

Hoping that I may have the pleasure of hearing from you again, and that if spared that I may at some future date be present to note the improvements which I am assured you will have in your exhibition grounds and buildings in the near future, I am, yours very truly,

W. L. CARLYLE.

Prof. Carlyle's suggestions are timely, especially the one where it is stated that the trotting horses should be removed from that portion of the grounds where the other live stock is now housed. Of course, the Professor aims no blow at the trotters, but thinks the racing stock and the exhibition stock should be separated, and in this he is eminently correct. The accommodations provided for the cattle at Sacramento are disgraceful. Animals that it took thousands of dollars to purchase and worth almost untold value to the State as progenitors of valuable stock, are placed in tumbledown sheds, while running skates that could not be sold for a hundred dollars are given the best of box stalls. The live stock should have quarters by themselves and there should be a covered and seated pavilion where spectators can be accommodated while the animals are being judged. The

trotting horses should have quarters to themselves and so should the runners. It is not only inconvenient to all concerned to have everything mixed up as it is now, but it keeps people from visiting the fair. There are many improvements that should be made at Agricultural Park, Sacramento, and they should be provided for by the Legislature at its session this winter.

## His Old Gray Mare.

BY SAMUEL WALTER FOSS.

Jim Bunkner hed to fish for words,  
An' bob his bait from left to right,  
An' swish his pole an' line aroun'  
An' hardly ever get a bite.  
He hemmed an' hawed an' gulped an' choked  
An' scratched an' stuttered an' grew red,  
An' then chawed out a word or two  
He allus wished he hadn't said.  
But yet his words flew thick an' fast  
As battle bullets through the air,  
W'en he onhitched his tied-up tongue,  
An' then described his ol' gray mare.

The very thought uv thet ol' mare  
Wuz lightnin' in the ol' man's eyes,  
Yeast in the dough uv his ol' soul  
Thet made it bubble up an' rise;  
Hot ginger in his lazy blood  
Thet give his tired natur' vim,  
Thet stung his nerves an' fired his heart,  
An' made a brau' new man uv Jim.  
It pricked the dull flanks uv his soul,  
An' made it champ its bits an' raar.  
An' dance 'roun' on his hind legs w'en—  
W'en he described his ol' gray mare.

W'en Jim described his ol' gray mare  
We all stopped work; an' Cyrus Brown  
Said, w'll he talked about thet mare,  
The mills had oughter all shet down.  
Said Jud, "The sun sh'd stop right short  
Squar' in the middle uv the day,  
An' stan' still, ez it used to do,  
W'en bossed aroun' by Joserway.  
Natur' sh'd knock off work, an' git  
Its money's worth, an' some to spare.  
In listenin' to Jim Bunkner spout,  
W'en he describes his ol' gray mare.

Like w'en a good saint talks of heaven,  
A scamp of gittin' out of prison,  
Like w'en his Silas talks to Sal,  
An' strokes her hair, an' calls her his'n,  
Like Sissero' upon the stump  
A spoutin' Latun to the nations,  
Wuz Jim w'en he described thet mare,  
An' give her pints an' qual'fications;  
We ut an' soaked in elerquence,  
Or walked an' wallered in it there,  
W'en Jim, out in the hay field, stopped,  
An' then described his ol' gray mare.

Jim's ol' gray mare fell dead las' night,  
Down in the pasture by the brook,  
Jim w'en an' foun' her therstone dead,  
An' jest stood still an' shook, an' shook.  
He then began to fish for words,  
In his ol' unsuccessful way,  
An' hemmed, an' hawed, an' gulped, an' choked,  
But couldn' fin' a word to say.  
Of course, he had no use fer life  
With thet ol' mare a-layin' there,  
An' so he fell down in his tracks  
An' died beside his ol' gray mare.

## Mr. Hamlin to Retire.

It has been known in inner horse circles for some time that the great turfman, C. J. Hamlin, proprietor of Village Farm, East Aurora, N. Y., was contemplating retiring from active breeding and turf affairs. Mr. Hamlin is now 83 years of age and will delegate the management of his great trotting establishment for his son, Harry Hamlin, who for several years has been closely associated with his father's racing stable. There will be but little change in the administration of the management of this celebrated stud. At the beginning of the year there were about 500 horses at Village Farm, which have been reduced by public and private sales to 350. It is the intention of Harry Hamlin to reduce the stud to the six principal stallions and fifty select broodmares during the next twelve months. Ed Geers will remain as superintendent and continue to train and race the stars of the farm. C. J. Hamlin will retire from the industry with an enviable reputation as a breeder of light harness horses, he having to his credit such stars as the following: The Abbot 2:03½, the world's gelding record; Fantasy 2:06, the fastest three and four year old filly; Lord Derby 2:05½, holding the fastest five year old gelding record; Lady of the Manor 2:04½, fastest pacing mare; The Monk 2:05½, Shadow Chimes 2:05, Robert J. 2:02, Heir-at-Law 2:05½, Bright Regent 2:06½, Dandy Chimes 2:08½, King Charles 2:08½, Moonstone 2:09, Dare Devil 2:09, the highest priced trotting stallion sold in recent years; Ed Easton 2:09½, Battletton 2:09.

MASSENA (N. Y.), September 8, 1902.  
Dear Sir:—Pind enclosed \$2.00 for a bottle of Absorbine. It is a great remedy; could not get along without it.  
Yours truly,  
GEO. E. CARR.

California favorite hot weather drink—Jackson's Napa Soda.

## The Durfee Sale.

The sale of trotters held by William G. Layng at Los Angeles on Thursday, December 18, 1902, was successful in every way. The highest priced one of those sold was the brown colt, Electro McKinney, foaled 1900, by McKinney 2:11½, out of El Mae by Electricity; second dam May by Wildidle, third dam Mayflower (the dam of Manzanita 2:16 and Wildflower 2:21) by St. Clair. He was purchased by Mr. Byron Erkenbrecher, of Los Angeles, for \$2450, and he secured one of the grandest individuals, as well as one of the fastest colts in California. Two hours after the the sale Mr. Erkenbrecher was offered \$1000 advance on the price paid, but declined the offer. The sum mary of the sale is as follows:

Zolock Ray, blk f, 1900, by Zolock, dam by Raymon; Mr. Garland, \$100.  
McKinney Belle, b f, 1900, by McKinney, dam by Fayette Wilkes; Mr. Garland, \$450.  
Electro McKinney, br b, 1900, by McKinney, dam by Electricity; Mr. Erkenbrecher, \$2450.  
Zombretta, br f, 1900, by Zombro, dam by Woolcough; Mr. Christopher, \$375.  
May McKinney, br f, 1901, by McKinney, dam by Electricity; Mr. Christopher, \$375.  
Direct Boy, br g, 1900, by Direcho, dam by Director; Mr. Brock, \$90.  
Egypt, b f, 1899, by Osito, dam by Fayette Wilkes; Mr. Newton, \$120.  
Red McKinney, b c, 1902, by McKinney, dam by Fayette Wilkes, \$200.  
Direct Maid, b f, 1902, by Direcho, dam by Director, \$45.  
Bay gelding, 1897, by Albion 2:25½, dam by Woolsey, \$75.  
Gold Coin, br g, 1898, by Zombro, dam by Dashwood, \$300.  
Bay mare, 1897, by Ira Woolsey, dam by Will Crocker, \$140.  
Election Boy, b s, 1897, by Richard's Elector, dam by Chieftain, \$75.  
Chestnut mare, 1898, by Woolsey, dam by Sattelite, \$85.  
Susie Almont, br f, 1900, by Alto Rio, dam by Brown Jug, \$25.  
Prince Howard, b g by Dexter Prince, dam by Artherton, \$225.  
Brown mare, 1899, by Gen. Beverley, dam by Electricity, \$80.  
Bay mare, 1897, by Albion 2:25½, dam by Will Crocker, \$65.  
Bay mare, 1897, by Woolsey, dam by Will Crocker, \$50.  
Black Team, sisters, 1896, 1898, by Coeur de Alene 2:19½, dam by Laddie, \$360.  
Jessie Iris, br m, 1897, by Iris, dam by Nutwood Wilkes, \$95.  
Vista, b m, 1892, by Electricity, dam by Gen. Benton, \$225.  
El Mae, br m, 1893, by Electricity, dam by Wildidle, \$215.  
Ida Director, b m, 1894, by Director, dam by Irvington, \$40.  
Bay mare by McKinney, dam by Dick Richmond, \$90.

## Christmas on the Speedway.

Members of the Golden Gate Park Driving Association held three races on the park speedway on Christmas Day and while all were won in straight heats there were close contests and plenty of excitement. Captain Batchelder won two of the races, one with Eden Vale and the other with Frank B. There were many spectators present who thoroughly enjoyed the sport. The officers of the meeting were Edward Aigeltinger, president; W. J. Simpson and Jack Holland, judges; J. O. Kane starter and F. W. Thompson, secretary. The results of the races follow:

Free for all.  
Uncle John.....(Captain H. W. Goodall) 1 1  
Al Sandy.....(S. Watson) 3 2  
Altavis.....(Captain N. P. Batchelder) 2 3  
2:20 class.  
Eden Vale.....(Captain Batchelder) 1 1  
Steve S.....(G. L. Swett) 2 2  
Dr. Hammond.....(Captain Bennett) 3 3  
2:30 class.  
Frank B.....(Captain Batchelder) 1 1  
Alice Nic.....(H. Schottler) 2 2  
Chispa.....(T. F. Bannon) 3 3

On Saturday evening the club held a banquet at a down town restaurant and President Aigeltinger was presented with a handsome gold watch.

## A Common Mistake.

It is a general opinion among too many horse-owners that during the wet and cold weather of fall and winter no particular care is needed to keep a horse's foot in healthy condition. Directly due to this belief may be traced most of the diseases which are met with in dry weather. Proper care at the proper time would prevent nine-tenths of the diseases and ailments which deprive you partially or entirely of the use of your horse, and adds the expense and trouble of doctoring, the result of which is uncertain, and in many cases requires the growing of an entire new hoof to effect a cure. Campbell's Horse Foot Remedy is just what is needed to prevent feet from becoming unsound.

There is a report in circulation that the stallion Kinney Lou, trial 2:09½, that Budd Doble took East for Douglas Cone, of Red Bluff, and is being wintered at Walnut Hall Farm near Lexington, has been sold for \$5000 in cash and a further amount when he trots to a record below 2:20.

Monroe Salisbury is giving his horses at Pleasanton their exercise himself. He is "better than a raw hand."

## Notes and News.

May the New Year be a prosperous one for you.

The demand for roadsters and work horses is keener than ever.

Barney Simpson is thinking of locating at Pleasanton this spring.

Belleflower 2:12½ will visit the paddock of Ashland Wilkes 2:17½ in 1903.

Our special edition will be issued next Saturday. For sale everywhere.

Connor 2:03½ has been racing twelve years, and the past season was in the money in every start.

The Rose Hotel at Pleasanton is headquarters for horsemen and the Sunday dinners are a feature.

Rosedale Stock Farm has some good roadsters for sale that are worth more money than is asked for them.

A stake for three year old pacers to be trotted this year should fill well. There will be a number of pacers of this age in training in California.

It is announced that C. J. Hamlin has made a provision for the continuance of Village Farm as a great breeding establishment after his death.

Little Boy 2:01½ is taking on flesh and Scott McCoy has hopes that the cripple will be in shape to take a shay at the two minute mark next season.

A. W. Shippee, of Nelson, Butte county, has secured stalls at Pleasanton for a string of ten or a dozen horses that he will have worked or trained there. They will be for sale.

"Farmer" Bunch has rented a cottage at Pleasanton and moved his family there. He is still at the Meek ranch at Haywards, but will soon move a big string to the horse centre.

Metallas 2:11, having been a failure in the hands of several first class trainers, will be given a trial next year by Ed Geers. The trotter has plenty of speed if he will only behave.

Shrewd breeders sometimes sell their best animals at ridiculously low prices. The Messrs. Stout sold both Gussie Wilkes, dam of Allerton 2:09½, and Lou, dam of Axtell 2:12, for \$250.

At the Los Angeles city election held December 1st, Mr. Owen McAleir, who is one of the prominent horse owners of that metropolis, was elected to the honorable position of City Councilman.

The first champion trotter to enter the 2:20 list was a son of Hambletonian 10, and each succeeding champion for twenty-three years was either a grandson or grand-daughter of the same sire.

One of the remarkable sires of 1902 is Axworthy 2:15½ by Axtell 2:12, who is credited with nine new performers. Axworthy is ten years old, and prior to 1902 was not represented by a single standard performer.

Frank Walker, the well known Grand Circuit starter, says there are three pacers in sight that will have a fighting chance to beat Dan Patch 1:59½ in 1903. The horses are Prince Alert 2:00, Direct Hal 2:04½ and Audubon Boy 2:03½.

J. C. Bray, of Montana, who visited Menlo Park this week looking for horses, tells us that the three stallions by Prince Airlie advertised for sale by Mr. P. H. McEvoy of that place, are three very handsome horses and well worth the prices asked.

Horsemen who have visited Pleasanton recently speak in high praise of the trotting stallion Lecco 2:09½ brought out by Mr. Mills, who also brought Searchlight 2:03½. These two stallions will be well patronized by California breeders this year.

It is a remarkable fact that although Alcyoner, the sire of Neil Alcyoner 2:12½, has had but six of his get trained and raced, yet McKinney, one of the greatest sires of extreme speed, is the only living son of Alcyoner that has more in the 2:15 list than Alcyoner.

George R. Woodin has written a card to the papers in which he says John Splan bid in Nella Jay for him; that James Y. Gatscomb bid in Par-o-Chute for him, and that these together with Allie Jay and Lady Isabel will be raced through the Grand Circuit in 1903.

While Prince Alert's half mile in 57½ seconds, made when he defeated Sir Albert S. is the half mile race record, the fastest half mile is still to the credit of Star Pointer, which paced a half in 57½ seconds in an exhibition against time at Belmont track, Philadelphia, September 17, 1898.

Rose Dale Stock Farm has sold the handsome mare Julia S. by Daly to Mr. Gray of Santa Rosa, who contemplates moving to San Francisco. Julia S. is a trotter of no mean ability and was in Millard Sanders' string last spring before he started East. Mr. Gray will drive Julia S. on the road and there will be few that can give him their dust.

Fifty two year olds from Palo Alto will be sold by Fred H. Chase & Co. during the last week in January. Full particulars next week in our special edition. The chance of a life time.

There is talk of fixing up the old Treat track at Melrose, which was one of the popular tracks of the old days. It would take but a few hundred dollars to make it fit to train on.

Brignoli Wilkes 2:14½, the fastest entire son of Geo. Wilkes, is owned by Timothy Collins, of Canton, N. Y. He is now twenty years old, but is chipper as a colt and always ready for a fast road brush.

Stamboulette 2:10½ is being driven on the park roads this winter and has taken many of the road drivers into camp. He was driven by a lady for sometime and out-brushed some of the crackerjacks before his identity was discovered.

Mr. Ben Davies of San Bernardino has a filly that is entered in the Occident and Stanford Stakes for 1903 that showed a 2:16 gait at Los Angeles recently and Mr. Davies was then and there offered \$1400 for her, which he declined. She is by Zolock 2:11½.

Jacob Ruppert of New York has recently refused an offer of \$40,000 for Oakland Baron 2:09½. It was a big price to turn down, but if the peerless son of Baron Wilkes lives he will justify the refusal, for his earning capacity during the next five years should be as large as that of any stallion in America.

It is far better for stallion and owner to have plenty of sound foals about the place, even though the matured ones cannot beat 3:00, than a barn full of cripples with standard records. Buyers do not care for cripples, even with records of 2:20, but will pay good money for sound trotters possessing 3:00 speed.

J. R. Albertson is training nine horses at Fresno, among them one or two colts that are entered in the Breeders Futurity. Chas. E. Clark is working quite a number also, and James W. Zibbell, who recently came here from Montana and located at San Jose, moved his string of horses to Fresno this week.

It is said that hereafter the Village Farm foals will be liberally entered in futurities. It was generally remarked at the New York sale that had the youngsters sent into the ring been eligible to the big Futurity stakes they would have brought much larger prices and the farm management seems to have arrived at the same conclusion.

Billy Andrews says, although Mr. E. H. Harriman will give up racing, he will continue breeding at his stock farm at Goshen, N. Y. He has quartered there John R. Gentry 2:00½, and will retain the broodmares Onoqua 2:08½, Lightning 2:11, Elsie S. 2:11½, Helen Grace 2:11½, Rose Leaf 2:14½, Hilda S. 2:15½ and a few others with records better than 2:20.

William Murray, of Woodland, owner of Diablo 2:09½, has arranged to keep the Allerton stallion Geo. W. Archer 2:5492 in the stud at Woodland last year. Geo. W. Archer is a very handsome sixteen hand bay horse, and being a son of the mighty Allerton 2:09½ will attract much attention in Yolo county, where there will be much breeding done this year.

B. S. Krehe, of San Jose, Cal., has placed his horses, including Black Pistol, Lancelot and other good ones, in the hands of Ben Kenney at the Lexington track, and Kenney will take them through the circuit next season. Two of the younger horses upon which great reliance is placed are a bay filly by Hambletonian Wilkes, dam Anna Belle, and a colt by Diablo 2:09½.

A veteran turfman says the fee of \$50 for change of name of a horse should be reduced. This feature was borrowed from the Jockey Club rules, but the club is about to reduce the amount to \$10. Some owners insist on starting their horses under outlandish names, which the purchasers deem inappropriate, yet do not feel like paying a tax of \$50 per head for the mere change.

Thos. Bonner has sold to Monroe Salisbury for Mr. Fred Talbot of this city the six year old bay trotter Albert by Seymour Wilkes 2:08½. Mr. Salisbury purchased the horse for James Butler of New York, owner of Direct 2:05½. Albert is one of the best green pacing prospects in California and was worked a mile in 2:18 pulled up before reaching the wire. His dam is by Geo. M. Patchen Jr. and his second dam by Stockbridge Chief.

Barondale's fee for 1903 will be \$50. Where can you find a better investment for your money? His first three dams are all great broodmares, some of the greatest in the books. Barondale was a race horse—made his record in the third and fourth heats of races. He is a grand individual and he gets that kind. And then he is by the great Baron Wilkes 2:18, whose descendants won 25 per cent of all the money hung up on the Grand Circuit of 1902. How can you beat it?

One of the colts at Los Angeles that is much talked of at present is the three year old Bobs by Bob Mason out of Lydia Payne, a half sister to She 2:12½. Bobs is the property of Dr. J. A. Edmonds and was started in a mixed race at the last matinee of the driving club. In the second heat, after a bad break, Bobs trotted three-quarters in 1:43, closing a gap of fully a sixteenth of a mile which the others had gained, and this with only six weeks' work. He looks like a 2:10 trotter. He has trotted 21 heats in workouts with but one break and this was when suffering from lameness that was thought to be a bruise, but afterwards turned out to be a severe case of gravel.

The veteran trainer, Charles Marvin, who has made more champions living and dead than any other trainer and who was the trainer at Palo Alto Stock Farm when it was at the zenith of its glory, has at last decided to take life easy. He will sell all his horses, retaining two broodmares and four youngsters. He will vacate Ashland Park and take a stable at the Lexington track. He will develop and train a few youngsters each year and breed a few mares.

One thing that will be earnestly considered by the board of stewards of the Grand Circuit at the January meeting will be the employment of a paid judge to go right through the circuit. That is a question that has been talked about and thrashed over for many years, but they are now getting closer to it. Several of the associations employed a professional judge last season, but what is needed is for the same judge to travel right through the circuit with the horsemen.

A. J. Welch of the Charter Oak Park track, Hartford, is an advocate of the shorter plan of racing, and is more than likely to adopt the two-in-three idea outside of the famous Charter Oak \$10,000 Stake. He will also give a Grand Circuit meeting at Oakley Park, Cincinnati, next season, reports to the contrary notwithstanding. He intends making considerable improvement at Oakley, and is of the opinion that trotting can be revived in Cincinnati and made just as popular as it ever was. The rain handicap he had last year has not dampened his enthusiasm in the least.

A Syracuse writer states: "The Syracuse State Fair Association, of which A. E. Perren of Buffalo, C. Wieting, Commissioner of Agriculture, and De Forrest Settle of Syracuse, are the racing committee, is after the proposed match between the crack trotters, Lord Derby 2:05½ and Major Delmar 2:05½. The idea is to have the race during the Grand Circuit meeting, held in connection with the State Fair, believing it to be the greatest drawing card the fair could have. It is acknowledged that a great part of the success of the last State Fair was due to the appearance of Dan Patch, the king of pacers.

Mr. Butler has sent his latest purchase, King Direct, by Direct 2:05½, to E. F. Geers at Memphis, Tenn. King Direct paced a half-mile in 1:01½ before Mr. Butler bought him, a great performance for a green three year old. Mr. Butler also sent to Mr. Geers four others from his East View Farm. One was a four year old by Direct 2:05½, out of Marie Jansen, 2:21½; another was by Direct out of Sayonne, by Jay Bird and tracing in the maternal line to the famous Betty Brown; the black horse Cole Direct, five years, and Fred Direct, four years, who traces through maternal lines to Clara, the dam of Dexter 2:17½, were the other two.

A Lexington dispatch of the 18th says: "The largest deal in horseflesh made here this winter was closed today, when J. D. Fisher, agent for M. H. Tichenor & Co., Chicago, bought of J. L. Stewart, Lee Thomas and S. T. Harbison & Co. nine head of trotting horses for \$20,000. The stock are all show horses, embracing mares, stallions and geldings by famous Kentucky sires like Nutbreaker, Oakland Baron, Ashland Wilkes and Onward. There are several promising green trotters in the list. They will be trained and developed next year, the best of them being made candidates for blue ribbons at the Madison Square Garden Horse Show next year."

A meeting of the Gentlemen's Driving Club of Cleveland, held recently at the Roadside Club, was called for the purpose of distributing prizes and ribbons won during the season. The championship cup for trotters went to John A. McKerron, for his mile in 2:06½; the championship cup for pacers to Tiger, for his mile in 2:07½; the Reed cup for trotters, to Lena Wilson, for the most heats between 2:17 and 2:24; and the Reed cup for pacers to Frank M., for the most heats between 2:15 and 2:22. H. K. Devereux, C. K. G. Billings, H. M. Hanna, C. A. Otis, Jr., and John Sherwin were appointed a committee to draft rules covering the Cleveland Challenge Cup for trotters, and it was decided that the cup should cost between \$1000 and \$2000.

D. C. Palmeter, owner of Riverside Stock Farm, Berlin, Wisconsin, who bred Peter Stirling, that J. B. Chandler had out last season, is a practical joker. At the recent Fasig sale in New York Palmeter purchased the mare Falfa for \$1100. A short time after the purchase a stranger stepped up and asked if the mare was for sale. "Yes," replied the Badger State breeder, "if I get what she cost me. Let me see: 'I lost \$600 in the pools the first time she started as a two year old, betting against her. At Lexington, in the Futurity, I bet \$450 in the pools that she would win. She did not. That makes \$1050, and with \$1100 I just paid for her, makes her price \$2150. That's what I want for her.'" He still owns the mare and is proud of the bargain.

As will be seen by an advertisement in another part of the paper Dr. G. W. Stimpson the well known veterinarian offers his services to Associations in the capacity of presiding judge. Dr. Stimpson officiated at the Concord fair in 1900 and at the meeting of the Stockton Driving Club and the Tuolumne County fair this year. He has the highest recommendations from the Associations giving these meetings. The Doctor should be well fitted for the position being a student of form, thoroughly posted in both running and trotting rules, having been associated with race horses all his life and being a close observer. He is firm in his decision, cool and collected in his judgment. The Doctor intends to devote his time to the interests of racing in California and is now open to engagements for 1903.

## Christmas Matinee at Los Angeles.

[Los Angeles Herald, Dec. 26.]

The Driving Club's Christmas meeting was an immense success. The magnitude of the card was such that only about 100 persons saw the final heat, while over 5000 were present in the middle of the afternoon, but too much racing was the only fault that could have been found with the afternoon's sport by anyone. In quality the entertainment was excellent, and while the time in most of the events was moderate compared to some previous performances at local matinees, a series of remarkably close contests culminating in a dead heat kept the interest well up until impending darkness and thoughts of turkey sent the greater part of the crowd home and forced a slight cut in the fourth event.

The day's feature was the last race, which had settled into a contest between C. A. Canfield with Athalo and E. T. Earl with Sweetheart before the horses had reached the first quarter. Either gentleman would rather have won the race than found a small fortune, and first blood went to Earl in 2:24, Canfield taking it rather easy. In the second trip around, Mr. Canfield went out for the race and outdrove Earl in the stretch. Sweetheart was a good second under the whip, but seemed rather pumped out from the driving finish, while the winner did not show the effects of his 2:16 1/2 mile. The third heat went to Canfield in rather hollow style, through a bad break by Sweetheart on the far side, she finishing a bad last.

The feature of the fourth event was a dead heat, which occurred in the third heat around. From the stand, Kathleen, M. B. Mosher driving, seemed to have a nose the best of Red Lion, but it was a close decision, and rather than engender any hard feeling, the judges sent them around again. Kathleen demonstrated her superiority and took the race.

E. J. Delorey, driving Graham Babcock's El Moro, made a heroic effort to take William Garland's Sweet Marie into camp, but the bay mare was there with the speed and had all the staying powers necessary to keep the aspirant for championship honors in the second division. The three heats were the fastest of the afternoon, 2:17, 2:17 1/2 and 2:17 1/2. Sweet Marie was expected to pull a bike cart, but did not, else the result might have been different, but nobody who saw the race could be persuaded so.

Proctor, an added starter in the second race, a 2:30 affair, won in the minimum number of heats from an easy field. The opening race of the day, a mixed affair, went to P. L. Budinger, more from his skill as sulky pilot than through any superiority of Glen, the animal he drove.

One of the features of the afternoon, which received great commendation, was the energetic and prompt way Willard Stimson has of sending them off. Mr. Stimson believes in expediting matters and as long as he is on the ball drivers understand that they will have to get together. He showed no partiality yesterday, but on two or three occasions those who were a little tardy in coming up with the bunch had to take the worst of it at the getaway.

There was not a vacant box in the big stand yesterday, and hardly an empty seat. Society was present in full numbers, and stylish turnouts were lined up two and three deep on the rail.

## SUMMARIES.

First race, two in three mixed.			
Glen, s. g.	(P. L. Budinger)	2	1
Sallie Miles, b. m.	(J. C. Burns)	1	2
George, b. g.	(R. E. Muncy)	3	4
Maggie May, b. m.	(W. R. Stimson)	4	3
Bobbette, gr. m.	(Dr. J. A. Edmonds)	5	5
Marjoller, b. m.	(R. B. Urnston)	6	6
Time—2:28, 2:24 1/2, 2:23.			
Second race, 2:30 pace, two in three.			
Proctor, b. g.	(M. B. Mosher)	1	1
Addie R., b. m.	(C. F. Nowlin)	2	3
Hannah G., ch. m.	(Dr. Ralph Hagan)	3	4
George B., b. g.	(Dr. C. W. Bryson)	4	2
Time—2:30, 2:27 1/4.			
Third race, free for all trot, three in five.			
Sweet Marie, b. m.	(William Garland)	1	1
El Moro, blk. g.	(E. J. Delorey)	2	2
Time—2:17 1/4, 2:17 1/4, 2:17 1/4.			
Fourth race, 2:35 mixed, two in three.			
Kathleen, b. m.	(M. B. Mosher)	3	4
Elizabeth G., b. m.	(K. V. Redpath)	1	2
Red Lion, br. g.	(A. W. Herwig)	2	1
Bobs, b. m.	(Dr. J. A. Edmonds)	4	3
Time—2:30, 2:28, 2:28, 2:30. Third heat declared a dead heat by judges.			
Fifth race, free for all pace, two in three.			
Athalo, b. g.	(C. A. Canfield)	3	1
Sweetheart, b. m.	(E. T. Earl)	1	2
Floretta Belle, b. m.	(Dr. Ralph Hagan)	2	3
Undine, ch. m.	(C. E. Guyer)	4	4
Time—2:24 1/4, 2:16 1/2, 2:19.			

## Caustic Balsam Better Than Knife.

OPAL (Tex.), November 14, 1901.

The Lawrence-Williams Co., Cleveland, O.  
Last spring I had a fine mare that had a grissel formed on her shoulder and the V. S. at Springtown, Texas, told me that there was nothing that would remove it but the knife. A friend advised me to try your Gombsall's Caustic Balsam. I did so and in ten days, to my surprise, the grissel was all gone. I have used the medicine for most everything and find it to be the best medicine on the market.

W. G. MUSE.

Strike!—if they don't give you Jackson's Napa Soda

## A Prominent Horsewoman.

Mr. Poldy McPhee, the queen of Austrian horsewomen and one of the most enthusiastic lovers of the horse in the world, is the widow of Dan McPhee, the first American driver to practice his profession as a trotting horse driver in Austria. Since his death, his widow has carried on the business herself, campaigning her horses successfully throughout western Europe, in Germany, Austria and Russia. She is an Austrian by birth, inherited a large estate, and as her dead husband was a thrifty man and left a big fortune, she is possessed of unlimited means to gratify her desire of making her stable of trotters the greatest array of campaigners that has ever raced in foreign lands.

A little over a year ago, Mrs. McPhee married an Austrian nobleman, so that her proper title is now Poldy von Schlechtergroll, although she will always be "Mrs. McPhee" to American horsemen.

In the last few years Mrs. McPhee has bought over \$100,000 worth of horses in this country for exportation to Austria, and the veteran Cleveland reinsman, John Splan, holds at all times her carte blanche to buy any promising trotter he may come across. His last purchase was the three year old Wig Wag 2:16 1/2, which he bought recently for \$5000. Mrs. McPhee has done more to introduce trotting into western Europe than any other person now living. She induced the government and the Trotting Club of Vienna to buy Prince Warwick by Alcona 730, and he has proven the greatest sire that has ever left this country for foreign lands. [He was bred by the late A. C. Goodrich of Jordan Valley, Oregon, brought to California by the late Silas Skinner, and sold to an Austrian dealer by Orrin A. Hickok.—Ed. B. & S.] Among the great horses Splan has shipped to her in the last few years are Col. Kuser 2:11 1/2, Bravado 2:10 1/2, Miss Sidney 2:14, Minnie Birchwood 2:13 1/2, Earl Baltic 2:17 and Dirego 2:18 1/2.

She paid \$7500 for Col. Kuser, and he has proven himself the champion in Europe at any distance, one of his startling performances being two miles in 4:28, which he trotted from a standing start. With Bravado, that cost her \$5000, she made the greatest winning campaign of any horse ever exported. For two seasons he swept all before him in Germany, Austria and Russia, and wound up his second season by beating all comers over the ice up to two miles, trotting these ice races with the thermometer at 40 degrees below zero. Miss Sidney 2:14, Minnie Birchwood 2:13 1/2 and Dirego 2:18 1/2 have all proven great winners abroad, but Mrs. McPhee's two great money winners were Dick Miller, a green trotter, that never started in this country, and Arline, that left America with a record of 2:24. The latter could not trot as fast, or did not cost as much money as some of her other noted stars, but her ability to go a race of any distance over any track, no matter who drove, made her a very useful mare. She campaigned more seasons on the European turf than any other horse or mare that ever raced, and was inside the money a large majority of her starts. Dick Miller gave the foreigners the surprise of the season by starting in the slow classes to which he was eligible early in the season, and winning race after race, gradually being forced to reduce his record, until the close of the season, when he entered the free-for-all class, and even then held his own. Outside of Wig Wag, Mrs. McPhee's most recent purchases were Axmere 2:13 1/2, for which she paid \$5000, and the noted black mare Henrietta 2:12 1/2. Henrietta won a number of important events on the Austrian turf last year.

It is likely Mrs. McPhee will secure several more good horses in this country this season, as she has laid out her lines this year to even eclipse the brilliant records made in the previous seasons. Mrs. McPhee is a charming woman and one of the finest amateur singers in Austria, although she never sings in public. Her home is a haven to all Americans, and a tramp, if from this country, is never turned away from her door empty handed.—American Sportsman.

## Training Department, Bitter Root Farm.

In the Grand Circuit, Sept. 4, 1898.

Spohn's Distemper and Cough Cure is what every owner and handler of horses everywhere should have. I have used it for the various forms of contagious diseases, and the throat affections of horses with the most gratifying results. It is a safeguard against exposure of horses to all sorts of distempers, pink eye, and the like.

Resp'y,

JOE REA, Trainer.

The breeders of America to-day are breeding for results; they are striving to produce trotters, rather than to increase their capital, and so long as breeding the light harness horse shall be conducted on scientific principles with the aim always to produce the best, there is no danger of a recurrence of the disaster that overtook those engaged in the enterprise during the last decade.

A lot of McMurray carts just received. You need one right now to work your colts in this winter. Call at the Kenney Manufacturing Company, 531 Valencia street and take a look at these carts and other first-class vehicles they have for sale.

## A Maine Horse Story.

"Yes," says Col. Carey, "I've seen some of the tricks of the racing game right here in Maine," as he put out the light of a somewhat rheumatic fly with a solution of saliva and Piper Heidsieck, a generous quid of which was ensconced in a hollow of his right cheek. "It ain't often ye see a man change horses in a race, but it's been done, right here, too. Joe Joy had two sorrel mares, and one was a dead ringer almost for 'tother. One had a record '16, or som'ers round there, while 'tother could start in a 2:35 class. Well, Joe, he seen after a couple of heats he couldn't git nowhere with the hoss that was all right, so what does he do but put some wash on the faster hoss and brings her out and wins the race in one, two, three. Not many would a taken the chance, but it worked all right."

"Waal," remarked Squire Dean, "I dun know, that worked pretty well, but I guess the way Jim Babbit pulled a racer out the fire over to Seabville was about as good as anythin' I knows of. Ye see, 'twas gettin' pretty nigh dark, and Jim, he had two heats with Honest Quaker, and Tom Frye jest the same number with Daisy Maid. Jim said 'twas too dark to trot, but Tom thought he could win that night, and the judge was Tom's brother-in-law, an' he said trot. It was gettin' pretty duskish 'fore they got the word. There was four or five horses in the race, and they bothered some in scorin'. Naow, there was a baseball gran' stan' out in the fiel' wich wuz jest about high enough so you couldn't see a hoss for two or three rods when he had got jest past the quarter. Jim bed ben sayin' to hisself, 'I can t win with this old skate, when he thinks of that ball stan,' and he falls back a leetle an' 'fore he got there every hoss had passed him, and he jest stayed right there till he heerd 'em comin' round again and gettin' pretty close. He started the Quaker again then and come down the stretch lickin' and reffin' and landid jest 'bout a length. 'Where'n—d you come from?' says Tom. 'Oh,' says Jim, 'I found out I wuz too slow, so I jumped the fences and cut across.' The crowd give Tom the laugh, and he went off scratchin' his head, and I dunno if he knows to this day how 'twuz done.'—Trotter and Pacer.

## Noble Will Drive Anaconda.

Fred W. Noble, who first raced The Monk 2:05 1/2 successfully after his breakdown in 1897, has been engaged by J. H. Bronson of New Haven to drive Anaconda 2:01 1/2 next year. Noble will train a public stable at Hartford. Speaking of his plans for Anaconda he said recently that he hoped to see some of the managers of the Grand Circuit tracks arrange a free-for-all class, which would bring together Dan Patch 1:59 1/2, Prince Alert 2:00, Anaconda 2:01 1/2, Audubon Boy 2:03 1/2, Dan R. 2:04 and Direct Hal 2:04 1/2.

"Of course," said the trainer of Anaconda, "some of these horses will probably race in the 2:04 class at the earlier circuit meetings, but I look to see one or two of them get out of the 2:04 class the first time they start, and then they must go in the free-for-all. The track manager who could bring them all together would have the greatest pacing race ever seen. I doubt, however, whether any inducement can draw Dan Patch into a race next year. He is out to win the world's record, and I expect to see him reserved for races against time exclusively."

Noble is confident that he can cure Anaconda of his habit of pulling, which has heretofore greatly handicapped the horse. "I never drove a horse that pulled me," he said, "and I don't believe this one will after I have got well acquainted with him and have gained his confidence."

## Duration of a Horse's Affection.

The affections of a horse are not inferior to his intellectual qualities, and if made a pet he becomes very fond of his master. In case of separation, he remembers him for years. But his affection is different from that of a dog, which continues to love his master even though the latter abuses him greatly. Rough, unkind treatment will quickly estrange the affection of a horse. Good horse sense discovers no particular reason why a horse should be devoted to a master who habitually maltreats him. The intellect and affections of a horse point out two things so important to a trainer that he must bear them in mind until they become fixed habits of thought. One of these things is, Never under any circumstances allow a horse to successfully oppose his will to yours. If you do, he will remember it and (reasoning by experience) try it again. The other is, always keep his affection. If he dislikes you he has no wish to please you, and if his obedience is always perfunctory you will make but little headway in training him. These two points assured, he will almost invariably try to do whatever you require of him—if he only knows what it is.—David Buffum in Success.

Sober up on Jackson's Napa Soda.

## Twenty Years' Progress.

The tables of sires of fast performers and sires of dams of the same furnish a very interesting study for students of the trotting-breeding problem. When the standard was first established the 2:30 table was scanned very closely each year, and the sires that were credited with the greatest number of performers in standard time were the ones that then stood highest in the estimation of most horsemen, regardless of whether those that entered the list were tin-cup performers or race winners.

The average rate of speed is such now, however, that unless a trotter or pacer can go heats in 2:15, he is of little value for campaign purposes, even on half mile tracks. How different from twenty years ago! What a change has taken place within that period in the rate of trotting speed! At the close of the season of 1882, the world's champion trotting record was 2:10½, and stood to the credit of Maud S. Now it is 2:02½.

Then the number of trotters that had taken records of 2:15 or better was only eight all told. They were Maud S. 2:10½, St. Julien 2:11½, Rarus 2:13½, Goldsmith Maid 2:14, Clingstone 2:14, Trinket 2:14, Hopeful 2:14½ and Lula 2:15. The only pacers then in the 2:15 list were Buffalo Girl 2:12½, Sleepy Tom 2:12½ and Fuller 2:14½.

At that time no stallion had sired more than one 2:15 performer, and no horse had sired the dam of more than one with a record so fast as 2:15. The total number of trotters then that had taken records of 2:20 or better was only eighty-two. The number of stallions that had sired more than one 2:20 trotter was only nine. Volunteer then stood at the head of the list of 2:20 sires with five to his credit. Rysdyk's Hambletonian, Almont and General Knox were each credited with three, while Alexander's Belmont, Black Bashaw, George Wilkes, Thorndale and Walkill Chief each had two to his credit.

Then the total number of stallions that had sired ten or more 2:20 performers was only thirteen. Rysdyk's Hambletonian then stood at the head with thirty-four to his credit that had taken records in standard time. Wilson's Blue Bull was second with twenty-seven; Volunteer third with twenty-three; Daniel Lambert fourth with twenty-two, George Wilkes and Almont came next with twenty each; then Happy Medium seventeen; next came Green's Bashaw, Gooding's Champion and Young Columbus, with eleven each, followed by Gen. Knox, Whipple's Hambletonian and Mambrino Patchen, each of which were credited with ten.

Today there are no less than twenty-four stallions that have each sired four or more performers that have taken records of 2:10 or better. Baron Wilkes 2:18 and Onward 2:25½ head the list with nine to the credit of each, the greatest number ever sired by any stallion. Three have each sired eight. They are Brown Hal, Chimes and Mambrino King. Three have sired seven apiece, viz., Altamont, Gambetta Wilkes and McKinney. Four have each sired six. They are Alcantara 2:23, Bourbon Wilkes, Direct 2:05½ and Wilton 2:19½. The number that have sired five each is also four. They are Allerton 2:09½, Ashland Wilkes 2:17½, Axtell (3) 2:12 and Pilot Medium. The following eight have sired four each, viz., Alyceno 2:27, Charles Derby 2:20, Director 2:17, Guy Wilkes 2:15½, Hal Dillard, Shadeland Onward 2:18, Sphinx 2:20½ and Steinway (3) 2:25½.

Twenty-one of the twenty-four sires of 2:10 performers are direct descendants of Rysdyk's Hambletonian, and one, Mambrino King, traces directly in the parental line to Mambrino Chief. Fourteen of the twenty-four are direct descendants of George Wilkes. Two of the remainder are direct descendants of Electioneer, and another is from a daughter of Electioneer. Two of the others are descendants of Dictator. Two of the remainder are descendants of Strathmore, one of the others a descendant of Happy Medium and another a descendant of Almont. The other two, Brown Hal 2:12½ and Hal Dillard 2:04½, are descendants of Tom Hal, the pacer, and all their 2:10 performers are pacers.

Sixteen stallions have each sired the dams of four or more 2:10 performers. George Wilkes 2:22 heads the list. His daughters have produced ten. Next comes Strathmore, whose daughters have produced nine. Nutwood is next in order, with eight to his credit. Blue Bull, Mambrino Patchen and Mambrino King are in the next class. Daughters of each of them have produced seven. Alcantara sired the dams of six. Almont Jr. 2:26, Hamlin's Dictator, Mambrino Abdallah and Pilot Jr. have each sired the dams of five. Attorney, Bourbon Wilkes, Daniel Lambert, Pilot Jr. and Robert McGregor 2:17½ have each sired the dams of four.

Eight of the above, or just one-half the entire number, are members of the George Wilkes branch of the Hambletonian family, and George Wilkes himself out-

ranks them all. The Mambrino Chief family is more prominent as sires of dams of 2:10 performers than as sires of performers that have taken records of 2:10 or better. Only three sires in the lot have surpassed Mambrino Patchen and his son Mambrino King as sires of the dams of 2:10 performers.

The increase in the 2:15 list during the past twenty years is really surprising. Turn to the tables of 2:15 performers under their sires, and the sires of dams of 2:15 performers, in the Christmas number of the *American Horse Breeder* and compare those lists with the total of barely eleven 2:15 performers at the close of the season of 1882, and no two of the eleven by the same sire.

In the *Breeder* table are the names of thirty-eight horses, each of which has sired ten or more with records of 2:15 or better. Alcantara 2:23 by George Wilkes 2:22 is the champion among them, with thirty-one to his credit. Baron Wilkes 2:18 is a close second with twenty-eight, and then come in order of number of performers Onward 2:25½ with twenty-six, Red Wilkes and Brown Hal 2:12½ each with twenty-three, Gambetta Wilkes 2:19½ and Simmons 2:28 with twenty-two each, McKinney 2:11½ with twenty-one, then Bourbon Wilkes and Wilton 2:19½ with twenty, and so on.

Turning to the table of 2:15 performers under the sires of their dams, it will be seen that not less than twenty-two horses have each sired the dams of ten or more. Nutwood 2:18½ outranks all other stallions in this respect, with forty to the credit of his daughters. George Wilkes 2:22 is next in order. His daughters have produced thirty with records of 2:15 or better. Wilson's Blue Bull and Red Wilkes come next with twenty-seven each; then Strathmore, with twenty-two; Mambrino Patchen, with nineteen; Onward 2:25½, with seventeen; Mambrino King, Almont and Dictator, sixteen each; Kentucky Prince, fifteen; Jay Gould 2:21½, with fourteen; Mambrino Abdallah, thirteen; Alcantara 2:23, with twelve, and so on.

It is a fact worthy of note that Alcantara, which stands at the head of the list of sires of 2:15 performers, and Nutwood 2:18½, that heads the list of the sires of dams of 2:15 performers, are both out of mares whose dams were strictly thoroughbred, also the mares that produced both Alcantara and Nutwood were by sires whose dams were running bred.

It is not probable that the next twenty years will show as great progress in the average speed of trotters as has been during the past twenty. They certainly will not if the sole object of a majority of breeders is merely to raise standard bred stock according to the present standard formula. With the lessons of the past twenty years and the experience of the most successful breeders as a guide, however, enterprising breeders will continue to make steady progress and produce a high rate of speed with greater uniformity than ever in the past. Sires of 2:05 performers may not be as numerous twenty years hence as those of 2:10 performers now are, but the subject of heredity and the facts upon which the improvement of speed depends will be better understood than now, and breeders will also have a better knowledge of the source or sources from which these factors may be obtained.

Many have already learned from a study of pedigrees and practical experience that something more than trotting instinct is required to produce record-breakers on the track, as well as to produce the kind of stallions and mares that are most successful in perpetuating a high rate of speed. The more that breeders become enlightened by a careful study of the blood lines of the champions, both performers and producers, the greater the progress that they will make.—*Am. Horse Breeder*.

## Kendall's Spavin Cure Used Fourteen Years With Good Results.

NEW YORK, Sept. 9, 1902.  
Dr. B. J. Kendall Co., Enosburg Falls, Vt.:  
Gentlemen:—I have used your Spavin Cure on my horses for the past fourteen years and it has always given me good results in every particular. I also have one of your books that I have found very useful. If you have any later editions of the "Treatise on the Horse and His Diseases," will you kindly send me one?  
Respectfully yours,  
B. F. FRISBIE, 721 E. 16th St.

Rich as prehistoric America appears to have been in horses, they had become utterly extinct long before the advent of the Spaniards. Their introduction by the settlers led to the restocking of the continent in a comparatively short time. Straying from their masters, or, as sometimes happened, abandoned by them when a settlement was broken up, the horses took kindly to the rich prairies and pampas, where they multiplied exceedingly. In 1537 they were first landed at Buenos Ayres, and a little more than forty years afterwards wild individuals were found at the Straits of Magellan. They scoured the plains in vast herds, and the Indians captured many of them for their own use.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

## Trotters in Arizona.

A correspondent of *The Review* writes as follows from Phoenix, Arizona: Probably one of the most important breeders is Charles Barkley, of Glendale, Arizona, who brought from Tennessee some good pacing blood of the Brown Hal and Copperbottom families. Wm. Barkley has a fine young stallion that is bred in the purple. Mr. Wain has an inbred Electioneer stallion that is kept off the track presumably for the purpose of development. He is a handsome and large chestnut three year old. Mr. Pemberton, at one time leader in the valley, has sold all his breeding stock and colts, retaining Boydello (4) 2:14½. He is in Geo. Klatzbaugh's hands at the track. Frank Moss has a fine young brown stallion coming three years, that he expects to bring to the front. He is by Vasco, dam by Almont Lightning. Attorney Clery has one of the most promising yearlings in the valley, that weighs 875 pounds, stands 15 hands and is a natural pacer. He is being edged up for the Christmas races, stepping quarters in 46 to 48 seconds. Sired by Sirius Mark, dam by a son of Onward. Mr. Clery expects to keep this fellow entire. He has a full sister that he thinks is his superior. J. C. Adams lost his good mare, Florence C. 2:30, the dam of Boydello 2:14½, a few days ago being cut in a wire fence, which caused her to bleed to death; she was stunted to Sirius Mark. Ed Worcester has a select lot, including a well bred mare by a son of Artillery 2:21½, that is a fine driver and quite speedy. He also has two by Sirius Mark, dam by Strathmore. The yearling is a beautiful bay and is surely the finest looking colt in the valley. He was nominated by his former owner, Wm. Lossing, in *The Review* \$10,000 Futurity No. 7, and is still eligible, as all good colts should be. At this date he is very promising.

"During the last six months about 600 horses have been shipped out of this valley to Eastern points. The result is the horse business is up to par again and owners of good mares will see that they are bred to good stallions, of which the valley is well supplied with representatives of Onward, Nutwood, Almont, Blue Bull, Electioneer, Brown Hal, Billy Wilkes, Wilkes Boy, Mambrino Patchen, Strathmore and many others. Silkwood 2:07, Stamboul 2:07½ and McKinney 2:11½, Mark Sirius 2:13, Dauntless, Masterlode, Ambassador and Colbert 2:07½ on the side of dams, should give the breeders of this valley bright prospects for the future."

## Right-Handed Race Courses.

If the original plans are carried out, the new race courses about to be constructed on Hempstead Plains will be right-handed ones. This means that the horses will run the reverse way to that now generally fashionable in this country. The change is provoking some discussion, but may be for the better, as there is some reason for believing that more diversified running grounds might in a measure check the unfortunate tendency of good horses to break down early in their career. If any good judge will take the trouble to examine the unsound horses at any track next season, and unfortunately most of the animals he will find there come under this category, he will discover far more affected on the near foreleg than on the off. This is easily accounted for. It is because they have always been trained and raced over circular tracks with the bridle hand on the rail.

Corroborative proof that this practice causes undue pressure on the near leg is furnished by statistics from England. There most of the courses, and all the training grounds, furnish straight galloping, while those of the former that necessitate the rounding of a curve are about equally divided between left and right hand. In consequence English cripples, which, owing to the elastic nature of the turf courses in vogue there, are not as numerous as around our tracks, are infirm on the off foreleg quite as frequently as on the near. This fact, and it is a fact, should warrant builders of new tracks trying an innovation, and should besides justify track superintendents in making a rule that during certain hours horses at exercise could only work the reverse way of the track. This course would enable trainers, who prefer to work all the machinery of their charges in equal proportions, a chance to do so with impunity.—*Exchange*.

## Don't Waste a Year's Time.

Mr. E. R. Winnie, prominent horseman at Waterloo, N. Y., writes: "Find enclosed \$1.00 for which send a bottle of Quinn's Ointment. About three years ago I had a valuable three-year-old colt that sprung two large splints on the inside of each fore leg. For a year I used all remedies, and even the best veterinarians experimented, until his legs got in bad shape. I saw Quinn's Ointment advertised, and secured a package using according to directions, and in three months time his legs were as clean as your hand. I have now another case which I think your remedy will bring out all right, as I know what it has done." This is only continued evidence of what we are receiving every day from horsemen all over the United States. For curbs, splints, spavins, windpuffs and all blemishes on horses or cattle, use Quinn's Ointment. Price \$1.00 by mail or express prepaid. Address W. B. Eddy & Co., Whitehall, N. Y., unless you can obtain from your druggist.

## BREEDER AND SPORTSMAN

F. W. KELLEY, PROPRIETOR.

Turf and Sporting Authority of the Pacific Coast.

—OFFICE—

36 GEARY STREET, SAN FRANCISCO.

P. O. BOX 2300.

TELEPHONE: Black 586.

Terms—One Year \$3, Six Months \$1.75, Three Months \$1  
STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, Cal.  
Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

G. G. TURRI & CO., Agents. Subscription and advertising.  
Salisbury Building, Melbourne, Australia

San Francisco, Saturday, January 3, 1903.

A NEW YEAR HAS DAWNED since the BREEDER AND SPORTSMAN greeted its readers, and the most prosperous year in the life of the United States has passed into history. Keeping pace with the progress of the nation, the trotting horse has resumed his place as the most popular animal with Americans, and his breeding is one of the great national industries, while his training, racing and driving on the roads give employment to an army of men and supreme pleasure to many more. The year just closed has been the greatest money earning season in the history of harness racing, and we doubt not but it has also seen horses sold for more money in the aggregate than during any previous twelve months. Prices for individuals have not reached the amounts paid during the boom days, but the average has been greater than ever. The breeding farms have increased in number during 1902, even though many of the most famous have gone or are preparing to go out of existence. There is a healthy tone to the trotting horse market and the outlook for continued prosperity is bright. In spite of the rapid increase in the number of motor wagons of all descriptions, the demand for the horse has been active and on the increase, and the year has closed with the supply unequal to the calls upon it. There is no fear that this demand will fall off for years to come. The breeding of the American trotter is on a different basis than it was when the panic of 1893 caused it to almost cease, and the losses of that period have been the gain of the present time. There has been no further mating of standard stallions to mares of no quality or pedigree with the idea that one trotting cross in a colt would sell it, as that fallacy has been disproved to the cost of those who tried it. There has been a "breeding up" movement all along the line during the past few years and there seems to be an almost unanimous desire on the part of breeders to continue in this line or not to breed at all. It is this that has established the breed of American trotters on a basis that is so sound that the waves of hard times will not prevail against it in the future. The demand for the high class road horse, matinee trotter and race horse will increase with the year. The organization of gentlemen's driving clubs has made matinee racing the most popular of American sports and the movement has only just begun. The earning capacity of the race winner on the Grand and other circuits has so increased that horses with class are being eagerly sought for in every part of the country and prices were never better. The BREEDER AND SPORTSMAN finds every reason to congratulate its readers who are engaged in horse breeding on the prospects for 1903. There has never been a time when a good mare could be mated with a good stallion with a greater certainty of profit on the investment; when a good racing prospect could be more readily sold for a good price, or when high class road horses were in more active demand at good figures. May all our readers share in the general prosperity which certainly is before the American people and may the new year be a happy one to all.

EIGHT RICH STAKES offered by the New Memphis Jockey Club will close to-day, January 3d, besides two stakes for foals of 1901 to run in 1904. The stakes for the Spring meeting are the Gaston, for two year olds and geldings, four furlongs; the Ardella, for two year old fillies, four furlongs; the Memphis, for two year olds, five furlongs; the Gayoso, for three year olds, one mile, the Montgomery Handicap, one mile and one-sixteenth; the Peabody, one mile and a furlong; the Tennessee Brewing Company, seven furlongs, and the Cotton Steeplechase, about two miles. The stakes for 1904 are the Tennessee

Derby, nine furlongs, and the Oaks, a mile. The added money has been increased to the stakes and the purses will also be increased. There is no better place for handling thoroughbreds during the winter and early spring months than Montgomery Park, where this club's races are run. Its appointments are first class in every way. Address all communications to M. N. McFarlan, Secretary.

NEXT MONDAY, January 5th, is the day for the closing of the Coney Island Jockey Club stakes. There are eighteen rich prizes to be won by the lucky ones, and there is added money in sums of from \$10,000 down to \$1500. There are eight stakes for three year olds and upward, headed by the Suburban, with \$10,000 added; the June Handicaps—the Coney Island, \$1500 added; Sheephead Bay, \$1500 added, and Long Island, with \$2000 added—the Advance, \$5000 added; the Equality, \$2500 added, and the Thistle, \$1500 added. The three year old events are the Swift and Spindrift, \$2000 added to each stake. For two year olds are presented the Great Trial, guaranteed value \$2500, and the Double Event, of a guaranteed value of \$5000 each race; the Vernal, Spring and Zephyr, \$1500 added to each stake. The jumpers have a chance with three steeplechases, the Beacon, \$2500 added; the Independence and Rockaway, with \$1500 added to each event. The open events for the Autumn meeting of 1903 are the Flight, for two year olds and upward; the September, for three year olds; the Autumn, for two year olds; the Flatbush, \$10,000, for two year olds, and the Great Eastern, \$7500, for two year olds. For the Autumn meeting of 1905 the Futurity, \$10,000 added. The Futurity is one of the richest classics of the American turf, and if money is sent when mare is nominated the subscription is only \$10. Entries to all these events will close on Monday, January 5th.

ABOUT FIFTY Palo Alto two years olds, the entire crop of 1901, will be sold at auction in this city at the popular and historic old salesyard corner Market street and Van Ness avenue, by Fred H. Chase & Co. This is a sale that no breeder in California can afford to miss. The horses on the great farm are being rapidly dispersed. These are the foals of 1901, and will be sold without reserve, and the farmers and horse breeders of the State should recollect that the day will soon come when there will be no more of the Palo Alto sales. At present the blood on the Palo Alto Farm is about the richest in the world that flows in the veins of trotting bred horses. It is the blood that trots to world's records and wins races, and the opportunity to get it now at low prices should not be overlooked. The stock on the Stanford farm is just now reaching the point that Senator Stanford aimed at. It is too bad that the great farm must go. But the decree has gone forth and these sales are the chances for buyers that come very seldom in a life time. Next week we shall have more to say of these colts. They are a grand lot. Remember the sale is to be held by Fred H. Chase & Co., the reliable auctioneers.

THE STAKES for the twenty-fifth annual meeting of the Brighton association will close on Monday next January 5, 1903. The well known Brighton Handicap, with \$10,000 added, heads the list, followed by the Brighton Cup, \$5000 added; the Cup Preliminary, \$1500 added. The other events for three year olds and upwards are the Islip Handicap, the Jamaica Stakes, the Test Handicap and the Nautilus. The added money to each is \$1500. Three events are for three year olds—the Seagate, the Glencove and the Seagull, for fillies. There are four events for two year olds, with \$1500 added to each—the Montauk, the Atlantic, the Winged Foot and the Distaff, for fillies. There are four steeplechases, \$1500 added to each, two over the full course, about two miles and a half, and two over the short course, about two miles. The added money to each is \$1500. An important future is the Produce Stakes of \$25,000, for the produce of mares covered in 1902. Mr. J. Boden, Jr., is secretary, to whom nominations should be addressed.

WASHINGTON PARK CLUB, Chicago, which holds the greatest and the grandest day's racing in America each year when the American Derby is run, announces its stakes for 1903 in this issue of the BREEDER AND SPORTSMAN. It leads off with the American Derby, to which \$25,000 is added, and then there are numerous stakes for three year olds and two year olds and older horses for which added money is from \$2000 to \$7500. The overnight handicaps will be for purses of \$1250 and upward, no selling purses will be less than \$600 and other purses will be \$700 and upward. Is not this a feast for horse owners?

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

## A Theory That Didn't Fit.

While in the East recently Trainer Chandler, of Peter Stirling 2:11½ fame, related a good story with a moral attached of his experience while in the employ of Henry C. Jewett, of Aurora, N. Y., the owner of the mile covered track in that town.

"I had been at his place but a few days," said "Chan," "and had taken one of the horses to the blacksmith shop. The foot artist was busily cutting down one of the horse's front feet when Mr. Jewett stepped into the shop, and after glancing to see what the blacksmith was doing, he turned to me and inquired:

"Is the blacksmith cutting off all that hoof under your orders?"

"Yes, sir, Mr. Jewett," I answered. "The horse has far too much toe, and I cannot possibly see how he could show any speed with so much foot."

"Mr. Chandler, it has taken me a whole year to grow those feet."

"But it won't take near that time to pare them off."

"H'm, that's true. Still it has always been a 'theory' of mine, Mr. Chandler, that a race horse must have a long foot to balance him when at speed."

"Did you ever consider, Mr. Jewett, that instead of a theory it may be only a notion?"

"Well," continued "Chan," Mr. Jewett immediately turned on his heel and left the shop. Some of the old employers of Mr. Jewett were present and informed me that in all probability I would find a blue envelope in my letter box the next morning. It seems that Mr. Jewett had never personally discharged a man from the farm, but instead every man had a separate letter box, and when he wished to dispense with anybody he slipped a check for wages due, with a note of dismissal, inside a blue envelope, which the party in disfavor would find in his box.

"To make a long story short, I didn't get the blue envelope, but did feel a trifle nervous as to whether the horse would do as well as I expected. I took him out of sight a couple of days later on the covered track and found, though, he could fairly fly.

"What made it better was Mr. Jewett bringing some of his friends to see the horses stepped. When I got to the horse I had pared the feet I showed him without a boot, while previously he wore the whole catalogue. He went an eighth in 15½ seconds, faster by far than he ever before showed. That settled it. From that day Mr. Jewett never questioned me as to the method I used in shoeing or hanging up a horse while I was with him."—Trotter and Pacer.

## Manners in the Show Ring.

A decision of the judges in one of the light-harness classes at the recent National Horse Show raised the question among horsemen as to the degree of perfection in manners to which animals should be held accountable in the show ring at Madison Square Garden, where all the surroundings are strange and artificial.

In the case alluded to one of the trotting roadsters shown acted restive and fretful when required to stand, twice rearing and once turning so as to nearly overturn the road wagon to which she was hooked. The judges gave her the blue ribbon over several trotters whose manners were seemingly beyond criticism, and the question arose among the rail birds as to whether she deserved it.

On the one hand it was contended that allowance should be made for the music and the lights and the crowd, and that the judges were right, as the mare had done nothing vicious. "She might be the best mannered one you ever saw for the real work of a gentleman's road mare," said one of her supporters, adding, "You can't ask a high-bred trotter to stand like a statue under such surroundings as there are here."

"Yes, you can," put in Charles Tanner, a man whose opinion would be sought as soon as anybody's by an amateur who wanted to buy a model road horse. "It's in just such places as this that a real good road horse shows his manners. Anybody's trotter will behave well enough when there's nothing to excite him, but show me the one that will keep his head in a place like the Garden and I will give him the blue ribbon. Manners are everything in a gentleman's road horse, and the judges ought to test the entries to the limit in this respect. When you see a horse that is afraid in the show ring here, what are you to expect on the road if an automobile turns the corner under her nose at the rate of thirty miles an hour, or if there is a blast in the subway just as you go past? Yes, sir; make 'em show their manners in the ring, for if they don't do it there they are likely to forget all about it on the road."—N. Y. Herald.

Jackson's Napa Soda untangles the feet.

### The First Toeweight in 1858.

But few gentlemen engaged in the trotting industry have had the experience of Frank B. Baldwin of Buffalo. He calls himself one of the old fellows, three score and ten last August, but we are all jogging along that way.

"The first toeweight I ever saw was at the Montreal races in 1858," said the veteran during a pleasant chat one evening not long ago, while discussing modern appliances, which have done so much toward increasing the average speed of horses the past decade.

"Back in the little '70's, boots, scalpers and all that sort of paraphernalia was introduced, so you cannot claim that their advent was the leading cause for extreme speed now so common. We had about everything, excepting the bicycle sulky twenty-five years ago, hence I maintain that the great achievements should be attributed to the improvement in the breeding of trotting stock, more than in the development.

"But let me tell you about the first toeweight I ever saw. While at the Montreal races, as stated before, I noticed a clever looking Frenchman driving a horse that acted to me like a dangerous competitor in the five-mile race—the great event of the week. I became interested in the nice movements of the Frenchman's horse, and when he slackened up I went out to see him.

"What's that contrivance you have on the toes of the front feet?" I asked, noticing a little sack about the size of your finger, fastened with straps around the hoofs.

"That bag, as you call it, contains lead to make the horse extend his reach and go squarely. I had them made at a harness shop down town," replied the Frenchman, courteously.

"Just what my horse needs," says I, to myself, and before leaving Montreal I went to the harness shop, but they could not tell me much about the things they had made for the peculiar Frenchman. But, suffice it to say, soon afterwards we all had toewights. Seth Blaine, a Montreal blacksmith, who afterwards moved to Detroit, made the first patent standard attached to the shoe and extending up over the toe, for securing a weight, shortly afterwards. He sold his invention to Fenton of Chicago, whose goods are now famous throughout the horse kingdom.

"The origin of the toeweight belongs to Canada," continued Mr. Baldwin.

"But let me tell you something about the Frenchman, who was father to the thought. His name was Charles Pecor, and he finally moved to Buffalo, and looked after Byron 2:25½, the first horse bred in this county to enter the 2:30 list, in 1871, driven by John Stevenson. Thirteen years afterward I drove the second horse bred in Erie County—the first one at Village Farm—to standard record, and it was Belle Hamlin 2:23½, at that time. Old Byron 2:25½, was owned by Capt. Frank Perew, sired by Field's Royal George, a son of blind Royal George, owned by Mr. Barnes, a noted Canadian turfite. Byron was a sensational local trotter in his day, defeating such cracks as Gen. Love, Prince, Charlotte Temple, Washington Irving, Charmer, Ben Wood, Cattaraugus Chief, Clara Lady Garfield, Independence, Ed. Foster, Albatross, John R. Fero, and other stars of the sweet long ago. I do not know whether the father of toewights is living or not, but he has relatives in Buffalo."—*Frank G. Smith in Horse World.*

### Further Infusions Not Needed.

Speaking of what breeding has done in the way of improvement in speed, what a slump there has been away from the idea prevalent a few years ago, that a new infusion of thoroughbred blood was necessary in the pedigree of a trotter if extreme speed was wanted. Today few men who have studied the breeding problem could be induced to take that course. The records of the last few years have convinced almost everyone, that it is not only useless, but folly to go outside the recognized trotting families to produce extreme speed and race-horse quality at the trotting gait. The *Western Horseman* admirably summed up the trend of public opinion in this direction when it recently said:

The trotting bred horse is working out his own glorious destiny in a way that should no longer leave a question in anyone's mind as to the proper and only course to hasten the progress of that glorious destiny. Handicapped by all sorts of straddling theories, or rather notions, orthodox trotting blood has continued to gain in intensity and purity until its manifestations are such as ought to convince the most skeptical mind that characteristic production, in horse families, is reached through exactly the same channels as in other kinds of live stock improvements, namely, in and in breeding of animals possessing the blood and characteristics sought for. There are those who try to make themselves believe that our trotters and pacers of today are no better than those of a quarter of a century ago, but the facts all contradict this proposition. Our

trotters nowadays have more size, finer finish, more uniformity in individuality, and are, beyond measure, more uniformly possessed with harness speed—extreme harness speed. Nearly all present-day trotting bred horses possess marked harness speed, and practically every one that trots or paces a mile in 2:30 will train on down to 2:20, and a large per cent of them to 2:10, and even faster. The harness gaits are rapidly becoming fixed characteristics—the "runaway" gaits, and hence not only the rapid increase of fast harness horses, but the relative increased speed rate of our trotters and pacers. Certainly, it is plain that harness speed progression rests wholly on the fundamental law that "blood tells," and that the only way to increase a blood line resultant is to purify and concentrate the kind of blood that produces the desired physical manifestation.

### News From the North.

[Rural Spirit, Portland, Or.]

W. O. Trine will likely resurrect Oregon Bull 2:17½ for 1903.

Kinmont by McKinney out of Beulah has been castrated.

Eugene, Or., is talking of holding a fair and race meeting next year.

C. P. Webb thinks he can drive Prince Tom in 2:10 next year.

Ben Bolt 2:18 is being jogged this winter with the view of racing next year.

There will be at least one stake of \$2000 at the Oregon State Fair, and maybe two.

Boodle 2:12½ will make the season of 1903 at Salem and other points in the Willamette valley.

Jahn Chalmers has two very promising colts coming one and two, by Erect out of Susie S. 2:18.

Senator Helman will put his stable of trotters and pacers into active training immediately after the legislature adjourns.

Senator Wehrung has a filly coming two years old, sired by Lovelace 2:20 out of Alta Dell 2:16, that is a perfect picture of the equine sect.

Seattle will likely have a thirty-day running meeting next spring, but it will be out of the way in time to give an old-fashioned race meeting in the fall.

Hambletonian Mambrino 5241 is dead. "Old Ham," as he was familiarly called, sired a number of high class race horses, among them were Jane L. 2:19½, Carle Carne 2:11½, Susie S. 2:18, Nettie Ham 2:19½, Sam Bowers 2:11.

Thomas S. Griffith, of Spokane, has just received a pair of unbroken geldings from S. E. Larrabee, Deer Lodge, Mont. One is a chestnut four year old by Lockheart 2:08½, son of Nutwood, dam Rosita (dam of G. W. S. 2:29½) by Aberdeen; second dam Etonia (dam of Capitalist 2:29½) by Almont 33. The other is a thoroughbred bay, four year old, by Eolion. We suppose Mr. Griffith has something fast in the Lockheart gelding and brought the thoroughbred along for a running mate.

### SADDLE NOTES.

The Christmas handicap was probably the most interesting race of the season. Seven horses went to the post and six of them were well supported by their followers. Nones had a heavier backing than the others and went to the post a lukewarm favorite at threes. At the start Bullman took Articulate to the front and despite his heavy impost of 125 lbs. attempted to make a runaway race of it. Articulate and Corrigan made the running at a fast clip, reeling off the first half-mile in forty-eight seconds. At the five-eighths pole Nones commenced to creep up and the issue was never in doubt from there on, Nones winning in a common gallop in 2:07½. Bessie McCarthy secured the place and Siddons, coming with a great rush at the end, after laying hopelessly out of the race was third. The event was worth \$2640 to the winner and his owner Mr. P. Ryan had the four year old in great shape to go the distance.

Walter Jennings has secured second call on the services of Jockey Ranch who will in future be seen on the Jennings' horses. The terms of the contract are private although the consideration is said to be a handsome one.

The Buffoon has developed into a pretty shifty selling plater, especially in soft going, and is a hard horse to beat in his own class.

Lord Badge turned a somersault and won handily from the Fretter and Diderot. He seems to run better at five to one than at eight to five with the same weight in the saddle. Possibly apprentice Reed can make him run more kindly than did Jockey Waldo.

Aunt Polly at one hundred to one is the longest priced winner at the meeting.

Jockey Winnie O'Connor is the latest American to arrange to go abroad to try his fortune on the foreign tracks, says the *American*. O'Connor has just closed

a deal through August Belmont to ride abroad for the next three years for Baron de Rothschild and M. de Bloch, of Paris. He will take the place of Milton Henry, whose license was suspended by the French jockey club last October. For his services O'Connor will receive \$5,000 a year for the first call from Baron Rothschild. M. de Bloch is to give him \$10,000 a year for second call. This will make O'Connor's salary in all \$35,000 a year. The contract begins on March 1, 1903, and runs to March 1, 1906. O'Connor is to ride at 110 pounds.

Duke of York II appears to hold safe most of the timber toppers now running at Ingleside. On both occasions on which he has met Crest he has taken her measure in hollow style, both outjumping and out-running her on the flat. While there is not much form to this style of racing, reversals are quite noticeable and sudden improvements are to be looked for, such, for instance, as shown by Dagmar in his last race.

Antolee won a race on Monday in very easy fashion with Birkenruth in the saddle. Honig's mare appeared to have fallen into a soft spot and should not have been overlooked by the bettors who backed her in her previous essay in a field in which she appeared to be outclassed.

Ben Mac Dhui was heavily backed on his first appearance, but did not run up to his Eastern form and finished third in a field of four.

Bob Smith, the trainer of Articulate, was greatly displeased at Bullman's ride on his horse. His orders were to never be better than third until the stretch was reached. Bullman said the brown horse was so rank and full of run that he was unable to take him back. It is doubtful, however, if the result would have been changed even had Bullman obeyed his orders, as Articulate was giving away too much weight to a pretty high class horse. Corrigan also appeared to be weighted out of it, although he ran a very creditable race.

The selling race war is still merrily running along. Bill Massie was elevated \$900 above his entered price, and Matt Hogan received a boost of \$300, in their respective races. The most unpleasant feature was the boosting of Sunello and depriving Matt Storn of the purse won by his horse. Mr. Storn has been ill for over a year and in the worst possible luck, and the loss of the purse won by his Morello gelding is a most serious matter to him.

Last Monday, Starter Dick Dwyer was the recipient of an elegant diamond horseshoe scarfpin, the gift of the jockeys now riding at Ingleside. Jockey Bullman made the presentation speech.

The averages of the jockeys, figured up from Nov. 15th to and including Saturday, Dec. 27th, show Jay Ransch to be well in the lead with 60 winning mounts to his credit. Burns comes next with 24 winners, but the comparison between the two jockeys will show Burns' work to be much better than Ransch's, as he had but 83 mounts as against 205 for Ransch. Donnelly has been first at the wire 21 times and Coburn and Reed come next with 10 wins each. Fifty-three riders have failed to ride a winner at the meeting.

Like all good things, Jackson's Napa Soda has a dozen counterfeits.

**Warranted to give satisfaction.**

**GOMBAULT'S CAUSTIC BALSAM**

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold Warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by press, charges paid, with full directions for use. Send for descriptive circulars to make etc. Address—

THE LAWRENCE-WILLIAMS COMPANY, Cleveland

## ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

### California Wildcats and Their Ways.

*Lynx rufus* was originally an inhabitant of the tropics but he has gradually worked his way north and is now found throughout the United States, Canada and British Columbia. In appearance at different times of the year the color of the coat changes with the season, at one time a reddish brown on the back and yellowish white spotted with black on the under surface of the body. In the spring the color of the upper parts will change to a grayish brown. We believe that the California variety will show most of the time more of the yellowish and grayish tinges than his Eastern cousins. The female is much smaller and more slender than the male, in looks and actions she bears a stronger resemblance to the domestic cat. The wildcat's claims for a game disposition and fierce reputation, muchly undeserved, are long legs and large feet armed with strong, sharp claws and its savage caricature of fighting fury as "it growls, spits and rolls its blazing eyes in a manner which faithfully (does not) reflect the demon character within." The food of the bobcat varies with the seasons. In warm weather when game is plentiful he takes his pick, in the winter, particularly where snow and ice prevail, he is glad to take what he can get. He is fond of fish and frogs, and in the summer he follows the dry beds of the brooks and small rivers and fishes in the deep holes. He also eats hares, rabbits, squirrels and bats, and other small fry when he is lucky enough to get them. He catches a good many birds, too, chiefly grouse, quail and other species which sleep on the ground. His preference however is the poultry house by long odds, in this field he is an adept anatomized from one end of the State to the other.

As a factor for the sportsman, particularly in the foothills within easy reach of this city, he is not to be despised. The hunting party with a pack of dogs can find many a day's sport running cats over exceedingly rough country at times. These varmints and also coyotes are generally started late in the morning after they have sought their lairs in the thickets of the canyons for a rest after a night's marauding. Thomas S. Van Dyke in the following article aptly describes many of the ways and characteristics of bobcats and truthfully disparages the generally exaggerated ideas concerning wildcats.

Next to the bear and the rattlesnake, the wildcat leads in interest for the general as well as the particular reader; and in truth he is a highly entertaining little beast if you have no yellow-legged chickens fattening for the parson's visit. Whether the truth can be told about the wildcat is a question not yet solved. But a harder question is, would the truth be spicy enough even if one could tell it. The mere truth of natural history is now too tame for readers whose taste has been cultivated on the highly peppered lies of those who find imagination a better thing to draw on than facts that are too much trouble to learn. There are, however, several funny things about the animal that make him a highly interesting factor in the charms of country life, provided that you have your hen coop well built.

There are apparently two kinds of cats, one a bit larger and grayer than the other, and with little black tufts on the tips of its ears, but it is not certain that the distinction amounts to anything, though this one is called the lynx and the other, that is a trifle more brownish and with shorter tufts on the ears, is about the same size. In the Rocky mountains both travel under the name of bobcats, from the short, stubby tail, probably. They live in holes in the ground or rocks, but spend much of the day in the brush or long grass and briars of the river bottoms, taking to their holes only when danger is about. Often they lie on the rocks before the sun becomes too strong. Like the coyote, they have little objection to showing themselves at a distance, and often stand and watch you before running away, and are quite different from the fox, which you rarely see, no matter how numerous.

If it is convenient to avoid it there is very little fight in either of these cats. They seem to know when you have a dog along, and it is seldom you can overhaul them with a dog before they get to a tree. For ten years I lived where I could see them almost every day, and many a time have had them sneak around the arbor of wild grapes down the creek where I used to do my reading and writing. I shot several times with a small pistol without moving from my seat, and have found them many a time out on the open ground early in the morning or late in the evening. But they have such an instinctive knowledge of the dog that if you have one with you, you will rarely see any cat until it is tired. I never yet saw a dog overhaul one in a fair race, though the cat is such a poor runner that the dog could easily do it. But it was a common thing to run one into a tree with the dogs and then shake him out. Few things are more amusing than to see a robust cat land in the middle of a pack of whiffets big enough to run a country town. Lovers of classic music can revel with all the shakes and trills desired. I once saw a cat that did not weigh over twenty pounds whip four dogs, including a plucky Scotch terrier. And it was done, too, with only one leg. I had treed the cat in a live oak near the creek at daybreak the owner went out to give the little fun to encourage them to keep the cat as he said. The cat was perched on a limb with arched back and eyes scattering fire

and fury over all creation. The owner began by shooting off one paw with the rifle, so as to make the cat come down and at the same time make it safer for the dogs, two of which were young and needed a gentle introduction to society. Another, too, had just "come out" that season and was still a trifle short on polish such as is necessary in this kind of diplomacy.

The loss of the foot only made the cat look madder and cast on the shooter a gaze of infinite disdain. Bang, went the rifle again, and off went another foot. Both hind feet were gone and still the cat stuck with its forepaws. It seemed a bit disconcerted, but showed no sign of coming down; so the man shot off one of the forepaws, by which it was clinging to the bark of the limb. To his astonishment it still clung by the other claw, so that he had to climb up and poke it off with the gun barrel.

Down came the cat in a whirl, but got the stumps of its hind legs under it in time to plant the sharp claws of its remaining foot fairly in the top of the nose of the nearest dog that seemed inclined to interfere. A ki-yi, ki-yi, ki-yi rolled along the hills as the dog dragged the cat back several yards over the ground by the hold on his nose as he tried to get away. Another dog then thought the rear was a safe place to begin the campaign, but being a recent formation he took only a tentative nibble at the cat's tail. The cat let go the first dog and swung that claw round in a semi-circle to which the nose of dog number two was happily located to play tangent. While number one started under the honey house number two retrograded at such a rapid pace that he dragged the cat back to about where it started from.

By this time the terrier thought he had located the best place for a hold and grabbed the cat in the middle of the back. His ideas were sound enough had he been large enough to carry them out. But he had miscalculated his own weight which was scarcely more than that of the cat and had also over-estimated the capacity of his jaw. For no sooner had he taken hold than the cat allowed dog number two to visit the honey house and by the aid of his loose skin and broad back twisted around so that in a second or two its teeth were anchored in the base of the terrier's ear, while the only paw happened to effect a landing on the dog's tongue. A brilliant passage of canine music sent the other dog under the kitchen stove while the owner of the dog hit the cat over the head with the gun for fear the dog's spirit would get broken as he said. The dog was a brave little scamp that had saved us many a deer and would have mastered the cat or died. But the owner was probably as wise as he was cruel.

If there is anything the wildcat loves it is the tenderfoot who comes out here with plenty of money, buys a nice ranch and brings home some fancy chickens. Ducks will do and I have known a dozen vanish in a night. The tenderfoot is quite certain that it was done by coyotes so he builds a coop that the coyote cannot enter. So the cats just climb up the sides and spit at the chickens until they scare them off the roost. When on the ground they run to the slats and poke their heads out. By that time the cat is down there, or his partners are. In a very short time the heads of the chickens are pulled off and unless dogs or the tenderfoot comes to the rescue the whole of the chicken is sometimes pulled out piecemeal. Cats are equally cunning in watching for chickens around the edge of the brush and can pick up one almost as adroitly as a cat can a mouse. Many a cottontail and even the more active jackrabbit is lifted in the same way at a single jump of the hidden cat. I have never known one to take a young pig as a coyote will but one can no doubt handle a respectable shoat and walk off at any time with a fair sized lamb.

It is but a short time since wildcats were plenty enough in all the wilder sections of the country to make fine sport for one strolling about with a rifle early in the morning. One flying up a hillside with a string of bullets scattering the dry dust over him and occasionally warming up his appendix with one well-aimed was once a very common sight in the part of the country where I spent many of the first years I was in California. But what do you think of killing four at one shot? You think that a lie, of course.

Those brought up on the great American educator—boiler plate—will believe it, of course, simply because it is so very much like the lies they daily swallow for truth. But there is no lie about it, nor was there anything wonderful except finding the cats in the right position. One might spend a lifetime where cats were very plenty without seeing it. I never heard of any one else finding them in the same position. But found that way the rest followed, as a matter of course, for I was very close and had a very large rifle shooting a large, round ball with a very heavy charge of powder.

It was absurdly simple when the necessary conditions were right. While slipping down a gulch early one morning on the trail of some deer I saw fur on a big granite boulder that lay under a live oak. The wild was coming up the gulch, and as I was wearing moccasins, as I always do in the country, I made no noise in walking. Mounting the hill side a little I found the fur was from an old cat with three almost full-grown kittens. The old dame was lying in the form of a crescent and the children lay in the enclosure side by side, absorbing their morning meal. It was a very simple matter to slip around to one side where I could get a dead shot at the old lady's neck and have it right in line with the three kittens. All four were dead by the time I reached the rock, which was only some twenty yards from where I stood. It really required no shooting at all. All that was wonderful

about it was in finding them. The Fallbrook correspondent of the San Diego Union sent an account of this to that paper and it went the rounds of the whole United States, simply because it was believed a lie. As a lie it would have been simply very stupid, for there was nothing in the shooting.

Many stories have been told of wildcats attacking people, but of the thousands I have seen not one lost any opportunity of getting away. I know of two cases, however, where the evidence seems beyond question. In 1872, at Miner's ranch in El Cajon, back of San Diego, a cat sprang on the back of one of the hired men some 200 yards from the house. The man ran into the house with it on his back, and it was killed in the kitchen by the Chinaman with a stick of wood. It made no effort to bite or scratch the man, but simply clung to his shoulders with a grip he could not shake or pull loose, and so he started for help. It was miserably emaciated, probably from the scarcity of rabbits and quails caused by the series of dry years. It was supposed to be crazy from starvation. I did not see this, but three years afterward I spent two years on the ranch, where I heard it talked about by the family and the children and the hired men, some of whom were still there, and it was often referred to by neighbors coming to the house. There was no motive in lying about it and I heard it from so many different people at so many different times with no opportunity of collusion among them and nothing to gain by it, that I have no doubt of its truth.

Some years later, at Pala, in the same county, a large cat seized a baby, about 5 months old, and started for the brush with it. Hearing the child cry, the mother ran to the rescue and got it away, but was well scratched and bitten in the struggle with the cat, which persisted in holding on. I did not see this, either, but lived in that neighborhood for several years, saw all the parties and heard it talked about by those who saw it, and who saw the mother and child afterward on the same day, and I have no more doubt of its truth than I have in the other case.

These are the only two cases I know of that are well attested. I have heard of other cases, but not on satisfactory evidence. But all animals are off their base at times and liable to do something entirely outside the line of their every-day behavior. The fact that any of them will run away ninety-nine times out of a hundred does not prove that they will always do so.

While a wildcat will fight a dog with great fury, it will often become thoroughly demoralized when run down with a horse on open ground. Sometimes it will be so much so that it will squat under the horse and may be killed with a stone, making no effort to escape, as it has already come to the conclusion that it cannot, and is out of breath. The cat is no such runner as the coyote or the fox. He can make a lively spurt for a short stretch, but almost any dog can quickly run into as close quarters as his ambition calls for. It is said that when they are occasionally driven into a corral with several thousands of rabbits in some of the large rabbit drives, they become demoralized in the same way, and often are killed as easily as the rabbits with a club. This would not be strange, for I have seen tame cats so stupefied with a mob of rats and mice that they did not know what to do.

Nowhere does the cat show the acuteness of the fox, or even of the coyote. He depends more on hiding than on slipping away at the approach of danger, and it is doubtful if he has the ears or the scent of the other two. The fox is so extremely acute that, though they are very plentiful in most all parts of the country, it is only at long intervals that the hunter sees one at all. Nearly all that I have ever seen were slipping away from a companion and toward me when I was at rest on a rock or something of the sort. I have seen coyotes coming toward me in the same way, but never knew a cat sneak out in that manner, though they were much more plentiful than either foxes or coyotes.

The wildcat is not so very strong for its weight, and notwithstanding all that has been said about the immense strength of the tiger, it is doubtful if he is much stronger in proportion to his size than the cat. The panther certainly is not and the tiger is of the same build. The wildcat is not as strong in ratio to its size as the grey squirrel. While a first class fighter when cornered, it certainly lacks the endurance and grit of the Bull Dog and the Bull Terrier, as well as most of the Scotch Terriers. A forty-pound Bull Terrier that is quick and fearless can make short work of a twenty-pound cat, while either of the terriers of his own weight can whip him in the end unless the cat gets some unexpected advantage. The claw is red hot stuff, and is apt to stay wherever planted. If it once reaches a tender spot on a dog, like the tongue, there will be music in the air in short order. But in a square fight either of the terriers is a match for the largest cat. If the dog can hold out until he gets the cat by the back of the neck or the small of the back or even the middle of the back, the fight will soon be over if the dog can hold on. Most dogs fail in trying to shake the cat or allow it to turn over by a loose hold so that it can use its claws to advantage. Many a dog fails in the same way with a coon, which is a very adroit little chap and needs a dog well up in his business. Of course, if the dog can get the cat by the throat and hold on the cat is soon finished. But out of dozens of fights that I have seen I never yet saw a dog get this hold. There are too many claws in the way to make the effort comfortable. The dog fears them more than the teeth, because he never knows where they are liable to anchor. But he does know that they are apt to stick even tighter than the teeth and cut just as bad. The dog that lacks good grit has no business with the cat. But there are many that stand up to the fray with great courage. Most of those that fail do so by snapping or trying to shake with a bad hold. Nothing is more amusing than to watch the speedy decay of ambition in such a dog, and the one that was the most savage while the cat was in the tree or on a rock is often the last to sample the outer defenses of the varmint when shaken to the ground.

## AT THE TRAPS.

## FEATHER AND FIN.

An impromptu live bird shoot was held at Sacramento last Sunday under the auspices of the Capital City Gun Club on the Kimball & Upson grounds at Agricultural Park and drew out a much larger attendance than the management expected. The day was ideal for the lover of the gun, and the finest, speediest and best lot of pigeons ever trapped on the grounds was provided. There was not a squab in the bunch and the shooting eye of the gunners was tested to its limit.

The winners and events were as follows:

First event, six-bird "warm-up," in which Frank Ruhstaller, Jr., Weldon and Englehardt divided first money, \$15; Johnson, Smith, Herold and Davis taking second, \$10.

Second event, ten birds, three moneys, in which Herold and Gusto divided first money, \$32; Smith, Davis, Captain Ruhstaller, Skeets, Hoag and "Poor Bill," second money, \$19.20, and Johnson, Newbert, Ruhstaller, Jr., Weldon, Englehardt and Stevens, third money, \$12.80.

Third event, five birds, two moneys—Herold, Skeets, Hoag and "Poor Bill" divided first money, \$16.80, and Newbert and Davis second, \$11.20.

Fourth event, ten birds, three moneys—Herold, Davis, Newbert, Stevens and Ruhstaller divided first money, \$24, and Smith took \$14.40 for second, while Englehardt, Skeets, Montgomery and Hoag took and divided \$9.60 for third.

The last race was a "miss and out" match, winner to take all, but owing to a shortage of birds "Poor Bill" and Hoag divided the pot of \$17.50.

In all, nearly 700 birds were trapped, thus almost equaling the record of any previous shoot there. The trap shooters are looking forward to the blue rock season and the management will construct an entirely new outfit, adding greatly to size and comfort. Frank Vetter was referee.

There were contestants from many outside points, among whom were noticed: J. S. Fanning, New York; W. A. Robertson, San Francisco; C. Johnson, Chico; Messrs. Smith, Montgomery, Hoag, "Poor Bill," Skeets and Fissel of Davisville; Messrs. Davis and Jones of Auburn; E. Englehardt of Winters and others. The appearance of Captain Ruhstaller at the traps was hailed with acclamation by the other shooters. The veteran held his own with the young fellows and did some excellent shooting.

Agricultural Park seemed to be the center of sport last Sunday. While the trap shooting was going on in one part of the field the Sacramento Coursing Club was enjoying the running of the hounds and hares in another portion, and in the outer track a number of horsemen were working out and speeding their finest nags, some spirited brushes occurring every once in awhile.

Mr. Fanning was greatly pleased with the California style of shooting. While he was watching the match he saw a brace of spoonbills hover over a small pond of rainwater at the further edge of the field, finally they settled down in a feeding place. Fanning walked over toward the pond, and as the ducks raised he grassed one of them. As he started back to the shooting stand he jumped up a jack rabbit and, of course, knocked it over with the other barrel. As he reached the crowd at the traps Mr. Fanning exclaimed: "Well this is old California, sure enough. Well I'm blessed if it isn't a good region for sport. I never before saw a place where a man could enjoy horse racing, trap shooting, coursing, duck shooting and a rabbit hunt all at the same time and within the same inclosure!"

Last Sunday a number of shooters, Clarence A. Haight, James V. Coleman, Ed Donohoe, Ed Fay, Dick Dwyer and others shot a number of live bird pools at the Ingleside grounds. Haight and Dwyer carried off the honors of the day

To-morrow it is proposed to hold an impromptu blue rock and live bird shoot at Ingleside. A number of the local cracks and several Eastern experts will be present.

The Ocean Park trap shooting grounds have recently been improved and reconstructed and Los Angeles shooters are now happy in the opportunity of enjoying trap shooting at as well appointed a shooting ground as there is on the Coast.

The grounds are situated just under the hill from the Country club house, near Santa Monica, which is reached by several electric lines, and two or three innovations have been put into effect which are bound to be popular. The most noticeable one is the flushing of the trap boxes. On most clubs the bulkheads stand up from the earth and allow a bird to get out some distance before it comes into view, but with the traps throwing from a pit as they do at the beach grounds the targets come into sight much sooner and afford a fairer mark. The traps throw to the east, rather bad for the early morning shooting, but very convenient later. The shooting score is a little higher than the traps, though not enough so to give one the sensation of shooting down hill.

At the Ocean Park Gun Club's initial tournament held Sunday on the club's grounds the newly installed plant worked admirably. The shooters were well pleased with the flushed bulkheads, and the day's shooting passed off without a hitch, close to 2000 blue-locks being thrown. These shoots are to be given every month during the winter and spring. Straights in the half-dozen ten-bird sweepstakes were too common to merit mention. The best of the Los Angeles local cracks were on hand and they were shooting well, considering their lack of recent practice.

Scores in the merchandise shoot were as follows: Blanchard, Hagerman, 25; Thornton, Shelley, Breer, 24; Lovelace, Kinburg, 23; Murphy, 22; Shelton, Llewellyn 21; Ehrhardt, 20; Decker, 19; Wright, Wescott, Van Singer, 18; Curtis, 14; King, 13; Billington 12; Shelley, 10; Elgholz, Holbrow, 6; Unger, 4.

Duck shooters have recently been enjoying good shooting at almost every point within easy reach of this city. Weather conditions have been generally favorable. The hunters who have had the best shooting are the fortunate fellows who have been shooting from blinds over decoys set out in the baited ponds. The last rains had a tendency to cause the birds to seek inland feeding grounds temporarily. The change of rations from broomcorn seed, beet pulp, musty wheat, stale beans, etc., to fresh sprouting vegetation and the various seeds brought down into the puddles and flooded districts by thousands of tiny freshets and rivulets gave the birds a chance for rest and immunity from the breechloader that they undoubtedly appreciated.

San Pablo and Richardson's bays are frequented by hundreds of immense flocks of canvasback and blue-bill ducks. A noticeable and unusual feature of the duck convention in Richardson's bay recently is the presence of many bunches of teal ducks. These beautiful and swift flying little birds are very partial to salt water, but their presence in the locality mentioned in such numbers is something unprecedented.

These ducks have been assiduously hunted by gunners in all manner of water craft, generally with but poor success. The fellows who get big bags are the fishermen who designedly and in violation of the law net thousands of these birds every week. The drowned birds are sold in the markets and by hawkers. Despite several seizures and arrests the pernicious practice is continued.

Last Sunday Otto Heins, E. F. Peterson and Chris Reese had a splendid shoot on canvasback. They shot from blinds in Richardson's bay and brought in almost three limit bags of fine fat birds.

Recent reports from Point Reyes are favorable to good fishing prospects. Theodore Rothschild, S. A. Wells, W. C. Stevens, W. A. Cooper, M. Pincus, James Watt and others fished the tide waters near the point last Sunday for grilse and steelheads. John Gallagher went up to Rocheford's Saturday afternoon and will try the virtue of bait fishing in the "white house" pool as long as the good weather lasts.

Striped bass fishing, apparently, is relegated to one locality at present, so far as results are concerned. San Antonio slough, near Burdell's Station seems to be the only fishing water where the fish can be found

JACK FANNING

that will respond to the efforts of the anglers. The spoon is now the effective lure, for the clam is as ineffective as a soup ladle would be. A No. 6 Wilson or Breidenstein brass spoon has been found to work with success. Many anglers there are who try both the No. 4 and 5 spoons and find them very effective also. Mr. Miller landed a fourteen-pound fish last Sunday and is now high hook for the fourth prize offered by the Striped Bass Club for the season's angling exploits of the different members.

A guest of the Angler's Club has fished the stream frequently this week and has landed a large number of fine bass. Several of the fish weighed 17 pounds.

Bay fishing seems to be full of uncertainties these days. Rock cod are scarce and tom cods seem to have deserted their favorite haunts about the Sausalito wharves. Porgies and flounders are also beginning to make themselves scarce. Three weeks ago they were so plentiful in many fishing spots that they were hauled out of the water by the basketful.

A very remarkable illustration of the present abundance of wild game near this city at present is noted in the exploit of a member of the Country Club on the 19th inst. The hunter left this city on a morning boat, arriving at Point Reyes about 10:30 A. M. Driving from thence to the club house, he prospected a nearby snipe patch. By 12:30 o'clock he had bagged the twenty five limit of the "long bills." A drive back to the comfortable quarters of the club for lunch and then a drive of twelve miles to the Bear Valley lagoon for a duck shoot was made, and by 5:15 P. M. the sportsman, who, by the way, is an expert with the shotgun, had shot another limit bag, fifty fat canvasback ducks. He was through in time to catch the evening down train to this city and was in town again by 7:30 o'clock, surely a most remarkable day's shooting, considering the generally limited opportunities for such unparalleled chances on the two varieties of feathered game most endeared to the fancy of sportsmen the world over.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Quail shooters are taking advantage of the favorable weather conditions and enjoying the sport of grassing limit bags in many favorite upland and valley resorts within easy access from the city. In the Marin county hills, along the line of the railroad contiguous to the foothills of Sonoma and Napa counties, across the bay in the thickets and brushy ravines of the rounded spurs of the Coast Range near Haywards, Sunol, Pleasanton and Livermore; south in San Mateo county and in the Santa Clara valley, quail are plentiful. An enumeration of localities where the birds cannot be found is easier than the listing of spots where beves of the "hoodlum of the valley" are to be found by the hunter.

It was supposed that a limit bag of ducks would be beneficial in stopping the slaughter of birds. That this is a fallacy is proven by the market traffic in birds which goes on persistently and systematically. It is not an exaggeration to state that 10,000 ducks have been sent in to this city in one day, not often, but frequently. Two hundred limit bags of 50 each is not a big invoice when the large number of hotels, restaurants, clubs, swell boarding houses, etc., in this city, that are ready buyers of wild game, is taken into consideration.

The express companies, as common carriers, are not molested when they have in transit many sacks of birds. The methods employed by shippers are to tag and ship properly; this is an easy means of complying with one section of the statute. The commission men and some dealers receive mailed memoranda of the shipments, the shippers forward orders for the game. The dealer and commission man finds his customer, gives him an order for the ducks and the trick is turned, the letter of the law thus being observed.

Another violation of the statute is the netting of all kinds of wild ducks and their cousins, sea-coots, divers, etc., which birds are found by the thousand congregating in flocks on the waters of San Pablo, Suisun and Richardson's bays. These birds are sold by hawkers, generally ragged tatterdemalions of the Latin quarter. The Greek and Italian fruiterers and vegetable vendors also sell a large number of the drowned birds.

Many people do not know one variety of wild fowl from another, and in buying birds for the table take for granted any statement vouchsafed by the vendor. A case in point was related this week by a Kearny-street jeweller. He had for several years past been accustomed to occasionally buy wild ducks. "Petaluma mallards," he was told they were by the Dago at whose store he made his purchases of poultry, wild game, etc. The birds he bought and had prepared for the table at his home were palatable usually and at times indifferent in flavor. He often wondered at the enthusiasm displayed by several shooting friends and could not understand the gastronomic eulogies he heard on the merits of wild ducks.

Several weeks ago he was prevailed upon to go hunting with two friends and then enjoyed his first duck hunt. Enough ducks were shot to give the trio a nice bunch to take to their respective homes. Our goldsmith friend happened to get a pair of canvasbacks and sprigs and half a dozen teal, all in the very best condition.

When these birds were cooked and came on his table, he was amazed at the difference between what he had previously eaten and thought were ducks and what were the real thing. So it is with lots of people who do not know the difference and are the victims of imposition in buying drowned ducks that were netted.

Another bird that should be looked after before it is too late is the English snipe. The sport afforded by this swift winged gyrating game bird is too good to allow the chance for its extermination. Market hunters are not doing a thing to these dainty birds—there being no protection at all for them save a flimsy pretence in the guise of an individual daily bag of twenty-five. A close season and stoppage of sale will do much for the protection of English snipe.

Two beautiful calendars just issued by powder manufacturers are typical of an experience dear to the heart of every sportsman—a boy's first shotgun and his initial lessons in acquiring the art of wing-shooting. A case in point is the account of a recent duck shoot indulged in by Neal Moore, a youth who is the stepson of Mr. Harvey McMurchy.

"Mac" is a devout worshipper at the shrine of the Spooney Gun Club and since his arrival here has made many pilgrimages to the club's ponds near Mt. Eden. Young Moore has accompanied his "dad"—how's that, Mac?—on several hunts. At first the lad was given no other instructions than those usual for the safety and comfort of the novice as well as his older companions. It was deemed best to let him make his own observations and go a little way on his own hook. The boy took to the sport with enthusiasm and used his 16-gauge L. C. Smith with commendable skill for a beginner. One day, about two weeks ago, the lad was in a blind with "Mac," who let him use his own judgment in shooting, the latter taking only choice and difficult shots after the boy fired.

Young Moore dropped a number of ducks, some after they lit among the decoys and others as they were in the air. Finally the young shooter, who had evidently fast outgrown his initial experience, remarked, "I want to shoot at them, just the way you do when they are coming in," expressing his preference for shots that every duck hunter knows are rather difficult. Mac, after a little general instruction, bid the lad go ahead, which he did so effectively that he dropped twenty-seven ducks as skillfully as many a veteran could do it. This boy is evidently destined to make a reputation with the shotgun. Under so proficient a tutor, natural intuition and ability should be cleverly developed.

The Christmas number of an esteemed old the *Shooting Times and British Sportsman*, this week is, as usual, full of good stories of field, fen and stream, as well as other matter with sport and recreation. The edition is well up and beautifully illustrated.

## Kennel Suggestions.

Every couple of months or so the entire kennel should be thoroughly tested for worms whether exhibiting symptoms or not. And here may be noted a fact I have observed time and time again, that after dosing a dog for worms, although there has been no apparent result, the animal has benefited materially in condition, appetite and coat.

Weekly, say Saturday, each dog should be carefully scrutinized from nose to tail, and the teeth and nails receive special attention. Taking the former first. The milk teeth of the puppy number, roughly, thirty, and are mostly deciduous or shed, whilst the full mouth of the adult contains forty-two. The incisors, six above and six below, are in front, small in the centre, but getting stronger and longer as they approach the canines or fangs, four in number, situated at each corner, top and bottom, the upper being the stronger. Of molars, there are twenty-six, twelve above and fourteen below, the first in each jaw top and bottom, immediately behind the canines—that is, four in all being permanent from their very first appearance.

The puppy begins to shed his teeth at any time after three months, and has his complete mouth at about six and a half months. Individuals and breeds, however, vary considerably, and toy dogs are, as a rule, somewhat slower. When casting their teeth they should be looked to every day and assisted, otherwise the shape of the mouth may suffer permanently. All loose ones should be removed at once, which can be most conveniently done with the fingers, the most difficult to extract being the fangs or canines of the upper jaw, to get rid of which help is almost sure to be required, since there is often a much greater surface embedded than that exposed. Forceps are made for the purpose, though if you give them time I have never failed to do the needful with my fingers and a handkerchief. Care should be taken not to snap them, which the use of a key, considered by some the handiest instrument, is very apt to do.

It is an old saying that a bone is a dog's natural tooth brush, with which I quite agree, as I should were I to hear that water was good for ducks. But unlimited access to water indubitably makes a duck tough for the table, and similarly the gnawing of bones develops the muscles of a dog's cheek, and as a puppy is particularly prone to muscular development everywhere, it follows that in those breeds where leanness or absence of cheek is a virtue, bones must be barred. When they can be given freely, nothing will dispose of the first teeth better. After five months of age on no account should Bull Terriers, Fox Terriers, Collies or any similar breed which demand clean cheeks, be allowed to gnaw and gnaw on bones. If the animal is not for show of course it does not matter but in the case of a show dog, other means of cleaning the teeth must be found.

If another reason were necessary for the extraction of milk teeth as early as possible, it is that at this time they are much subject to convulsions—the puppies, not the teeth—through the pain, and the mouth containing loose ones is so sore that its possessor is hardly able to eat, at any rate with convenience. Then in the adult there is canker, usually the result of aldermanic menus and no exercise, but quite as often from the presence of decayed teeth, especially in old dogs. All these must be at once removed, the mouth well washed with a solution of alum and permanganate of potash, and the state of the stomach and dependent organs attended to. It is advised at this weekly inspection, as a preventive and preservative measure, that all the teeth be carefully cleaned with an ordinary brush and some carbolic tooth powder.

As regards his nails, the dog who has plenty of exercise on gravel or good macadam will need little attention in this respect. But there can be small doubt that a very short nail gives a more compact appearance to the foot, and it is only neglect or lack of exercise, or the two combined, which are the cause of the open feet which has given many a dog a set-back in the show ring. It begins in the nest, for there the little nails grow rapidly, having nothing to wear them down, and will even curl right round, sometimes into the pad itself, consequently when the youngsters begin to come out pressing on them causes the toes to open, a long course of this resulting in a permanent deformity which need never have arisen. Therefore, in the nest, they should constantly be clipped close up, the which, if continued, has the effect of shortening the nail altogether, the quick being reduced. Per contra, if this is never done, they can never be effectively shortened in the adult, without pain and loss of blood, since, if opportunity be given, the quick will increase in length.

Anyhow, always keep your dog's nails as brief as possible, the most suitable instrument for which has been mentioned earlier. Another means to the same end, which has been adopted by some, is that of filing them down. Of course, this does away with all risk of hurting the quick, and the nail can be so finished off as to appear uncut. But it is laborious, nor do I see cause why the fact that you clip your dog's toe nails should be hidden from the world any more than that you so treat your own—if not in public.—*American Stock-Keeper.*

H. S. Humphreys has been selected to judge the field trials at Bakersfield. Mr. Humphreys is well known to Eastern sportsmen and has had a qualified experience in the saddle to make his visit here appreciated by Coast sportsmen. His home is in East Ind.

Previously stated last week in our report of the Oakland that there were fourteen entries of Spaniels, there were twenty-seven entries of all told.

## DOINGS IN DOGDOM.

The following remarkable communication was received by a business firm in this city. The agent for the firm deals in commodities and dog sundries used by fanciers. It was a poser for him and he saddled the burden on the kennel editor.

"Gentlemen—We have just raised a litter of English Setters and have success that is just a little too good, for the Pups are now 7 months old and some of them go as high as 63 lbs. in good condition (not too fat).

The strain is pure and of A. 1. quality and as the pups are of an abnormal size especially for their age, we would like very much if you could supply us with information as to how we can prevent our next litter (due in a few days) becoming so large.

The sire of our pups weighs (in like condition as pups) 60 lbs and the dam 40 lbs. and we assure there is no out cross. We started treating for worms at 4 weeks old & continue once every month till they are 9 months old and we don't know what it is to have a sick animal in our kennels & at present we have 8. Your views of the subject will be greatly appreciated."

We will suggest that the puppies should have been treated for boia constrictors instead of worms, this would have given them a smaller weight no doubt. A further suggestion that the dam should not be bred to a Percheron in future, but to Cocker instead would possibly bring smaller dogs but none the less on the mongrel order.

If it is desired to keep down weight only, send the pups to board at McCracken's.

We are curious to know what these puppies are intended for—steepchase jumpers, watch dogs or flea factories?

Woodlawn Kennels purchased this week the Irish Terrier Irish. This dog was bought from L. A. Klein by Mr. L. G. Rowell, sold by the latter to C. F. Charles. Rowell afterwards bought him back and this week sold him to John Bradshaw. The dog is none other than the Irish Terrier Endcliffe Paddar, which was entered in the limit class at the 1901 show of the S. F. K. C. to compete for specials only. He was entered as the property of G. S. Thomas by L. A. Klein, agent. He is by Milton Nobles out of Marion Nora.

BUCKWA.

That there will be a large and representative attendance of sportsmen at the Bakersfield trials seems assured from the local interest and enthusiasm shown. Secretary Betz has received communications from many points, the writers expressing warm feeling for a successful meeting and stating that personal attendance at the trials is looked forward to with pleasant anticipation.

Reports from Dodge, Coutts, Lucas, Peach, Hughes, Babcock and others on the grounds or nearby with a string of dogs, are to the effect that handlers and dogs are getting on famously. Each trainer has "something up his sleeve" and is confident of landing a winner. This is the spirit that makes a contest and is the standard of the sportsman.

The past year has been a record year for field trials; total meetings run has been thirty. The indications for the coming year are that interest in the sport and the breeding of high class field dogs will not be diminished.

Mrs. Thos. Murphy, of Gabilan Kennels, writes she "has purchased of Mr. T. P. McConnell, of Victoria, B. C., a young dog by Albert's Fleet out of Albert's Rosalind. This is Dr. Fair's strain."

Mrs. Bradley-Dyne has changed her residence and for private reasons will not exhibit any dogs for a year to come. For this reason she proposes to materially reduce her kennel stock and sell off all of her dogs, retaining only one or two favorites. She writes us: "I think I have, unless she proves too small, one of the best bitch pups ever whelped. She is out of Doreen, the bitch that has all the winners for these kennels, out of Cardiff Warman, an imported Ch. Bolton Wood Mixer dog. The bitch pup is to be called Sannah Sweetheart, has her mother's ideal body with nice coat on it, looks like what's wanted in coats. Beautiful front like her sire and a small, well carried ear and a pair of piercing dark eyes. I never hope to breed a more promising pup, as I cannot see any fault in her really. If she grows well, as she has done until now, she will be hot thing for 1904."

I have long wanted a dog worthy of Sweetheart as a name and I can now bestow it. I sent Mr. Fitzgerald, of the White House, Prisco, a good dog out of same bitch, Doreen. Such a counterpart of his dam that I had to look twice to see which was which; so I think Squire, as I called him, shall be able to do a bit of winning for his new owner. Squire, till I got Sweetheart, I considered my best dog pup bred here. Still, I have seen another sold, quite young, this out

of Doreen, that I think, if shown, would make all the Coast terriers sit up. He has, besides a grand body, the ideal coat. All these three pups are by different sires, so you see Doreen can breed a good one every time. It seems to me Irish Terriers are looking up a bit down south. I have had a lot of inquiries, but I dare say the Eastern dogs have it; distance, as we all know, lends enchantment, so the further off, the greater the enchantment. I know no one can compete with me in prices for the quality, but purchasers have got to buy their experience, of course. I only wish I could meet the Eastern importations next year. Never mind, I'll be prepared for them. N. P. Ollard, of Tacoma, still thinks the bitch he got from me, also out of Doreen, one of the best of her breed, tho' he has been looking at Irish Terriers all over England and he is bringing out a dog of his own choosing to mate with her. I expect more of this dog than all the other importations put together, because he was personally selected by his buyer. Few, very few buyers, have such golden opportunities. I hear of a litter of exceptional grand Fox Terriers, wire haired, by N. S. Bostock's Reconquest out of a Meersbrook Bristles bitch, which the owner is very proud of. They were whelped at Nanaimo, B. C."

## Arsenical Treatment For Chorea.

The German treatment for Chorea, or St. Vitus dance according to Dr. Wesley Mills in the *Canadian Kennel Gazette*, is interesting. While cures, with both human beings and dogs have been made, in some cases no improvement was reported. A case that came under his observation is cited where a cure seems to have been effected with a young dog badly diseased, whether the relief was permanent or not the Doctor is not in a position to state. He quotes the following method used in recent human practice:

"During the first day 15 minims (nearly the same as 15 drops) was administered, divided into three doses. This quantity was increased daily 7½ minims until on the sixth day a total of 52½ minims had been reached. The doses were then diminished daily by the same amount until the eleventh day the daily dose was again 15 minims. The drug was then discontinued. The total quantity of the solution taken was 352 minims (nearly six drams). In many cases the increase of dose was stopped on the fifth day, and the total quantity taken only 255 minims. Of the 80 cases 28 cures are claimed.

"The average duration of the treatment was a little over nine days. As others report no improvement, and such large doses are not without objections, I should myself be disposed to try the method only in desperate cases at first, i. e., cases in which the dog was so bad that I thought him better dead than alive. Later, if it proved successful in such cases, one might try it in less serious cases."

The preparation of arsenic used in the above mentioned cases is not obtainable in this country, but the doses as given above represent those of the Liquor arsenicalis sold by our druggists.

## Kennel Registry.

Announcements of Visits, Whelps, Sales and Leases will be inserted hereafter, for advertisers, free of cost.

## VISITS.

Plumeria Cocker Kennels' red Cocker bitch Red Sue (Hampton Promise-Black Sue) to same owners' Ch. Hampton Goldie (Ch. Red Mack-Hampton Queen Regent), December 26, 1902.

## WHELPS.

Charles F. Charles' black Cocker Spaniel bitch Naird Impostor (Ch. Viscount Naird Chlo) whelped December 32, 1902, nine puppies (6 reds, 3 blacks; 5 dogs) to Naird Kennels' Plumeria Beau II. (Ch. Hampton Goldie-Ch. Plumeria Surprise)

## SALES.

Plumeria Cocker Kennels sold to Mr. Turner, December 25, 1902, the red Cocker bitch Plumeria Chic (Hampton Primrose-Plumeria Flo).

## LEASES.

Plumeria Cocker Kennels leased, December 20, 1902, the red Cocker bitch Red Sue (Hampton Primrose-Black Sue) from Mr. T. J. Blight.

## Something for Nothing.

The Polk Miller Drug Co., of Richmond, Va., are manufacturers of Sergeant's Dog Remedies, the most popular line of preparations, intended for dogs, on the market today, having received the highest endorsements of the leading dog men and kennel owners in this country and Canada. Read their advertisements appearing in the columns of our journal each issue. The firm referred to will mail you absolutely free, a copy of their celebrated book on Dogs if you will forward 3 cents to cover postage. If your dog is sick, write them enclosing stamp, and describe the symptoms as accurately as you can. They will cheerfully furnish the best information on the subject without charge. F. W. Brann & Co., of Los Angeles, California, have recently been made distributing agents for Sergeant's Dog Remedies on the Pacific Coast.

All the sportsmen who went afield in the Yolo Basin, says a Sacramento Monday exchange, are said to have had excellent sport and returned home with game bags that were close to the limit. The arrival of the local train from Davisville last evening brought in some thirty of the sportsmen, all of whom were loaded down with ducks.

## Coming Events.

## Rod.

Nov. 1-April 1—Trout season closed.  
Nov. 15-Sept. 30—Season open for taking salmon above tide water.  
April 1-Feb. 1—Open season for taking steelhead in tide water

## Gun

Aug. 1-Feb. 1—Dove season open.  
Oct. 1-Aug. 1—Deer season closed.  
Oct. 1-Feb. 1—Open season for quail, ducks, etc.  
Oct. 1-Feb. 1—Open season on quail in San Mateo county.  
Oct. 15-Jan. 15—Open season on quail in Marin county.  
Nov. 1—Quail season opened in Santa Clara county.

Roots play a valuable part in the winter feeding of swine. While they are not particularly nutritious, they serve to give variety to the ration and keep the hogs in good condition. They are of especial value for feeding young and growing pigs. Roots should be used much more than they are for swine feeding.

While it is a critical time for the cows between hay and grass, it is also a very serious period between grass and hay, says the St. Paul Farmer. The cow that is scrimped between hay and grass will recover when she gets an abundance of succulent pasturage, while the cow that gets pinched on short fall pasture will not recover on dry feed until she again comes fresh. Fodder, corn, ground feed, or even a little hay to help out on this surplus flesh may later on be accounted for in the messes of \$1.40 per 100 milk.

Much labor and expense have been expended by farmers in giving feeding stuffs special treatment, such as wetting, steaming, cooking and fermenting, in order to secure a supposed increase in nutritive value—an increase which must come chiefly, if at all, from a more complete digestion. It is plainly noticeable these methods have lost rather than gained in prevalence by dairymen of to day. The conclusions of German experimenters have been that these special treatments have no favorable influence, their effect being very imperceptible or unfavorable. German and American experiments unite in condemning the cooking of foods already palatable, because this causes a marked depression of the digestibility of protein without any compensating advantages. Digestion trials with cooked or steamed hays, silage cornmeal and wheat bran uniformly show their protein to be notably less digestible than in original materials and therefore lessens the value of cooked grains which has been observed in experiments.

The firmness of the butter has much to do with its keeping quality. A soft or watery butter may be kept hard at a temperature near the freezing point, but as soon as it reaches a temperature where it softens, it loses flavor and then soon begins to take on the rancid flavor that is not liked by many people. This matter of firmness depends much upon the food given. Wheat, bran, corn meal and a little cottonseed meal have the result of making a hard, dry butter, even to the extent of being crumbly at times. Gluten meal and linseed meal are said to make the butter soft, and fodder or straw contribute to the same result, while good, fine hay or well cured clover result in a firm butter. Having cream well ripened and churning at a low temperature will also help to make the butter solid, and washing the buttermilk out is better than grinding it out under a heavy pressure. These points should be kept in mind, as many say it is not easy to have good, firm, well-flavored and long-keeping butter in July or August, although they are ordinarily successful in June or September. And some go so far as to claim that the highest point of flavor in butter cannot be found in a firm and long-keeping butter. We may not be expert enough to judge that, but we do know that such butter may have a very fine flavor.

Sole Owners and Manufacturers.

## CURES

DISTEMPER, INFLUENZA, PINK EYE, EPIZOOTIC, CATARRHAL FEVER.

Prevents these diseases, no matter how horses are exposed to them. Heaves, Bad Throats, Chronic Coughs, Catarrh, Laryngitis, etc., are effects of Distemper. SPOHN'S CURE will cure any or all such if case can be cured. Distemper, etc., are caused by bacteria or germs that get into the horse's system. They attack the glands, and millions of their dead bodies must be expelled to cure a horse. SPOHN'S CURE is guaranteed never to fail, or your money back. It is used by so many racing stables, stock farms and other handlers that we need not mention any names. You want FACTS, not names. Just what we are giving. ONE 50 CENT BOTTLE TO CURE ONE CASE. This is the guarantee. Send for our 32-page booklet, "Distemper," free. All Druggists.

## SALE EXTRAORDINARY! PALO ALTO TWO-YEAR-OLDS.

FRED H. CHASE & CO. announce that they will sell during the Last Week in January, 1903, the entire crop of the Palo Alto Two-Year-Olds (foals of 1901), consisting of Colts, Fillies and Geldings, by such sires as Mendocino (3) 2:19½, Altivo 2:18½, Nazote 2:28½, Azmoor 2:20½, Monbells 2:23½ and Wildnut 1:34½, out of the great broodmares of Palo Alto Farm, such as Aria 2:16½, Avena 2:19½, Belle Bird 2:22, Carrie C. 2:24, Cressida 2:18½, Ella 2:29, Ladywell 2:16, Laura C. 2:29½, Masden 2:23, Aeroetele by Palo Alto 2:08½, Ashby (dam of Aria 2:16½) and Atheno 2:15½, Expressive 2:12½, Gertrude Russell 2:23½, Liska 2:28½, Lucyneer 2:27, Sallie Bentor 2:17½, Sweet Rose 2:25½. Full particulars and date of sale in next issue. Send for catalogues.

FRED H. CHASE & CO., 1732 Market St., San Francisco.

## CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET. IT PENETRATES AND DRIES IN quickly and DOES NOT GUM AND FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

IT PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FLESH—a FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES.

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2½-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gail Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

JAS. B. CAMPBELL & CO., Manufacturers, 412 W. Madison St., CHICAGO, ILL.

## THE BARON WILKESES WON 25 PER CENT OF ALL THE MONEY ON THE GRAND CIRCUIT OF 1902.

His first dam, Nathalie, produced Barondale 2:11½ and Grand Baron 2:13½ and is by NUTWOOD the greatest of all sires.

His second dam, Beatrice is the dam of Patron 2:14½, Prodigal 2:16, Patronage and Pangloss, all great sires, and is by Cuyler.

His third dam, Mary Mambrino is the dam of Elvira 2:18½, the producing sire Dunraven, and dams of Ponce de Leon 2:13 and four others.

BARONDALE has two new ones in the list this year and is now the sire of four in the list.

## EVENTS TO CLOSE MONDAY, JANUARY 5, 1903.

### FOR THE JUNE MEETING, 1903.

FOR THREE YEARS OLD AND UPWARD.

**THE SUBURBAN, \$10,000 Added.** (Estimated value, \$17,500).—A HANDICAP FOR THREE YEARS OLD AND UPWARDS. By subscription of \$30 each for starters, \$100 forfeit, or only \$15 if declared out by May 15, 1903; with TEN THOUSAND DOLLARS (\$10,000) added; of which \$3000 to the second and \$1000 to the third. WEIGHTS TO BE ANNOUNCED FEBRUARY 2, 1903. Winners after announcement of weights, of three races of \$1000, or one of \$2500, 4 lbs. extra; of two of \$2500, or one of \$5000, 8 lbs. extra; of three of \$2500, or two of \$5000, or one of \$8000, 12 lbs. extra. In the case of horses handicapped at 115 lbs. or over, these penalties shall apply to the extent of one-half only: in the case of those handicapped at 125 lbs. or over, to the extent of one-quarter only; and in the case of those handicapped at 130 lbs. or over they shall not apply at all. Penalties in the case of horses three years old shall not make the weight exceed 115 lbs. One Mile and a Quarter.

**The June Handicaps, \$5000 Added.** (Estimated Value, \$10,000).—BY SUBSCRIPTION OF \$50 each, which subscription shall entitle the entry to start in all three handicaps, viz: The Coney Island, \$1500 added; The Sheepshead Bay, \$1500 added, and the Long Island, \$2000 added; without additional cost and also to be handicapped free for all over-night handicaps at the June Meeting, thereby saving the usual declaration fee.

The subscription fees to be divided, one-third to the winner of each race. THE CONEY ISLAND—A handicap for three years old and upwards; with \$1500 added. The winner to receive one-third of the subscription fees, all fees derived from supplementary entries to this race, and \$1000 of the added money; the second \$500 and the third \$150. Weights to be announced three days before the race. Winners after announcement of weights, 5 lbs. extra. Horses entered five days before the race to pay \$20 to start or \$30 forfeit. Six Furlongs on Main Track.

THE SHEEPSHEAD BAY—A handicap for three years old and upwards; with \$1500 added. The winner to receive one-third of the subscription fees, all fees derived from supplementary entries to this race, and \$1000 of the added money; the second \$350 and the third \$150. Weights to be announced three days before the race. Winners after announcement of weights, 5 lbs. extra. Horses entered five days before the race to pay \$20 to start or \$30 forfeit. One Mile.

THE LONG ISLAND—A handicap for three years old and upwards; with \$2000 added. The winner to receive one-third of the subscription fees, all fees derived from supplementary entries to this race, and \$1400 of the added money; the second \$400 and the third \$300. Weights to be announced three days before the race. Winners after announcement of weights, 5 lbs. extra. Horses entered five days before the race to pay \$20 to start or \$30 forfeit. One Mile and a Furlong.

**The Advance, \$5000 Added.** (Estimated value, \$8000).—FOR THREE YEARS OLD AND UPWARDS. WEIGHT FOR AGE. By subscription of \$150 each for starters; \$75 forfeit, or only \$15 if declared out by May 15, 1903; with \$5000 added, of which \$700 to the second and \$300 to the third. One Mile and Three Furlongs.

**The Equality, \$2500 Added.** (Estimated value, \$5000).—FOR THREE YEARS OLD AND UPWARDS. By subscription of \$75 each for starters; \$30 forfeit, or only \$10 if declared out by May 15, 1903; with \$2500 added, of which \$400 to the second and \$200 to the third. Winners in 1903 of two races of \$3000, or one of \$5000, 4 lbs. extra. Non-winners during the June Meeting, 1903, of the Coney Island Jockey Club, or of \$5000, during 1902, allowed, if non-winners in 1903 of \$3000, 5 lbs.; of \$1500, if three years old, 7 lbs.; if four years old and upwards, 10 lbs.; if \$1000, if three years old, 10 lbs.; if four years old and upwards, 15 lbs. One Mile.

**The Thistle, \$1500 Added.** (Estimated value, \$3500).—FOR THREE YEARS OLD AND UPWARDS. SELLING. By subscription of \$50 each for starters; \$35 forfeit, or only \$10 if declared out by May 15, 1903; with \$1500 added, of which \$350 to the second and \$150 to the third. The winner to be sold by auction for \$500. If entered to be sold for \$400, allowed 5 lbs.; then 1 lb. allowed for each \$100 down to \$200. Selling price to be stated through the entry-box by 2 P. M. the day preceding the race, or to carry weight for age. One Mile and a Furlong.

FOR THREE YEARS OLD.

**The Swift, \$2000 Added.** (Estimated value, \$5000).—FOR THREE YEARS OLD (Foals of 1901). By subscription of \$75 each for starters; \$30 forfeit, or only \$10 if declared out by May 15, 1903; with \$2000 added, of which \$400 to the second and \$300 to the third. Winners in 1903 of two races of \$3000, or one of \$5000, 4 lbs. extra. Other horses which have never won \$5000, allowed, if non-winners in 1903 of \$3000, 3 lbs.; of \$2500, 5 lbs.; of \$2000, 8 lbs.; of \$1500, 10 lbs.; of \$800, 15 lbs. Seven Furlongs on Futurity Course.

**The Spindrift, \$2000 Added.** (Estimated value, \$5000).—FOR THREE YEARS OLD (Foals of 1901). HANDICAP. By subscription of \$75 each; \$30 forfeit, or only \$10 if declared out by May 15, 1903; with \$2000 added, of which \$400 to the second and \$300 to the third. Weights to be announced three days before the race. Winners after announcement of weights, 5 lbs. extra. One Mile and a Furlong.

FOR TWO YEARS OLD.

**The Great Trial, \$25,000.** FOR TWO YEARS OLD (Foals of 1901). By subscription of \$200 each, or only \$15 if declared out by March 15th, \$50 if by April 15th, or \$75 if by May 15th. Each starter to pay \$250 additional. Guaranteed cash value, \$55,000. THE CONEY ISLAND JOCKEY CLUB TO ADD NOT LESS THAN \$5000. The winner to receive \$30,000, the second \$3000 and the third \$2000; winners of two races of \$3000, or one of \$8000, 7 lbs. extra; maidens allowed 5 lbs. SHOULD THE MONEY ADDED BY THE CONEY ISLAND JOCKEY CLUB INCREASE THE VALUE OF THE RACE OVER THE ADVERTISED AMOUNT, THE SURPLUS SHALL GO TO THE WINNER. Last six Furlongs of Futurity Course.

**The Double Event, \$10,000.** FOR TWO YEARS OLD (foals of 1901). By subscription of \$100 each, or only \$15 if declared out by April 15th, or \$50 if by May 15th. Starters to pay \$100 additional, which shall entitle them to start in both events. Guaranteed cash value of the two events, \$5000 each. \$1000 additional in plate or money (at the option of the winner) will be given should the two events be won by the same horse.

Guaranteed Cash Value \$7500, of which \$6000 to the winner, \$1000 to the second and \$500 to the third. Weights to be announced three days before the race. Winners after announcement of weights, 5 lbs. extra. Last Six Furlongs of Futurity Course.

### FOR THE AUTUMN MEETING, 1905.

**The Futurity, \$10,000 Added.** BY SUBSCRIPTION OF \$20, OR ONLY \$10 IF THE MONEY BE SENT WITH ENTRY for mares covered in 1902, and a further subscription of \$50 each for the produce of such mares, unless struck out by NOVEMBER 1, 1904; or \$100 unless struck out by July 15, 1905. Each starter to pay \$250 additional, all of which shall go to the second and third horses as further provided. The Coney Island Jockey Club to add TEN THOUSAND DOLLARS (\$10,000); the second to receive \$1250 of the added money and two-thirds of the starting fees; the third \$750 of the added money and one-third of the starting fees.

The nominators of the winner of the second horse and of the third horse, namely, the nominator of the mare, to receive \$2000, \$1250 and \$500 of the added money, respectively, whether they are the owners of the horse when the race takes place or not.

Colts 122 lbs., fillies and geldings 119 lbs. Winners of two races of \$3000, or one of \$5000, 4 lbs. extra; of three of \$3000, two of \$5000, or one of \$10,000, 8 lbs. extra.

If mare or stallion has not produced a winner prior to January 1, 1903, the produce will be allowed 3 lbs. for either or 5 lbs. for both, said allowance to be claimed at time of entry. Maidens allowed 5 lbs., which allowance shall not be cumulative.

If a mare nominated for this event drops her foal before the 1st of January, 1903, or if she has a dead or more than one foal, or is barren, the entry of such a mare is void, and the subscription, if paid, will be returned.

By filing prior to NOVEMBER 1, 1904, with the Coney Island Jockey Club an accepted transfer of the produce with its engagement in this event, accompanied with all forfeits to date, the original subscriber will be released from any liability as to the engagement of the produce. Six Furlongs.

Johnnie Trouble 2:15; trial 2:10.

Chloe (P) 2:13.

Bonnie Russell 2:14 1/4, trial four year old.

Conifer was bred by Hancock M. Johnston, Los Angeles, 1889. Is a rich bay, weighs 1200 lbs.; perfect in conformation and disposition; is prepotent to a degree. He combines in himself more Miss Russell blood than any other horse in the world, being sired by one distinguished son and sire, Lord Russell, (sire of Kremlin 2:07 1/4, and his dam, Carlota by Nutwood 600, Miss Russell's greatest son, thus giving Conifer her double cross. Miss Russell, the greatest dam of trotting horses of all time, transmits her extreme speed through her sons and grandsons and their get, as instanced by Kremlin, Mount Russell and Conifer, all sires of early and great speed. Conifer's beauty, ability to reproduce his good temper and conformation as well as speed, make him peculiarly desirable as a sire of roadsters and carriage horses.

Will make the Season of 1903 at LOS ANGELES RACE TRACK.

FEE \$50.

S. E. KENT, Manager.

### MAMBRINO CHIEF, JR.—11622

Sire of Geo. Washington 2:16 1/4, Dollican 2:15 1/4, Trilby 2:33 1/4, and several others in the 2:30 list. By McDonald Chief, 3:53. Dam, Venus by Mambrino Patchen 55; 2nd dam, Daughter of Wardlaw Shakespeare.

Will make the Season of 1903 at my Stable in VALLEJO.

\$20 FOR THE

Good Pasture at \$3 per month.

SEASON.

THOS. SMITH, 1021 Georgia Street, Vallejo.

### RICHMOND CHIEF 2:11

By Monroe Chief, 2:18 1/4; dam, Ela (dam of Richmond Chief, 2:11, and Viola, 2:34 1/4), by A. W. Richmond, 1887.

WE GUARANTEE that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin mixture ever made. Every bottle sold is warranted to give satisfaction. Write for testimonials showing what the most prominent horsemen say of it.  
Price, \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use.

## THE ACCEPTED STANDARD VETERINARY REMEDY

Caustic Balsam May Have Imitators, But Has No Competitors.  
**ALWAYS RELIABLE. SURE IN RESULTS.**

PREPARED exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud. Impossible to produce any scar or blemish. The safest, best blister ever used. Takes the place of all liniments for mild or severe action. Removes all bunches or Blemishes from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

None genuine without the Signature of

The Lawrence-Williams Co.,  
Sole Importers and Proprietors for the  
U. S. AND CANADA CLEVELAND, O.

### Caustic Balsam Better Than Knife

OPAL, TEX., Nov. 14, 1901.

The Lawrence-Williams Co., Cleveland, O.:  
Last spring I had a fine mare that had a grissel formed on her shoulder, and the V. S. at Springtown, Tex., told me that there was nothing that would remove it but the knife. A friend advised me to try your GOMBAULT'S CAUSTIC BALSAM. I did so and in ten days, to my surprise, the grissel was all gone. I have used the medicine for most everything and find it to be the best medicine on the market. W. G. MUSE.

### Sweeny Cured

NORWALK, CAL., Nov. 7, 1901.

The Lawrence-Williams Co., Cleveland, O.:  
Yours of Sept. 25th at hand. The case of sweeny I cured is as follows: It was a young horse, 4 years old, had been sweened on a gang plow. I had seen your advertisement in "Hoard's Dairyman" and concluded to try "GOMBAULT'S CAUSTIC BALSAM." I read the directions on sweeny that came with the bottle and applied it and rubbed it in thoroughly. Next day applied it again, but the horse would not stand as much rubbing. In five days there was a scurf, or scaling off of hair and skin. I cleaned it as well as I could and applied the Balsam again. That was the last time. I did not use any grease or other medicine or lotion. The shoulder is as even and looks as nice as it did before the injury. FRANK M. WARNER.

### Caustic Balsam Cures Sweeny

NORWALK, CAL., Sept. 20, 1901.

The Lawrence-Williams Co., Cleveland, O.:  
Please send me descriptive circular. Used GOMBAULT'S CAUSTIC BALSAM on a sweeny on fore-shoulder of horse, that was so bad that a man's hand laid on it did not near fill it up even, and can't tell that the horse ever had a sweeny now. Will the liniment cure a sweeny of several years' standing in an old horse? (Yes, L. W. Co.) FRANK M. WARNER.

### N. W. Territory Heard From

ELKTON RANCHE, DEWINTON, ALBERTA.

N. W. T., CANADA, Nov. 13, 1900.  
Having had very satisfactory results from GOMBAULT'S CAUSTIC BALSAM I thought it might be worth while writing to you and asking you whether you have any representative in this part of the world. C. DAVIDSON.

### Veterinarians Know Its Value

POMONA, CAL., June 7, 1897.

The Lawrence-Williams Co., Cleveland, O.:  
Since I have practiced my profession (veterinary surgeon) in this place, I have had occasion to prescribe your "Gombault's Caustic Balsam," contrary to my usual method of practice, which is to avoid the use or recommendation of any proprietary medicine, but experience has shown me its value. When I came here in '93 the remedy was unknown. I think if I can make some arrangement with you for an exclusive agency for this community, I can push the sale of the same in a way that will be highly satisfactory to you and profitable to myself. If you will come to some understanding with me please advise me of the terms you are willing to give. WALTER P. KELTY, V. S.

### The Results Were Extraordinary

WAPELLA, N. W. T., Feb. 13, '97.

The Lawrence-Williams Co., Cleveland, O.:  
I keep your "Gombault's Caustic Balsam" in stock. I have sold it for the last three years. I have been in the drug business in Ontario and this country, but it is not known to the majority. I sold a bottle which I saw used under my own supervision which gave most universal satisfaction. The results were extraordinary. I sell it here at \$1.50 per bottle. I am quite a horseman and would be pleased to use any pictures of the noted racers of the day, to our mutual benefit. J. A. MACDONALD.

### That Stuff is All Right

MESA, COLO., Feb. 2, '98.

The Lawrence-Williams Co., Cleveland, O.:  
Enclosed find money order for \$1.50 for which please send me one more bottle of "Gombault's Caustic Balsam." "That stuff is all right." JOS. BOGUE.

### "Gave Good Satisfaction"

LORENA, TEX., Sept. 10, '97.

The Lawrence-Williams Co., Cleveland, O.:  
Enclosed please find money order for \$1.50. Send me one bottle of Caustic Balsam. The bottle I bought some time ago gave good satisfaction. Please be prompt, as I need it at once. J. W. WHITSITT.

### LOS ANGELES DRIVING CLUB.

California can boast of one driving club that is founded on the same plan which has made the leading clubs of the East so popular. It has a very large membership and is growing in popularity all the time. It has made Los Angeles the leading point for road driving on the Pacific Coast, and about the only place where a high class road horse will bring anything like his real value.

The Los Angeles Driving Club is composed of gen-

December 8, 1900. The first board of directors, who were also selected by the club to act as the constituent incorporators, were:

Willard H. Stimson, M. L. Moore, M.D., J. J. Fay, Jr., C. H. Chandler, W. LeMoine Wills, M.D., H. Bert Ellis, M.D., N. W. Myrick, John G. Mott, Walter S. Vail, Howard G. Bundrem and Byron Erkenbrecher.

The expenses are met entirely by the membership. No purses have ever been offered on contests of speed, no admission fees charged either to owners of horses or spectators, no bookmaking or poolselling allowed, and no public bar or saloon permitted. The matinees have uniformly been workouts in classes under the auspices of the club, which supplies from its member-

boxes in the grand stand for the members. No reasonable expense has ever been spared on details. The policy of furnishing first class entertainments has been found profitable in that it strongly attracts new membership, thus increasing the income of the club.

One of the best matinees occurred last Thanksgiving day. Numerous counter attractions existed, especially a baseball exhibition by eastern experts and a football contest between the Berkeley students and the Sherman Indians. Against those counter attractions, the Driving Club was patronized by about seven thousand people, who occupied every place on the grounds available for a sight of the track and who remained until the fourteenth heat was done, well into the darkness

Fiesta Parade of Los Angeles Driving Club, showing Track front of Club House.

tllemen who love and enjoy feats of equine speed. The club was formed on the principle that true sport is not necessarily allied with gambling, or, in fact, with money making in any form. The early organization of the club was successful in point of membership and in zeal for maintenance of the club's purposes. The first organization was voluntary, without incorporation, in October, 1898, with a membership of sixty. The accession to membership was so rapid that in the fall of the year 1900, it was decided that the club would be regularly incorporated under the laws relating to social organizations. Articles of incorporation were filed with the county clerk November 26, 1900, stating the purposes of the corporation was to foster horsemanship and to promote good roads. The number of the directors was fixed at eleven. The certificate of incorporation was issued by the Secretary of State on

ship the judges, timers, marshals, starters and drivers. Printed programs are furnished embellished with appropriate special designs, making them souvenirs for those who wish to preserve them. Intervals between heats are enlivened by the best brass band music. The events at each matinee have usually been called in rapid succession, hardly more than ten minutes between heats being suffered to elapse, thus affording no more delay than is necessary for the enjoyment of the band performance. Under the amended rules of the National Association, no bar or record is acquired by the participating horses.

The matinees have attracted from the beginning the best people of Los Angeles, in number at each matinee varying from three to seven thousand. These exhibitions are made absolutely free to the public without reservations of any kind except certain

of evening.

The matinees have from time to time not only elicited great local popularity but have attracted the attention of the sporting press of the country. Hitherto the club has held a lease on the grounds of the Agricultural District No. 6, except during the week of the Agricultural District Fair. The two years' lease of those grounds has just expired. The Agricultural Park has passed into the hands of a racing association which is negotiating with the club to set apart certain reservations for its exclusive accommodation with the use of the track, grand stand and other appurtenances.

In addition to horses, the club has exerted its influence largely in favor of good roads. At the good roads' convention held at Los Angeles, the club was ably represented by a committee specially appointed, of which Dr. W. LeMoine Wills was chairman.

the convention in the way of providing for the best method of maintaining good carriage roads and the best method of maintaining them under the sanction of public law.

At the present session the committee will likely adopt some system by which the roads and streets outside of municipal boundaries will be able to provide good roads to conserve the interests of both man and horse, and to emphasize the pleasures attending horsemanship, and to the Los Angeles Driving Club and its energetic members and the credit will be due.

Among the fast trotters owned by members of the club are Toggies 2:08, Petigru 2:10, Neernut 2:12, Lou 2:14, Cozad 2:11, El Moro 2:13, Sue 2:12, Sweet Marie 2:10, Zambra 2:16 (five miles world's record 12:24), Galette 2:12, Gen. Wiles 2:15, Rex Gifford 2:14, and many others. Of the pacers driven by members of the club are Stanton Wilkes 2:10, Primrose 2:09, Athnio 2:14, Wilhelmina 2:11, Monticito Boy 2:13, Roan Wilkes 2:12, Robert I. 2:10, Hanford Medium 2:11, Caesar de Lion 2:12, and many others with

various articles that bear the stamp of the "Sunset Mill" can in advance assure himself of the purity of the goods. In addition to the mill and feed business, Mr. Dougherty will make a specialty of providing hay and other feed to accompany live stock en route to our Island possessions and Australia in the most compact form, which is so essentially necessary on our crowded steamships. We personally know Mr. Dougherty and cheerfully commend him to our readers.

If integrity, intelligence, push and vim are passports to success then is a brilliant future assured to our young mill owner.

#### Maplewood Dispersal.

The dispersal of the Maplewood stud at Portsmouth, N. H., is one of the prominent features of the coming Mid winter sale during the last week in January at Madison Square Garden. The late Hon. Frank Jones has been known for years as a discriminating buyer, and having unlimited wealth and the most expert talent at his disposal, his purchases have always been of the best. The closing out consignment numbers between thirty and forty head. Idolita 2:09½ and Betonica 2:09½ are the two stallions at the head of the stud, but a four year old Col. Carter, heretofore unknown to fame, is said to be another John A. McKerron 2:05½ and has been bred to a few of the mares. Every horseman would pick Idolita as the gem of the collection. He is now a six year old, and showed how great a race horse he was the last season at both Hartford and Baltimore. This stallion has not been in racing form since he was a three year old, until the past season, but it took a knock-down collision to beat him at Hartford and at Baltimore he was third in a neck-to-neck finish, timed separately in 2:07½. At two years he won the New England stake for trotters of that age, and at three years won the \$20,000 Horse Review Stake and the \$10,000 New England

#### The Payne Long Shaft Sulky.

When the horsemen that have come down through the Grand Circuit this season stop to think of the vast number of the Payne Long Shaft Sulky they have seen and that have been used throughout the circuit, they cannot help but think of what a great friend and of what great help it has been to them in their work. The great number of Long Shaft Sulky now in use speaks

MEDICO 2:16 1-4, Winner of First Club Race. Owned by D. J. Desmond, Los Angeles Driving Club

louder than words, and illustrates that they are fast becoming the most popular sulky built, and that no racing stable is complete without one.

The seat is low, so the driver gives no resistance to the wind, and can see every move his horse makes. The track is narrow and runs a turn very fast. Whenever there is an opening large enough for a horse's head to go through, this sulky will follow, and with no possible danger of a collision with anybody, and which overcomes the danger of being pocketed.

It is the best and most safe sulky built for racing, driving colts, and all kinds of bad acting horses, such as rearing, kicking, hopped

#### Enterprising.

Daniel Webster, on being asked if he did not think the legal profession was too much overdone to warrant a young man to devote himself to the study of law, remarked that "there is no crowding at the top." What is true of the law is equally applicable to the other pursuits of life. The subject of this sketch, Lewis A. Dougherty, a son of the well known old time rancher and breeder, Chas. M. Dougherty, shortly after his graduation and attaining his majority decided to go into the grain and produce business, was frequently told that the business was so much overdone that it would be impossible to make a success out of it. He bethought himself of the Websterian saying of "room at the top" and determined to so master the foundation and preliminary steps that he would eventually reach the top. Mr. Dougherty first acquainted himself with the wants of the market and

BASTINA 2:16 and GEN. WILES 2:15, Holders of Club Team Record of 2:26 1-2 for Los Angeles Track.

Futurity, twice defeating the champion filly Extasy 2:11½. At Readville, the past season, Idolita was timed an eighth in the stretch in 14½ seconds—a remarkable flight of speed which few trotters have been able to attain. There are great possibilities in store for such a stallion—and should he even reach championship honors, it will not surprise some who are best acquainted with this horse's speed.

Two other good ones in the Maplewood dispersal are Phoebe Onward 2:12½, a great brush mare with 2:10 speed; and Her Ladyship, a two year old by Wilkes Boy, with extreme speed. The broodmares include

horses falling, and the driver is comparatively safe.

The sulky has been drawn quarters in 29 seconds, and it has been demonstrated that the Payne Long Shaft Sulky is from a second to a second and a half faster than any high sulky built.

It is the universal opinion of drivers and trainers who use the Long Shaft Sulky that it is the most comfortable and easiest riding sulky, and one that they can hook any and all size horses to with no danger of hitting the sulky.

It can be readily determined that the Payne Long Shaft Sulky is fast becoming the most popular sulky built by the vast number now in use and used by all of the largest stables and used by such horses as Major Delmar, John A. McKerron, Anzella, Direct Hal, Prince Alert, Wilque, Baron De Shay, Daniel and The Roman.

The popularity of the Payne Long Shaft Sulky has not been confined to this country alone, but to the foreign world as well. There has been a large number sent to Russia, Germany, Austria, Denmark and Australia.

The Payne Speed Sleigh is built for speed and comfort. The

PRIMROSE 2:09 1-4, Fastest Pacer in the Los Angeles Driving Club.

saw wherein he could become a factor in filling them. After successfully conducting a general hay and grain brokerage business, he determined to still further reach out for enlargement. To this end he bought the "Sunset Mills," 810-12-14 Fourth Street, and at once proceeded organizing his business on an enduring basis. His motto being "square dealing."

The subject of mill feed for live stock is one that intimately appeals to every horse and cattle owner. In this day of adulteration, when sawdust masquerades as bran and marble dust judiciously admixed helps out the weight of middlings, whilst sweepings and other impurities so frequently find their way (or weigh) in the crushed barley sacks, it behooves the intelligent buyer to investigate the quality of food offered. One of the best safeguards is the name of some reliable miller—one who so highly values the good name of his establishment as never to permit any inferior article to leave his mill. Such is the aim and inflexible rule of Mr. Dougherty, and any consumer of the

EL MORO 2:13 1-4, Owned by Graham E. Babcock. Member Los Angeles Driving Club.

Rosamond, dam of Kingmond 2:09; Maggie McDonald 2:21½, dam of Dan M. 2:09½ and Helen D. 2:09½, etc.; Kilda 2:14½, nosed out at Louisville in 2:09; Wilbooka 2:19½; Bertha Red by Red Wilkes; Lady Boone, half sister of Nancy Hanks 2:04; Sister Euprasia, four year old trial of 2:15 and Carrie Caswell, trial 2:14.

While not the largest consignment in the Mid-Winter sale it is safe to say that there will be few more attractive, and none will call out a more representative attendance of breeders and buyers.

MAMIE B. 2:20 1-4, Owned by Secretary Dr. R. Hagan. Los Angeles Driving Club.

runners are bent out in front, which affords a very close hitch, and with no danger of the horse hitting the sleigh.

The dash is high, which prevents any snow coming in the driver's face, and the seat is well up, so the driver can see every move his horse makes and have perfect control over him.

These sleighs are built in two sizes, one man and to carry two are all finished in carmine gear and black body, which makes a very rich and handsome finish on the snow, and is without doubt the best gentlemen's speed sleigh built, as a horse is a hooked ready to speed, or for a pleasure drive.

## A Few Pointers on Zombro 2:11.

What horseman is there in California that does not recall with a thrill of pleasure and excitement the year 1895, that memorable year of three year old racing in California, when Zombro won the crown for trotters of his age and closed it with a record of 2:13. That same year he went up against the aged horse Iago, and forced that fleet son of Tempest to trot to his record of 2:11 and was only beaten a head at that. Two years after Zombro trotted to a record of 2:11 as a five year old, meeting and defeating the best horses on the circuit. It was Zombro's wonderful speed, gameness and race horse qualities that attracted the attention of breeders all over the country to McKinney as a sire, and every year since then there has been proof sufficient and conclusive furnished by the race results as published in the Year Book that Zombro was no freak, but simply the best member of a family that now occupies the very front rank in the world of speed.

Zombro is the most promising young sire on the coast to-day and is the largest money winning sire of 1902 that is now west of the Rocky Mountains. His four year old daughter Zephyr trotted to a record of 2:11 on the Grand Circuit, beat such horses as Chase 2:07½, Dulce Cor 2:08½, Maxine 2:08½, Wentworth 2:09½ and Directum Spier 2:11½, won the sum of \$6250, and in that memorable first heat at Hartford in which unfortunately the timers were not in the stand and

consequently no time was taken, trotted the mile in 2:06½ by a dozen outside watches and beat the great trotter Rhythmic 2:08 to the wire by a length. At Buffalo in the \$5000 stake for 2:24 class trotters, Zephyr won in three straight heats, and Dulce Cor 2:08½ by Baron Wilkes, Chase 2:07½ by Keeler, and Oxford Chimes, Hallie Hardin, and Alfred Star were behind her. The time was 2:11, 2:11½ and 2:12½.

At Brighton Beach Zephyr again won in straight heats, in the \$5000 stake for four year olds. Maxine 2:08½ got second place and Hallie Hardin, Horace Wilson, Belle Sligo and Directum Spier finished as named.

It was at Hartford where Geers drove Zephyr out the first heat in 2:06½ when the timers were not in the stand and no time was given out. She beat the great Rhythmic in this heat and the race went to Wilque 2:09½, the great son of Queechy.

Zombro's oldest colts are now five years old and there are but eleven of them. Of these eight have been worked for speed and every one of the eight has stepped miles in 2:30 or better in its work, including Julia M. that trotted a mile in 2:12, Lady Zombro one in 2:17, Lord Kitchenner one in 2:19½, Gold Coin one in 2:22 and Tee Dee Cee one in 2:21½. He also has eleven four year olds, of which seven have been worked. These include Zephyr 2:11, with a mile in 2:06½ in a race at Santa Ana, winner of the Occident Stake, with a trial of 2:15 as a three year old, and two others that have beaten 2:30.

Zombro's colts are all showing speed, and a finer looking lot of young trotters no man has ever seen. He has every indication of being a greater producer than his sire, McKinney 2:11½, that stands to-day as the champion of his age.

As everyone knows, Zombro was a great race horse and if trained again could restore his record five or six seconds, as he is perfectly sound, was never lame a day in his life and never had a blister put on him. He is a horse that trots on his courage and his driver does not have to beat him with a chain or rubber hose to the speed out of him. He is a good actor and has a light of speed as any horse living. The season he was worked he was given 155 heats bet-

ter than 2:30 and did not make a break in any of them. After stepping the first eighth in 15 seconds, he has stepped the last eighth in 14½ seconds and this tremendous speed did not seem to be his limit.

As an individual Zombro is superb. He stands 16½ hands, weighs 1250 pounds when in flesh and is a beautiful seal brown, with a noble head and most beautiful yet masculine expression. He has a grand mane and tail, his legs and feet are as good as were ever put under a horse and his disposition is the very best. No more intelligent horse ever lived. His colts all make fine drivers, being free and always ready to go and full of style.

Zombro won more races during his three year form than any of the McKinnies, and has to his credit eleven races in which he did not lose a heat.

Mr. Beckers, his owner, has received no less than five letters from different Eastern parties asking him to set a price on Zombro, and he has refused a bona fide offer of \$20,000 for his great horse. In selecting a stallion with which to mate your mares this year, remember that it pays to breed to the best and that the race winning stallions are the ones that are founding the great families.

Zombro will make the season of 1903 at the barn of his owner, Mr. Geo. T. Beckers, near the Los Angeles race track. His fee will be \$75 with the usual return privilege. Mr. Beckers' address is University P. O., Los Angeles, Cal.

## The Greatest Money Winning Family.

While it is doubtless true that a majority of owners who send their mares each year to be mated with a standard bred stallion, never expect to race the produce, the fact yet remains that there are very few breeders that do not anticipate the pleasure of raising a crackerjack and one that has the speed and gameness to win races on the Grand Circuit even though owned at the time by others. A point that strikes every observant breeder most forcibly when looking over the race winners of recent years, is the position occupied by the Baron Wilkes family. Baron Wilkes himself, headed the list of money winning sires year after year, he is represented by more Futurity winners than any horse ever known, and during the last season when more money was trotted and paced for on the Grand Circuit than ever before, the Baron Wilkes family won no less than 25 per cent of the entire amount. The family that gets the money is the one to breed to, and Californians are fortunate to have here this year, one of the very best bred sires of Baron Wilkes in Barondale, a stallion whose first, second and third dams are among the greatest of broodmares, and from thence to the eleventh dam are thoroughbreds of race winning families.

Barondale is himself a race horse, and made his record of 2:11½ when a four year old, in the third heat of a race and repeated the performance in a fourth heat. His oldest colts are but four years old, yet he has four in the list and three others of his get were close seconds in races last year and timed separately in from 2:13 to 2:25 on half-mile tracks. Those of his get with records are the four year old trotters Baron May 2:20½ and Baronoid 2:24½, the three year old pacer Lady Dale 2:21½ and the four year old pacer Oakdale Baron 2:19½.

Baron Wilkes, sire of Barondale, is the greatest living sire of 2:10 performers, having 9 in that exclusive list. Nathalie, the dam of Barondale 2:11½ is also the dam of that great trotter Grand Baron 2:12½ and is by the mighty Nutwood champion of all sires. Beatrice his second dam is a mare whose produce have made history in the trotting world. She is the dam of Patron 2:14½ and Prodigal 2:16, both fast trotters and producing sires, and she is also the dam of Patronage that sired the fastest trotting mare in the world, beautiful Alix 2:03½. Another of her produce is Pangloss already a producer of standard speed, and a coming great sire. Beatrice is reckoned one of the greatest of all the great broodmares and she is by that great horse Cuyler 100. The third dam of Barondale is Mary Mambribo by Mambribo Patchen. This mare is the founder of a great family that bears her name and she produced Elvira whose record of 2:18½ as a four year old to a high wheel sulky was a world's record. Then comes the thoroughbred cross through the fourth dam Bell Wagner that is a member of the famous family that produced that wonderful running mare Imp, the idol of Chillicothe that was almost unbeatable for years at all distances. It is hard to see wherein Barondale's breeding can be improved upon and he is worthy to be mated with the best mares in California. Barondale is a dark mahogany bay with black points; bred by Col. R. G. Stoner, Paris, Kentucky; passed to present owner, Tom James, Des Moines, Iowa; is standard four generations and registered under rule 6, Vol. 12, page 22, American Trotting Register. Stands fifteen and three-quarters hands high and weighs about 1200 pounds. In con-

formation he is very handsome, highly finished, abundantly supplied with bone and muscle, feet and legs of best quality, and in every respect a race horse. He is bred in the most fashionable producing lines and his present record is no indication of his speed, as his six heats in 2:12 or better, and ten in 2:15 or better, indicate.

He has a fine, handsome, shapely head, an expressive, intelligent eye, a clean cut, shapely neck, strong shoulders and back, with massive, powerful loins and quarters, a broad chest, good withers, a well rounded body and the very best disposition. In conformation

and breeding he is one of the best descendants of Baron Wilkes and Nutwood, and in every way should please the most critical breeder. Mr. James brought Barondale here last year and the horse has made one season in California. He is a sure foal getter and the colts by him that Mr. James has at San Jose are very high class lookers as well as endowed with great speed. California breeders can make no mistake in patronizing Barondale. He is a truly great representative of one of the greatest sires as well as a great line of broodmares. His service fee is \$50 for the season with usual return privileges, and Mr. James provides the very best of pasture for mares and sends them home in good condition.

## A Handsome and Promising Colt.

Up in Humboldt county there is owned at the present time by Mr. Mullady a three year old son of Mr. P. J. Williams' great stallion, Monterey 2:09½, that is destined to be one of the fastest pacers this Coast has produced. He was bred by Mr. S. Comisto, of Ferndale, who sold him to Mr. Mullady, a gentleman that is a great lover of the horse, but one who has had no experience in the racing business. When Mr. Mullady began driving the youngster he soon found that up to a three minute clip he would trot square enough, but beyond that speed he would mix it up considerably.

He put the hobbles on him a few times and the colt found his natural gait. In two months he was pacing eighths in 17 seconds, a half in 1:13 and a mile in 2:30. He does this as smooth as a machine and acts like an old time race horse. He is capable of a mile in 2:20 right now. Horsemen who have seen him say he is one of the greatest prospects in the State and the picture herewith shows that he is a very handsome individual. His breeding could hardly be excelled. He is by Monterey 2:09½, dam Hazel by Waldstein, second dam Nancy by Grand Moor, third dam Nelly by Billy Allen and fourth dam by Norfolk. He was foaled May 18, 1899, and is a bright bay in color. Mr. Mullady will breed him to a few mares this year and then have him worked for a low record.

It is said that Chase 2:07½, has a strong liking for the pace and may be switched over to it when he has reached his limit at the trot.

TWO GREAT RACE WINNING STALLIONS.

Over at Pleasanton this spring there will be standing for public service two stallions (one a pacer, the other a trotter) that have gone down the line on the Grand Circuit, met the best horses of their years and defeated them. These stallions are Searchlight 2:03½ and Lecco 2:09½ and were brought to this Coast a few weeks since by Mr. Edward Mills, who proposes to keep them here for the next for or five years at least. Searchlight is so well known on this Coast that little

SEARCHLIGHT 20:3 1-4.

need be said about his magnificent breeding and marvelous speed. He is by Dark Night, one of the greatest sons of that wonderful sire, Alecyone 2:27, and his dam is that great broodmare, Nora Mapes, dam of four in the standard list. His second and third dams are also in the great broodmare list and carry in their veins the most fashionable speed lines. Searchlight is the fastest stallion by the records that ever stood for service in California and holds two world's championships. His record of 2:04½ in a race is the race record

ONE OF A ROYAL LINE.

A green four year old filly made her appearance on the California circuit last season, started in six races and won \$1261.50 without being outside the money. She took a second heat record of 2:09½ after winning the first heat in 2:11½, and that mile was the fastest paced by a four year old filly in the United States in 1902. This performance by a big green four year old, pacing against aged horses attracted attention all over the country, but when it was announced that she was a daughter of Mr. T. W. Barstow's stallion Nearest 2:22 (son of Nutwood Wilkes 2:16½, and an own brother to that great stallion John A. McKerron 2:05½) there was little surprise expressed, as intelligent breeders have learned that it is the members of the great

ALONE 2:09 1-4

record holding families that are breeding on in this day and generation. Alone, for that is the name of the filly, paced one of the most remarkable races of the year the day she made her record at Woodland. It was a seven heat race and while Alone did not win the event, she was the contending horse in every heat but one, when a break going away put her fifth at the finish in the field of six. In the other six heats she was fighting for first place, and had no less than three different horses as contestants. Alone 2:09½ is the first and only representative that her sire has had on the turf, but there is a numerous family coming on and in the summaries of 1904, the sons and daughters of Nearest will begin to figure prominently.

Nearest, as before stated, is an own brother to the great John A. McKerron, the three time winner of the Boston Challenge Cup and the winner of every race in which he has started since he passed to the ownership of Mr. H. K. Devereux, of Cleveland, Ohio. Last year, when the final trial for the cup was trotted,

for four year olds, and his mark of 2:03½ as a five year old has only been equalled by Audubon Boy. He is a horse of rare individuality and is pronounced one of the most perfect specimens of horseflesh ever foaled. Two minute speed he can show at any time. He paced a trial in 2:02 in public at Indianapolis, pulling the heavy cart in which he is now daily exercised at Pleasanton, and the last quarter of that mile was paced in 29½ seconds. He is a horse of great substance, great speed and great endurance and a very high order of intelligence. It was at the request of California breeders who sent their mares to him two years ago and who are highly pleased with the colts, that Mr. Mills brought Searchlight back to this State.

Searchlight's sire, Dark Night, was by the same sire as the famous McKinney 2:11½, recently sold for \$25,000 and taken from California to Indiana, where he commands a fee of \$200. Searchlight will make the season of 1903 at Pleasanton race track at the reasonable fee of \$75. He is himself a great race horse—one of the greatest that ever drew applause from a grand stand full of admirers, and his breeding and individuality are such that he cannot help being a great sire of extreme speed and game race horses.

The other stallion that Mr. Mills has brought to California is the game and fast race winner Lecco 2:09½, a magnificent son of Bonnie Boy, the best producing son of Patchen Wilkes, sire of the great Joe Patchen 2:01½ that has in turn sired another champion, Dan Patch 1:59½. If a breeder wants champion race blood combined with great speed and splendid individuality he will find in Lecco a stallion to his liking. It was in 1899 that this young stallion went down the Grand Circuit, meeting the best horses of the year in his class, starting seven times and winning four first moneys, and two seconds. In the \$10,000 Massachusetts of that year, which was a seven heat affair, he won second money, taking the fourth and fifth heats in 2:13½ and 2:10½ and being the closest kind of a second to the great Charley Herr 2:07 in the sixth and seventh. Such trotters as Bonnatella 2:10, Surpol 2:10, Fred Kohl 2:07½ and ten others of the best trotters out that year finished behind Lecco in this important event.

The breeding of Lecco is worth considering, as he is an outcross for nearly every mare in California to-

day. His sire is Bonnie Boy 2:25 that has 16 in the 2:30 list. Bonnie Boy is by Patchen Wilkes, sire of the great Joe Patchen 2:01½, and his dam is the producing mare Bonnie Maid by Sherman a son of Geo. Wilkes and sire of 19 in 2:30 or better.

The dam of Lecco is the great broodmare Lucy Homer, by Homer a speed producing son of Mambrino Patchen, the great sire of broodmares and the sire of the great Mambrino King. The second dam of Lecco is also a producer, Dinnie 2:25, and she is by the producing stallion Rochester that is a son of Aberdeen, grandsire of Anzella 2:06½. His next dam is a producing mare by Clark Chief whose get are

LECCO 2:09 3-4.

renowned for speed and great endurance. For four generations in the pedigree of Lecco there is not a sire or dam but is a producer of standard speed, and they are all of the stoutest families beside. Lecco is a square trotter with perfect action, he has great beauty and style and will sire fast, game and level headed trotters. Mr. Mills has placed his service fee at the low price of \$50 with the usual return privileges.

For any further particulars as to either of these two great stallions a letter to Mr. Edward Mills at Pleasanton will bring a prompt response together with card containing complete tabulated pedigree of each.

We commend these stallions to California breeders and know they cannot go amiss in patronizing either or both of them.

John A. McKerron was pitted against the two crack trotters of the year, Lord Derby 2:05½ by the great Mambrino King, and The Monk 2:05½ by the equally great stallion Chimes. He beat them both in straight heats, trotting the middle half of one of the miles in 1:00½, the fastest flight of speed ever shown in a trotting race.

It is something worth while for a stallion to carry in his veins the identical blood that has made such a champion as John A. McKerron 2:05½ and when he has himself proven its great value by trotting to a record himself of 2:22 and sired the fastest four year old of her year, he places himself on a pinnacle that few stallions reach in a lifetime. But one other of Nearest's get was ever worked for speed. This was the mare Our Lady that Dr. O'Rear, the eminent veterinary of Indianapolis, purchased last year when he came out to pass upon McKinney's soundness for Mr. Gentry. Our Lady, with a little work, trotted a mile in 2:20½ and a half in 1:06, and the Doctor purchased her to breed to McKinney, she having a foal at her side by that horse that was a model of conformation.

Nearest is the only eight year old stallion in California with a 2:10 performer to his credit, and Alone has not reached her limit, as she will pace close to two minutes. She has been a quarter in 28½ seconds in a race and this clip will hang up the best of them including Star Pointer and Dan Patch and Prince Alert, the only two minute horses in existence.

Two of the greatest speed producing families are represented in the pedigree of Nearest. His sire Nutwood Wilkes is the sire of the fastest trotter of the Wilkes tribe—John A. McKerron 2:05½ that, as

said before, is an own brother to Nearest. His dam Ingar is the dam of three fast trotters, and is one of the best daughters of Director 2:17, the founder of one of the greatest families of race horses that has yet been produced. He is a dark bay, stands 15.3 and weighs 1200 pounds. He is well formed, brainy and game, and his disposition is perfect. His colts are uniformly large, strong and stylish, have the very best of legs and feet, and all show a great deal of speed. That he is one of the coming great sires of speed is beyond question, and as he is a sure foal getter, his family promises to be not only high class but numerous. His breeding cannot be surpassed. There is not a cross but has been celebrated for speed and endurance.

He will make the season of 1903, from February 1st to June 1st, at the stable of T. W. Barstow, his owner, on Alameda avenue, San Jose, near the entrance to Agricultural Park, in that city. The terms are but \$40 for the season, and the very best of pasturage will be furnished at \$3 per month.

Secretary E. W. Shanklin, of the Kentucky Trotting Horse Breeders Association, has decided that the Lexington track can be made faster, and he has a large number of men at work on it already. Improvements will be made on the turns at the quarter pole and above the half mile pole, and at other points. The resoling will take about three weeks' work, and then the track will be covered with straw and allowed to rest until early in the spring, when it will be conditioned for training operations.

NEAREST 2:22

### NUTWOOD STOCK FARM.

If the question should be asked "What stallion in California can I send a mare to with the certainty of making a profit on the investment of stud fee and money expended in raising the colt to maturity?" the answer would naturally be, Nutwood Wilkes 2:16½, sire of the champion stallion John A. McKerron 2:05½, record made in 1902 at Memphis. The reasons for this reply are evident. In the first place the produce of Nutwood Wilkes are noted for size and good looks, good legs and feet, fine dispositions, extreme and early speed and the racing instinct. They are not numerous as yet, as it has only been in the past three years that Nutwood Wilkes has been patronized liberally in the

stud, and very few of his get of racing age have appeared on the turf. Yet he is the sire of the champion trotting stallion to wagon, has six representatives in the exclusive 2:15 list and is considered the leading speed sire in California to-day.

Nutwood Stock Farm is the property of Mr. Martin Carter, who for years has been one of the most progressive breeders on the Pacific slope. Possessing a very choice, though not large number of mares, he has regularly sent them to be mated with the best stallions in California, and with the result that there is now in training and on the farm a collection of mares and fillies that represent the very acme of breeding. In conversation with Mr. Carter recently, a representative of the BREEDER AND SPORTSMAN asked him to send a list of the horses he had in training and on the farm, and he complied with the following:

#### AT PLEASANTON IN CHARGE OF WM. CECIL, TRAINER.

T. C., c h, four years old, three year old record 2:30, trial 2:20½, by Nutwood Wilkes 2:16½; dam Zeta Carter by Director 2:17, grandam Lida W. 2:18½ by Nutwood 2:18½, etc.

Miss Georgie, b m, three year old record 2:25, trial one-half 1:06, one-quarter 0:31½, by McKinney 2:11½; dam Georgio B. 2:12½ by Nutwood Wilkes.

L. E. C., b g, record 2:29½, one-quarter in 0:33½, by Nutwood Wilkes 2:16½; dam Lady Mine, dam of three in the list by California Nutwood; grandam Lou G. by Albert W. 2:20.

Bay filly two years old by Nutwood Wilkes 2:16½; dam by Long Branch by Antevolo; grandam by California Nutwood, great grandam by Speculation.

Bay filly, two years old by Nutwood Wilkes 2:16½; dam by Direct Line, grandam by California Nutwood. These two fillies are very promising.

Bob Ingersoll 2:14½, and Irvington Boy 2:17½ both by Nutwood Wilkes. Bob Ingersoll and Irvington Boy both belong to Mr. W. M. Cecil. He also has in his stable a grand looking chestnut colt, two years old by Nutwood Wilkes 2:16½; dam full sister to Coney 2:02 by McKinney. Also a yearling filly by McKinney 2:11½; dam 2:28½ by Nutwood Wilkes 2:16½ that are very promising. It looks from what I have seen that the Nutwood Wilkes and McKinney are a happy nick, and the sure line to get great race horses with extreme speed.

#### STOCK AT THE NUTWOOD STOCK FARM.

Chestnut filly, one year old by T. C. 2:30; dam Hessel, by California Nutwood, grandam by Anteo 2:16½, great grandam Queen by Venture 2:27½. Bay filly one year old by Klatawah 2:05½, three year old world record, dam Queen C. 2:28½ by Nutwood Wilkes 2:16½, grandam Queen by Venture 2:27½. Chestnut filly, one year old by Nutwood Wilkes; dam by Direct Line, grandam Lady Mine, three in the list, great grandam Lou G. four in the list. Grey filly, one year old by Nutwood Wilkes; dam Little Witch 2:27 by Director 2:17. Chestnut colt, one year old by Nutwood Wilkes; dam by Anteo 2:20, grandam by Pleasant 2:14½, great grandam 2:21 by Electioneer; great great grandam Aurora 2:27 by John Nelson. Chestnut colt, one year old by Nutwood Wilkes; dam by Boodle. Bay colt by Nutwood Wilkes; dam Black Line by Direct Line, second dam Lou G. by Albert W. Bay gelding, one year old by Nutwood Wilkes; dam by Wilkesdale 2:29, grandam by Caliban by Guy Wilkes 2:15½, great grandam by John Nelson. Bay filly, two years old by searchlight 2:04½; dam Zeta Carter, dam of T. C. 2:30 by Director 2:17, grandam Lida W. 2:18½ by Nutwood 2:18½. Lida W. 2:18½ is dam of Nutwood Wilkes 2:16½, sire of the great John A. McKerron 2:05½, the fastest trotting member

of the great Wilkes family. This filly is very promising. Bay filly, two years old by Nutwood Wilkes; dam Lady Mine, three in the list, by California Nutwood; dam Lou G., four in the list, by Albert W. 2:20. Bay gelding, two years old by McKinney 2:11½; dam Lida W. 2:18½ by Nutwood 2:18½. Chestnut colt, two years old full brother to John A. McKerron 2:05½. Bay colt, weanling by Bonnie Direct 2:05½; dam by Nutwood Wilkes 2:16½, grandam Lou G. by Albert W. 2:20. This is a grand looking and a lot trotter from the old home. And just look at the combination—Guy Wilkes 2:15½, Nutwood 2:18½, Bonnie Direct 2:05½ and Albert W. 2:20. Bay colt, weanling by Zombro 2:11; dam Lida W. 2:18½. This is a grand looking colt. Bay weanling colt by T. C. 2:30; dam Lou G. four in the list by Albert W. 2:20. This fellow also has the combination—Wilkes, Nutwood, Director and Electioneer. Bay colt, weanling full brother to John A. McKerron 2:05½. Mr. Cecil says he will take the little chap and I can have all the balance. Bay filly, weanling by Mendocino 2:19½ sire of Monte Carlo 2:09½ and Idolita 2:09½ (made this season); dam Mamie R. full sister to John A. McKerron. Mr. Salisbury says, this little miss will suit him. Chestnut filly, weanling by Nutwood Wilkes 2:16½; dam Zeta Carter by Director 2:17, grandam Lida W. 2:18½. Bay filly, weanling by Nutwood Wilkes 2:16½; dam by Wilkesdale, grandam by John Nelson, and several others by Nutwood Wilkes 2:16½, out of mares of various breeding. Chestnut mare by Nutwood Wilkes; dam Ingar by Director 2:17, grandam Annie Titus by Echo, etc. This is a full sister to John A. McKerron 2:05½, and is very promising. Bonnie Derby trial one-quarter in 0:33 by Chas. Derby 2:20; dam Bon Bon 2:26, dam of Bonnie Direct 2:05½ and Bonsilene 2:14½ by Simmons 2:28, grandam Bonnie Wilkes 2:29½, dam of four in the list by George Wilkes 2:22, great grandam Betty Wiley dam of Bonnie Wilkes 2:29½ by Bob Johnson son of Boston, and on to the fourteenth dam thoroughbred. Two full sisters to Bob Ingersoll 2:14½ by Nutwood Wilkes 2:16½; dam Lou G. by Albert W. 2:20. Georgie B. 2:12½ by Nutwood Wilkes 2:16½; dam Myra by California Nutwood, second dam Kitty by Speculation. Georgie is the dam of Miss Georgie, record 2:25, one-quarter in 0:31½ by McKinney 2:11½, and she is now in foal to Zolock 2:10½. Lida W. 2:18½ by Nutwood 2:18½, safely in foal to Stam B. 2:11½. Queen C. 2:28½ by Nutwood Wilkes 2:16½; dam Queen by Venture 2:27½ is safely in foal to T. C. 2:30. Lou G. by Albert W. 2:20 dam of four and Lady Mine (three in the list) by California Nutwood, second dam Lou G. by Albert W. 2:20 and numerous others by different sires in foal to Nutwood Wilkes 2:16½ and T. C. 2:30.

Now comes something that will cause the king maker, Monroes Salisbury, to laugh and say, "Oh, my! I wish I had some of those young cubs old enough to go on and race the boys with." Little Witch 2:27, gray mare by Director 2:17 (dam is being traced), in foal to T. C. 2:30. Ingar, brown mare by Director 2:17, dam Annie Titus (dam of Annie C. 2:23½ by Echo); second dam the Tiffany mare, dam by Gibraltar 2:22½. Ingar is the dam of John A. McKerron 2:05½ and two others and is in foal to T. C.

Zeta Carter, dam of T. C. 2:30, by Director 2:17; second dam Lida W. 2:18½ by Nutwood 2:18½, etc., in foal to the great Bonnie Direct 2:05½. So you will see that the produce of the above three mares will have a double cross of the so-called iron horse, the great Director 2:17, that Uncle Sol used to make the boys look so cheap with. I have always liked the Hambletonian—Star branches of the Hambletonian family, handed down as it is through the great Director. In my opinion it cannot be beaten. It is like a good old mine that improves with age. I bred to the little black rascal Direct 2:05½ three times, but failed to get a colt, but am well supplied now through Director 2:17, Bonnie Direct 2:05½ and Direct Line 2:25½ and I look for some more John A. McKerrons, 2:05½, to be trotted out from here most any time. They say lightning don't strike twice in the same place, but I always will think that if Nutwood Wilkes 2:16½, the sire of McKerron 2:05½, had been handled the same as McKerron he would have been just as fast, as he had much more speed with the same handling. He was a natural good-headed trotter with extreme speed and seems to impart it to his produce. He seems to nick with all strains of blood and get early and extreme speed and it looks now as if his daughters were going to make good broodmares, as the few of his daughters that have been bred all seem to produce speed.

So, Mr. Editor, you will see by the above that I have been breeding on broadminded principles. I have bred to all first class stallions that have come to this State since I have been in the business, and they are all represented here, and visitors can see most any strain of blood they wish while at the farm.

Nutwood Wilkes 2:16½ was a trotter himself. His sire, Guy Wilkes 2:15½, was a great race horse. His dam, Lida W. 2:18½, was a very fast mare, by the great Nutwood 2:18½, that outranks all sires living or dead, both as to sire and broodmare sire. So, to sum this matter up, Nutwood Wilkes 2:16½, a race horse himself, his daughters are producing race horses; his son, Nearest, full brother to John A. McKerron 2:05½, the fastest trotting member of the great Wilkes family, sired the great mare Alone, four year old record 2:09½ last season, the only one that has been trained to date to my knowledge.

Now, with Nutwood Wilkes' qualifications, together with the great qualifications of his ancestors on both sides, and looking this matter square in the face from a business standpoint and one that will bring quick returns for money invested, I can see nothing left but to send in your mares by the different first class stallions in the State. If they have fast records or are producers, or both, so much the better. In this case all that is left is the possible nick, and that you should get very often. There is money in the breeding business on these lines. There were several horses in the East this season that won from \$5,000 to \$30,000. So, if one should strike a good one, it is a quick way to get rich.

Yours truly,

MARTIN CARTER.

### Suggestion for an Outing.

There is no place in California where a lover of the harness horse can pass a more enjoyable time than at Pleasanton, famed all over the United States as the horse centre of the Pacific Coast. The historic Pleasanton Race Track, where so many world's champions have been made, is still the Mecca of trainers, and no track on the Coast is as popular with speed makers, or has so many horses in training. A visit to Pleasanton is not complete without dinner at the Rose Hotel, one of the landmarks of the beautiful little town, and since A. S. Olney & Son assumed proprietorship last year, one of the best kept hotels in California. Wednesdays and Saturdays are workout days at the

track and on those days especial provision is made for the entertainment of visitors at the Rose Hotel. Under the new management the entire building has been renovated and furnished and guests can now be accommodated with as finely fitted suites as can be found in any of the leading caravanseries of the metropolis. There is no trip that can be taken with more pleasure than a Saturday and Sunday at the Rose Hotel at Pleasanton. The time spent at the track, watching the horses, is just like attending a race meeting and quarters and halves at two minute speed are often seen. When the track work is over there is a splendid dinner to sit down to at the Rose, and never were meals better cooked or better served than those which are prepared by the chef at this hotel. The Rose is headquarters for horsemen and the stories that are related "around the stove" there on any evening are worth going a long way to hear, as the champions of the stove circuit often congregate there and not one of them has ever been known to throw a race or pull a heat in one of these hot air contests. We can recommend no pleasanter outing at this season of the year than a few days at the Rose Hotel, Pleasanton. A line to Messrs. Olney & Sons, proprietors, will bring by return mail full particulars as to prices, etc.

### The Baywood Stud.

Success in any business is assured when there is a demand for its product which is constant and active. The Baywood Stud, San Mateo, Cal., the property of Mr. John Parrott, may congratulate itself by the above rule, with having already achieved success, although a comparatively young establishment among those devoted to breeding high class horses in California. During the year just closed it has sold several thousand dollars worth of horses. Conspicuous among the purchasers have been Templeton Crocker, Esq., of this city; Lewis Bradbury, Esq., of Los Angeles; W. A. Boole, Esq., of Rose Valley; Hon. S. M. Damon, of Hawaii, and others. It has had inquiries for more horses than it could supply, which may seem strange to some, but the Baywood Stud never accepts money for a horse or a pair that is not thoroughly schooled in the work for which they are intended. The prospects for the present year's matched pairs and single horses are excellent. It has booked ahead several important orders which it hopes to be able to fill satisfactorily.

Imported Green's Rufus, the premier stallion of the Baywood Stud, is in splendid condition and will be ready on time to meet his stud engagements for 1903. He will be twelve years old, having reached the most prepotent, and hence valuable, years of a stallion's life, and the effect of his blood in a cross with trotting bred mares will be very marked. He will stand at the same fee (\$75) as last year, and will serve a limited number of approved mares.

The fact that the prices obtained for carriage and park horses averaged higher last year than for any other class, should not escape the attention of breeders, and the further fact that a very large proportion of the highest priced ones were obtained by crossing trotting bred mares on hackney stallions should be a guide to those who aim to produce the best in this line.

## THE SANTA ROSA STOCK FARM.

There are only a few of the stock farms left in California that have made this State famous and only one that has sent representatives East to battle with the best trotters and pacers on the great circuit, and that one is the Santa Rosa Stock Farm, owned by Messrs. Henry and Ira Pierce. The marvelous records achieved by the horses bred and owned by these gentlemen, are the main topics of conversation among horsemen everywhere, and no items in the daily papers were the subjects of more universal discussion on this Coast than the stories of the races in which Dolly Dillon 2:07, Janice 2:08½, Anzella 2:07, and Sir Albert S. 2:03½ figured. Space forbids us giving a detailed description of the magnificent farm and race track within the city limits of Santa Rosa from whence these and at least a score of others are now being prepared for the races. It is familiar to everyone interested in horses in California. There is a new inside track being built, however, and all the large buildings have been renovated and painted and the main track has been covered with a new layer of soil, making it one of the safest and best in this State.

The premier stallion here is Sidney Dillon, a perfectly proportioned son of that great sire of early and extreme speed, Sidney 2:19½, out of the famous mare Venus, dam of Adonis 2:11½, Leah 2:18½ and Cupid 2:18 (sire of Venus II. 2:11½, Psyche 2:16½, etc.), and grandam of Mercury 2:21 (sire of Twinkle 2:05½) and Idaho, yearling record 2:30, by Venture 2:27½ (sire of dam of Directum 2:05½), son of Williamson's Belmont; second dam by Whipple's Hambletonian 725

2:25 list) by Alcantara 2:23; third dam Miss Buchanan (dam of Escape 2:26½) by Clark Chief 89. There is enough of George Wilkes and Alma Mater blood in this grand individual to suit any one.

In the paddocks are the choicest broodmares that money could buy. They are by such sires as Electioneer, Mendocino 2:19½, Diablo 2:09½, Directum 2:05½, Direct 2:05½, Charles Derby 2:20, Simmons 2:28, Simmocolon 2:13½, Nutwood 2:18½, Guy Wilkes 2:15½, Anteeo 2:16½, Milton Medium, Altamont 2:26½, Bay Rose 2:20½, Gen. Benton, Palo Alto 2:08½, Stamboul 2:07½, Steinway 2:25½, C. M. Clay, Jr., Piedmont 2:17½ and Abbottsford 2:19½. In fact, every standard bred stallion of note in California has his best representatives here, and there is not a non-standard colt or filly on the whole magnificent place. Every youngster is for sale, and breeders who are seeking the best and owners who want only the fastest should look no further in California than this farm.

The record made by the Santa Rosa Stock Farm mare, Anzella 2:06½, is familiar to all our readers. There never was a mare sent from California, with the exception of the other Santa Rosa mare, Dolly Dillon 2:07, that created a more favorable impression on the Grand Circuit than the wonderful daughter of Antrim. Handled by Millard T. Sanders, she went down the line winning race after race in the most sensational style. Her first start was made at Detroit, where she won the 2:11 class, trotting the third and fourth heats in 2:09½, 2:10½. At Cleveland she won the 2:10 class, trotting two heats in 2:08½, 2:08½. She next won the 2:10 class at Buffalo in 2:10½, 2:12½. At Brighton Beach in the 2:07 class she achieved a sensational conquest of The Monk 2:05½, forcing him out in 2:09½, 2:07½, and then beating him in 2:07½, 2:08, 2:08½. At Readville she won the 2:09 class, the first heat in

time of 28½ seconds, where he made an unexpected break and was beaten in the extraordinary time of 57½ seconds. It was no disgrace for Sir Albert S. to be beaten such a race by such a horse, but Mr. Sanders is confident that he would have won but for the break. It was ascertained after the race what had caused him to make that disastrous break. He had struck himself above the knee, very near the elbow on the outside, and knocked off a piece of skin and flesh about as large as a silver dollar, nevertheless, Mr. Sanders started him in the novelty race two days after and he won the first heat in 2:04½ and the second mile he trotted, and was timed in 2:04 and in the last half mile dash he was only beaten a head in 1:00½.

This year Millard F. Sanders has taken his string to Pleasanton and will, if nothing happens, repeat the successes of the past two years.

It is a matter of pride with every horseman to speak in the highest terms of the Santa Rosa Stock Farm and its gentlemanly and enterprising owners. This farm is only one of a number of enterprises they are interested in. Everything receives their personal attention and every detail of the business—buying, breeding, caring for, training and selling—is a matter of study, and the success which has crowned their efforts can be attributed to their devotion for man's best friend.

WM. G. LAYNG.

### "Good Things Come to the Top"

every time," said the superintendent of one of the largest and best stock farms. "It is so among the large winners, and the same in remedies, harness, sulky boots, etc. For example there is the Spohn's Distemper and Cough Cure. Why, do you remember what a serious time we used to have with distemper, catarrhal fever, pink eye and shipping fever? And how it left horses in bleached condition?

And here came these people who compound the Spohn's Cure and showed that the old methods of treating this class of diseases is not the rational, natural one to follow, and with their simple easy to use spray to the very top of popularity. It is but a half dozen years since it was put on the market, and now it is one of the big sellers in the veterinary line. Why? Because it is one of the "good things," and we are compelled to believe about the only good thing as a distemper cure."

This man spoke the truth. The gentleman is Harry Burgoine, Superintendent Walnut Hill Farm, where Ed Benyon is trainer. The first year on the market 1000 bottles were sold and this, the eighth year over 134,000 bottles have been sold. 98% of all training and racing stables in the Grand Circuit use Spohn's, and over 75% of all other stables, and 79% of all stock farms in the United States. Remember, Spohn's comes only in liquid form, and is manufactured at Goshen, Ind. Be sure to remember the name and place, and avoid substitutes. Spohn's Cure will keep a horse from getting distemper when he is exposed to the disease. Ask your druggist for it or send to the manufacturers, who will pay express charges. They will mail you their booklet free, if you drop a postal card asking for it. Write to Spohn's Medical Company, Goshen, Ind.

### Hera and Mabel G. For Sale.

An advertiser offers to sell through the columns of this paper, two mares with their colts that should be a profitable investment. These mares are Hera 2:20½ and Mabel G., trial 2:6 trotting. Hera was one of the fastest mares ever trained in California. She is by Mambrino Wilkes out of Kitty by Conductor 18779, and her record was made over the Reno track years ago when it was considered four or five seconds slow. She has two colts, one a yearling by Welcome 2:10½, the other a suckling by Monterey 2:09½. Both are entered and fully paid up in the Breeders \$6000 of their respective years, and the suckling is entered in the Hartford Futurity, \$10,000 stake. Mabel S., the other mare, is by Brigadier, and has a fine suckling at her side by Chas. Marvin, full brother to Don Lowell. It is entered in the Hartford Futurity also. They can be seen any day at the residence of the owner, P. H. Sexton, 1801 Union street, corner 26th street, Oakland.

### About Clipping Horses.

A Review correspondent wishes to know the advantages to be derived from clipping horses. We depart from our rule of answering questions in our pages, just this once, as the subject is of interest to all our friends.

First—The natural process of moulting or shedding the hair is a draft on the vitality of the animal. The animal is irksome during the period, and with a work or pleasure horse exertion is irksome during the period. Clipping, or artificial removal of the hair, accomplishes in a very short space of time what Nature requires much more time to do. In other words, Nature is anticipated in her work and the animal's system saved a call upon it.

Second—A clipped horse is less liable to take cold than a long-coated horse, because the evaporation of perspiration is more rapid. A "hot" horse will cool off quicker with a short coat. Every groom is aware of this fact.

Third—A clipped horse requires less fuel (food) to maintain bodily heat than the long-coated horse; therefore clipping as a matter of economy should be generally practiced.

Fourth—A clipped horse looks cleaner, acts more sprightly and keeps in better health. Horses intended for the sale or show ring should be clipped at least two weeks before the event. There will be a marked improvement in weight and appearance, with manifest advantage to the owner's pocket book. These points about cover the ground. We add that clipping machines are cheap, that all horse owners can afford to have one.—Horse Review.

### Worth Your Consideration.

The season is approaching during which nearly all troubles with the feet of horses begin. The mud and rain, and with it mixed with rain and snow water, penetrates into the pores of the coronet, causing fever of the coronet, which absolutely prevents a growth of strong, healthy, new hoof. It soaks into the skin of the leg and fetlock, causing cracked and greased heels, scratches and most obstinate skin diseases. The pores of the foot open up during the day, and absorb this water and filth, then dry out and contract each night. This process is continually going on every day and night during the fall and winter months, the result being that contracted feet, corns, brittle feet, quarter cracks, wasted, dry, hard frogs and general soreness appears when the dryness of spring and summer appears. Campbell's Horse Foot Remedy will prevent and cure these troubles. Your dealer is authorized to guarantee any claim made for it.

A lot of McMurray carts just received. You need one right now to work your colts in this winter. Call at the Kenney Manufacturing Company, Valencia street and take a look at these other first-class vehicles they have for sale.

Dolly Dillon 2:07 by Sidney Dillon.

(sire of dam of Azote 2:04½, etc.) The dam of this Hambletonian mare was owned by Sabin Harris, of Oakland. He brought her from Illinois and bred her to Whipple's Hambletonian, and the filly that came he bred to Venture when the latter was in charge of Dennis Gannon. Affidavits of the history of the maternal line of Sidney Dillon's breeding are being made and will soon appear in these columns. Sidney Dillon is the sire of Dolly Dillon 2:07, B. S. Dillon 2:25, trial 2:10; Captivity 2:28½ and Lou Dillon, trial 2:08, half in in 1:01½, this year at Memphis, the greatest and best prospect in the trotting world to-day.

L. W. Russell is another young stallion whose progeny are coming to the front. He is by Stamboul 2:07½ out of Bye Bye (dam of Marengo King 2:29½ and sister of Lockheart 2:08½) by Nutwood 2:18½; second dam Rapidan by Dictator, etc. L. W. Russell has to his credit Almareta 2:25, Madonna Russell 2:25½, Lady Pansy Russell 2:26½ and Pansy Russell 2:30. This farm has a five year old called Marengo King 2:29½ by McKinney out of the \$10,000 Bye Bye. He is one of the handsomest McKinneys ever foaled. Mr. Sanders says 2:12, at least, will be his mark this season. A two year old brother of the King, also several other two year olds by the renowned son of Alcyone 2:27 and Rosa Sprague are here. One is from Biscari (dam of Stambold 2:18½, Guycara 2:18½, B. S. Dillon 2:25 and Stamboulita 2:27) by Director 2:17; second dam Bicara (dam of Pancoast 2:21½, etc.) by Harold; third dam Belle (dam of Belmont 64 and McCurdy's Hambletonian 2:26½) by Mambrino Chief. Another is out of Carlotta Wilkes (dam of Volita 2:24) by Charley Wilkes 2:21½; second dam Aspasia (dam of two in the

2:08½, third in 2:07½. She then appeared at Hartford, where she won the classic \$10,000 Charter Oak purse, for 2:11 trotters, taking the last three of five heats in 2:09½, 2:12, 2:11½. At Baltimore in the \$5,000 Pimlico purse for the 2:11 class, she won three straight heats in 2:07½, 2:08½, 2:08½. At Cincinnati she was again victor in one of the most sensational races of the year, the \$10,000 Ohio purse, in which she beat Major Delmar 2:05½, Rhythmic 2:08, Ozanam 2:08, Susie J. 2:06½, Monte Carlo 2:09½, Baron de Shay 2:08½, Nutbearer 2:09½ and the King 2:10½, after a great six-heat race, over a very heavy track, she taking the last three heats in 2:13, 2:12½, 2:13½. All told, Anzella won eight races, \$21,600 and twenty-two heats in the average time of 2:09½. Her achievements have caused her to be generally acclaimed the best trotting mare produced since Alix 2:03½.

Dolly Dillon, with a record of 2:07 and the reputation of being the fastest mare of 1901, was placed and a contender in five fast races on the Grand Circuit.

Sir Albert S. 2:03½ also represented this farm. He earned a splendid reputation in California in 1901, winning eighteen heats, average time 2:11½, and was undefeated and never made a break. He was entered in \$35,000 worth of eastern stakes for 1902, but through an accident which injured one of his legs was unable to start until late in the season, at Lexington.

Here he showed the most sensational form, defeating a field of twelve cracks in 2:03½, 2:06½, 2:06½. At Memphis he won the 2:08 pace, second and fourth heats, in 2:04½, 2:07½. He was then matched against the champion gelding, Prince Alert 2:00, for a half-mile dash. He led past the quarter in the record-breaking

Salsbury Building, Melbourne, Australia

San Francisco, Saturday, January 10, 1903.

**THE LOS ANGELES JOCKEY CLUB** announces in this issue the stakes to be run at its meeting which opens January 31st. There will be over-night handicaps and special races to suit all classes of horses. The stakes are to close Monday, January 19. Mars Cassidy of Washington has agreed to act as starter and the management hopes to get one or two of the Washington Park judges. The stakes are the Montgomery handicap, for three year olds, distance one mile—Entrance \$10, and \$40 additional to start, with \$1000 added and a silver cup to winner. Hotel Potter handicap, for three year olds and upwards, one mile and a sixteenth—Entrance \$5 and \$30 additional to start, with \$500 added and a silver cup to the winner. Los Angeles Railway selling stakes, for three year olds and upward—Entrance \$5 and \$25 more to start, with \$500 added. Distance one mile. Hotel Rosslyn handicap, for three year olds and upward, one mile and a sixteenth—Entrance \$5 and \$30 additional to start. Silver cup to winner. Hotel Nadeau stakes and the Young stakes, for two year olds, at four furlongs—Entrance \$5 and \$30 additional to start, and with added money of \$400 for each, and silver cups to winners. There is another race for three year olds and upward, one mile and a sixteenth—Entrance \$5 and \$30 additional to start, and \$500 added. Those entered for \$1800 to carry weight for age, with one pound off for each \$100 to \$1000. Silver cup to winner.

Mr. J. W. Brooks is the manager of the meeting and Mr. E. J. Power will act as handicapper. It is expected that four or five hundred horses will be on the grounds and at least ten books will cut in on the first day. The outlook is for a very successful meeting.

## PAYMENTS in the Pacific Breeders Futurity

Stakes, Nos. 1 and 2, which were due and payable January 1st, have been more numerous than was expected, and show the great interest that is taken in these colt events. No less than 122 colts and fillies, now two year olds, have been paid up on in Stake No. 1, which was for the foals of mares bred in 1900. These on which payment has been made are all eligible to start in the two year old trotting and pacing divisions of this stake which will be decided at the meeting of the Pacific Coast Trotting Horse Breeders meeting this year, the only additional payment required of them being the starting fee. For Stake No. 2, which is for the foals of mares bred in 1901, 175 payments were made on January 1st. This is also a magnificent showing and the probabilities are that both stakes will be worth more than the \$6000 guaranteed. In our next issue the complete lists of the colts entered in these two stakes on which payments were made January 1st, will appear, and no greater testimonial to the popularity of colt stakes, or confidence in that sporting organization the Pacific Coast Trotting Horse Breeders Association could be published.

**THE BIG WINTER SALE** to be held January 27th to 31st by the Fasig-Tipton Company at Madison Square Garden, New York, will be one of the greatest sales of record for trotting and pacing horses ever known. To begin with there are six trotters in the sale with records of 2:10 or better, all made in 1902. But none of these are named in the page advertisement of the sale which appears in this issue, but come that page went to press the great trotting mare, Blad, in 2:06 by Jack Dawson with the ability to be added to the sale. Blad is one of the best prospects for the free-for-all class in the country. This is not only a star sale, but a sale and this is the very last chance to make the

consignment of a good horse if you have one for this sale. The best buyers in America and a number from Europe will be at the sale and this is the opportunity to sell. You must act at once however and wire the Fasig-Tipton Company to-day in regard to the matter or it will be too late. Read the page advertisement carefully. It is not only entertaining, but instructive.

**A GREAT SALE** is to be held on Thursday evening, January 29th, by Fred H. Chase & Co. at the popular old salesyard corner of Market street and Van Ness avenue in this city, which will be one of the most remarkable ever held in California. At 7:30 o'clock on the evening stated, there will be led into the splendid new brilliantly lighted fire proof pavilion recently erected by these enterprising live stock auctioneers, forty-nine two year old colts, fillies and geldings, the entire crop of the foals of 1901 of the famous Palo Alto Stock Farm. As every California admirer of that grandest of the equine breed, the American trotting horse, well knows, and profoundly regrets, Palo Alto Farm is soon to be a thing of the past. This grand breeding farm whereon has been bred more champions than ever were foaled at any stud, however famous, is to be turned to other uses, and the grand collection of stallions, broodmares and colts are to be disposed of by auction. We of California have felt such a pride in the place, and have watched with such interest, the advancement, development and firm establishment of a breeding plan evolved by the mind of a great man, now dead and gone, that it is hard for us to believe that the grand and successful enterprise is to be discontinued. But, alas, it is too true, and while we must note the fact with the deepest regret, we should be thankful that on this occasion when the last of the two year olds (representing as they do the very acme of the breeding theories of the lamented Senator Stanford) are to be sold, the breeders of California will have an opportunity to bid on them. As is well known, there are very few stallions owned in California that were bred at Palo Alto. The demand for the stock over East and the high prices offered for the farm's young studs, caused them to be sent across the mountains to be sold, and for that reason California farms are well stocked with Wilkes and other choicest lines, but are short on the blood of Electioneer, probably the greatest of all speed progenitors. Here consequently an occasion offers that should not be overlooked. There are eight young stallions, bred in royal lines, by sons or grandsons of Electioneer, and twenty-five fillies, also of the choicest breeding, that are rich in the same blood lines. These young stallions mated with the mares of California, and the fillies sent to our numerous high class stallions cannot help but produce future record breakers and race winners and make for their owners not only profit but fame. In another column will be found a short synopsis of the breeding of these colts and fillies, written by Superintendent F. W. Covey of the Palo Alto Farm, and we desire to call the attention of our readers to the same, and to suggest that they write immediately to Fred H. Chase & Co. for a catalogue, which will give each two year old's breeding in full, and a statement of his or her stake engagements. The consignment will be at the salesyard on Tuesday, January 27th, and an invitation is extended the public to call and look them over. Such good judges as Monroe Salisbury, Ben Walker, Budd Doble, Sam Gamble, J. C. Bray and others who have visited the Palo Alto Farm recently say this is the grandest lot of two year olds they ever saw. On the night of the sale Superintendent Covey will be present to announce the name and pedigree of each animal offered and he may well be proud of the youngsters that are to be led into the ring. Mr. Covey has been on the farm from boyhood, and with a love and veneration that amounts almost to worship for the great man whose brain and energy and wealth established Palo Alto, he has followed closely to the plans of breeding as laid down by him, and is just now reaching the point that the Senator aimed for in the production of the highest type of the trotting horse. It is with the utmost candor that we say to our readers, attend this sale by all means and bid on these two year olds to be offered. Money paid for them will be well invested and pay a large profit if the colts and fillies are properly handled. There are many great racing prospects among them, colts and fillies that are entered in thousands of dollars worth of stakes, but aside from the opportunity to get a stake winner, we advise California breeders that these youngsters are excellent investments for breeding purposes alone. Don't miss this, the greatest opportunity you will ever have in this line.

**ENTRIES FOR THE OCCIDENT STAKE** of 1905 are more numerous than ever in the history of this great stake. There are over ninety of them, and it is expected the stake will be worth \$5000. The list of entries will be given out next week.

**JUST BEFORE RETIRING FROM OFFICE**, Governor Gage appointed the following new directors of the California State Board of Agriculture: L. J. Rose Jr. of Oxnard, vice L. Harris, resigned; William Land of Sacramento, vice Park Henshaw, term expired; James Whittaker of Galt, vice A. W. Barrett, term expired; Thomas Fox of Sacramento, vice Frederick Cox, term expired. The Board is now composed of the following well known gentlemen: A. B. Spreckels of San Francisco, F. W. Covey of Palo Alto, Grove L. Johnson of Sacramento, M. D. Chamberlain of Woodland, J. E. Terry of Sacramento, Benjamin Rush of Suisun, John Mackey, C. W. Paine, Thomas Fox and William Land of Sacramento, L. J. Rose Jr. of Oxnard and James Whittaker of Galt. Since the death of Secretary Geo. W. Jackson, the duties of the office have been performed by Assistant Secretary Harry Lowden. The Board meets in February to elect a new Secretary and there will doubtless be quite a lively contest over the office.

## The Handsome Mare, Diablita 2:15 1-4.

Among the several animals that appeared on the California circuit last year that were conspicuous for their handsome proportions as well as speed, was the mare Diablita, that paced to a record of 2:15 1/4 in a winning race. Diablita was sired by that handsome stallion and sire of extreme speed and good looks, Diabolo 2:09 1/4, and her dam is Salinas Maid 2:30 by Junio (son of Electioneer and sire of Athanasio 2:10, etc.); her second dam Mamie V. by Carr's Mambrino (son of Mambrino Patchen and sire of the dams of Helena 2:11 1/4 and the sensational Los Angeles mare, Sweet Marie 2:11 1/4), and her third dam Jennie by Paul's Abdallah. Diablita has the speed necessary to carry her into the 2:10 list if trained and raced this year, and as will be seen from the picture herewith, has all the style and grace necessary to make a very high class road mare. She is about 16 hands high and her gait is perfection itself. She has the blood lines for a great broodmare and a colt from her by any first class sire should be not only fast, but a game race horse. Diablita was bred by Mr. William Vanderhurst, of Salinas, but is

now being driven on the road by Mr. John Thoms, of Alameda, who finds her a very pleasant road animal. She is a bright bay, with proud carriage, and great endurance, and should be in the hands of someone who will train her for racing, as she is capable of a very low record. She is now in Mr. G. Lapham's stables, corner of Park and Pearl streets, Alameda.

Another great prospect bred by Mr. Vanderhurst is Pan Yan, a five year old by Dictatus 2:17 out of Libby V., full sister to Salinas Maid 2:30. Pan Yan is a bright bay, 15.3 hands high, perfectly sound and with a fine disposition. He showed a 2:40 gait without handling, and is one of the most spirited, proud stepping roadsters in Monterey county and at the same time gentle and kind.

Mr. Vanderhurst, while a great admirer of the standard bred horse, has never engaged in racing and either or both of these fine animals are for sale at a reasonable figure. Particulars as to price, etc., can be had by addressing Mr. Vanderhurst at Salinas, or Mr. J. W. Thoms, 1009 Call Building, San Francisco.

The first gelding to become a champion trotter was Pelham, who gained a record of 2:28 at Centerville, N. Y., July 14, 1849. The last gelding to become a champion trotter was The Abbot, who trotted a mile at Terre Haute, Ind., September 25, 1900, in 2:03 1/4. During the fifty-one years that intervened between the performance of Pelham and the trial of The Abbot six geldings held the world's record for trotters, namely: Tacony 2:27, Dexter 2:17 1/4, Occident 2:16 1/4, Rarus 2:13 1/4, St. Julien 2:11 1/4 and Jay-Eye-See 2:10. The first champion trotter, taking the 2:30 table as a basis, was Lady Suffolk. The last champion trotter was Cresceus. Since Lady Suffolk's day the only stallion to become a champion trotter was Cresceus, holder of the present record. Honors are even between geldings and mares, eight of each sex having held the championship record since 1845.

# MONEY WINNERS ON THE CALIFORNIA CIRCUIT.

The following tables give the names of the horses that were first, second, third or fourth in the regular trotting and pacing events on the main California Circuit. No account is made of the special purses offered, but only the regularly advertised events at the different meetings are included in this recapitulation. The first figures in each line give the class of the race, next is the amount of the purse or stake and then follow the names of the money winners of the race in the order in which they were placed in the final summary:

## TROTTER RACES.

### SAN JOSE.

2:25—\$ 500—Lijero, Faust, Tuberose, Cicero.  
2:20— 500—Petigru, Cicero, Lady Rowena, Faust.

### VALLEJO.

2:15—\$500—Alta Vela, Lijero, What Is It, Vic Schiller.  
2:30— 700—Coronado, Prince Howard, Doleza, Briney K.  
2:24— 600—Forrest W., Lady Rowena, Trilby.  
2:19— 500—Petigru, Puerto Rico, Robizola, Arketa.

### NAPA.

2:15—\$600—Alta Vela, Vic Schiller, Thomas R.  
2:24— 600—Petigru, Forrest W., Verona, Trilby.  
2:19— 600—Petigru, Arketa, Twilight, Babiola.  
2:40— 800—Coronado, Cornelius D, Briney K, Vi Direct.

### PLEASANTON.

2:15—\$ 600—Cozad, Richmond Chief, Alta Vela, Vic Schiller.  
2:30— 800—Lady Fair, Princess, Faust, Vi Direct.  
2:24— 600—Coronado, Forrest W., Verona, Faust.

### WOODLAND.

3 yo—\$ 400—Cuato, McPherson, Gertie H.  
2:14— 600—Richmond Chief, Alta Vela, Vic Schiller, McKenna.  
2:19— 600—Petigru, Cozad, Forrest W., Arketa.  
2:30— 750—Lijero, Vi Direct, Briney K., Prince Howard.

### STATE FAIR—SACRAMENTO.

3 yo—\$3295—Aristo, Cuato, Zombowette, McPherson. (Occident Stake.)  
2:30— 1000—Arketa, Vi Direct, Zambra, Briney K.  
2:30— 700—Prince L., Cicero, Rosalind, Iloilo.  
2:17— 400—Lady Rowena, Hopper, Faust, Trilby.  
2:24— 600—Prince L., Verona, Lady Rowena, Cornelius D.  
3 yo— 1060—Aristo, Zombowette, Gertie H. (Stanford Stake.)  
2:30— 600—Princess, Rosalind, Iloilo, Tom Smith.  
2:22— 600—Prince L., Zambra, Arketa, Briney K.  
2:35— 600—Ama A., Rosalind, Cicero, Tom Smith.  
2:11— 500—Cozad, Vic Schiller, Alta Vela.  
2:17— 600—Forrest W., Lady Fair, Shelby, Puerta Rico.

### STOCKTON.

2:14—\$ 500—Alta Vela, Petigru, Vic Schiller.  
2:30— 500—Tom Smith, Iloilo, Briney K.  
2:40— 500—Princess, Cicero.  
2:19— 500—Cozad, Forrest W., Petigru, Lady Fair.

### BREEDERS MEETING—FRESNO.

2:27—\$ 500—Ama A, Iloilo, Verona, Tom Smith.  
2:19— 500—Zambra, Hopper, Arketa, Puerta Rico.  
f f a— 600—Richmond Chief, Cozad, Alta Vela, Vic Schiller.  
2:24— 2000—Petigru, Forrest W., Verona, Vi Direct.  
2:23— 500—Arketa, Ama A, Iloilo, Lady Rowena.  
2:40— 600—Princess, Briney K, Prince Howard.

### BAKERSFIELD.

2:15—\$ 600—Cozad, Richmond Chief, Vic Schiller.  
2:19— 500—Zambra, Princess, Lady Rowena, Foxy Mac.  
2:16— 350—Zambra, Foxy Mac, Tom Smith, Prince Howard.

### LOS ANGELES.

2:30—\$ 700—Princess, Iloilo, Tom Smith, Briney K.  
2:15— 500—Arketa, Hopper, Ama A, Zambra.  
2:18— 500—McKenna, Lady Fair, Lady Rowena, Lady Zombro.  
2:19— 500—Briney K, Tom Smith, Hopper.  
2:23— 700—Arketa, Forrest W, Rozell, Zambra.  
2:12— 500—Petigru. (Walk over.)  
2:25— 500—Iloilo, Briney K, Tom Smith.  
2:16— 500—Zambra, McKenna, Foxy Mac, Lady Fair.  
2:18— 500—Zambra, Lady Fair, McKenna, Princess.  
2:16— 500—Briney K, Ama A, Lady Fair.  
2:17— 500—Zambra, Hopper, Briney K, Lady Rowena.  
2:15— 500—Arketa, McKenna, Iloilo, Princess.  
5 m— 500—Zambra, Hopper, Briney K, McKenna.

### VENTURA.

2:17—\$ 500—Cozad, Zambra, Leader.  
2:20— 500—Cozad, Zambra, Leader.

### SALINAS.

2:17—\$ 400—Cozad, Shelby, Zambra.  
2:30— 300—Lijero, Walling, Princess.  
2:20— 350—Cozad, Zambra, Shelby, Silvion.

### MARYSVILLE.

2:19—\$ 500—Lijero, Puerto Rico, H D B, Prince L.  
2:40— 150—Dolly N, McNear, Hazel B, High Tariff.

### COLUSA.

3:00—\$ 200—Sutter, Dolly N, Quillesene.  
2:30— 400—Prince L, High Tariff, Alex Button Jr.  
2:40— 500—H D B, Dolly N.  
2:20— 300—Lochinvar, H D B, Prince L.

## PACING RACES.

### SAN JOSE.

2:25—\$ 500—Yukon, Robert I, Del Oro, Dixon Maid.

### VALLEJO.

2:25—\$ 500—Yukon, Robert I, The Mrs, Easter D.  
2:20— 500—Eagletta, Smuggler, Admont, N L B.

### NAPA.

2:15—\$ 500—Midnight, Silver Coin, Doc Wilkes.  
2:20— 500—Robert I, Welcome Mac, Alford C.  
2:25— 500—Yukon, Eagletta, Smuggler.  
G'n— 600—Alone, The Mrs, Alford C.

### PLEASANTON.

2:30—\$ 500—Eagletta, Alone, The Mrs, Enoch.  
2:20— 500—Robert I, Alford C, Chief, Diablita.  
2:24— 500—Eagletta, Diablita, Chief, Easter D.  
2:12— 500—Dictatress, Silver Coin, Lady Mac.

### WOODLAND.

2:12—\$ 600—El Diablo, Toppo, John A.  
2:19— 600—Robert I, Alford C, Welcome Mac, Penrose.  
2:15— 600—Silver Coin, Midnight, Doc Wilkes, King Cadenza.  
f f a— 600—Miss Logan, Kelly Briggs, El Diablo, Toppo.  
2:25— 750—Eagletta, Alone, The Mrs, Yukon.

### STATE FAIR—SACRAMENTO.

2:13—\$1000—El Diablo, Alone, Margaretta, Peggy.  
2:25— 1200—Enoch, The Mrs, Rita H, Alford C.  
2:15— 600—Doc Wilkes, Eagletta.  
2:18— 1000—Harry J, The Mrs, N L B, Penrose.  
2:17— 600—Monroe B, Silver Coin, Peggy.  
2:21— 600—Harry J, Enoch, Penrose.  
2:24— 600—Enoch, Athnio, Polka Dot, Alford C.  
2:18— 500—Penrose, Alford C, N L B.

### STOCKTON.

Green\$ 500—Alone, The Mrs, Eagletta.  
2:12— 500—El Diablo, Toppo, Dictatress.  
2:20— 1000—Enoch, N L B, Cranky Thorn, Alford C.  
2:25— 500—Eagletta, Polka Dot.  
2:15— 500—Harry J, Robert I, Midnight, Yukon.

### BREEDERS MEETING—FRESNO.

2:20—\$1000—Robert I, Harry J, Alone.  
2:12— 500—El Diablo, Dictatress, Midnight.  
2:30— 500—Enoch, Athnio, Alford C.  
f f a— 600—Midnight (walkover).  
2:30— 600—Alone, Harry J, Athnio.

### BAKERSFIELD.

2:17—\$ 600—Robert I, Alford C, Polka Dot.  
2:10— 500—Dictatress, Midnight, Alford C, Silver Coin.

### LOS ANGELES.

2:17—\$ 700—Robert I, Eagletta, Harry J, Alfred D.  
G'n— 500—Athnio, High Ball, Billy F, Elizabeth G.  
2:10— 500—Robert I, Eagletta, Dictatress, Enoch.  
2:23— 700—Harry J, Eagletta, Alfred D.  
2:11— 500—Dictatress, Midnight, Hanford Medium, Alfred D.  
2:25— 500—Athnio, Enoch, Billy F.  
2:10— 300—Dictatress, Robert I, Harry J.  
2:16— 500—Richard B, Mamie B, Nance O'Neil.  
f f a— 500—Robert I, Harry J, Dictatress.

### VENTURA.

2:30—\$ 500—Alfred D, Welcome Mac, Alford C.

2:20—\$ 400—Jennie S, Sonoma, Flashlight, Convict.  
2:17— 300—Jennie S, Peggy, Sonoma, Flashlight.

## An Enterprising Auctioneer.

FRED H. CHASE.

Fred H. Chase, who has associated with him other gentlemen under the firm of Fred H. Chase & Co. There are few live stock owners in California who do not know Fred Chase, who has been identified with stock sales from boyhood, and his uniform courteous treatment of his patrons, whether buyers or sellers, has made him friends whose name is legion. The firm has recently erected a commodious fire proof pavilion at the salesyard, corner of Van Ness avenue and Market street in this city, where it proposes handling stock sales at night by electric light. They inaugurated this new venture by a sale recently of Mr. Theodore Winters' thoroughbred yearlings and horses in training and scored a great success. The next sale will be the great dispersal sale of the Palo Alto two year olds, which, as stated elsewhere in this paper, is set for Thursday evening, January 29th.

## The Leading Money Winners.

Below will be found a table giving the names, records and breeding of the trotters that won \$400 or more on the California circuit in 1962. As in the adjoining tabulation no note is taken of special races, the regular advertised events being alone considered. The table gives the number of times each horse winning \$400 finished in the money and shows that several of them won a goodly sum. The greatest money winner of the year was the pacer Robert I. 2:10 by Hambletonian Wilkes, and next was the trotting stallion Petigru 2:10 by Kingward. Both these horses were campaigned by W. G. Durfee whose string of campaigners won nearly \$12,000 during the campaign.

There will be two fine sales of thoroughbreds at the Occidental Horse Exchange this month. On Monday evening there will be a sale of twenty-two thoroughbred broodmares all in foal to Bright Phoebus and Joe Ripley. These mares are by such sires as imp. Islington, Midlothian, Racine, Sir Modred, Hyder Ali, Joe Hooker, Norfolk, Apache, Piccolo, etc. This is a fine opportunity for breeders and farmers to get some grand mares. It is the closing out sale of Paul G. Lane's thoroughbreds. On Tuesday evening Mr. Layng will sell all of Wm. O. B. Macdonough's horses that are in training as this breeder has decided to give up racing and devote his time to the breeding of thoroughbreds. There are to be sold Beau Ormonde, Orsine, Orpheo, St. Phillipina, Orseus, a bay colt by imp. Brutus out of Gold Locks, etc. This sale should attract a large crowd as every one offered is bred in the purple and are well known money winners.

## Leading Winners of 1962.

Mr. J. R. Freeman of Red Bluff was in the city this week and purchased a handsome young bay stallion by Sable Wilkes 2:18 out of Menlo Belle 2:30. The horse was sold through an advertisement in this paper.

## ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

### My Dog.

Beneath this sword that formerly he pressed  
With agile feet, a flag is laid to rest.  
Him, as he sleeps, no well-known sound shall stir,  
The rabbit's patter or partridge's whirr;  
Comrades "Mark" afar, but well defined,  
That spell the startled quail down the wind;  
The whistle warning, as the winged ones rise  
Large and more large upon our straining eyes,  
Till with a swoop, while every nerve is tense,  
The chattering bevy tumbles o'er the fence;  
The double crack of the ready gun;  
The darting thud of birds whose course is done,  
These sounds, that to his listening ear were dear,  
He heeds no longer, for he cannot hear  
None stancher, till the hunt was done, defied  
Temptation, rooted to his master's side.  
None swifter, when his master gave the word,  
Leap'd forth to track the wounded running bird,  
And bore it back—ah, many a time and oft—  
His nose as faultless as his mouth was soft.  
How consciously, how proudly, unconcerned  
Straight to his master's side he then returned,  
Wagged a glad tail and deemed himself repaid,  
As in that master's hand the bird he laid.  
If, while a word of praise was duly said,  
The hand should stroke his smooth and honest head.  
Through spring and summer, in the sportless days  
Cheerful he lived a life of simpler ways;  
Chose, since official dogs at times unbend,  
The household cat for confidant and friend;  
With children, friendly but untaught to fawn,  
Romp'd through the walks and rollicked on the lawn;  
Rejoiced, if one the frequent ball should throw  
To fetch it, scampering gayly to and fro,  
Content through every change of sportive mood,  
If one dear voice, one only, called him good.  
Such was my Dog, who now without aid  
Hunts through the shadowland, himself a shade;  
Or, couched intent before some ghostly gate,  
Waits for my step, as here he used to wait.

### The Field Trial Winners of 1902.

Thirty field trial meetings for 1902 is an encouraging outlook for breeders of Setters and Pointers. A list of winning dogs, and other field trial data for the past year, is commenced in this issue—a change of make-up at the last moment preventing the presentation of the list in full until next week. This summary should be of much interest to owners and handlers as well as sportsmen interested in the breeding of bird dogs.

The leading English Setter sires are shown in the following order—Champion Rodfield with thirteen winners, Tony Boy with twelve, Lady's Count Gladstone with seven, Marie's Sport five, Count Gladstone IV., Count Danstone and Oakley Hill with four each, Dash Antonio and Count Whitestone three each. Sires of two winners are numerous and over seventy-five dogs have sired one winner.

Among the Pointer sires the leaders are Young Rip Rap and Young Jingo with four winners each, Jingo's Light, three. Young Jingo's progeny have won two firsts (22 starters), two seconds, a third and a fourth. Young Rip Rap's get has been placed first once (18 starters), twice second, once third and fourth. Jingo's Light stock has gone first twice (23 starters), one second, two thirds and a fourth.

Among the Setter winners Rodfield's get has taken eight firsts in stakes that had 110 starters, eleven seconds, three thirds and two fourth places. Tony Boy's offspring, annexed three firsts (among 102 starters) four seconds, ten thirds and two fourth positions. Lady's Count Gladstone had two firsts in 14 starters, four seconds and four third prizes. Marie's Sport's get ran, one first (8 starters) two second and three third place. Oakley Hill had one first in 18 starters, three second, one third and one fourth place. Dash Antonio's get made three firsts in 45 starters, a third and a fourth prize winner. Count Danstone's progeny figured two firsts (30 starters) three seconds and two fourths. Count Whitestone's puppies were placed first once (5 starters) third twice and fourth once. A remarkable feature of this showing is that no single bitch is prominent as the dam of more than two winners.

In forty-two mixed All-Age Stakes (this embraces champion and free-for-all stakes Setters have taken twenty-six firsts (413 starters) twenty-three seconds (419 starters) thirty thirds (350 starters) and nine fourth places (136 starters).

Pointers running in the same events won fourteen firsts (170 starters), fourteen seconds (261 starters), fourteen thirds (117 starters) and seven fourth places (136 starters).

Out of twenty-five mixed Derby events the Setters won eighteen firsts (290 starters), twenty seconds (290 starters), twenty-three thirds (182 starters), nine fourth places (149 starters). The Pointers took seven firsts (101 starters), four seconds (133 starters), eight thirds (104 starters) and seven fourths (137 starters).

A place of the Gordon is shown by the ability of entry of the breed during the year. Two Setters were in mixed stakes, one of which made a Derby of ten starters.

At eight per cent only of more than ninety sires

are without field trial records. Champion Jingo and Dash Antonio, for Pointers and Setters respectively, are the sires or grandsires of about four-fifths of the winning dogs.

**PACIFIC COAST FIELD TRIAL CLUB.**—Santa Maria, Cal., January 13, 19th annual trials. J. A. Balmer, judge; Albert Betz, secretary.

Derby, entrance \$10, \$10 additional to start. 35 nominations, 7 starters January 13, 1902 (4 English Setters, 3 Pointers). Purse \$350—\$175, \$105 and \$70. Winners—1 Cuba Jr. (Cuba of Kenwood-Florida), Stockdale Kennels (R. M. Dodge, manager), liver and white Pointer dog, R. M. Dodge, handler; 2 Rod's Lark (Rodfield-Count's Diana), H. L. Betten's b w and t English Setter bitch, H. L. Betten, handler; 3 Ned Funston (Kris Kringle-Plain Sister), W. B. Coutts' liver and white Pointer dog, W. B. Coutts, handler.

All-Age Stake. Entrance \$10, \$10 additional to start. 19 nominations, 15 starters, January 13, 14 (6 English Setters, 9 Pointers). Purse \$340—\$170, \$102 and \$68. Winners—1 Doctor Daniels (Plain Sam-Dolly Dee II), W. W. Van Arsdale's white and liver Pointer dog, C. Babcock, handler; 2 Pearl's Jingle (Young Jingo-Pearl's Dot), Clinton E. Worden's liver and white Pointer bitch, J. E. Lucas, handler; Equal 3—Peach Blossom (Count Gladstone IV-Peach Mark), W. W. Van Arsdale's b w and t English bitch; equal 3 Northern Huntress (Joe Cumming-Mecca II.), T. J. A. Tiedemann's b w and t English Setter bitch, W. B. Coutts, handler.

Distemper breaking out among the young dogs prior to the running caused a material difference in the number of Derby starters and also in the other stakes—the Member's and Champion stakes not being filled.

**UNITED STATES FIELD TRIAL CLUB**—Grand

Wu Chung (Fitzsimmons-Muckles), B. Brooks' red Irish Setter dog, owner, handler; 3 Maybelle (Dickburn-Peggy Pride), J. W. Brown's white and tan English Setter bitch, B. Brooks, handler.

(Don P.-Jessie), J. F. Fletcher's lemon and white English Setter dog, W. G. Hodgkins, handler; 2 Lady Tora (Banker-Maud V.), W. Y. Dent's liver and white Pointer bitch, E. B. Bishop, handler; equal 3 Countess Ladystone (Count Ladystone-Markliiz), L. Moody's b w and t English Setter bitch, owner, handler; equal 3 Danube (Tony Boy-May Blue), T. T. Ashford's white and tan Setter dog, W. G. Hodgkins, handler.

Free-for-All Stake, February 5, one hour trials. Guaranteed purse \$75, two-thirds to first, one-third to second, entrance \$7.50, 8 entries, 6 starters (2 Pointers, 4 Setters). Winners—1 Fred T., equal 2 Lady Tora, equal 3 Countess Ladystone.

**CONTINENTAL FIELD TRIAL CLUB**—Grand Junction, Tenn., February 8. Messrs. S. C. Bradley and Theo. Sturges, judges. Theo. Sturges, secretary.

Members Stake, sweepstake, 50, 30 and 20 per cent, entrance \$10, 8 entries, 7 starters (4 English Setters, 3 Pointers). Winners—1 Roysterer (Count Gladstone IV.-Hester Pryne), H. B. Duryea's white and tan English Setter dog, owner, handler; 2 Grant (Thiers-Antonia Queen), E. H. Osthaus' b w and t English Setter dog, owner, handler; 3 Ned B. (Rap-Lady Grace), H. B. Duryea's black and white Pointer dog, owner, handler.

Derby, February 10. Purse \$500—\$250, \$150 and \$100, entrance \$10, \$10 second forfeit, \$10 to start, 51 entries (41 Setters, 10 Pointers), 10 starters (3 Pointers, 7 Setters). Winners—1 Mohawk (Tony Boy-Countess Meteor), A. Vent & Duryea's b w and t English Setter dog; 2 Pretti Sing (Tony Boy-Nellie C.), W. H. Hutchings' b w and t English Setter bitch, D. E. Rose, handler; 3 Bessie Gath (Sport's Gath-Bessie P.), C. H. & J. Chenault's b w and t English Setter bitch, J. H. Johnson, handler.

All-Age Stake, February 11. Purse \$500—\$250, \$150 and \$100, entrance \$10, \$20 additional to start, 30 entries, 12 starters (10 Setters, 2 Pointers). Winners—1 Doc Hick (Count Rodstone-Nona H.), J. W. Consi-

About the Spawning Station at Willits.

Junction, Tenn., January 20, 13th annual trials. Messrs. H. B. Duryea, Pierre Lorillard and W. W. Titus, judges. W. B. Stafford, secretary.

Setter Derby, January 20. Entrance \$10, \$10 second forfeit, \$10 to start, 56 entries, 15 starters. Purse \$400—\$200, \$125, \$75. Winners—1 Marso Ben (Domoko-Mecca II), H. J. Hoover's b w and t dog, W. D. Gilchrist, handler; 2 Cherokee (Val Lit-Dot's Roy's Sister), A. Vent and Duryea's liver and white bitch, J. M. A. Vent, handler; 3 Mohawk (Tony Boy Countess Meteor), A. Vent and Duryea's w b and t dog, J. M. A. Vent, handler.

Pointer Derby, January 20. Entrance \$10, \$10 second forfeit, \$10 to start. Purse \$400—\$200, \$125 and \$75. 23 entries, 5 starters. Winners—1 Jingo's Bang (Young Jingo-Queen Rip Rap of Elgin), Zell Gaston's liver and white dog, W. D. Gilchrist, handler; 2 Percival Jingo (Jingo's Light-Phi), W. K. Terry's white and lemon dog, D. E. Rose, handler; 3 Alpine Lad (Lad of Jingo-Fanny Flash), Chas. Proctor's white and liver dog, D. E. Rose, handler.

All-Age Stake, January 23. Entrance \$10, \$20 additional to start. Purse \$400—\$200, \$150 and \$50, 28 entries, 15 starters (14 English Setters, 1 Pointer). Winners—1 Jack (Eugene T.-Maud), P. Lorrillard's b w and t English Setter dog, C. Tucker, handler; 2 Uncle B. (Harwick-Dan's Lady), Edward Devereux' b w and t English Setter dog, D. E. Rose, handler; 3 Senator P. (Captain P.-Queen B.), J. W. Flynn's white and lemon Pointer dog, D. E. Rose, handler.

**ALABAMA FIELD TRIAL CLUB**—Athens, Ala., February 3. Messrs. C. B. Cooke and J. M. Taylor, judges.

Derby, February 3. Purse—50, 25 and 15 per cent of entrance, entrance \$5, \$2 additional to start, 14 entries, 10 starters (5 English Setters, 1 Irish Setter, 4 Pointers). Winners—1 Rondo (—), Lee Moody's white and tan English Setter dog, owner, handler; 2

dine's b w and t English Setter dog, C. Askins, handler; 2 Clip Wind'em (Tony Boy-Phoebe Wind'em), A. Vent & Duryea's w b and t English Setter bitch, J. M. A. Vent, handler; 3 Doc Light (Jingo's Light-Gull's Juno) Oakland Kennels, liver and white Pointer dog, R. A. Tomlinson, handler.

**NATIONAL CHAMPIONSHIP FIELD TRIAL ASSOCIATION**—Grand Junction, Tenn., February 21. Messrs. Hobart Ames, C. E. Buckle and H. S. Bevan, judges; W. B. Stafford, secretary.

Seventh Championship Stake. Purse, \$500 to first. Entrance \$25, \$25 additional to start, 5 nominations, 2 starters, Setters. Winners—Sioux (Count Gladstone IV.-Hester Pryne), A. Vent & Duryea's b w and t English Setter bitch, J. M. A. Vent, handler.

**IOWA FIELD TRIAL ASSOCIATION**—Emmettsburg, Ia., August 19. W. W. Titus, judge; Lewis Stuehmer, secretary.

Derby, August 19, 20. Twenty-eight starters (20 Setters, 8 Pointers). Winners—1 Captain Jack (Colonel R.-Spot's Girl), George E. Gray's b l and t English Setter dog, John Gude, handler; 2 Missouri Sue (Missouri Gale-Thiers' Sue), J. W. Canaday's b w and t English Setter bitch; 3 Lady Whyte (Count Whitestone-Princess White), J. W. Blythe's b w and t English Setter bitch, Wm. Elliott, handler. Equal 4 Rapp's Lass (Young Rip Rap—), Garth, Keller and Risen's black and white Pointer bitch. Equal 4 Speckle B. (Uncle B.-Pride of Abercorn), Geo. E. Gray's b w and t English Setter bitch, J. Gude, handler.

All-Age Stake, August 22. Purse \$300—\$120, \$80 and \$30, 50 nominations, 36 drawn to start. Stake declared off owing to inclement weather conditions and scarcity of game after four braces of dogs were put down. The club added \$60 to purse and divided the amount pro rata among the starters.

**SOUTH DAKOTA FIELD TRIAL ASSOCIATION**

—Salem, S. D., August 29. Thomas Johnson, judge G. T. Page, secretary.

Derby, August 26, 27. Purse \$300—4 moneys, 24 starters (13 Pointers, 11 Setters). Winners—1 Speckle B. (Uncle B.—Pride of Abercorn), Geo. E. (Cap B.—Queen B) J. W. Flynn's Pointer dog, D. E. Rose, handler; 2 Ortiz Lad (Rodfield—Grace G. Darling), Dr. C. I. Shoop's Setter dog, H. S. Bevan, handler; 3 Annie B. (Uncle B.—Pride of Abercorn), C. K. Brown's Setter bitch, D. E. Rose, handler; 4 Jack (Eugene T.—Maud), P. Lorillard's Setter dog, C. Tucker, handler.

Manitoba Stake, September 13. G. B. Borradaile, judge. For dogs owned in Manitoba. 8 starters. Winners—1 Zuluka (Shot—Fannie), W. G. Lee's Pointer bitch, D. E. Rose, handler; 2 Fleet (—), G. A. Carruthers' Pointer bitch, Chas. Archibald, handler. Club Cup, Prairie Bird (Brighton Monk—Manitoba Belle), E. H. White's Setter bitch, owner handler. Club Medal—Tony Lad (Hurstbourne Zip—Manitoba Prairie Bird), J. P. Brisbin's Setter dog, J. P. Brisbin, handler.

[Concluded Next Week.]

On Russian River, where the Black Bass Run.

### The Dog Seller's Little Game.

Diverse are the ways of the Tenderloin, that portion of this great city where people never feel comfortable or seem to take interest in life save when the electric lights are on and shining brightly. Many are the vocations plied in that particular community, a few are the occupations of those hanging on the ragged edge of "life" as it is observed after dark. A recent success about there is a fellow called "Meaty," who is a dog seller. Other dog sellers make a peripatetic appearance in the district now and then, but they do business after a different fashion. It is a simple matter to barter off mangy puppies and sick curs at anything from 25 cents to \$2 each, but the fact that Meaty can sell the same dog two or three times, or even oftener, in a single night has excited the envy and admiration of the other midnight curbstone merchants and attracted no little flattering attention of various habitues of the locality to Meaty himself.

In the neighborhood of Ellis and Powell streets and the districts contiguous is Meaty's fishing ground. Here, late in the night, he can often be seen leading his stock in trade—generally a most disreputable specimen of a dog, for he seems to have an ingenious faculty in getting something in the dog line for sale, that at first glance, no one would want at any price. The puppy limps along dejectedly and looks down at the pavement just beneath his nose. The dog seller scrutinizes everybody. If a passerby appears in his right mind he is safe, but if he shows any signs of the local mania, either habitual or temporary, he will hear an insinuating voice whisper close to his ear:

"Want a nice dog, sir?"

There are many sales, but that is not strange, considering all the freakish people who try to throw away their cash along the "cocktail" route. The wonder is how the one particular head in the dog-vending line gets back his dog after he has sold it, how he has sold the same one, night after night, and is still, we suppose, selling the pup at the same old price.

Most people who observed dog and man cannot understand it either, for neither of them will disclose the secret. It happens, however, that one outsider knows, and he has told all about it. The knowing man is a big, jolly, blonde mustached barkeeper who holds court in one resort on the corner first mentioned and who is known popularly as "Dave." He says that of all the various games he has known during his "practice at the bar" in the midtown district, this scheme of the dog-seller is one of the prize winners.

It transpires that one night recently Meaty strolling

complacently along Ellis street toward Powell, saw a young man of unsteady gait approaching. Toward this apparently easy prey, he made a dart, dragging a big, yellow puppy across the sidewalk by a cord he used as a lead. He accosted the young man and the latter from the start seemed to take much interest in the proposition of investing in a dog. Within a few minutes a bargain had been effected. Meaty took his price, seventy-five cents; the young man took the dog. Then the two men separated.

With his new pet the young fellow "took in" the district, taking refreshments at various places he visited, showing off his new purchase to any and all who had the patience or humor to listen. To every one and each one he declaimed on the beauty and pedigree of the animal. Hours passed, and the idea of going home struck him forcibly. He leaned against a lamp-post and thought, unsteadily. The dog looked much larger than it did at first. How much could it eat, and where could he keep the pup? Would the landlady raise a fuss if it was taken into the house? Very probably. But it had to be taken somewhere, that was a sure conclusion. Was there ever a dog that looked so hungry, lonely and dejected? It would be sure to require several pounds of meat a day for weeks to finally hide his ribs and bony protuberances under a decent looking covering of substance. The dog blinked his "china" eyes at his new master, as much as to say: "Now, you've got me, you'll have to feed me."

Then the dog began to grow in size again, until the small yellow ears were large and hung down flabbily to the lean shoulders. The emaciated body became elongated until it stretched all the way across the

street, the tail protruding into the front door of Dave's headquarters. By the way, this saloon wasn't a bad place at all; it might be well to follow the dog's tail.

Into Dave's the young man rolled, the giant yellow dog dragging behind.

"What a little puppy!" exclaimed Dave.

The young rounder thought this a good joke and laughed loud and long. Then he had a "high ball"—and one or two more. The dog filled the whole place, fairly crowding several visitors into a small corner. A brilliant idea struck the young man.

"Fine dog, isn't he, Dave," he said, a scheming, fox-like expression coming over his face.

Dave assented smilingly.

"Will you do me the favor to let me leave him here for about ten minutes till I go up to the market and get some oysters?" said the weary owner of the canine.

"Take good care of him, please, because he is valuable," concluded the young man. Dave thought his visitor's talk was far steadier than his walk.

"Yes," replied Dave, "I'll hold him for a few minutes."

The owner of the dog reached over the bar and tendered Dave the end of the cord that held the dog. Then he slid past the yellow monster and out of the door into the night, free and unencumbered, that is, outwardly, the other impediments was inside of him. Half an hour later he was trying to find the front door keyhole, a happy expression in his eyes, a smile on his lips, and a little later he dreamed that the yellow hobgoblin had eaten up Dave bodily.

Meanwhile Dave tied the dog up in a back room of the saloon and waited. Soon in walked Meaty the dog seller.

"Have you got my dog?" he asked.

"No," replied Dave, and there followed some little argument.

Then Meaty explained his game; how, night after night, he followed unsteady young men, who bought his dog and were sorry for it afterward.

"And they always leave it with the barkeeper," he added, "and never come back. Are you on to the game?"

Dave decided that he was.

Free!! Free!! Free!!

The Polk Miller Drug Co. of Richmond, Va., whose advertisements of "Sergeant's Dog Remedies" are appearing now in the columns of this journal, desire us to state that they will furnish absolutely free to our readers a revised copy of their book on "Dogs," which accurately and exhaustively treat frequent diseases with which Dogs are afflicted. Enclose stamps to cover cost of mailing the book. They made F. W. Braun & Co. of Los Angeles, California, agents for their popular line of "Dog Remedies," invitation to all persons having sick dogs to write for symptoms, etc. Enclose stamp for reply. No made for information furnished.

Notes and News.

The records for 1902 have all been made, and the books are closed. What will 1903 bring?

The Santa Rosa Stock Farm string, in charge of Millard Sanders, has been shipped to Pleasanton.

It now looks as though a professional judge would preside over all the Grand Circuit meetings next year.

C. W. Williams will not go to Kentucky next spring. His stallions will be at Galesburg, Ill., season of 1903.

A pair of gray trotters that stand seventeen hands will be one of the features of the next Fasig-Tipton sale.

A journal to be known as *The Trotting World* has been started in London, the same being devoted to the light harness horse.

Senator J. W. Bailey, of Texas, will wait until his young Prodigals are old enough to train before he starts a racing stable. He wants to breed his own trotters.

Ed. Geers says that he will never try driving three horses abreast again, as the danger is too great, for it is impossible for a man to stop such a team when once it is started.

Horse breeding in Hungary has been fostered by the government since 1785, when the famous Kisher stud was established. The government spends \$625,000 annually on horse breeding.

There is a fascination about buying horses at auction. It becomes so exciting at times that men present without the slightest idea of purchasing are carried away with enthusiasm and own a horse before they know it.

Several trotters will be prepared to go for a fast record in 1903. Cresceus 2:02½ will probably be out on another exhibition tour, while The Abbot 2:03½, John A. McKerron 2:05½ and Lord Derby 2:05½ will try to set a new world's trotting record.

Mr. J. C. Bray has purchased from Mr. J. J. Shoo of Oakland the Allerton stallion Geo. W. Archer 25492, and the horse will be taken to Montana. Archer is one of the handsomest stallions ever brought to California, is sixteen hands high and well proportioned and should do much to improve the stock of Montana.

A wagon which is said to be the oldest in existence in this country, has been found in the possession of an Indian near Santa Fe, N. M. The solid wheels are made of cross sections of a sycamore tree. The possessor of the vehicle is about eighty-five years old, and he avers that it was built or owned by his great-grandfather.

The types made us say last week that the gelding Albert by Seymour Wilkes 2:08½ that Monroe Salisbury recently purchased for James Butler of New York, was one of the best "pacing" prospects in the State, but they should have read "racing." Albert is a trotter, and one of the best gaited ones in California, as well as being lightning fast.

Last week the pugilistic artist, or the artistic pugilist, Jas. J. Corbett, who was playing in Toledo, visited Cresceus 2:02½ at Mr. Ketchum's home stable, on Madison street. Mr. Corbett was very enthusiastic over the champion's superb form, and stepping alongside of him he said: "How are you, old boy? I know just how it feels to be a champion."

John D. Creighton, proprietor of the Orchard Park Farm, denies the report that he has formed a partnership with C. W. Williams for the purpose of racing a stable of thoroughbreds. He also says he will not sell all his broodmares and retire from the breeding of trotting horses. He will dispose of a few of his mares, as he will not breed as extensively as heretofore.

M. E. Sturgis, former owner of Dan Patch 1:59½, has received a letter from M. W. Savage, the new owner of the great pacer, in which he says that it is his intention to have Dan shipped to his Minneapolis home from Kansas City, where he is now quartered, as soon as the weather moderates, and that during the winter he will keep Dan at his private stable in that city.

J. R. Freeman, of Red Bluff, is offering Prince L. 2:17½ for sale. Mr. Freeman says 2:17½ is no mark of the horse's speed, as when the record was made he was pulled to a jog and then beat the field by five lengths. Prince L. is a handsome trotter, sound, and of perfect disposition. He is ahead of nothing, has no bad habits, will stand anywhere without hitching and can be driven by anyone.

The following story is told of Geo. W. Leavitt, of Boston: A short time ago Mr. Leavitt sold a prominent member of one of the most famous clubs a winning colt which he picked out on a recent trip to Kentucky, on account of the speed. He could show while running with his dam. At the time of the sale he dejectedly mentioned, among other things, that he was a pacer. A few days later he got a letter from the new owner asking several questions. One question was: "Does he wear blinkers?" Leavitt's reply was: "Yes, he was used to them on."

Mr. P. H. Sexton, of Oakland, had the misfortune to lose a few days ago one of the most promising young colts in California. It was by Monterey 2:09½ out of the well known old race mare Hera by Mambrino Wilkes. The colt was well staked and was a fine looking youngster that gave every prospect of being a trotter. He was a foal of 1902 and had been a strong lusty colt up to the week of his death.

D. J. Campan of the Detroit Driving Club, that always opens the Grand Circuit, is in favor of the two-in-three heat plan. The only events he will give at the old three-in-five plan in 1903 will be the classic Merchant and Manufacturers, \$10,000, and the Chamber of Commerce, \$5000, for pacers. Mr. Campan says that while he believes they will eventually get to the dash system he does not believe that the time is yet ripe for so radical a change.

Betonica's record is now 2:09½, and not 2:10½, as it appeared in the advertising columns of former issues of this paper. The record of 2:09½ was made at Dover, N. H., which is an admittedly slow track. In the 2:10 class Betonica should be able to give a good account of himself another season. He was timed separately in a race last fall a third heat in 2:06½, and he paced halves in a minute and quarters in 29 seconds. As the season closed the son of Azmoor was rounding into free-for-all form.

During the past racing season the State of New York derived an income of \$170,085.88 from the seven race tracks located in that State on which running meetings were held. In 1901 the returns were \$128,581.50, while in 1900 \$95,099.94 represented the 5 per cent tax on gross receipts of racing organizations exacted under the Percy-Gray law. This makes a total income from this source in the three years of \$393,767.32, which New York State has had to turn over to the improvement of agricultural interests.

The Denver-Overland Racing Association, C. A. Wahlgreen, secretary, announces their summer meeting, claiming the dates of June 20th-July 4th, inclusive. The meeting will be similar to that of the last few years, being a mixed meeting, two harness and four running events each day. The program of the harness events will be out within the next week or ten days. Mr. Wahlgreen promises several new features, one of which will be a Club Steeplechase of two miles for gentlemen riders. The Colorado Derby will be run as usual the opening day, with a purse of as much as former years if not more, the purse heretofore being \$800. The clubs throughout the State have asked for at least two polo pony races, race horses barred, only polo ponies having played in the State ridden by their owners eligible. The announcement that has met with great approval throughout the territory is the fact that there will be no syndicate books, which has prevailed there for the last six years, but an open ring, anyone with the necessary funds can cut in. For further particulars address the secretary at Denver, Colo.

American farmers and stock breeders are too much given to shifting and changing their policies. Horse owners especially are subject to the charge of inconsistency in their methods and plans. Francis Dunbar, the noted Glasgow authority, who is now here with some choice specimens of harness horses, says our people have heretofore seemed to be too willing to follow certain breeding lines for a while and before going far enough to reach success make a complete change. Breeding to a draft horse one or two years, then taking a turn at trotters for a year or two, and then giving the whole thing up for a bad job is no way to succeed in horse raising any more than similar methods would win in any other line of business.

One trouble with our people is that many of them have not got started right. Many have taken up a line of breeding as an experiment without having looked into matters well enough, and in many cases, they have been wise in making changes where they were sure they had gotten a wrong start. The man who starts into business and decides to stick to it and work it out is much more apt to win than he who expects to breed trotters when they seem to be the thing and cut them out when there seems to be a better sale for coachers and drafters.

One cannot well know too much about his business and frequent change leads to confusion. Carefully decide upon a sensible course and then follow it thoughtfully, and earnestly, and enthusiastically through thick and through thin. It is only in this spirit that one can hope to reach the highest success. Attempting to do one thing this year and something different next year in hope of catching something on the boom every year, will result in one's always being just starting. Such a course is more apt to land one on the low places in the market than on the high spots. If you feel sure that you are on the wrong track, change, and do it quickly, but to weaken and falter during a season of dullness and depression is to fail to be ready when the reaction comes.

At the present time there is a great demand for good American horses, and American horse breeders are not able to supply the demand in our own country. Choice harness horses are worth more here than they are in London, and yet London buyers are anxious to take large numbers at prices that would be very profitable for producers. Be sure you select a good line of business, whether breeding or what not, and then resolve to stick to it through bad periods as well as good. When a supply is large and prices low cull out the inferior stock, at whatever cost, and then breed only the best animals you have or can get. At such times if you are forehanded you can usually pick up some good bargains in extra choice stock that your more timid competitors are ready to let go. Be as careful and earnest in building up the quality of your stock in low times as high, remembering that there is always more demand for good things than poor, and that he who gets discouraged and sells out when the prices are low has nothing to sell when the reaction comes.—Chicago Live Stock World.

The Great Sale From Palo Alto.

In past years it has been the custom of Palo Alto Stock Farm to send the colts, the high class products of the great breeding farm, to the Eastern market for sale, but this year, it being the closing out sale of two year olds, it has been decided to sell in California, and on January 29, 1903, at 7:30 P. M., there will be sold at auction by Fred H. Chase & Co., at 1732 Market street, San Francisco, forty-nine head of grandly bred two year olds, by great sons and grandsons of the famous Electioneer 125: Mendocino 2:19½, sire of Idolita 2:09½ and Monte Carlo 2:09½; Altivo 2:18½, full brother to Palo Alto 2:08½; Azmoor 2:20½, sire of Betonica 2:09½, Azmon 2:13½, Rowena (2) 2:17; Monbells 2:23½, son of Mendocino and the great Beautiful Bells; Nazote 2:28½, full brother to Azote 2:04½, and Wildnut, son of Woodnut 2:16½ and Wildflower 2:21 by Electioneer 125.

Included in the lot are eight young stallions combining blood lines that have made Palo Alto famous, having large stake engagements, and are from stake winning families.

The ch c Menselor by Mendocino is from Anselma 2:29½, dam of the stake winner Anselor (3) 2:21½.

Nazon, br c by Nazote, is from the good stake winner Aria 2:16½, dam of Adaria 2:17½.

Avelon, b c by Mendocino from the stake winner Avena 2:19½ by Palo Alto.

Corleon, b c by Mendocino, is from Coralina by Boodle 2:12, her dam the stake winner Coral 2:18½.

Cassian, b c by Mendocino, from Cressida (3) 2:18½, a stake winner.

Loring, blk c by Nazote from Ladywell 2:16½, a stake winner and dam of Local (3) 2:19½, a stake winner.

Monbello, b c by Monbells from Laura C. 2:29½, dam of Laurel 2:13½, Lauretta 2:14½, Langton 2:21½.

Moormont, b c by Azmoor, dam Rosemont, dam of Sweet Rose (1) 2:25½, Mont Rose (3) 2:18 and Mazatlan 2:26½.

They are a grand lot of young stallions, their breeding, form and individuality placing them high in the ranks of progressive breeding for extreme speed.

There will be twenty-five two year old fillies sold, by the sires noted above, and out of dams—great ones—such as Aerolite by Palo Alto. Ashby, dam of Athena 2:15½ and Aria 2:16½ by General Benton 1755. Expressive (3) 2:12½ by Electioneer, Gertrude Russell 2:23½ by Electioneer. Lucyneer 2:27, dam of Lucrative 2:13½ and Minnie B. 2:15½. Sallie Benton (4) 2:17½, dam of Serpol 2:10, by General Benton. Sweet Rose (1) 2:25½ by Electioneer. Athena 2:15½ by Electioneer, and many others that carry the blood of Electioneer.

Sixteen two year old geldings will be sold. They are well bred, good looking individuals, many of them out of the best producing mares at Palo Alto in the present and past, such as Carrie C. 2:24, Bell Bird 2:22, Clarion 2:25½, Ella 2:29, Maiden 2:23, Mano, dam of Mendocino (3) 2:19½, Sweet Water 2:26 by Stamboul and others. These youngsters are broken double and single and can be seen at the sale yards Tuesday, January 27, 1903.

Orrin Hickok's Condition.

A prominent Cleveland, Ohio, horseman made the following statement to a newspaper reporter recently: "While Orrin has lost about all of his money, he is in no way in need of anything. There is no millionaire in the land that could be better taken care of than the old driver, and he is in no way in need of anything, as the report I saw would lead one to believe. H. M. Hanna, who is one of the founders of the hospital, saw that Orrin was in a bad way during the Cleveland meeting, and, after considerable effort, prevailed upon him to take the advice of a physician. The physician advised the hospital, and that is how the old man came to go there. He is attended by Mr. Hanna's own doctor, who is one of the best in the country, and has everything possible to make him comfortable. He is suffering from paresis, I believe, or, at any rate, a softening of the brain—I believe that is what they call it—and as he must be close onto 70 years of age, I doubt if he ever recovers; but so long as he lives his friends may rest assured that he will have everything that he could wish and will be well taken care of in every way."

Burns & Waterhouse have announced their intention of retiring, at least temporarily, from the active part of the racing game. This well known firm has had a varied experience during the several years of continuous winter racing in California and has found that a racing stable has been an expensive amusement to keep up. Corrigan and the best of the two year olds will be disposed of in the East, while the other horses in training will be sold or leased. For the immediate future the energies of the firm will be devoted to breeding yearlings for the sale ring. Burns & Waterhouse have an extensive stock farm at Hopland with Eddie Jones, Altamax and Take Notice at the head of the stud; Altamax has already proved himself to be a successful sire and his yearlings should command a good figure in the Eastern market.

## New 2:30 Performers.

The following list of new 2:30 performers for the year 1902, are the get of stallions that have stood for service on the Pacific Coast during the past few years.

Alcyo, p. 2:10, by Alcyone 2:27—2:15, p. 2:24 1/4  
Arzilla, p. 2:20 1/4 to 2:17  
Alco, p. 2:20 1/4 to 2:17  
Lois J., p. 2:22 1/4 to 2:17 1/4

Altamont 2:26 1/4, by Almont 33—30, 17 p. 2:18  
Altacora, p. 2:20 1/4 to 2:18  
Admont, p. 2:27 1/4 to 2:18 1/4  
Claymont, p. 2:27 1/4 to 2:18 1/4  
King Altamont, p. 2:20 1/4 to 2:13 1/2  
Le Roi, p. 2:18 to 2:10 1/4

Altivo 2:18 1/4, by Electioneer 125. 2:29 1/2  
Altoaine 2:20 1/4 to 2:18 1/4  
Dorothea A., 4 2:29 1/2

Antrim 5819, by Aberdeen 27—4, 1 p. 2:12 1/4  
Anzella 2:10 1/2 to 2:06 1/4

Arthur Wilkes 2:28 1/4, by Guy Wilkes 2:15 1/4  
4 p. 2:12 1/4  
Hobo (tr. 2:14 1/4), p. 2:12 1/4  
County Attorney, p. 2:20 1/4

Arthur Holt 23204, by George Sherman. 2:25 1/4  
H. D. B. 2:25 1/4

Athadon 26990 by Matadon. 2:25  
Chin Wo 2:25

Azmoor, 2:20 1/4, by Electioneer 125—6, 3 p. 2:12 1/4  
Betonica, p. 2:10 1/2 to 2:09 1/4

Barondale, p. 2:11 1/4, by Baron Wilkes 2:18  
1 p. 2:12 1/4  
Baron May, 4 2:20 1/4  
Lady Dale, 3 p. 2:21 1/4

Bay Bird 8874, by Jay Bird 5060—3, 5 p. 2:14 1/4  
Yukon, p. 2:14 1/4

Beau B., p. 2:16 1/4, by Wildnut 13472—  
1 p. 2:24 to 2:15 1/4  
Volita, p. 2:24 to 2:15 1/4

Bob Mason 2:27 1/4, by Echo 462—1, 3 p. 2:17 1/4  
Rozelle 2:17 1/4

Bonner N. B. 2:17, by Daly 2:15—1. 2:16 1/4  
Oregon Sunshine, p. 3 2:16 1/4

Captain Jones, by McKinney, 2:11 1/4. 2:26 1/4  
Lady Jones, 3 2:26 1/4

Caution 10581, by Electioneer 125—5, 3 p. 2:18 1/4  
Francisco, p. 2:18 1/4 to 2:14 1/4

Charles Derby 2:20, by Steinway 2:25 1/4—  
6, 13 p. 2:23 1/2  
Frank Dale 2:23 1/2  
Climax, p. 2:18 1/4

Dr. Hammond, P. 2:14 1/4  
Lucetta, p. 2:15 1/4  
Don Derby, p. 2:13 1/4 to 2:06 1/4

Naniwa, p. 2:17 1/4 to 2:15 1/4  
Willie Osborne, p. 2:23 1/4 to 2:12 1/4

## EVERY HORSE OWNER Should Keep Constantly On Hand

the old reliable remedy for Spavin, Ringbone, Curbs, Splints, etc., and all forms of Lameness.

USED FOR 25 YEARS.

University Ave., San Jose, Cal., May 21, 1900.

Dr. B. J. Kendall Co., Dear Sirs—I have been using your Spavin Cure for twenty-five years, and find it very efficient as a remedy for what it claims to cure. Please send me your "Treatise on the Horse and His Diseases," and much oblige Yours truly, G. B. BLANCHARD.

Endorsements like the above are a sufficient guarantee of its merits. Price \$1; Six for \$5. As an aliment for family use it has no equal. Ask your druggist for KENDALL'S SPAVIN CURE, also "A Treatise on the Horse," the book free, or address DR. B. J. KENDALL CO., ENOSBURG FALLS, VT.

Great young racing prospect by Red Wilkes

**HATTIE B**

Sister of Francis B, 2:11<sup>1</sup>/<sub>4</sub>, the Syracuse sensation. Has 2:10 speed.

**DOMINO**

One of the fastest green Pacers on earth.

This is not only a star sale, but a **SALE OF STARS**, unprecedented in auction annals. To begin with, there are five trotters with 2:10 records all made in 1902, and two started green. Some of the other features are indicated above. If you have a **GOOD HORSE** you wish to sell where the right kind of buyers will be plentiful, now is the opportunity. But you must **ACT AT ONCE**. Wire us to-day, or it will be too late.

## GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY. It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables.

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

Read our "ad." on Campbell's Horse Foot Remedy in next issue of this paper.

# ALL OVER THE WORLD

## The 1902 Chicago Clipper (Stewart's Patent) Price in San Francisco, \$15.00

Is recognized as the greatest clipping machine ever invented. More of them are sold every day TEN TIMES OVER than all other makes combined. Each one is sold under a positive guarantee to clip faster and turn easier than any other made, regardless of price, or MONEY REFUNDED.

Remember that the gearing of the 1902 Chicago Clipper is all cut from solid metal, not cast. Unlike any other machine made, it can be turned with either the right or left hand.

This is the machine that received the highest award at the Pan-American Exposition, and is used by professional clippers all over the world, to the exclusion of all others.

Chicago Flexible Shaft Co.

Those beaten and not placed allowed 10 lbs. Allowances not accumulative. Winner to be presented with a silver cup by MESSRS. ALDEN & THOMPSON, PROPRIETORS. Four Furlongs.

**The Young Stakes, \$400 Added.** FOR TWO YEAR OLDS. Entrance \$5, \$30 additional to start. \$400 added, of which \$60 to second and \$40 to third. Winners of a stake of the value of \$1000 to carry 5 lbs extra. Non-winners of a stake that have not won two races allowed 5 lbs; Maidens 10 lbs. Winner to be presented with a handsome silver loving cup by MR. CEASAR YOUNG. Four Furlongs.

#### Notice to Nominators.

The Mid-Winter Race Meeting, 1903 opens at Agricultural Park, Saturday, January 31st, and horses should be shipped to Agricultural Park, University Station, Los Angeles, Cal.

In case of a walkover, the horse walking over shall receive only one-half of the added money.

No selling stake or race shall be a claiming race, unless so specified in the conditions.

In races for all ages, horses shall carry weights according to their ages at the time the race is to be run.

Liberal over-night handicaps and special events during the meeting.

Two or more races for two-year-olds each week. If horses enough to fill, we will also give two hurdle races each week.

# THE WASHINGTON PARK CLUB

CHICAGO, ILLINOIS.

Stakes to Close **THURSDAY, JANUARY 15, 1903, for the**  
**Summer Meeting of 1903** Beginning Saturday, June 20th,  
 Ending Saturday, July 18th.

OVERNIGHT HANDICAPS, \$1250 AND UPWARD. NO SELLING PURSES LESS THAN \$600. OTHER PURSES \$700 AND UPWARD.

**SPECIAL NOTICE.**—No entry will be received for any of these Stakes except upon this condition: That all disputes, claims and objections arising out of the racing, or with respect to the interpretation of the conditions of any Stakes, shall be decided by the Racing Stewards present or those whom they may appoint, and their decisions upon all points shall be final.

## "SAVE-THE-HORSE" —TRADE MARK— SPAVIN CURE.

Any of the Testimonials we publish can be verified by writing to the parties signing them.

South Amboy, N. J.  
Gentlemen:—My experience with "Save-the-Horse" has been as follows: My horse, when young, would rear on his hind legs and produced a curb, which later developed so that after driving a mile or two he would become so lame I could hardly get home. I was recommended to use "Save-the-Horse" instead of blistering and after a few weeks' use, and since, the horse has never taken a lame step and I have driven him as far as forty miles in a day. To a man who has a valuable horse \$50 would be a small price to pay for this remedy to produce a cure in such a case. I used not over three-quarters of a bottle.

Very truly,

DR. L. F. MENIZER.

New York, N. Y.

Gentlemen:—My black mare (Candy 2:10) has a

Horse can be worked with either shin or ankle boots, as no harm can possibly come by either destruction of hair or scalding of the limb. "Save-the-Horse" can be applied in all conditions and extremes of weather—hot or cold.

POSITIVELY AND PERMANENTLY CURES Bone and Bog Spavin, Ringbone, Curb, Thoroughpin, Splint, Capped Hock, Shoe Boil, Wind Puff, Weak and Sprained Tendons and all Lameness. ## THE OCCIDENT STAKES.

That classic trotting event for three-year-olds, the Occident Stake, is growing in favor with breeders every year, the total number of entries for the foals of 1902 to trot in 1903 being an even hundred in number. This will make the stake worth nearly if not quite \$100,000, the richest by odds in its history. The list of entries is as follows:

C A Arvidson, b e Rattus by Sutter Lady Phelps.  
W O Bowers, b e Earl Madison by James Madison-May; ch f Silver B by Silver Bee Sable Benton.

Alex Brown, b e by Nushagak Nougay; b f by Nushagak Adela W. Lacey; Nushagak-Punch; b e by Nushagak-Adahalla; b f by Prince Ansel-Mamie Martin.

Forty-two colts and fillies have third payments made on them for the stake of 1903, to be trotted this year at the State Fair. They are a grandly bred lot, and if they come up to expectations will make a grand race for first money at the fair this year. The following are those on which third payment was made:

I L Borden's b f Sadie L; W G Durfee's b f by Zombro-Leonora; Mrs S V Barstow's b e Star B; Alex Brown's b e by Arthur B-Nosegay, ch f by Nutwood Wilkes-Wildflower; John Baker's b f Freckle-bird; C A Durfee's blk or br f Ragbie, br e Grecco, br e Jim Rea; B Davis' blk f Dixie S; D J Desmond's b f Fairy; B Erkenbrecker's blk f California Poppy; G W Ford's ch e by Neerut-Florence; J Gallegos' b f Sophia McKinney; E A Gammon's blk f Urana; A J Hudson's b e Strathcona; G W Kingsbury's b e by Lynmont-Daisy; W H Lumsden's b e Robin Stanley; La Siesta Ranch's b e Search Me; W Maben's b f Dixie W; H E Meek's b f by Welcome-Hybla; W E Meek's b e by Welcome-Leonora, b e by Wm Harold-Fenella; C W Main's b f Zomilia; Oakwood Stock Farm's b e by Owyhee-Inex, b f Tuna, r e by James Madison-Steinola, b f by James Madison-Babe Marion, b f by McKinney-Electway; Owens Bros, ch g Acme; Rosedale Stock Farm's b e Dacus; J A Richardson's b e Swift B; Santa Rosa Stock Farm's ch e by Sidney Dillon-Silver Eye, b f by Sidney Dillon-Pansy, b e by L W Russell-Pacita; Jas A Smith's blk e by McKinney-Daisy S; Thos Smith's b e Fred P; Little Bros' b f by Stam B-Laurel; L H Todhunter's br e The Jester; Valencia Stock Farm's blk e Amador; P J Williams' blk f Monterey Bells; F E Wright's b e Sir Knight.

## At the Salinas Track.

Cal. Rodriguez, the well known trotting horse trainer, is now located at the Salinas race track, where he is training three very promising youngsters. Two of them are the property of J. D. Kalar, Clerk of Monterey county, one being a filly coming two years old, by Robin, sire of Roblet 2:12, Black Bart 2:17 and others, out of Lillian Wilkes by Alpheus Wilkes. This filly worked an eighth in twenty seconds last fall as a yearling and is a good prospect. She is entered in the Stanford Stake of 1904.

Another good one belonging to Mr. Kalar is Duplicate, a six-year-old green mare by Chas. Derby out of Belle Alto, second dam by Gen. Taylor. This mare is not only handsome but fast.

Editor Smeltzer, of the Salinas Journal, who is a great admirer of a good horse, has placed his three year old filly by Dictatus 2:17, dam by Brown Jug, in Mr. Rodriguez' hands and she is developing into a good one. She has speed enough to race and gameness to take as many heats as the next one.

Mr. Robert Garside will soon send to Rodriguez a filly foal of 1902 that is entered in \$56,000 worth of stakes over East. She is by McKinney 2:11 out of a Nutwood Wilkes mare and one of the prettiest natural lot trotters ever seen. She will be broken next month and given a few lessons and then turned out. There is no better bred one in California.

## John Phippen Returns to California.

It is a pleasure to announce the return to California of Mr. John Phippen, so long connected with Palo Alto Stock Farm as head trainer, who several years ago went to Dallas, Texas, and took charge of Col. Exall's stock farm, where the Electioneer stallion Electrite is the premier. Mr. Phippen gave many of the Electrites records and took large consignments north to the auction sales, where they sold for good money, but the glorious climate of California had too many fond remembrances for him and he has returned here and is now located with his family at Mayfield, San Mateo county, where he has taken charge of the old half-mile track there and is putting it in shape to handle and train young and aged horses for the road or track. Mr. Phippen writes us that he will have an excellent track and that there are splendid roads to jog horses on where the horses can see any kind of a rig from a bicycle to an automobile, with the exception of electric cars, and they will come soon. As all our readers know, Mr. Phippen is one of the best colt handlers that ever sat behind a baby trotter and he will doubtless have no trouble in securing all the horses and colts he can attend to, and we hope to see him on the California Circuit next summer with a string of money winners.

## Stops His Ad.

HAYWARDS, January 12, 1903.  
BREEDER AND SPORTSMAN—Through the advertisement in your valuable paper I have sold the draught stallions Fresno and Pluto, Fresno going to Fortuna, Cal., Pluto to Templeton, Cal., and sold them for good prices.  
Yours respectfully,

GEORGE GRAY.

P. S.—Please stop the ad.

California favorite hot weather drink—Jackson's Napa Soda.

## Horse Notes From the Capital.

SACRAMENTO, Jan. 14, 1903.

EDITOR BREEDER AND SPORTSMAN—Considerable interest is manifested in "hoss" circles in Sacramento just now, and each owner of a well bred colt thinks he has the fastest and best in the country, which is natural and at the same time pardonable.

As the time is approaching for the announcement of programs for the meetings in the different agricultural districts, the directors should "get next to themselves" and open pacing and trotting stakes for colts foaled and owned in the separate districts. There will be good entry lists in all such stakes that are opened this year.

The Capital City has been covered by a dense, cold fog for the last month and the track being in no condition to work on, the trainers have taken to jogging on the road.

There are quite a number of royally bred yearlings and two year olds that are entered in the Pacific Breeders \$6000 Futurity. They are by Zombro, Azmoor, Ouboul, Stam B., Silver Bee and Nutwood Wilkes and are all in condition and taking their early lessons in harness.

Hi Hogboom is very sweet on his Bell Bird colt by Iran Alto. He stole a march on the boys and drove him a mile in harness the other day and says he will be ready when the bell taps to show them the way around the track.

Mrs. E. W. Callendine's chestnut filly Lady Carreta, entered in the same stake, acts like an old campaigner and shows her breeding as well as speed in harness.

The Tryon stable is not asleep but has a long string of trotters and pacers. Walter has a sweet two year old pacer that is quite a hummer by Daedalion 2:11 out of Mollie Nurse 2:14.

The lessee of the track here, Thomas Norton, is a lover of horses and has quite a number of good ones himself. The track will be put in first class condition as soon as the weather will permit and with a little sunshine will be all right. Mr. Norton will offer inducements for the horsemen to establish their training quarters here as in former years.

As to stallions, we have here Azmoor 2:20, son of the mighty Electioneer, Ouboul 2:22 by Stamboul 2:07, Athamax, grandsire of the great Onward, and the three year old Guynut by Nutwood Wilkes 2:16, sire of the great John A. McKerron 2:05. Breeders and farmers ought to take advantage of this opportunity to improve the breed of their horses by patronizing such high class stallions as these.

Yours truly, WILLITA.

## Breeding for Bone.

Export dealers in American draft horses insist on animals with good bone and blocky conformation. The symmetry of a draft horse depends largely upon well distributed substance in all parts of the personality of the animal. The quality of inferior bone and substance is the natural inheritance of many of the draft horses bred in America, occasioned by the importation of sires of light bone formation. Dealers more ambitious to get rich quickly than to improve the quality of American horses brought over many inferior animals for breeding purposes. It takes several generations of methodical breeding to establish any family characteristic. The stallion with inferior bone by crossing with mares with superior bone development and then mating the progeny with sires of extra bone and substance might in a few generations of consecutive breeding produce horses of the desired substance.

The best breeders of Europe are particular to patronize stallions with strong bone and substantial personality. The strong bone of the Belgian, Shire and Clydesdale horses has been developed by methodical breeding and scientific rations during the period of maturity. The superlative quality of a breed can be largely nullified by injudicious feeding.

From the day the foal is dropped until maturity the ration should be adapted to building up a grand bone superstructure. In nearly all the pronounced horse breeding States the leading cereal is corn, a grain rich in fat producing qualities, but deficient in the properties that promote bone formation. With medium bone as the natural inheritance of a foal, and reared principally on a ration of corn, the young animal develops into a cheap, light boned horse. Instead of corn the foal should be fed generously of rations of bran and oats that are rich in the elements which stimulate bone formation. There is no reason why American breeders cannot equal, or even excel, their foreign competitors in the horse industry, but to succeed they must follow the system of feeding practiced by foreign breeders. Foreign bred horses are raised principally on nitrogenous foods, while American draft animals are matured on feed deficient in nitrogenous constituents. The foreign bred horse is increasing in bone development, while in too many instances American bred animals are deteriorating.

A lot of McMurray carts just received. You need one right now to work your colts in this winter. Call at the Kenney Manufacturing Company, 531 Valencia street and take a look at these carts and other first-class vehicles they have for sale.

## Notes and News.

Get your stallion advertisement in before February 1st.

The Hungarian government spends nearly \$700,000 annually on the breeding of horses.

The Board of Stewards of the Grand Circuit meet in Boston this month.

Monte Carlo stepped a quarter in 32 seconds at Pleasanton last Wednesday.

Don't breed your scrub mares, if you have any, to a stallion or jack of any kind. It don't pay.

The present owner of the pacer Anaconda says that he paid \$6000, not \$8000, as reported, for him.

Four years is a long preparation for a campaigner, but it paid well in the case of Direct Hal 2:04½.

The list of stallions advertised in our last issue shows that California is pretty well supplied with well bred producing stallions.

A case of inbreeding and the produce getting a fast record is shown in Linden 2:20 by Allerton 2:09½, dam Hindes by Allerton 2:09½.

Palo Alto Stock Farm two year olds will be sold Thursday evening, January 29th, at 1732 Market street, by Fred H. Chase & Co.

H. R. Murray of Canastota, N. Y., owns a colt by Gayton 2:08½, son of Allerton 2:09½; dam by Dare Devil 2:09; second dam by Arion 2:07½.

The two Iowa mares, Blue Silk 2:27½, and Raw Silk, daughters of the great broodmare, Soprano sister to Steinway, are safe with foal to Directum 2:05½.

Lily Direct 2:21½, pacing mare by Direct 2:05½, dam Lily Langtry by Nephew, has been sold by Thos. J. Brady, New York, to A. W. Liekert, Indiana, Pa.

Directum Fay, the son of Directum 2:05½, owned by Walter Winans of England, recently won first prize in the high-stepping class at the Dublin Horse Show.

Monte Carlo is eligible to the 2:10 class, and that is an advantage he has over Major Delmar 2:05½, Chase 2:07½, Ozanam 2:08, Prince of Orange 2:07½ and Rhythmic 2:08.

W. L. Snow is very much pleased with Julia M. by Zombro, this winter. He has let her step a little in brushes on the snow this winter, and she can trot very fast and do it right.

Dan Lieginger says he will get up a few horses and train them if there is a California circuit this year, otherwise he will stay at home and tend to business at the corner of Devisadero and Fulton streets.

Frank Nugent, Superintendent of the Brentwood Stock Farm, owns a handsome gray mare, a full sister to the gray ghost Waldo J. 2:08. She was bred to Welcome 2:10½ last year and is now very heavy in foal.

One of the remarkable sires of 1902 is Axworthy 2:15½ by Axtell 2:12, who is credited with nine new performers. Axworthy is ten years old, and prior to 1902 was not represented by a single standard performer.

Colts that are fed liberally during the winter months must have plenty of exercise or they will amount to but little. There is no surer way to spoil a good colt than to feed high and keep him in the stable without exercise.

Mr. F. C. Sayles, who owned the champion trotting mare Alex 2:03½, Sable Wilkes 2:18 and others, died suddenly at his home, Pawtucket, R. I., January 5th, aged 68 years.

Daedalion 2:11, son of Diablo 2:09½ and the great broodmare Grace by Buccaneer is at Lodi in charge of Walter Trefry. Daedalion's colts are grand looking youngsters with substance and fine style and are great speed prospects.

J. B. Stetson, of Boise, Idaho, has lost by death a colt by Zombro 2:11 out of Lady Alfred. This colt was entered in several rich stakes over East, and was one of the most promising of the many good ones that have been sired by Zombro.

The will of the late A. J. Alexander, proprietor of noted Woodburn Farm, Kentucky, disposes of property to the value of about \$5,000,000. Mr. Lucas Brodhead, who has managed the breeding farm successfully for many years, received \$5000.

Nearest 2:22, own brother to John A. McKerron 2:05½, sired the champion four-year-old filly of last year—Alone 2:09½. There is a yearling by him down at San Jose that gives every promise of being faster than Alone. It is out of a mare by Danton Moultrie, second dam by Soudan, third dam by Nutwood and fourth dam by Owen Dale. No more perfect pacing machine was ever foaled, and it will break into the 2:10 list at an early age.

Advices from Minneapolis, Minn., under date of January 5th, state that W. W. Savage arrived there that day with his recent purchase, Dan Patch. Two thousand persons with a brass band were at the railroad station to receive the famous race horse.

The sensitive, excitable colt in proper hands can be made steady-going, tractable and reliable, or he can be ruined as easily as the blowing out of a candle. It only needs a quick-tempered trainer that will be harsh in language and rough in handling and the ruin will be complete.

Mrs. Poldy McPhee, the well-known Austrian horsewoman, died recently at her home in Vienna, Austria. Among the horses imported by her were Bravado 2:10½, Colonel Kuser 2:11½, Henrietta 2:12½, Axmere 2:13½, Minnie Birchwood 2:13½, Miss Sidney 2:14 and Wig Wag (3) 2:16½.

Sam Bowers, the pacing wonder that took a record of 2:11 last season up north, is reported sold to Mr. A. J. Newman, of Kansas City, for \$6000. Sam Bowers won \$5700 last year, winning nine races and being second in one out of ten starts. The horse is now in Spokane, but will go East soon.

An ordinance has been passed by the Los Angeles city council prohibiting all bookmaking and betting on horse races. If the ordinance is signed by the Mayor it will become a law immediately, but we understand that Mayor Snyder has assured Caesar Young and Manager J. W. Brooks that he will not sign it.

The catalogues are out for the Palo Alto sale of two year olds and is a handsomely gotten up affair. If you have not received one already send to Fred H. Chase & Co., 1732 Market street, San Francisco, for one. The sale is to be held Thursday evening, January 29th, and the horses will be at the yard the Tuesday previous.

They are predicting that King Direct will be the champion four-year-old pacer of 1903. His sire is Direct 2:05½, his dam, Welcome Bunker, was by Mambrino King; his second dam, Lady Bunker, was by Mambrino Patchen, and produced Guy Wilkes 2:15½, and his third dam, Lady Dunn by Seely's American Star, produced Joe Bunker 2:19½.

Congressman Thomas H. Tongue, of the First Congressional District, Oregon, died at Washington, D. C., January 11th, from an acute attack of dyspepsia which resulted in heart failure. Congressman Tongue was a great lover of the American trotting horse and owned a fine breeding farm at Hillsboro, Oregon, which was headed by the stallion Lovelace 32741, a son of Egotist 2:2½ out of the great broodmare Crepon by Princes.

W. Harry Orr thus explains why he bought Ashland Wilkes 2:17½: "On my visit to Lexington about every colt or horse that I saw by Ashland Wilkes," said Mr. Orr, was a bay with black points, all of them being strikingly alike in form and their speed is a matter of record. They were horses that had plenty of bone, and so far as I could see were a sound lot. I figured that Ashland Wilkes would suit me to breed my mares to."

Sam Hooper has Alta Vela 2:11½ at Hans Frellson's stables on Point Lobos avenue this city and states he will keep the handsome son of Electioneer here during the spring as there are a number of San Franciscans who have booked mares to him. Mr. Hooper says that it is his intention to train Alta Vela again this year and start him in two or three races as he is certain that with a good day and track he can reduce his record to 2:09.

The offer of \$40,000, which was made a few days ago for the young stallion Wiggins 2:19½ and four mares, shows that true excellence in a stallion will command a big price even if his blood lines are not those of the most fashionable families. Wiggins has not got a drop of the blood of either George Wilkes or Electioneer. He was sired by that sterling Hambletonian-Star sire Aberdeen, while his dam, Albina de Mer, was by Stamboul 2:07½; second dam Belle Blanche by The Moor; third dam Belle View Maid by Idol, son of Mambrino Chief; fourth dam by Pilot Jr.; fifth dam Kate Taber by Mambrino Messenger, son of Mambrino Pastermaster.

Thus speaketh a veteran: It is reported that nearly all the Grand Circuit meetings will put on one or more wagon races for amateur drivers in each day's program. While it is allowed that the sport of amateur racing has done a great deal of good to the horse interests, it can never be expected to keep up that reputation if it is to be used as a means of filling in a day's program without cost to the track management, unless some rule is made that will absolutely prohibit all betting on such events. Directly amateur racing, whether it be horse or any other kind of sport, commences to take in any systems by which money can be made on it, then it ceases to be amateur sport.

There are but eighteen stallions that have trotted in 2:08 or better, as follows: Crescens 2:0, by Robert McGregor 2:17½; Directum 2:05½, by Director 2:17; John A. McKerron 2:05½, by Nutwood Wilkes 2:16½; Ringen 2:06½, by May King 2:21½; Tommy Britton 2:06½, by Liberty Bell 2:24; Ralph Wilkes 2:06½, by Red Wilkes; Charley Herr 2:07, by Alfred G. 2:19½; Caid 2:07½, by Highwood 2:21½; Peter the Great 2:07½, by Pilot Medium; William Penn 2:07½, by Santa Claus 2:17½; Jupe 2:07½, by Allie Wilkes 2:15½; Stamboul 2:07½, by Sultan 2:24; Kremlin 2:07½, by Lord Russell; Arion 2:07½, by Electioneer; Fred Kobi 2:07½, by Guy Wilkes 2:15½; Grattan Boy 2:08, by Grattan 2:13; Rhythmic 2:08, by Oakland Baron 2:09½ and Onward Silver 2:08, by Onward 2:25½.

Anteros, one of the best speed siring sons of Electioneer 125 has become the property of a lady at Carthage, Mo., by lottery. The son of Electioneer and Columbine was the capital prize offered to buyers of admission tickets for the fair and race meeting given at Knell's Driving Park, in that city, last fall, and, of course, proved a strong drawing card. A Mrs. Cornell held the lucky number.

M. M. Donnelly, the well known horseshoer whose place of business is at 1306 Grove street in this city, is the owner of the very promising trotting stallion Young Salisbury by Judge Salisbury out of Nora Sprague by Gov. Sprague. He also owns a five year old gray gelding by McKinney 2:11½ that is a big, fine looker with speed. "Mike" is often seen on the road with one of these trotters and he don't take everybody's dust.

"I am inclined to think," says A. E. Perren, one of the New York State Fair Commissioners, "that a great deal of the trouble about laying up of heats can be avoided by talking with the drivers before the rule is violated, and giving them to understand that unlawful work will be severely punished. Let them understand that no mild fine of a hundred or so will be the punishment, but that they will be ruled off for periods of time commensurate with the offense. They don't like to take a chance of being set down and will be very careful about infringing the rules. Some of them will pay a fine of \$100 or \$200 and laugh at it as a good joke; almost any one would pay that price for a chance to make a couple of thousand or more. But when it comes to being suspended they will do a little more thinking before they will deliberately violate the rules."

One of the greatest consignments of draft horses ever sold at the Chicago market was shipped by D. D. McGregor, of Tingley, Ia. The shipment consisted of nineteen head, which sold for \$4980, an average of \$257.36—the highest average for a carload lot ever made at auction in the history of the Chicago market. Mr. McGregor fed these horses ninety days, and the lot was composed of Clydesdales, Percherons and Shires, the top price being brought by a Shire gelding weighing 1900 pounds, which sold for \$350. This sale demonstrates the fact that good horses will sell at prices that will bring a profit to breeder, feeder and shipper. Too many owners do not properly fit their horses for market, hence do not secure the price the animal really deserves. By selling a thin horse the breeder is not making any great profit and is certainly affording some other man an opportunity of making a handsome profit. The farmer can, and should, fatten and place in shape his horses, no matter whether they belong to the draft or light harness breeds.

The importance to horsemen of having a continuous chain of fairs, says the *Rural World*, can hardly be overestimated. Horsemen will not make entries to any fair unless it is in a series of fairs held from week to week. They want to start out on a six or eight weeks' circuit. The difficulty in the way is that some of the fairs are wedded to a particular date and are unwilling to take any other. This is the stumbling block in organizing circuits. It is very difficult to accommodate all. The first point to consider is what fairs want to join in a circuit. The next is the convenience of shipping from point to point, without having to double back. The shortest, most direct route should be selected, and the dates should be made to accommodate this route. It is not necessary to have all the fairs under the same management. Each fair can manage its own affairs to suit itself, if it chooses, and still remain in the circuit. If the representatives of the different fairs where a circuit can be formed will meet together in the right spirit, and be willing "to give and take" so as to accommodate the largest number, the agreement on a series of meetings, from week to week, will be attended with the greatest advantages, not only to horsemen but to the fairs also. The lists of entries will be more than doubled when on a circuit.

The New York evening papers of Monday, December 22d, stated that a horseman who was crossing Broadway at the intersection of Spring street, was run over and trampled underfoot by a runaway horse, and that the horse's hoof had severed the jugular vein and caused immediate death to the unfortunate man. The police took immediate steps to learn the identity of the man, the only card that was found on the body being one with the address of Mr. James Butler. Mr. Butler was out of the city at the time, which was learned by calling at his residence. Horsemen were shocked to learn on Tuesday that the dead man was no other than the well known turf writer, E. C. Walker, "Veritas," his body being identified by his wife, who read the account of the accident in the papers. His funeral was held on Saturday at his residence, Jerome avenue and 167th street. Under the nom de plume of "Veritas" Mr. Walker was a contributor to the literature of the trotting turf for many years. At one time he was editor of the *Horseman*, and for a time contributed to the columns of the late *Spirit of the Times*. For some years he has conducted a department on the *Trotter and Pacer*. Mr. Walker always had a few horses which he trained and drove himself. Years ago he had a stallion, Young Buchanan, which was said to be a man eater. Last spring he had four or five in his stable at the Empire City track, which he was jogging himself. Cartridge Jr. was one of them, which he thought pretty well of, and he also had a promising filly by Temple Bar. About the best trotter he ever had anything to do with, however, were the horses Cartridge and Miss Alice 2:13½. During last season he gave his stable over to a trainer and put in a greater part of it as a starting judge at various meetings. He was devoted to the American trotter, was a forceful writer and a clever gentleman. His friends on the trotting turf were legion.—*Horse Review*.

## Pleasanton Track Notes.

Dr. Boucher has moved his string of pacers to Pleasanton. He had Miss Logan 2:09½ and has already booked her to Searchlight 2:03½. This mating should produce a two-minute pacer sure, as Miss Logan is a producer of speed and Searchlight is one of the fastest and best bred pacers ever foaled. The genial Doctor has Harry Logan 2:12½, Miss Logan's first foal, in the string, also her two year old by Colbert 2:07½ that is a 2:10 pacer, sure.

Among the horses in Monroe Salisbury's string, besides Monte Carlo 2:09½, is the stallion Clay S. 2:13½, now owned by Mr. William Hendrickson, of this city. Mr. Salisbury thinks well of the son of Grover Clay and may take him East. A four year old bay trotter by Directum 2:05½, owned by Judge Greene, of Oakland, is showing well and is very promising. He is a large colt, larger than most of the Directums. The Seymour Wilkes gelding, Albert, that Mr. Salisbury recently purchased from Fred Talbot, of this city, attracts much attention. He has a nice way of going and lots of speed. The standard was put on him the other day and it showed that his height was 16 2.

One of the best green prospects in California is a mare by McKinney 2:11½ that Geo. A. Davis, of Pleasanton, recently purchased at the Oakwood Park Stock Farm. Mr. Davis has many inquiries about his stallion Rey Direct 2:10, as the colts and fillies by this son of Direct 2:05½ are attracting great attention from horsemen. Ed Parker has nine of these colts at the track and they are a horse show in themselves.

The Santa Rosa Stock Farm string, comprising fourteen head, is now stabled at Pleasanton and the horses are all looking well. Anzella 2:06½, Dolly Dillon 2:07, Lou Dillon (trial 2:08½) and the great pacer Sir Albert S. 2:03½ are looked over every day by visitors at the track and the green ones come in for much admiration.

Bert Webster gives Bonnie Direct 2:05½ a jog every day and is giving several yearlings by him a few early lessons. Bonnie looks as handsome as a picture. He is considered by many to be the best bred son of Direct and he certainly is an equine beauty, as well as a wonderfully fast and game race horse.

The big trotter Vi Direct 2:18½ that was on the circuit last season is at the head of Al McDonald's string. Al has five others that he is getting ready to drive to records this year.

The two handsome stallions Searchlight 2:03½ and Lecco 2:09½, the latter a trotter, are much admired by visitors to the track, and Mr. Mills, we are glad to note, has already booked quite a number of mares to each. As these stallions are outcrosses for nearly all the mares in California, and are both great individuals as well as royally bred winners, they should not be overlooked by California breeders.

Ben Chaboya, who for several years past has been the head trainer at the celebrated Oakwood Park Stock Farm, has located at Pleasanton since the farm has stopped training its products, and has a string of eight colts and fillies that he is working on. The majority of them belong to Mr. C. L. Crellin, who enjoys seeing them take their lessons at the track and visits them often.

S. K. Trefry has two green ones in his string, one the property of Mr. Geo. Johnson, who has named the horse Marin Jr. the 2d. Both of Mr. Trefry's charges can show speed.

Will Welch is training a McKinney filly for Dr. Masoro, the well known San Francisco Vet, that is a great prospect, and he has another that belongs to Mr. Roberts of San Francisco that is equally as promising.

Samuel Gamble has secured quarters for Stam B. 2:11½, the great horse, at the Santa Rita Farm, where the paddocks are all in fine shape and the pasturage most excellent. Mr. Gamble is a great stickler for good feed for broodmares and for this reason he has taken quarters at Santa Rita, one of the best appointed farms for pasturing and keeping horses in California.

The Nutwood Stock Farm string of youngsters at Pleasanton is showing speed already and William Cecil, the trainer, will put quite a number in the list this year by Nutwood Wilkes, sire of the great John A. McKerron 2:05½. He worked Miss Georgie 2:25, record made as a three year old last summer, a half in 1:06 over the Pleasanton track the other day. She is by McKinney out of a daughter of Nutwood Wilkes. Few young stallions have shown the breeding on quality earlier than Mr. Carter's great son of Guy Wilkes. He has not only sired a lot of fast ones, among them the champion matinee horse of America, but he has a son that produced a four year old 2:10 performer and two daughters that are producers. And these are the only ones of his descendants in the second generation that have been winners.

Those who see James Thompson at work on his bunch of Palo Alto bred three year olds are all with a desire to own something like them and

many have resolved, after seeing these handsome colts and fillies step to attend the Palo Alto sale at Fred H. Chase & Co.'s salesyard in San Francisco, on the 29th inst., and make a few bids. Mr. Thompson, who is a pretty fair judge, says there is nothing like the Palo Alto bred colts to make a trainer get a reputation as a speedmaker, and if he had the money he would go to Chase's sale, buy the whole bunch and start a stock farm of this own.

## The Primitive Horse.

Some weeks ago a report came from the West that the party supported by the William C. Whitney fund, which is exploring for relics of extinct horses had made important discoveries. The fossils of a herd of five small horses had been found. They belonged to the species of three-toed horses, which hitherto had been known only from fragments of skulls and limbs. The party now in the West had found five fore limbs and ten rear limbs in a perfect state of preservation, several skulls and one skeleton nearly complete. The fossils were shipped to the Museum of Natural History, New York. Prof. Osborn, of the museum, said that the find would add an important stage to the history and development of the horse in America.

There was a period when naturalists looked upon the horse as a very isolated and singular creature, because it walked so differently from the other animals and the naturalists, therefore, made it an order by itself, under the title of "Solid hoof." Prof. W. H. Flower, F. R. S., director of the natural history department of the British museum, asserts that knowledge obtained during the past fifty years as to the comparative anatomy of the horse, and as to the myriads of extinct forms of animal life, has shown that the horse was only one of a large group of animals. The professor says that he is compelled to assume Darwin's theory of derivation or descent of one form of animal from another. The group of animals known as the hoofed animals are divided into two great and distinct groups. One group comprises the horse and its most immediate allies, such as the donkey and the various forms of zebras, which are practically almost the same in their structure as the horse. More is known about the ancient history of this group because in early years it was far more abundant in the world than at present. It seems to be on the decrease, dying out as it were, and probably would become extinct but for donkeys and horses being so valuable to man. Prof. Flower asserts that the horse family of the group was that branch which had undergone by far the greatest changes. It was, too, the most interesting branch of the family. It has been continually changing from its ancestors, and the points in which the horse differed were very numerous. It had been gradually adapting itself to the changed conditions of the times.

It had gradually increased in size, and especially in the length of the neck; its legs had lengthened and its toes had disappeared. There were certain alterations in the structure of the bones, but mainly the alterations were in two points—in the teeth and the feet, both of which had been adapting the horse for the altered conditions of his life. So great had been the change that specimens could be traced back, showing that at one time some of them were no bigger than a hare. Now it is difficult to find anything more perfect in its whole organization than the horse. It has ceased to be anything like the tapir and as the horse was when it lived in woods, forests, by lakes and on marshy land. It had become changed to an animal destined to inhabit the dry open plain, far away from the cover of woods and from the swampy ground, into which its feet might sink, and also destined to live upon the food of the open plain—dry, hard, harsh herbage that grows in open spaces. The modification of the teeth had now reached the point at which it is difficult to conceive anything better adapted for grinding hard herbage, and the feet have got to the point which specially facilitates speed over hard ground. The foot has been modified into an organ simply for support, and for that purpose it is about as perfect as anything can be. The whole of the changes were to fit him for the sphere of usefulness he was to occupy in future ages and were obviously advantageous to him in the changed conditions of his life.

It is a fact that the earliest horse known to naturalists had five toes. Further along down the ages came the Hippation, an animal almost a horse, which had three toes, but only the central toe rested on the ground. In this connection it is interesting to note that nature sometimes reaches back through untold ages and reproduces in the horse of to-day some of the characteristics of his toed ancestor. Horses have been born in comparatively recent times with three toes on one foot. In 1883 there was a horse in Boston with eight hoofs, the second, which took the place of the first toe, being almost as perfectly developed as the third and fourth.

Whatever the horse was primitively, since he became an essential part of civilization his intelligence has been so marked by every nation, ancient and modern, that he has always been taken as a symbol of the human intellect or understanding. Hence in the mythology of all nations he has been used as the symbol of the intellectual people.

## Save Money.

Campbell's Horse Foot Remedy. If applied regularly, two or three times a week, during the winter, at night, will cause a continuous healthy growth of the foot, remove any soreness that may exist, and absolutely prevent the foot from becoming unsound. It never fails to cure scratches, corns, contracted feet, quarter cracks, culls, thrush, nail wounds and brittle or sore feet if directions are carefully followed. The use of Campbell's Horse Foot Remedy during the fall and winter will save any horse owner ten times what it costs.

Like all good things, Jackson's Napa Soda has a dozen counterfeits.

## President Johnston's Pertinent Points.

Major P. P. Johnston, President of the National Trotting Association, recently addressed a letter to the press in which he calls attention to the fact that judges of harness races have the power to suspend drivers instead of fining them and that the suspension may be for less than a year. His letter is as follows:

To correct the misapprehension which exists as to the power of judges to suspend, rather than fine, for offenses that tend to bring racing into disrepute, I send you extracts from the rules, showing in what cases they may suspend for days, weeks, months or years. If, however, they fail to fix a limit to the suspension Rule 51, Sec. 2, limits it to the season in which the order is issued.

Rule 6, Sec. 3—For falsely stating pedigree or record in an entry for the purpose of deception.

Rule 8, Sec. 6—For making a fraudulent protest to embarrass a race.

Rule 14—For failing to give up money wrongfully obtained.

Rule 15, Sec. 2—For disguising a horse to represent another or different horse. For entering a horse in a class in which he does not belong.

Rule 17, Sec. 1—For drawing a horse without permission.

Rule 25, Sec. 1—For fraud and for disobeying the judges.

Rule 27, Sec. 5—For failing to contest a heat in a race, or drive to a finish.

Rule 28—For refusing to be substituted.

For being intoxicated or refusing to comply with the directions of the judges or being reckless in conduct, endangering the safety of others in the race.

Rule 29, Sec. 9 and 10—For changing positions in a race, thereby compelling a horse behind him to shorten his stride, or causing the driver of such other horse to pull him out of his stride; for crossing, jostling, swerving, carry out, sitting down in front, or any other act popularly known as helping.

Rule 30, Sec. 3, Rule 35, Sec. 1—For allowing a horse to make repeated breaks for the purpose of fraudulently losing a heat.

For causing interference or collision to aid a fraud. Rule 46, Sec. 1—For improper language or conduct to race officials with reference to the administration of the course.

Rule 46, Sec. 2—For threatening, assaulting, striking or insulting a driver for anything he had done by order of the judges.

Rule 47, Sec. 1—For loud shouting or other improper conduct during a heat.

Rule 25, Sec. 1—For any violation of the rules while the race is on not specially provided for elsewhere, or failure to obey the judges.

Rule 48—For any misconduct in respect to a race, injurious to the turf, though not specified in the rules. In the following cases suspensions are limited:

Rule 27, Sec. 6—If the judges believe a horse is driven during a race with a design to prevent his winning a heat or place he was evidently able to win, or to perpetrate or aid a fraud, the guilty parties shall be suspended not less than one year or be expelled.

Rule 29, Sec. 3 and 4—For sponging out oftener than once in five times scoring, the driver may be fined or suspended for any time not exceeding one year.

In nearly all of the cases named the judges have the alternative to fine, and in the more important to expel. It is obvious that ample power is vested in the stand. On many tracks this power has been judiciously exercised with the highest results, on others bad or incompetent men have failed to protect contestants by a vigorous and impartial enforcement of the rules, and have left the door open for every species of trickery and fraud.

The duty of selecting men competent to perform the work of the judge's stand, and keep it above suspicion, must hereafter be looked after with greater care. A salary will not give a man force, character and ability, but having these indispensable qualifications, it will enable him to take the time to master the rules and make a study of the varied conditions to which he must apply them.

It is now the duty of the president or manager of each associate member to select three competent judges for the day or race, who shall understand and rigidly enforce the rules. This power has not always been exercised with wisdom. The track officials themselves are sometimes unlearned in the rules, and unfamiliar with racing, and would gladly have the responsibility of selection met by the united wisdom of the racing circuit.

This can be done in each circuit by agreement between the members without further legislation. In this way the merits of the new method can be shown, and if successful all the tracks in congress will be glad to adopt it. The president of the National Association can clothe good men so selected with the power of supervision, if desired, making them not only representative of the track and circuit, but also of the power and dignity of all the tracks combined. There is no aspiration for better conditions that is not shared by the representatives of the trotting interests, as well as by all thoughtful drivers, owners and track officials.

I hope to see the many suggestions and theories, thought to be for the betterment of the turf advanced by practical and impractical men, thoroughly winnowed by the turf journals, the fallacies exposed, and whatever is definitely good, so labeled for practical use.

The rule committees of the two governing bodies may be relied on to bring such conclusions, as well as the recommendations of the committee of the mile tracks and of the individual members, up for consideration by all the tracks. P. P. JOHNSTON.

Stake No. 2, \$6000, for Mares Bred in 1901.

Payments January 2d, on Stakes Numbers 1  
and 2, Make a Splendid Showing.

The lists of colts and fillies entered in the Breeders Futurities, stakes numbers 1 and 2, make a splendid showing. There are no less than 122 paid up in Stake No. 1, the two year old divisions of which will be trotted and paced this year. In Stake No. 2 there were 176 payments made. The full lists of those making payments follow:

**Stake No 1, \$6000, for Mares Bred in 1900.**

Fourth Payments of \$10 each were made January 2, 1903,  
on the following foals of mares bred in 1900.

## Methods of Horse Swindlers.

Probably in no business are so many tricks and wiles practiced as in horse dealing. It is safe to affirm that thousands of horses are sold throughout the country every year under false conditions, and no skillful have "fakers" become that it takes a very clever and experienced man to detect the doctoring tricks of those who are anxious to sell a bad animal to the best advantage.

Perhaps the commonest of all faking or bishoping, as it is called—a term derived from a man named Bishop, who during the eighteenth century obtained a great reputation for making old horses appear young—is in relation to a horse's teeth. At full age a horse has forty teeth, and not until the fifth year are they all visible. Six months later the "nippers" or front teeth become marked by a natural cavity, and it is the presence or absence of these marks that certifies the animal's exact age.

As the horse gets older these marks wear away, and it is then that the copier or faker sets to work to make fresh cavities as found in a horse of the age he wishes to represent. The surface of the teeth is cut out with a steel tool, and the black lining of the groove, which must be visible, burnt in with nitrate of silver or some other chemical. In this way horses which are often over eight or nine years of age are sold as five year olds.

The age of a horse is often increased as well as reduced by means of faking the teeth. A three year old will often be transformed into a five year old by means of chiseling out the side milk teeth with which horses are furnished up to their third year, when they are supplanted by the permanent ones. The extraction of the former, of course, brings on the latter much quicker than would be the case in the natural order of things, thus making a horse appear much older than it really is.

The taking of broken-winded horses is an art in itself, so to speak. It is generally accomplished by means of drugs, arsenic being chiefly used. The copper also pays strict attention to such an animal's diet previous to a show. If during the trial a horse is a little short-winded, the owner will turn furiously upon the groom for giving his horse too much hay, when in all probability it has had nothing to eat or drink for hours.

The groom will thereupon explain how the animal got loose and ate a bushel of oats and half a truss of hay in the night, and that he was afraid of losing his place if he said anything about it. This explanation will in nine cases out of ten satisfy the intending purchaser, and remove any doubts which he might have had.

Doping is a term usually applied to the trick of making horses appear spirited and high steppers by means of drugs and chemicals. An animal is often made to pick up its legs in the quick nervous style of a thoroughbred by having the back tendons of the leg rubbed with turpentine, cowitch and ammonia, which burns like fire and makes the animal prance with pain.

From President American Trotting Association.

**Warren Park Farm**, home of the sensational performer  
and Sire, **Axtell** (3) 2-12.

**Spoohn Medical Co.**                      **TERRE HAUTE, IND.**, Oct. 24, 1901.  
Gentlemen:—For seven years I have used your specific for can-  
cervous diseases, to cure Distemper, also as a preventive, both  
with and without the track and the stall. I have used it in all cases,  
I never found anything that worked so well as **Spoohn's Distem-  
per and Cough Cure**, in fact it helped me out of the most serious  
trouble. No stock farm or owner can afford to be without it.

Very truly,  
W. P. JAMES.

J. J. Scannell of New York has ordered The Abbot 2:03 $\frac{1}{2}$ , which is quartered at Patchen Wilkes farm, near Lexington, in charge of Manager Peter Duryea, shipped east to be placed in Trainer John Kelly's hands. Along with The Abbot will go Shadow Chimes 2:05, and Antezella 2:08 $\frac{1}{2}$ , owned by Wm. Smathers, also wintering at Patchen Wilkes.

San Francisco, Saturday, January 17, 1903.

Strike!—if they don't give you Jackson's Napa Soda  
Jackson's Napa Soda untangles the feet.

A GREAT LOSS to the State of California, and especially to the live stock breeding interests of this commonwealth, was suffered when Henry Pierce died at his residence in this city, last Tuesday morning, at the age of 75 years. Mr. Pierce was a pioneer of the early days and since coming to California in 1850 has been one of its most progressive citizens. Born in Maine in August, 1827, he came to San Francisco soon after the discovery of gold with a capital consisting almost entirely of energy and brains and he possessed a very large stock of both. One of his first ventures was the purchase of a cracker making machine that had been shipped here and never used, and with it he began the business of making crackers, which proved very profitable. He was soon joined by his brothers Lewis, William, Orestes and Ira and under the firm name of H. & W. Pierce they entered the grain business. Henry Pierce went to London and acted as the firm's agent there for years and they were soon the second largest grain shipping firm in California. The firm retired from the grain business in 1872, having accumulated an immense fortune which was invested in lands, stocks of various enterprises, etc. On his return from England, Mr. Pierce brought with him a number of pure bred Durham and Jersey cattle, being the first to import pure bred cattle to California from England. Mr. Pierce was one of the organizers of the Contra Costa Water Company; the Bank of California, the National Insurance Company, Pacific Sheet Metal Works, Judson and Giant Powder Companies, the Bowers Rubber Company and many other large enterprises that have helped build up this State and in all of which he has made money.

Henry Pierce was a great lover of horses and was an accomplished horseman. Up to within a few months of his death he could mount a saddle horse and ride over one of his immense farms all day without tiring, and on the road he was a skillful reinsman and always drove a fine animal. Twelve or fifteen years ago he became a purchaser of trotting stock and was a regular attendant at all the leading sales here and in New York. He paid \$10,000 each at a New York sale for two great broodmares, Bon Bon, since dam of Bonnie Direct 2:05½ and Bonsilene 2:14½, being one of them, and by by a grandly bred mare by Natwood that has since produced one standard trotter and is the dam of two or three young things that will certainly enter the list. Mr. Pierce purchased the race track and grounds at Santa Rosa and established there the Santa Rosa Stock Farm, now the home of Stoney Dalton 2:07 and others. The farm's collection of blood horses is not large, but very choice, and it was Mr. Pierce's plan to breed them to the best stallions in California, and there are a number of young McKinnays, Diablos, Directs, etc., on the farm at the present time. At the future auction sales of standard bred stock, Mr. Pierce's name will be noticed and felt, as he was always ready to pay a good price for anything he wanted. During the first two years Santa Rosa Stock Farm's crop of trotting stock has been one of the competitors on the eastern Grand Circuit and it was Mr. Pierce's intention that the season of 1903 should see the farm represented by a 11 larger and if possible rather string.

Henry Pierce was a man of parts, great intellect, experience and most enterprising energy. He was a conversationalist and a better writer and could remarkably convincing and pointed short

argument to a convention of business men. He never wasted words or time, and was always ready to assist worthy men in legitimate business enterprises. His funeral took place from the First Unitarian church in this city on Thursday of this week and the interment was at Laurel Hill cemetery. His only surviving brother of the five that were originally in the firm is Mr. Ira Pierce of this city, who, while not enjoying in late years the robust health of his elder brother, has always been active in business affairs and greatly interested in the success of the Santa Rosa Stock Farm's products in the stud and on the tracks. There has not been a man identified with the horse breeding interests of California since the foundation of the State whose death has been more sincerely regretted or for whose memory more kind words have been spoken than Henry Pierce. The whole State of California has suffered a severe loss in his demise.

MR. J. C. LINEMAN, a capitalist of Lima, Ohio, owner of the Electioneer stallion Norval 2:14½, is spending a few weeks in California in company with his friend, Mr. Daniel O'Dell, also a wealthy gentleman who owns a number of fast trotters. Mr. Lineman visited Pleasanton this week and states that in Monte Carlo 2:09½ he believes he has seen the greatest trotter of 1903. Mr. Griffith's stallion Bonnie Direct 2:05½ he calls the best looking member of the Direct family he has ever seen, and Mr. Mills' stallion Lecco 2:09½ he considers one of the grandest looking trotters of any country. Mr. Lineman will visit several of the stock farms in California before he returns East.

OUR ADVICE to every horseman in California who can afford to keep a colt or a filly is to attend the Palo Alto sale of two year olds at Fred H. Chase & Co's salesyard 1732 Market street, this city on Thursday evening, January 29th. This is one of the choicest lots ever sent from this celebrated farm, and the entire crop of the foals of 1901. The breeding farm will soon be entirely closed out and those who secure some of the stock now will find that it will increase greatly in value. As a business proposition buy a colt or a filly at this sale.

ENTRIES FOR THE SEVEN STAKES offered by the Los Angeles Jockey Club will close on Monday next. The full list of these stakes with conditions, etc., will be found in our advertising pages. That the meeting will be a great success is as certain as it is held. There will be at the least calculation five hundred horses to take part in the meeting and those who intend racing there should get their entries mailed in time.

## Aristo the Largest Money Winner.

In the special edition of the BREEDER AND SPORTSMAN, in the table of money winners on the California Circuit last year, the pacer Robert I. 2:10 was given as the largest money winner of the year with \$2775 to his credit, and the trotter Petigru 2:10½ second with \$2600. We have received a letter from Mr. Alex Brown, proprietor of the Walnut Grove Stock Farm and breeder and owner of the colt Aristo 2:17½, winner of the Occident and Stanford Stakes last year, in which he calls attention to the fact that Aristo with \$2897 to his credit led all horses campaigned in California as to the amount of money won. His winnings (first money) in the Occident Stake were \$2137 and in the Stanford Stake \$760, making \$2897 in all. It will be seen by this that Aristo, the three year old by Nushagak, is the largest money winner of 1902 on the California Circuit. These figures are furnished by the Acting Secretary of the California State Agricultural Society and there is no doubt as to their being correct. We congratulate Mr. Brown on the fact that his handsome colt heads the list of California Circuit money winners for 1902.

## Born Great and Achieved Greatness.

It has been truly said that "some men are born great, some achieve greatness, and some have greatness thrust upon them." Horses are like men in this respect. Some have a glamor of greatness thrust upon them for a while to which neither birth or achievements entitle them. Some horses are born to be great, but their environment prevents these from coming to their birthright, and some again like the great sires Sidney, Electioneer, Strathmore, Director, Stamboul, Happy Medium, Gov. Sprague, and others achieve greatness in spite of every adverse circumstance.

It cannot be truly said of Stam B. that he had greatness thrust upon him, but it can be said that he was by birthright a great horse, that he was gifted by nature with the physical requisites for greatness, both on track and in the stud as he is now proving, and that right nobly has he accounted for the gifts which were his.

The writer on Stam B. will not find much in the

literature of horses to assist him. No gifted pen has ever sung his praises; no owners even in their modest way have made any extraordinary claim for him. If then in popular estimation he be ranked with the great horses of the land, it must be from innate and demonstrated merit and not the eloquent voice of the pen. If I had not the greatest admiration for his merit as a coming great sire, I surely would not have taken him in hand, for the rewards can only be slight at my age. I could not, nor would not be guilty of trying to mislead those who have confidence in my belief, and I have yet to look back at my failure in selecting a young stallion as a great sire. The unbiased public I select as the jury in this case. Stamboul, his sire, was a great horse, and his blood is highly valued to-day by the best informed breeders. He sired extreme speed, and extreme speed has been characteristic of all his generations, his sons and grandsons, sired extreme speed, and his daughters and granddaughters have produced it. It now seems that Stamboul will live in the memory of men, chiefly through the blood of The Moor, Hambletonian 10, Geo. M. Patchen 2:23, and Abdallah 1, as they have the characteristic of transmitting speed, size, soundness and style, and such blood is like good wine, needs no bush. He was a classic hero, and not to know his greatness means to be unlearned in the science of breeding trotters. To be sure Stam B. may not be ranked with horses of an earlier and more favorable epoch. But considering his day and generation he ranks with kings, as he was born in 1892, and produced performers in 1902. Enough has been said to make it appear that Stam B. was born to the birthright of greatness as a race horse and sire of extreme speed. He has not denied his pedigree, as his produce, his sire, his dam, and his present manager were never behind the money.

Yours truly,

SAM GAMBLE.

## An Enterprising Association.

The North Pacific Fair Association, an organization comprising nearly all the fair and racing associations in Oregon and Washington, met at the office of the *Rural Spirit* in Portland, January 7th, and arranged dates for the North Pacific Circuit of 1903. There were present W. H. Wehrung, of Hillsboro, Ore., Robert Leighton, of Vancouver, B. C., secretary, and the following delegates: J. C. Woodrow, Vancouver (B. C.) Jockey Club; R. E. Kline, Whatcom County Agricultural Association; Dan Currie, Snohomish County Agricultural Association; A. T. Van De Venter, King County Fair Association; M. D. Wisdom, Oregon State Fair; A. J. Splawn, Washington State Fair; Gus Rosenblatt, Multnomah Fair Association; C. D. Jeffries, Spokane Inter-State Fair; John Alheit, Walla Walla Fair; J. B. Stetson, Idaho Inter-Mountain Fair; L. A. Manly and Jos. Anderson.

Two circuits were arranged, one for spring and the other for fall racing as follows:

## SPRING MEETINGS.

Victoria, B. C.—May 22 to 23.  
Vancouver, B. C.—May 23 to 25.  
Seattle, Wash.—June 6 to July 4.  
Vancouver, B. C.—July 1 to 2.  
Grand Forks, B. C.—July 1 to 3.  
Spokane, Wash.—July 4 to 6.  
Everett, Wash.—July 2 to 4.  
Whatcom, Wash.—July 2 to 4.

While the above places will hold their meetings under the rules of the North Pacific Fair Association, it was impossible to arrange a continuous circuit, and the above allotted dates met with the approval of each association delegate.

## FALL CIRCUIT.

Seattle, Wash.—August 1 to 29.  
Whatcom, Wash.—August 31 to September 5.  
Everett, Wash.—September 7 to 12.  
Salem, Or.—September 14 to 19.  
Portland, Or.—September 21 to 26.  
North Yakima, Wash.—September 28 to October 2.  
Spokane, Wash.—October 5 to 13.  
Boise, Idaho—October 12 to 17.  
Walla Walla, Wash.—October 19 to 24.  
Lewiston, Idaho—October 26 to 31.  
The Dalles, Ore.—September 28 to October 3.  
La Grande, Ore.—October 5 to 10.  
New Westminster, B. C.—September 29 to October 2.  
Vancouver, B. C.—October 3 to 5.  
Victoria, B. C.—October 6 to 10.

The above dates will include agricultural fairs, stock shows and mixed racing at most of the points named. The circuits outlined will give 145 days' racing on the North Pacific Circuit for 1903. The fall circuit will consist of continuous racing from August 1st to November 1st, and will likely carry \$150,000 in stakes and purses.

The North Pacific Fair Association is wise in appointing dates and arranging circuits early and all the organizations will announce purses and stakes within a few weeks. Entries to the stakes will close April 15th.

Sober up on Jackson's Napa Soda.

## THOROUGHBRED DEPARTMENT.

It was beginning to look as if Green B. Morris had a mortgage on all the two year old races with his Star Ruby colt, however on Monday last the Morris entry was taken into camp, Stanfield's Annie Marie winning by three parts of a length from Samar which was a neck in front of Selected.

It would be a great relief to the patrons of the race track if Starter Dwyer was given a rest of a few weeks. Mr. Dwyer is a first class man in his position, but has been out of luck of late and his work has been of a most unsatisfactory nature, the leaving of horses at the post being of daily occurrence and most of the starts away below par. Mr. Holtman has had better success so far this season, and without intending any comparison between the work of the two gentlemen it seems that in justice to all persons interested that he should have been continued as starter as long as he was giving satisfaction.

The Follansbee handicap which was run on Saturday last was won by Princess Tetania which ran seven furlongs in 1:26 flat with 112 lbs. in the saddle. The race was rather an unsatisfactory one owing to the large field and the straggling start, Durazzo and Elliott getting away very badly; the latter colt ran a most remarkable race and would doubtless have won with an even break. The race run by the winner with 112 lbs. up goes far to prove what was stoutly contended last winter as to the leniency with which horses from Caesar Young's stable were treated in handicaps.

Nigrette seems to be a bad betting proposition, always at a short price she seems to have a mortgage on second place, in fact, her only win in which she beat Ignacio seems to have been in the nature of a fluke.

The following dispatch from New Orleans, bearing date of January 13th, will be of interest to all Californians: Consternation prevailed to-day when the statement was published that Durnell & Herz, the biggest owners at the track, and who have won over \$10,000, would ship their stables away from here, dividing their strings between Scoggin farm at Louisville and Los Angeles. Colonel McChesney, the famous colt, with The Lady, Scotch Plaid and a string of others, will go to the California track, which opens January 31st. Redfern, the famous jockey, under contract with Durnell & Herz, will also go to Los Angeles. He is receiving \$1000 per month, and there could not be a much better card for Los Angeles than the combination, McChesney and Redfern. Herz said he had no fault to find with the treatment accorded him by the Crescent City Jockey Club. "Many of our horses have gone wrong," he added, "and except a few selling platers we have nothing to race but McChesney and The Lady. Of course, these will naturally be weighted out of the handicaps, and as they have a lot of short distance purses and selling races at Los Angeles we thought we would go there and finish out the winter." Last summer President Tom Williams of the California Jockey Club refused to allow Durnell & Herz to race on his track because of the fact that Durnell had been suspended in France. Later he stated that Herz could race there. This proposition Durnell & Herz would not accept. In fact, there will be a general exodus of horses owners and their strings to California at the end of this week. Frank Kelly will ship his fast filly Athlana. She has won three races here. Sam Morton will send Agnes Mack and Silver Fringe. The fact that many short races will be given at Los Angeles influenced Morton in sending his string. A prominent Californian has already asked Morton to put a price on Agnes Mack. Ed Corrigan will send four or five to Los Angeles in charge of his nephew. In all, four carloads of the best horses here will pull out for California the last of this week.

John A. Drake's Futurity winner, Savable, heads the list of winning two year olds for the season of 1902. The Salvador colt won \$50,780 in stakes which, however, compared to the achievements of Domino, His Highness, Potomac and other celebrated race horses in their two year old form, is a small amount. According to the records fifty-two two year olds won \$5000 or more, while thirty-nine won \$3000 or under \$5000. Hastings, the leading sire of the year, leads in the winners of the most money taken by two year olds, four of his get—Mizzen, Lord of the Vale, Fireater and Gloriosa—having won together \$52,950. Aceful, Mexican and Skilful, the get of John E. Madden's stallion Mirthful, won \$42,459. Artvis, Girdle and Golden Maxim, all sired by imp. Golden Garter, won \$40,665. The Keenes' stallion Ben Brush also figured as the sire of three of the heaviest winners in Dales-

man, Duster and Wild Thyme. J. B. Haggin bred the largest number of two year olds in training, including Savable, Irish Lad, Astarita, Girdle, Golden Maxim, Hurstbourne, Africander. Artvis, Sir Voorhies and Charles Elwood. From the Castleton Stud of the Keenes came Dalesman, Dazzling, Duster, Whitechapel, Injunction and Hurst Park. The figures show that it was a millionaire's year on the turf, the men with the great wealth having led in both winnings and the breeding of winners.

Leader, a three year old from the Jennings' stable, ran a mile in 1:39½, the fastest of the present season at Oakland, on Wednesday; his performance on this occasion was a direct contrast to his last previous race, where Jay Ransch succeeded in getting him beaten by a cheap lot of horses; Ransch claimed to have been interfered with, but to a close observer it was evident that there was no interference. While in Mr. Jennings' employ Ransch managed to ride one winner for him, although as a rule his mounts were the best in their various races. The reversal of form shown by Leader proved very costly, as L. O. Walz ran him up to \$1500 after the race, Mr. Jennings retaining him with the customary \$5 bid.

Considerable criticism has been indulged in regarding the in and out running of several horses which have shown marked reversal of form in their various races. Such reversals may be looked for in the class of horses now racing here, most of which are ordinary selling platers which have a faculty of running last one day and first the next for no obvious reason. In trying to blame jockeys and trainers for the ill-assorted races, the newspapers seem to have lost sight of the low class of horses entered in the various races. The different going caused by the varied conditions of the track, owing to the weather, is also responsible for many glaring reversals of form.

The New York Evening Telegram says: Everything is off as far as California races and local bookmakers are concerned. On Saturday everybody interested in the bureaus of information that are dotted around the outskirts of New York proper came to the conclusion that they wanted nothing more to do with racing that is now being conducted in California. They claim that horses are either running too closely to public form or else there are too many good things put through without opposition. "May be a bit of both," was the remark of one after Nugget had been backed off the boards, "and," he continued, "telegraph service is very bad. Many times this season we did not have time even to take a bet on a horse, not getting first quotations until after the race had been run. Frequently the betting and winner would come in at almost the same time. We have at last decided not to take any more news from California until such time as the telegraph companies can give us a service with which to do a satisfactory business. I don't think there is a poolroom in the country that has made money on the California races."

Richard Dwyer, who is now in the employ of the California Jockey Club as its race starter, will have to pay a fine of \$500 for assaulting H. F. Breivogel, a newspaper man, at the Worth race track near Chicago last fall. The Western Jockey Club, at its monthly meeting last Monday, sustained the finding of the Worth officials and inflicted the penalty on Starter Dwyer. Another act was depriving J. O. Keene of the services of the crack jockey, G. C. Fuller. Keene claimed that the jockey was under contract to him, but this was disproved. It had been expected that the Jockey Club would take some action in the threatened turf war on the Pacific Coast, but nothing was done. So far as could be learned, Manager Brooks, of the Los Angeles Association, did not ask for recognition and Tom Williams did not seek for any aid.

Geo. Van Gordon, of Danville, has a colt foaled last March by Rubicon out of Playful that is the largest as well as the handsomest thoroughbred colt in Contra Costa county of his age, so Will Sparling says. The colt is a perfect picture of his sire and is over 15 hands high.

According to authentic figures, the winning of prominent turfmen in England and France during the season of 1902 make American winnings here look small in comparison. In France M. de Saint-Alary's horses captured \$160,898 as against \$118,400 won by R. S. Siever in England, and \$83,855 captured by F. C. McLewee & Co in this country. The leading French owner also won \$7500 on the side, because he bred a number of his winners. In both his case and that of the Englishman their big winnings were due to three year old fillies, Kazil Kourgan and Sceptre. Nine English owners won \$50,000 or more, the late Col. McCalmont following Mr. Siever with \$90,575, Sir J. Blundell Maple being third with \$89,560. W. C.

Whitney stood sixteenth on the list with \$27,800, a drop from \$98,000 won by him in 1901. Richard Croker won four races worth \$8925 and the Keenes' three races not worth more than \$3000. Eight owners in France won \$50,000 or more, William K. Vanderbilt being included in the list.

### Staggers.

Staggers, or inflammation of the brain and its membranes—meningitis—is not an uncommon disease among horses. Dr. R. A. Graig, of Purdue University, Experiment Station, writes as follows about the disease, in Bulletin No. 105:

This disease occurs more frequently in the horse than in other domestic animals, but is not infrequent in cattle. The disease may occur in a single individual, but if the conditions be favorable a number of animals may be affected at the same time. It most common occurrence is in the late fall or early winter.

CAUSES—The usual cause is a sudden change of feed, all dry feed, feeding in too large quantities for the amount of work done, feeding of shredded fodder; ensilage or hay that has not properly cured or has spoiled, and possibly foods that contain injurious fungus growth. Sudden changes in the weather, exposure or severe exertion and badly ventilated stables may also be factors.

SYMPTOMS—The disease may develop slowly or come on suddenly. It may manifest itself while the animal is in the stable, or what is more frequently seen is a sudden onset when the animal is being started to work. The animal stops suddenly, is nervous, sensitive to sounds and to handling. The eyes are staring and the respiration and pulse quickened. It braces itself, and on attempting to work or move will stagger and develop convulsions and go into a comatose condition. Some animals become quite violent. Others stand with the head pressed against the wall, and if they walk it will be uncertain and in a circle. A paralysis of the muscles of swallowing is quite common, so that the animal cannot drink and may get food lodged in the throat. Death may occur suddenly or paralysis may develop and the animal live for a week or more.

TREATMENT—When the disease develops in a stable, it is well to administer a purgative to the well animals, to give plenty of salt and water, and to cut down the feed, temporarily at least. An examination of the possible causes already cited should be made and corrected as far as possible. The affected animal should be given a box stall and provided against self-inflicted injuries. The diet should be light. The medical treatment should be directed by a competent veterinarian.

### A Notable Improvement.

The new general offices, factory and ware-rooms of the American Steel & Wire Works, occupying an entire block from 15th to 16th streets on Folsom street are the direct outgrowth of the necessity of concentrating and providing more room to accommodate the immense business of this association. Mr. Ismon, the general representative on this Coast, has given his personal supervision to the arranging of this immense plant. The result is one in which he takes just pride, and after an inspection of the plant in its perfection and immensity we unhesitatingly congratulate him. Not only has every consideration been given the solidity but every labor saving device both for expedition and convenience has been adopted. The whole plant is so arranged as to make the transaction of business a pleasure. In the private offices of the heads of the various departments light and ventilation have been considered the main requisites. The walls finished in California curly redwood with the antique mantels and quaintly tiled fire places, rich desks and in fact all the accessories of an elegantly appointed establishment are evidences of taste and a complete idea of having the place so arranged as to be in keeping with the large business interests of this immense association. Courtesy, promptness and a thorough knowledge of each subject is met with not only in the office of the general manager but in each one of the various departments visited. The thanks of the writer are hereby extended to Mr. Ismon and his intelligent assistants for courtesies extended.

## Horse Owners

Look to your interests and use the safest, speediest and most positive cure for ailments of your horses, for which an external remedy can be used, viz:

## GOMBALT'S CAUSTIC BALSAM

Prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

### SUPERSEDES ALL CAUTERY OR FIRING.

Impossible to produce any scar or blemish. The safest best Blisters ever used. Takes the place of all instruments for mild or severe action. Removes all Bunches or Blemishes from Horses or Cattle. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

## ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

### Field Trial Winners of 1902.

Champion Rodfield stands at the head of the English Setter sires with thirteen winners to his credit. Following among the leaders and in order come Tony Boy, Lady's Count Gladstone, Marie's Sport, Oakley Hill, Ch. Count Gladstone IV., Count Whitestone and Dash Antonio. Among the Setters entered for the Coast trials this week there will not be found one that cannot trace back to these eminent performers—some being sons and daughters of one or other of the sires mentioned. Among the Setter field trial winners for last year by far the greater proportion appear to have been what are termed "grade Llewellyns," that is, dogs which do not trace back to Duke-Phoebe-Kate-Laverack blood without an admixture of other blood. Among these winners no one dam is conspicuous as having more than two winners among her progeny, a significant illustration of the value and potency of the sire.

Young Jingo and Young Rip Rap are in the lead among the pointer sires, followed closely by Jingo's Light. Among the Bakersfield dogs the Pointers are in the same analogy in regard to sires and blood lines as was noted of the Setters. Few of last year's Pointer winners do not trace their blood lines to the old-time winners, Mike, Romp, Bang and Hebe. Mike bred to Romp produced Hops, the dam of Ch. Rip Rap, he bred to Pearl's Dot produced Dot's Pearl. Hops was a sister to Mainspring, sire of Queen III, the dam of Ch. Jingo; the latter bred to Pearl's Dot produced Young Jingo, the sire of nearly a dozen winners. Rip Rap's sire was imported King of Kent, son of Priam, the English field trial winner. King of Kent, sired Hal Pointer, which, when mated with his half-sister, Kent's Star, produced Plain Sam, a winner and sire of fifteen winning dogs. Plain Sam is now owned by Stockdale Kennels and will be represented in the trials this week by some clever dogs. It will be hard to find a winning Pointer for the past year that does not show the blood of King of Kent, Jingo, Hops and Pearl's Dot.

Among the ninety odd different sires not more than a dozen are without field trial records. Ch. Antonio is either the sire or grandsire of 80 per cent of all the winning English Setters, and the same may be remarked of Ch. Jingo, in relation to the Pointers. This seems to be a substantial indication of the development theory as far as the male lines of modern pedigrees are concerned.

With the Setter winners, but few there are which do not trace, on one side or other, to Duke and Rhebe. Duke was so prepotent that he could get winners to whatever blood he was bred to. Ch. Dan was the premier performer of the progeny of Duke and Rhebe. This great dam, like Duke, seemed a producer of good ones, irrespective of the dog she was mated to. From a mating with Laverack's Old Dash II. came Bruce, a field trial winner, and when she was bred to Duke she produced Dan; and again the union with Fred resulted in Ch. Rob Roy. Dan was the sire of Gladstone, who was the grandsire of Antonio, the sire of Rodfield and Tony Boy (the sires of more than fifty winners). Rodfield sired Oakley Hill, a coming young dog. Gladstone was also the grandsire of Verona Kennels' Champion Count Gladstone IV., the sire of thirty-four winners, including Count Whitestone, he a sire of three winners last year. It will readily be seen that the record of the descendants of Duke and Rhebe continues steadily to keep up the high standard which sportsmen claim for the blood.

The following is a continuation of field trial summaries, which, we regret, could not have been published in full last week:

**MONONGAHELA FIELD TRIAL ASSOCIATION**—Washington C. H. O., October 24, 8th annual trials. Maj. J. M. Taylor and N. Wallace, judges.

Winners—1 Bob's Tony (Tony Bob-Virginia Reel II.), E. P. Wilkins' Setter dog, owner, handler; 2 Ned (—), R. A. Croxton's Setter dog, owner, handler; 3 Teddy Roosevelt (Ch. Sport's Boy-Sallie Kinloch), Fenton Noland's Setter dog, owner, handler; 4 Alice Roosevelt (Ch. Sport's Boy-Sallie Kinloch), F. Noland's Setter bitch, owner, handler.

All-Age, Sweepstakes—same conditions as Derby, 20 nominations, 12 starters (7 English Setters, 5 Pointers). Winners—1 Governor Spottswood (Cid-Chart II.), J. R. Purcell's Pointer dog, owner, handler; 2 Bena (Guy-Lena), W. M. Cary's Setter bitch, owner, handler; 3 Bob's Tony (Tony Bob-Virginia Reel II.), E. P. Wilkins' Setter dog, owner, handler; 4 Dick Black (—), T. S. Baskerville's Setter dog, owner, handler.

ALABAMA FIELD TRIAL CLUB—Huntsville, Ala., December 15. D. E. Rose, J. W. Matthews and J. F. Fletcher, judges, 6th annual trials.

Derby, for dogs owned in Alabama, \$3 entrance, \$2 to start, 10 starters (6 Pointers, 4 English Setters). Winners—1 Rip's Lass (Young Rip Rap-Jingo's Lass), Garth, Keller and Rison's Pointer bitch, W. D. Gilchrist, handler; 2 Bee Line (Jingo's Light-Brook's Belle), Lee Moody's Pointer dog, owner, handler; 3 Sam's Vesta (Plaid Sam-Rap's Vesta), J. D. Stripling & Co.'s Pointer dog, E. B. Bishop, handler; 4 Wooley (—), R. H. Lowe's Setter dog, W. M. Hundley, handler.

All-Age, December 17. For dogs owned in Alabama, \$3 entrance, \$2 to start, 10 starters (5 Setters, 5 Pointers). Winners—1 June III. (Jingo's Light-Gull's Jingo), T. T. Ashford's Pointer bitch, W. J. Allen, handler; 2 Blue Danstone (Count Danstone-Fairland Dot), Gilchrist & White's Setter dog, D. C. White, handler; 3 Countess Ladystone (Count Ladystone-Mark's Lilitz), Lee Moody's Setter bitch, owner, handler.

Free-for-all, December 18. \$5 entrance, \$7.50 additional to start, 6 starters (4 Pointers, 2 Setters). D. E. Rose and T. T. Ashford, judges. Winners—1 Spot Four (Royal Dan-Queen of Lilitz), E. L. Denison's Pointer dog, D. C. White, handler; 2 Paul Rap (Young Kent-Trick Mald), S. M. Welburn's Pointer dog, W. D. Gilchrist, handler; equal 3 Jolly Boy (—), Dr. C. L. Gunn's Setter dog, owner, handler; equal 3 Fred T. (Don P.-Jessie), J. F. Fletcher's Setter dog, D. C. White, handler.

### Dog Owners!! Read This!!

We are carrying in the advertising columns of this journal an advertisement of "Sergeant's Dog Remedies," a popular line of preparations for which F. W. Braun & Co. of Los Angeles, California, have been made distributing agents on the Pacific Coast. The goods have few equals and no superiors on the market today, having received the highest endorsements of the leading dog men and kennel owners of this country and Canada.

They are manufactured by Polk Miller Drug Co. of Richmond, Va., who invite all persons having sick dogs to write (enclosing stamp) describing symptoms, and they will cheerfully furnish the best possible advice without any charge whatever. A revised copy of their book on "Dogs" sent free on receipt of 3c in stamps to cover postage.

### About the Newfoundland.

A breed that seems to be in decadence on the Coast, and for that matter in the East also, has a champion in Mrs. W. F. Storm, who made the following remarks before a meeting of the Ladies Kennel Club of Massachusetts. The Newfoundland is a dog that should not be lost sight of by fanciers and breeders. The breed possesses many virtues and characteristics—too many in fact to allow the Newfoundland to be laid away upon the shelf:

"Having been requested to give a talk on Newfoundland dogs, I shall be glad to relate some of the observations I have had the opportunity to make in regard to a dog of this breed by the name of Black Boy, which I have owned for several years. I beg to state here that I talk as a fancier, and not as a breeder, and hope that my little experience will be of some interest to you. It seems a pity that the Newfoundland is so rarely met on our dog show bench on this side of the Atlantic and should be on the eve of extinction in America, for truly by his rare qualities he is worthy to rank among the foremost of his more favored canine brothers.

Without going into details as to special points, I will try to give a short description as to his appearance and qualities. It was common at one time to call every shaggy large dog a Newfoundland, but since dog breeding has become a special study and dog shows have opened the eyes of the general public, people interested in dogs have learned to discriminate between mongrels and true bred types. The true color of the Newfoundland is black, without any mixture of white whatever, although many of the best specimens have a few white hairs on the chest. Their stature is large, from twenty-seven to thirty inches in height, their body massive and exceedingly well proportioned, indicating at the same time great strength and activity. The coat, without being silky, is without wave and has a texture of its own, particular to the breed, which seems to protect the dog almost equally well against heat and cold and makes them specially adept in the water.

From personal experience I can state that although my dog lived through three summers in the South, the heat never seemed to cause him any great discomfort. He was always kept out of doors, summer and winter, and was ever in splendid health. As to mental qualities, the Newfoundland may have his equal, but certainly not his superior. Gifted with almost human intelligence, exceedingly affectionate and good natured, he makes a splendid companion and the truest of friends.

I have many times come across the belief that Newfoundlands were cross tempered and quarrelsome, but never found this to be the case with Black Boy. Only once can I remember him punishing one of the other dogs on the place—a big pointer, who provoked him by trying to snatch a large bone away from him, which he was peacefully enjoying on the lawn. One of his greatest pleasures consists in carrying parcels or sticks, or anything one gives him, and if there were nothing for him to make himself useful with, he will insist upon taking hold of one's sleeve and drag one gently along, all the time grunting and wagging his huge tail to show his great pleasure and satisfaction. He was very fond of children and a good playmate. Once a small boy, who was staying with us at the time, put a pony saddle on his back and rode him around the place, not, however, without Biggy-Boy (the dog's pet name) giving him a tumble from time to time, but always good natured and enjoying the joke as much as did his rider. Among all of the dogs on the place he had but one deadly enemy, my Fox Terrier Jack, who never would make up to the big black bear, in spite of all the advances Biggy-Boy made towards him to make friends, and many times Jack would fly at him and generally manage to bite and hang on to Black Boy's nose, but under such provoking circumstances Black Boy would never hurt the little fellow, and was ever ready to forget and forgive the next minute, never having any malice or grudge.

As watchdog he was invaluable; his bear-like appearance alone was sufficient to keep tramps and undesirable people at a respectful distance. I shall be happy if my little talk about Black Boy has been of some interest to you and would induce true dog lovers and fanciers of the Newfoundland to start breeding and reviving this almost extinct noble breed."

### DOINGS IN DOGDOM.

Delverton Kennels have placed Hampton Promise in the stud, as will be seen by reference to our kennel advertisements, page 15. This young and vigorous handsome black Cocker has a record of twenty-seven prizes to his credit. He is by Black Duke II out of Champion Gaiety Girl, both noted Eastern winners.

Woodlawn Kennels is out with a great stud announcement in the classified ads on page 15. The premier of the kennels is Champion Woodcote Wonder, an unbeaten world's champion. Wonder has proven himself a potent sire on the Coast. All his get, even out of mediocre bitches, show the quality and character of the sire to a great degree. Wonder puppies are recognized at a glance by any one who has ever seen the sire. In Bulldogs Endcliffe Forceps is, excepting one dog only, the best we have here. Endcliffe Paddar is said to be the best Irish Terrier on the Coast at present. Cairnsmuir General is the best wire we have here now. Baby Elvet won winners at Los Angeles the first time he was shown on the Coast, he has a creditable string of English wins to his credit. Brood bitches, bitches in whelp and some choice puppies are now at the kennels.

Dr. H. Clay Glover after a long term of hard and conscientious work has requested the Westminster Kennel Club to accept his resignation of the position of official veterinarian for the club.

The Doctor has been present at the door of each

the past twenty years past. He urges that the birds which have become quite arduous and that the business of the country would be best served by the appointment of a younger man. He generously offers to give his successor, by appointment, the benefit of his long experience.

L. L. Campbell writes us that his Irish Setter bitch Glenmore Sadie was bred to his Barrymore on the 10th inst. If the prospective litter will be as good as one or two we know of in the past, they should be excellent puppies.

Mr. G. J. M. E. MacAgall a prominent Fox Terrier fancier proposes to devote two or three years to a business trip which will require his residence in Mexico.

### Pacific Coast Field Trials.

The twentieth annual meeting of the Pacific Coast Field Trials Club is in progress this week near Bakersfield. The trial grounds are located eight or ten miles away. The attendance of club members and sportsmen has been far greater than anticipated, in fact, the meeting has attracted more general attention than any previous trials here for years.

The Derby was started rather late on Monday morning, with fifteen dogs in, on Tuesday afternoon the stake was finished. Joseph E. Terry's English Setter Kilgariff (Orion-Mary Lou) won first; J. W. Flynn's Pointer bitch Nellie Bang (Senator P-Manitoba Bile) took second and Stockdale Kennels' Pointer bitch Margarette (Cuba's Z-p-Jingo's Bagpipe) won third prize.

The All-Age commenced on Wednesday with fourteen starters, including the winner of first in the Derby.

The club held its annual election Wednesday evening, which resulted as follows: President, W. W. Van Arsdale, San Francisco; First Vice-President, C. E. Wooden, San Francisco; Second Vice-President, H. W. Keller, San Francisco; Secretary and Treasurer, Albert Betz of San Francisco; Executive Committee—C. N. Post of Sacramento, J. H. Schumacher of Los Angeles, T. J. A. Tiedemann of San Francisco, W. S. Davis of Bakersfield and J. W. Considine of Seattle.

The following new members were elected: J. I. Woolley and Thomas O'Brien of Bakersfield, J. W. Considine and V. O. Watkins of Seattle, C. W. Coggin of San Rafael, J. B. Coleman of San Francisco, Al Lindley of Bakersfield, W. W. Richards and T. R. Atkins of San Francisco.

The next club trials will come off in January next year; the place has not yet been decided upon. H. S. Humphreys, of Indiana, was elected judge and honorary member.

A full report of the trials by Albert Betz, the representative of the BREEDER AND SPORTSMAN at the trials, will appear next week.

### Destruction of Birds for Their Plumage.

The question of bird destruction for the purpose of obtaining the plumage has attracted interested attention, not only in this country but abroad as well. Recently in the Chamber of Deputies of France the bill of M. du Perier de Lanson relative to the protection of birds, was put on the urgency list, and now that an international agreement seems to have been reached, it is believed that measures which will be passed in the near future will give the feather industry a severe blow.

In point of fact it may be generally stated that there are no birds which are not found to-day in the hands of the manufacturers, utilized either for their feathers or for their down. Notwithstanding the republics of South America have for ten years carefully regulated the hunting of humming birds, it is an interesting fact to note that there are annually sold in the markets of London more than 1,500,000 little birds, in one single season there having been sold in this mart 10,000 humming birds, 25,000 paroquets, 17,000 fisher martins, and 10,000 white herons. An idea may be given of the great profits to be derived from this trade when it is stated that two pounds of egrettes brings on an average in London from \$80 to \$90, but these same egrettes are resold for about \$500, this price being obtained for the inferior quantities, the superior bringing \$800 an ounce, or \$1000 for two pounds.

The feathers of birds are not alone obtained from tropical countries, for in all countries extensive use is made of the plumage of sea gulls, partridges, pheasants, cranes, ravens, magpies, jays, owls and of vast quantities of farmyard birds and sparrows. When this process of extermination is carried on against birds of the destructive class, such as magpies and jays, which is paid for a bird and a half-cent, but when the fact is convenient that the air poachers not only take these fowls, but they also kill the robins, vireos and other birds which have a useful function to perform in the domain of agriculture.

As the trade in the plumage of birds has made enormous strides, and as both extravagant and economical buyers are constantly on the increase, there has been a corresponding development in the character of the feathers which are dyed and treated. Thus there is a dye which is exported to-day to France, and is in great demand, and a similar dye is exported from the West Indies, Paris having been for many years the great center for the manufacture and distribution of this article of adornment. This is because the French capital is in great danger of being, as the English, favored by next to come ones, and is aided by the skill of French workmen, have made great progress in preparing feathers and down for the market. The same is true of Germany, which country exports annually more than \$5,000,000 worth of feathers.

Frequently the feathers when they reach the manufacturer are dirty and stained, the first work therefore is to clean them thoroughly. To do this they are placed for several days in tepid, soapy water, after which they are rinsed in hot water, and are then immersed for a quarter of an hour in boiling water, in which has been placed some Spanish white or raw starch. As a last step, the feathers are put into a frying pan for twenty-four hours, so that the rib may become thoroughly dry.

Most feathers, as many people know, are dyed. Twenty years ago black ostrich feathers became fashionable, but as the only feathers which were black came from the back of the male ostrich, they were naturally rare. Since that time, however, by diverse methods, notably by means of oxygenated water, manufacturers have succeeded in decoloring stained as well as naturally dark plumes, and making them perfectly white, and now are able to give them any desired shade. In former days this result could only be obtained by using absolutely white feathers, which was expensive. Light colors are obtained by the use of aniline dyes; deeper colors by curcuma, indigo, orchilla and vegetable dyes. Black is the result of iron, salt and logwood. After dyeing the feathers this operation being performed at temperatures differing with the different dyes, the feathers are rinsed and dried. They are then assorted, passed through dry steam, and bent into the desired shapes.

The feathers of birds are not only used for raiment, but also for the wool of certain stuffs, utilization being made of them in the manufacture of a great many domestic objects. One of the birds whose feathers are put to the most diverse uses is the goose—the vulgar, domestic goose—the large feathers from the wings furnishing most excellent quills for writing, each year a harvest of down being obtained, and the hide, sold as swan's down, furnishes a beautiful and elegant fur. To obtain this so called swan's down the feathers are first carefully pulled out, then the goose is skinned, the hide being cut down the back. After this the skin is put through a process of very delicate tanning, the result being a pretty, serviceable garniture for dresses.

would have equal rights and equal opportunities to share in the grand sport which Lake Merritt affords."

New floodgates for Lake Merritt are being placed in the southeast corner of the lake. The old gates have been open for some months past and the supply of water in the lake is subject to the tide. It has been noticed, at low tide, that the immense amount of thick vegetation that had been growing on the bottom of the lake, and which interfered seriously with trolling, has almost entirely disappeared. This disappearance is due to the thousands upon thousands of wild ducks and mudhens which have fattened on the salt water grass. These birds have done a most appreciated thing for the bass fisherman, who are now elated over the favorable prospects for striped bass trolling.

On Thursday, January 15th the open season for shooting quail in Marin county was brought to a close.

The first day of February contrary to the intention of the law makers, is an open day for shooting feathered wild game in this state. The clause of the statute reads, "Every person who, between the 1st day of February and the 1st day of October kills," etc. This clearly does not include the first day of February in close season.

A big grizzly bear in Trabuco Canyon, above the Santa Ana tin mines, forty miles east of Santa Ana, Orange county, has been causing considerable damage lately by raiding apiaries in that vicinity to secure honey. Hunting parties have been repeatedly formed to run the bear down, but he has thus far escaped all efforts to capture him. After a disappearance of several weeks the grizzly made his presence felt again last week by destroying a number of bee hives, and the bee ranchers of the Trabuco district are now organizing for a hunt after the monster to prevent his further depredations.

J. W. Marshall, of Binghamton, Solano county, and two companions killed over 300 gray geese,

Trout From Alder Creek, Yosemite Valley.

### FEATHER AND FIN.

If certain mutual observations of conduct and action were recognized among salt water fishermen generally, there is no question but what it would be eminently pleasurable and satisfactory to everyone who indulges in the sport of dropping a line. As a matter of fact, there is a general practice of angling ethics, but the amateur and the boor need a hint now and then. On this subject a well known local angler submits the following suggestions:

"In anticipation of the opening of the bass season in February, the following few remarks to the fishermen who have in the past made Lake Merritt their fishing grounds are seasonable. Either through ignorance or intention the elementary principles of the etiquette of angling have been overlooked or ignored by many of the Lake Merritt fishermen. So, for the benefit of those who are careless or not posted, we suggest the following points: When leaving the boat-house cast your eye over the water and select the position in which you desire to anchor. When you have selected your spot you should row to this position in such a direction that you will not cross another angler's fishing ground. Go behind those who have already located, in order that you will not disturb them by the splash of your oar or the shuffling of your feet on the bottom of the boat. Every slight sound will scatter a school of fish, hence we owe it to our fellow anglers to be as quiet as possible. Never anchor nearer than 100 feet from the next boat. You will thus disturb no one and you will have a position which is just as good as the earlier comers. There is plenty of room on this lovely sheet of water for a hundred boats if a little discretion is used in locating.

"When the bass are feeding they travel all over the lake, thus you have just as good a chance as your neighbor. Should two or three boats fortunately strike a school, do not leave your position and crowd around the lucky ones. Your time will come later, and so every angler will have his share of sport.

"If these foregoing points were borne in mind a great deal of unpleasant language and much ruffling of tempers would be avoided and the anglers would get on better with one another. Every fisherman

honkers and a few white geese. Wild geese are congregating at present on the Solano plains in countless thousands. To the expert, the sport is lively and good bags are the rule. To the novice or ordinary shooter a half dozen birds in a day's shoot is a lucky bag. The geese generally remain in that section until about the middle of April.

Because no longer popular, Alaska bear skins have fallen in value from \$25 and \$50 one year ago to \$10 and \$12. There is little sale for them, the effort of San Francisco dealers to have them take the place of buffalo skins in this country and Europe having failed.

George Simmons, a San Francisco fur dealer, says the demand is so light that buyers will not purchase bear skins in Alaska this season. He has a large stock of them which he shipped to England last year and is now trying to sell at a large discount. Simmons is en route to the north to spend six weeks buying furs of the Indians along the coast and in the interior.

Reports from the north indicate a very large catch of fine furs, chiefly mink, black marten, silver fox and seal. These are the most popular skins now obtainable and the market is just now so short of them that an advance in prices is expected. Winter in the interior of Alaska has been very severe, which adds to the quality of the furs obtained here.

The number of Indian hunters has been greater than usual as this winter did not afford them employment at chopping cord wood.

### Kennel Registry.

Announcements of Visits, Whelps, Sales and Leases will be inserted hereafter, for advertisers, free of cost.

#### VISITS

Naird Kennels' black Cocker Spaniel bitch Imp (Black Trophy-Stella Silk) to Mrs. P. C. Meyer's Ch. Havoc (Black Duke-Woodland-Jude, January 3, 1903)

Mrs. Foster's black Cocker Spaniel bitch Tiny (—) to Naird Kennels' Plumeria Beau II (Ch. Hampton Goldie-Ch. Plumeria Surprise, January 3, 6, 1903)

#### SALES.

A. L. Byler sold to Naird Kennels, December 28, 1902, the black Cocker Spaniel bitch Maid of Oakland (Wood and Jersey-Woodland-Confess) in whelp to Oakland Romance (Oakland Fascination-Oakland Tippeo).

## THE FARM.

### A Wonderful Record.

As has been printed heretofore in these columns, the Riverside Herd of Holsteins owned by the Pierce Land and Stock Company whose magnificent stock farm is located four miles from Stockton, has made some wonderful records as butter producers. A test conducted by the authorized representatives of the University of California showed that Fidessa, the first prize winner at the recent California State Fair, and selected by Prof. Carlyle as embodying the highest degree of perfection of type in the ideal cow, regardless of breed, earned two records. In a thirty day test she gave 2392.7 pounds of milk, which yielded 91.5 pounds of butter. This is the world's record for a four year old Holstein for thirty days. In a seven-day test she gave 569 pounds of milk which would have made 25,038 pounds of 80 per cent butter. Another cow in the same herd, Romeo Aaggie produced twenty-six pounds of 80 per cent butter in a seven-day test. This last record has never been beaten on the Pacific Coast and is second only to the world's record held by a cow at St. Paul, that gave no less than twenty-nine pounds in the same length of time.

Now comes what to our mind is a still more remarkable showing for the farm. A letter received at the office of the BREEDER AND SPORTSMAN from Mr. Chas. D. Pierce, President of the Pierce Land and Stock Company, says:

"We desire to report to you that we have just finished testing our 9th two year old heifer, and the average record for the lot is 14 lbs., 3 oz. of butter each in seven days. These are certainly wonderful records, and we doubt if there is another herd in the United States to day that contains nine two year olds with such records."

A dairy farm that can produce nine two year old heifers that average over two pounds of butter each per day is certainly a wonderful success.

### Grading Up a Dairy Herd.

We do not want long-legged cows in a dairy. We do not want a cow that has the habit of putting fat on her back.

We want a machine, and we want to educate that machine to do our work.

It is not within the power of man to make that machine do its work properly in one generation; it must be a matter of continuous breeding to fix a given habit in the cow.

Someone may ask: "Well, how am I going to do that? I do not possess these high priced thoroughbred cows; I am not fixed on my farm to maintain the thoroughbred cow, the dairy cow, that is, as a rule, delicate.

That is a foolish idea.

She is not any more susceptible to disease than any other animal of the bovine race.

I know that the dairy cow always looks delicate in the same sense that she is always thin; a cow that will make a profit ten months in the year will look thin, because she is not putting her fat on her back; but in the milk-pail.

Now, I will say to the man who cannot put into his herd the thoroughbred breeds, buy a thoroughbred bull, it matters not whether it be a Jersey to supply butter, a Guernsey to supply rich colored milk, an Ayrshire to give a good flow of milk, or the Holstein, to give a large flow.

Get a thoroughbred bull; never pick one that is a "scrub." Why? Because he cannot with any surety fix the blood or type.—Address of V. E. Fuller at the Ohio State Board of Agriculture.

Cows giving the highest per cent of butter fat produce butter, as a rule, at less cost than those giving a low per cent. The difference between six per cent and three per cent milk is 100 per cent, inasmuch as it requires twice the quantity of milk to produce a pound of butter.

### Vaccinating Against Tuberculosis.

Some experiments on the vaccination of cattle against tuberculosis have recently been published by Dr. Leonard Pearson, State Veterinarian of Pennsylvania, and Dr. S. H. Gilliland. These experiments were conducted at the veterinary school of the University of Pennsylvania, with the support of the State Live Stock Sanitary Board. The work has been in progress more than two years, thus antedating all other work along this line, for the German investigations of von Behring did not begin until July, 1901. No other investigations of this sort have been reported in any other country than in the United States and Germany.

The process used was to inject into the vein of the animal to be protected a small quantity of a suspension of tubercle bacilli non-virulent for cattle. This procedure, called vaccination, may be repeated several times with gradually ascending quantities. The immediate effect is to produce a passing fever following each injection, which does not annoy the animal enough to cause it to lose a single meal. The general health is not disturbed by the process of vaccination. When the series of vaccinations was completed the animal had an astonishingly high degree of immunity to tuberculosis.

In the last experiments completed four young cattle were used. Two of these were vaccinated last March. All four were inoculated in July by injecting into the windpipe a quantity of culture of virulent tubercle bacilli. A large quantity was introduced and each of the four animals received exactly the same treatment. These animals were killed in October. It was found that the cattle that had not been vaccinated were extensively tubercular, showing alterations of this disease in the windpipe, lungs, throat and intestinal glands; while the two vaccinated animals, inoculated the same time from the same material and in the same way, were free from tubercular infection and were sound.

Dr. Pearson considers that this principle of immunization as applied to vaccination against tuberculosis of cattle is proved and it now remains only to work out the details of the method. This important work is being continued on a larger scale for the purpose of ascertaining the simplest and shortest practical method of vaccination.

It is not yet known how long the immunity will last nor what the ultimate effect upon the animal will be. So far, however, as the few experiments here and in Germany show, no fear need be anticipated of unfavorable results in these particulars. What is needed now is the painstaking use of the method on a few tubercular herds kept under careful and continuous observation. A scrupulously careful trial on a limited scale under proper conditions will do more to furnish the information needed to answer the few remaining questions upon this discovery than any amount of general use under less careful supervision. In the estimation of the investigators it would be premature to apply this vaccination to herds until such further experiments are completed. An effort will be made to secure State aid for experiments on a scale large enough to solve this important problem.

### Jerseys to be Represented at St. Louis.

The American Jersey Cattle Club has made definite progress towards presenting a working herd of Jerseys at the St. Louis World's Fair which will be a credit to the breed. The committee appointed for this purpose—J. J. Richardson, Davenport, Iowa, William Gettys, Athens, Tenn., and Geo. E. Peer, Rochester, N. Y.—has organized by the election of Mr. Richardson as chairman. Generous arrangements have been secured with Mr. A. O. Astor for free use of adequate accommodations on his farm at Jerseyville, Ill., which is a short distance from St. Louis, and a lot of cows will be assembled there quite a time pre-

vious to the opening of the Exposition in order that they may be thoroughly acclimated before called on to undergo test. The members of the committee will at once set about the task of selecting candidates for this exhibit. It is not at present known whether a competitive dairy test will be included as a part of the exhibit of live stock at St. Louis in 1904, but the American Jersey Cattle Club with characteristic enterprise is thus fore-handed in preparing for such a contingency, and is determined that if such a test is not provided it will maintain a working dairy of high class cows of the breed, under the strictest sort of test conditions for the purpose of demonstrating anew the butter making possibilities of the breed. Preparations for such an exhibit are certainly in very capable hands.

### An Interesting Experiment.

The following is from a late bulletin of the Wisconsin Experiment Station on sheep breeding and lambs of various breeds:

"Southdown ewes dropped 78 per cent of strong lambs while the Shropshire ewes dropped 59 per cent. The Shrop-Merinos 73.4 per cent and the Dorset-Shrops 60 per cent of strong lambs, the latter being but a trifle ahead of the Shropshires. The Shrop-Merinos, however, have the smallest percentage of weak lambs, which would in average vitality of lambs at birth make them practically the equals of the Southdowns. The Shropshires, however, of the breeds and crosses mentioned show the least vitality in their lambs at birth.

"The Shropshire ewes were found to be easily in the lead in percentage increase for the three years above mentioned, with the Shrop-Merinos a close second. As 19 per cent of the lambs dropped by Shropshire ewes were triplets this may in some measure account for the large percentage of weak lambs from the ewes of this breed, though the Shrop-Merino ewes with 15 per cent of triplet lambs had the smallest percentage of weak lambs of any of the breeds or crosses. None of the Southdown ewes gave birth to triplets, though the ewes of this breed gave the largest percentage of twins of any breed or cross. It will also be noticed that 13.3 per cent of the whole number dropped were triplets, 19.1 per cent were singles and 67.6 per cent, or over two-thirds of the whole number, were twin lambs.

"Single lambs are much larger at birth on the average than twins and twins are much larger than triplets, the difference in average weight between single and twin lambs being 1.44 pounds and between single and triplet lambs a difference of 2.16 pounds, yet from lamb feeding experiments conducted at his station (16th Ann. Rep., p 51) it was found that until weaning time twins made equally as good gains as single lambs."

### Heavy Ram Contest.

We doubt if there has ever been a prize offered for a sheep that has created such widespread interest in all sheep breeding countries as the \$400 offer made by the International Stock Food Co. for the heaviest ram in the world. The announcement was made early last winter and leading breeders in England, Canada and the United States commenced to prepare rams for the contest. Henry Dudding, the great English Lincoln breeder, who has made the world's record for selling two Lincoln rams at \$5000 each, and S. E. Dean & Sons, the celebrated Dowsby Hall breeders, both fed rams for this prize. Frank Harding brought over the Dudding ram and he tipped the beam at 461 pounds in quarantine, but died on the second day after his arrival. S. E. Dean & Sons shipped a Dowsby Hall ram weighing 480 pounds prior to shipment at Liverpool. This ram reached Quebec in good shape, but died a few days later. Park & Son, the Canadian Cotswold breeders, were ready with a Cotswold ram weighing 460

pounds, but thought they were beaten and did not enter in. Patrick Bros. fed a Dudding bred Lincoln ram, that weighed 445 pounds November 20th, the day set for the taking of weights. John Gibson, the Canadian Lincoln breeder, sent weight of a 407 pound ram, and Geo. McKerrow, the well known Oxford Down importer and breeder, made affidavit to the weight of a 406 pound Oxford ram. S. P. Williams, of Hancock, Iowa, sent proof of a Cotswold ram that cleared the beam at 333 pounds, and Hans Abeld, of Wauconda, South Dakota, furnished affidavit for a ram weighing 300 pounds but did not state the breed. According to the rules of the contest, Patrick Bros. received the check for \$400, and their ram was shipped to the great stock farm of the International Stock Food Co. at Hamilton, Minn. Without doubt the Lincoln ram sent over by Messrs. Dean & Sons would have weighed 500 pounds and over, but the long, hard voyage proved too much for him. The International Stock Food Co. own the largest horse, cow and hog in the world. Mr. Savage recently purchased the world's greatest pacer, Dan Patch paying \$60 000 for him.

### Butter Making in Russia.

The American consul at Moscow, Russia, reports to the Secretary of State that the Russian government has appropriated \$39,000 to be used for instruction in butter making in the creameries of western Siberia. Five creamery schools are to be maintained and everything will be done to build up the dairy business of this undeveloped territory.

The Red Polled is one of the youngest of the breeds. It was not until the year 1846 that the union of the Norfolk and Suffolk breeders gave the breed its name. From the start this breed has been famous as one valuable alike for dairying and for beef production, and on the markets of England the Norfolk cattle take high rank. They were first brought to America in 1873 and since then have grown steadily. Here their beefmaking qualities have been neglected to some extent, but they have figured strongly as valuable animals for the smaller farmer. Neglect to show them in high condition has also tended to obscure their flesh bearing powers in time past, but recent exhibitions have been highly creditable.

As their name indicates cattle of this breed are without horns, no appearance of them being tolerated. In color they are a rich deep red with white allowed on the udder and underline, inside the flanks and on the switch of the tail. The head is quite characteristic, of medium size, clean cut, with a sharp poll which carries a good tuft of hair. The neck is of medium length body of good size and shape, legs of medium length. Red Polls are very uniform, prepotent and hardy, and have many earnest advocates, being good milkers as well as good feeders.

The Iowa Agricultural College has recently sold Secretary Wilson of President Roosevelt's cabinet two superior pairs of horses for service in the department of agriculture at Washington. A few years ago when horses were a drug on the market at any price an experiment was undertaken to determine the qualities and value of western range bred horses obtained from the range as colts and developed under Iowa farm conditions. Many horses in the range territory and elsewhere were then selling as low as \$5 per head. The experiment station at that time obtained a carload of well bred colts as weanlings and yearlings from the ranges of Wyoming and Montana and brought them to the college for development and investigation. They were carefully and intelligently selected as colts, care being taken to combine good breeding with a high degree of individual excellence. These horses have been greatly admired as they have been developed and used at the college. Those recently sold are a pair of steel gray grade Percherons for hauling the department's mail and express and a pair of well matched seal brown coach horses that will be used on Secretary Wilson's carriage and it is the opinion of good horsemen that the secretary will ride better handsome pair as there is in Wash.

## Shipping Hogs to Market.

In one of the reports of the Kansas Board of Agriculture some points are given on the subject "Shipping Hogs." The information was collected by consultation with the leading commission men of large cities. It is pointed out that much loss is traceable to hogs being overloaded, shippers being careless at times and thinking they are loading only 18,000 or 19,000 pounds when in fact they are putting in 21,000 to 23,000. In addition to the loss derived from this source many hogs are crippled and die from the manner in which they are handled before the shipper gets possession of them. Hogs coming out of a wet, manure car in cold weather generally depreciate at least five cents per hundred pounds when placed on the market, says *The Homestead*. The advice of commission men is that it always pays to clean the cars thoroughly and bed them well with hay and straw before shipping. Each carload should be graded so as to be as even as possible. They will not only sell better when this is done, but they will ship better than if the large and small hogs are mixed. Care should be taken to have hogs in as near their normal condition as possible when they are loaded on the cars. A common mistake is that of over-feeding or over-driving hogs immediately before placing on the cars. It is much better to allow them to rest and cool off before placing them in the cars. It is usually advisable to distribute a good feed of corn throughout the car.

A common mistake made by farmers is that of shipping pregnant sows. This is no doubt based on the belief that a sow from one month to two and a half months gone is just as good for meat purposes as one that has not been bred. One large packing company says that depreciation in the meat of a sow begins very shortly after she becomes pregnant. Another firm denounced the practice of shipping such sows and made the statement that it ought to be considered criminal to send an animal to the slaughter when in this condition. Packers claim that a dockage of forty pounds does not cover the loss that is incurred in the handling of pregnant sows. In addition to this it should be borne in mind that the government inspectors are obliged to condemn sows that are considered too far forward.

As to the age at which boars should be castrated packers were almost unanimous in their opinion that the operation could not be performed too early. The time given varies from three weeks to three months and attention is called to the fact that after the latter date the hog's meat grows stronger very rapidly.

## Breed the Best Types.

Types of draft horses cannot be evolved at will, even with pure-bred sires and dams. The difficulty is augmented when mixed bred dams are crossed with pure-bred stallions. Farmers should have high ideals and breed specifically for the best types. Some of the produce of the best crosses will result in rather upstanding draft animals of medium weight in urgent demand for express service, with the residue of more powerful types suitable for the best domestic and export trade. A few of the progeny of the best combinations will develop into chunks and busses of commerce. Nearly all classes will be produced when the breeding industry is conducted on modern principles of methodical selections of sires and dams. The animals with the greatest beauty of conformation and avordupoise will command the best prices. The economy and advantage of breeding from the best types of the heaviest grades is that even the variations incident to the laws of atavism will develop into animals representing the best market types of chunks and expressers. To achieve success farmers must breed the best mares to best stallions available and keep the best filly foals for future improvement of the industry.

## A Good Game to Stick To.

An exchange reports Mr. J. E. Wing, of Ohio, as of the opinion that fat mutton will be in demand for export. "Sheep and lamb feeding is a good game to stick to, provided the feeder raises his own feed. We raise lots of alfalfa and feed in conjunction with ear corn. Never shell the corn. At least that is our experience, and it has been a profitable one. The thin lambs are the ones to buy. The feeder gets the growth with them and will make money by not finishing them too much. Send them too market on the light side, if anything, is my policy. When buying feeding lambs, be sure to pick those with open, loose fleeces. They do better in the feed lot than close fleeced stock."

It is rarely considered that water is far more important a matter for consideration in the winter than in summer. Horses feeding on dry food are deprived of three times the weight of it, which they get when on pasture. Ten pounds of green grass has eight pounds of water in it, while as many pounds of hay has but one pound of water in it. If, then, horses on pasture will drink, how much more is it necessary that water should be supplied sufficiently in the winter.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

## SONOMA PRINCE FOR SALE---\$600

CLYDESDALE STALLION, Sired by POLLOCK, he by Model Prince. Dam Imp. Pride of Oro. SONOMA PRINCE took first prizes at the California State Fair as suckling, yearling, two year old and three year old. He is one of the grandest looking draft stallions in California and a sure foal getter. His sire Pollock is the winner of six first prizes and the sire of 11 first prize winning colts. Pollock holds the champion walking match record at the State Fair with one ton of weight to a wagon with a driver. Apply to owner, D. M. FRAME, Lakeport, Lake Co., Cal.

## Had Good Dairy Cows.

The Visalia News, commenting upon the profits in dairy cows in that section, cites the results obtained by two local dairymen. It says that C. H. Kinkler milked fourteen cows last year, receiving for the butter fat \$1032.28, or an average of \$73.75 per cow. The other dairyman, J. W. Oakes, received an average of \$62 per cow. Assuming that these dairymen did not receive on an average over 25 cents per pound for butter fat, it is apparent that these cows must have been what are called 300-pound butter cows; that is, their annual yield of butter must have been pretty near that mark. While the district no doubt produces the feed to stimulate cows to their utmost, it is apparent that these dairymen had the other factor essential in profitable dairying, namely, good cows.—*Dairy and Produce Review*.

Thousands of cattle are starving in Northwestern Colorado. The cattle are snowed in on the high ranges without pasture and without water. It is impossible to get feed to them and equally impossible to get them into suitable winter quarters.

## FOR PINK EYE

DISTEMPER, CATARRHAL FEVER, AND ALL NOSE AND THROAT DISEASES.

Cures the sick, and acts as a preventive for others. Liquid given on the tongue. Safe for brood mares and all others. Best kidney remedy, 50 cents bottle, \$3 dozen. Sold by all druggists and turf goods houses, or sent, express paid, by the manufacturers.

**FOR SALE.**

Having concluded to retire from the business of breeding trotters, I have decided to sell all my horses, including the famous stallions

**Richard's Elector 2170**

Sire of 16 in the list, son of Electioneer and Gilberta by St. Clair.

**L. A.**

Sired by Richard's Elector, dam by Butterfield's St. Clair, second dam by Williamson's Belmont.

**Electric**

Sired by Richard's Elector, dam by Yorktown (son of Speculation), second dam by Blackhawk 767.

These horses are in perfect condition and are offered at very low prices. Colts and fillies by these sires will be shown at my place, Grayson, Stanislaus county. For further particulars, prices, etc., address

**L. A. RICHARDS, Grayson, Cal.**

**MARES AND COLTS FOR SALE.**

**HERA 2:20 1/4** by Mambrino Wilkes, with yearling horse colt by Welcome 2:10 1/4, entered in Breeders \$6000 Futurity for foals of 1901.

**MABEL G.** (trial 2:36 trotting) by Brigadier, with suckling filly foal by Chas. Marvin. Full brother to Don Lowell 2:14 1/4. Entered in Hartford \$10,000 Futurity and eligible to California State Fair Stallion Stake, Occident and Stanford Stakes.

Can be seen at my place, 1801 Union street, corner 26th, Oakland. **P. H. SEXTON.**

**GOOD ONES FOR SALE.**

**ATHANEER**, dark bay Stallion, 2 years old; full brother to A. Athadon 2:10. By Athadon 3:00, sire of Listerine 2:13 1/4, Sue 2:12 1/4, Dakon D. 2:16 1/4, Donatrine 2:26 1/4, etc.; dam Lustrine by Onward 1411. A large, stylish, pure-gaited trotter. When 5 or 6 years old will weigh 1400 lbs. Will make a great stock horse.

**A Two-Year-Old Colt** by Athadon, dam Frenna by Junio; second dam by Onward. J. A. Albertson has worked this colt for 3 1/2 months and was pleased with the speed he showed, and says that he will make a trotter.

**Four-Year-Old Colt** (brother to Sue 2:12 1/4) by Lustrine, full brother to Listerine 2:13 1/4. A large, handsome, stylish road horse; with but two months' work showed a mile in 2:30.

All will be sold at reasonable prices. For price and further particulars address

**JACOB SCHAFER, Fowler, Fresno Co, Cal.**

**FOR SALE.**

**Three Standard-Bred Trotting Stallions  
WILKES STOCK.**

**One Seal Brown**, 16 hands, foaled May 2, 1898; first dam Fearless by Fallis 4781 (record 2:23); second dam Jean Perault by Signal 3327.

**One Golden Bay**, 16 1/2 hands, foaled March 5, 1898; first dam Signal by Del Sur 1098 (record 2:34); dam of Guy Sino 2:29 1/4; second dam Lady Signal by Signal 3327.

**One Brown**, white points, 16 1/2 hands, foaled April, 1898; full brother to the Seal.

These colts are all sired by Prince Airlee 28045, son of Guy Wilkes 2807 (record 2:15 1/4), and bred by Wm Corbitt, San Mateo, Cal. They are pure gaited and show wonderful speed for the little work they have done.

For further particulars apply to  
**P. H. McEVOY, Menlo Park, Cal.**

**FRED H. CHASE & CO.**  
 (SUCCESSORS TO KILLIP & CO.)  
 LIVE STOCK AUCTIONEERS. 1732 MARKET STREET, SAN FRANCISCO.

## CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET. IT PENETRATES and DRIES in quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS and BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed. IT PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH STRONG ELASTIC WALL and HEALTHY FROG—A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES. We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2½-Gallon, \$5.00; Five-Gallon, \$10.00.

Horses are supplied for their use and much valuable information as to shoeing are supplied free. Don't fail to read and receive information concerning Campbell's Iodoform Gull Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

JAS. B. CAMPBELL & CO., Manufacturers, 412 W. Madison St., CHICAGO, ILL.

## RIVERSIDE HERD REGISTERED HOLSTEIN FRIESIANS

Comprise the representatives of the best families of this famous breed. The home of ROMEO, a 1901 All Star, who has an official seven day record of 26 lbs. 11 ozs. butter; PIERSSA, who made in a seven days official record over 25 lbs. butter, and many other large producers.

PIERCE LAND AND STOCK CO.

Those beaten and not placed allowed 10 lbs. Allowances not accumulative. Winner to be presented with a handsome silver loving cup by MR. CHASAR YOUNG. Four Furlongs.

### Notice to Nominators.

The Mid-Winter Race Meeting, 1903 opens at Agricultural Park, Saturday, January 31st, and horses should be shipped to Agricultural Park, University Station, Los Angeles, Cal.

In case of a walkover, the horse walking over shall receive only one-half of the added money.

No selling stake or race shall be a claiming race, unless so specified in the conditions.

In races for all ages, horses shall carry weights according to their ages at the time the race is to be run.

Liberal over-night handicaps and special events during the meeting.

Two or more races for two-year-olds each week. If horses enough to fill, we will also give two hurdle races each week.

## "SAVE-THE-HORSE" —TRADE MARK— SPAVIN CURE.

Any of the Testimonials we publish can be verified by writing to the parties signing them.

Gentlemen:—My experience with "Save-the-Horse" has been as follows: My horse, when young, would rear on his hind legs and produced a curb, which later developed so that after driving a mile or two he would become so lame I could hardly get home. I was recommended to use "Save-the-Horse" instead of blistering and after a few weeks' use, and since, the horse has never taken a lame step and I have driven him as far as forty miles in a day. To a man who has a valuable horse \$50 would be a small price to pay for this remedy to produce a cure in such a case. I used not over three-quarters of a bottle. Very truly,  
 DR. L. F. MENIZER.  
 New York, N. Y.

Gentlemen:—Please find enclosed check for \$5, for which kindly send me one bottle of "Save-the-Horse." We think this the greatest remedy for all lameness we ever struck and we would like to have the agency for "Save-the-Horse."  
 Pleasant City, Ohio  
 ERNST PLATH, 57 E 3rd St.,  
 Real Estate & Insurance.  
 ARCHER & McCLEARY,  
 Art Studio

Gentlemen:—My black mare (Candy 2:10) has a bunch on her forward ankle, of three years' standing, and was lame during that time to such an extent that I turned her out to pasture. I used "Save-the-Horse" and treated her for about six weeks. Your remedy has done all that you claim for it. The mare is perfectly sound and moves about without any appearance of lameness.

Horse can be worked with either shin or ankle boots, as no harm can possibly come by either destruction of hair or scalding of the limb. "Save-the-Horse" can be applied in all conditions and extremes of weather—hot or cold.

POSITIVELY AND PERMANENTLY CURES Bone and Bog Spavin, Ringbone, Curb, Thoroughpin, Splint, Capped Hock, Shoe Boil, Wind Puff, Weak and Sprained Tendons and all Lameness. Contains no arsenic, corrosive sublimate or other forms of mercury, or any injurious ingredient. Work horse continuously, if desired. Cures without soar, blemish or loss of hair.

**\$5.00 per Bottle.** Written guarantee with every bottle, constructed to convince and protect you fully. The need of second bottle is almost impossible except in rarest cases. Gull antec covers effectiveness of one bottle. Copy of guarantee sent upon application. \$5 a bottle at all dealers' and druggists', or sent prepaid by the manufacturers.

TROY CHEMICAL CO., Troy, N. Y., Manufacturers.

D. E. NEWELL, 519 Mission St., San Francisco, Pacific Coast Agent.

## QUINN'S OINTMENT FOR HORSES

stands at the head of all veterinary remedies. Such troubles as Spavins, Curbs, Windpuffs, Splints, Bunches have no terrors for a horse if the master keeps and applies Quinn's Ointment. All well known horsemen speak of it in the highest terms:

Miller & Sibley of Franklin, Pa., owners of St. Bel, brother of late Boj Boy, write, "We have used Quinn's Ointment with great success and believe it fulfills all claimed for it. We cheerfully recommend it to our friends." For Curbs, Splints, Spavins or Bunches it has no equal.

Price \$1.00 per package. Sold by all druggists, or sent by mail.

W. B. EDDY & CO., WHITEHALL, N. Y. TRY IT.

WALTER SEALY, Manager.

THE BARON WILKESSES WON 25 PER CENT OF ALL THE MONEY ON THE GRAND CIRCUIT OF 1902.

## BARONDALE 2:11 1/4

IS A SON OF BARON WILKES 2:18.

His first dam, Nathalie, produced Barondale 2:11 1/4 and Grand Baron 2:12 1/4 and is by NUTWOOD the greatest of all sires.  
His second dam, Beatrice is the dam of Patron 2:14 1/4, Prodgal 2:16, Patronage and Pangloss, all great sires, and is by Cuyler.  
His third dam, Mary Mambrino is the dam of Elvira 2:18 1/2, the producing sire Dunraven, and dams of Ponce de Leon 2:13 and four others.  
BARONDALE has two new ones in the list this year and is now the sire of four in the list.  
Where Can You Beat This Breeding?

Season of 1903 at SAN JOSE RACE TRACK.

Terms, \$50 for the season, with usual return privileges.

For further particulars address TOM JAMES, 1120 Alameda Ave., San Jose, Cal.

## STAM B. 2:11 1-4

(TROTTER.) REG NO. 23444.

3-YEAR-OLD RECORD, 2:15 1-2  
(Time set on 2:12 1/4)  
4-YEAR-OLD RECORD, 2:11 1-4  
(Time set on 2:09 1/2, 2:09)  
2-YEAR-OLD TRIAL, - - 2:26

Early speed is natural speed and natural speed is inherited speed.  
Reach for the top by breeding a good mare to STAM B.

Your chances are good for a 2:02 trotter or a Futurity winner, extra good for a handsome show or coach horse. It is a well-known fact that Baron Wilkes 2:18 has been recognized for years as the leading money winning sire and his blood and the blood of STAM B. is among the leading early speed performers, so much so that well informed and successful breeders, the late Col. R. G. Stoner, contemplated purchasing STAM B. as a stud companion for Oakland Baron 2:09 1/4. Such blood produced Rhythmic 2:08, Baron Deshay 2:08 1/4, Gail Hamilton (3-year-old) 2:11 1/4, Peter Stirling (3-year-old) 2:11 1/4. By tabulating STAM B.'s pedigree, it is impossible to do so without figuring in all the champion performers' records—1:59 1/4, 2:01 1/4, pacing: 2:02 1/4, 2:03 1/4, 2:04, trotting—and the once champions of the show ring, Stamboul 2:07 1/4, Mambrino King and Almost Lightning, and such young Futurity performers as Champion Girl 2:12, Bugle (3-year-old) 2:14, Oxford Boy (2-year-old) 2:20, Wiggins (2-year-old) 2:19 1/4, sire of Katherine A. (3-year-old) 2:14, Hilgar (2-year-old) 2:15 1/4, Wigwag (3-year-old) 2:16 1/4.

STAM B. was sired by Stamboul 2:07 1/4, sire of 47 from 2:10 1/4 to 2:29, sons and daughters (34 from 2:07 1/4 to 2:27), showing that his blood breeds on and down. With his few foals, he compares favorably with the leading sires of the past. First dam Belle Medium 2:29 (dam of 3 from 2:11 1/4 to 2:31) by Happy Medium, sire of Nancy Hanks 2:04; 55 of his sons produced 283 from 2:07 1/4 to 2:30; 58 daughters produced 78 from 2:10 to 2:30, including Admiral Dewey (3-year-old) 2:15. Second dam Argenta (dam of 1 in 2:30) by Almost Lightning, sire of 1 in the list and dams of Zombro (5-year-old) 2:11 and King Princeps 2:15 by Almost 33. Third dam Mary Adams by Mambrino Patchen, sire of dams of Giv Wilkes 2:15 1/4, Baron Wilkes 2:18, Patchen Wilkes 2:29, etc. etc. Fourth dam Mambrino Belle by Mambrino Chief II, sire of Lady Thorne 2:18 1/4 and dams of Director 2:17, sire of Directum (4-year old) 2:05 1/4, Onward 2:25 1/4, sire of Benetta (4-year old) 2:09 1/4. Fifth dam by Mason's Whip (thoroughbred).

Can it be possible that the service of such a bred stallion can be secured for such a low fee? Yes, for this season only. Grasp such a rare opportunity! STAM B. has the characteristic of transmitting speed, soundness, size and style, as his ancestors have size, soundness, speed and style. He is a handsome bay, two white hind ankles, 15 1/2 inches high, weight 1000 lbs., a typical Morgan in form, of the greatest stamina and of powerful muscular development. As a living game racehorse he is known nationally. In his career he beat such noted trotters as Klamath 2:07, Kentucky Union 2:07 1/4, Toggles 2:08 1/4, Altas 2:09 1/4, Jasper Ayers 2:09 1/4, Monterey 2:09 1/4, Zombro 2:11 and Stambouletta 2:10 1/4. STAM B. 2:11 1/4 will make the season of 1903 at that well-appointed farm,

SANTA RITA FARM, PLEASANTON, CAL.

Terms \$40 SPOT CASH, at time of service. Best of care taken of mares and foals, but no responsibility for accidents or escapes. The public is cordially invited to attend our receptions at all times from February 15th to June 1st and see our gems.

## Testing for Lameness.

Hocks and fetlocks are not always from accident, and it is necessary to find out if the horse is a habitual sufferer. Examine the cannon bone for evidence of spavin, which is a common ailment of horses, and also very often we find an abnormality between the carpal and metacarpal bones, the fetlock and the pastern. Any enlargement of the pastern constitutes an unsoundness, as probably the result of ringbone.

Pass the hand down the back of the leg, and first examine the elbow for capped elbow; then observe the hock tendons, noting especially the one next the bone. This ligament supports the greater part of the horse's weight, and prevents displacement of the fetlock. If there is an enlargement it may be the result of some strain to the tendons, and this may be considered an unsoundness. In order to carefully examine the foot, it is necessary to remove the shoe, and find out if there is a bad smelling discharge from the frog. This is called thrush. Corns are a source of unsoundness; notice, when paring the horn, and if there is a blood stain in the heel it is an indication of corns. Also notice if the foot is normal in size and shape. By the term "sidebone" is understood that the cartilage has turned into bone, a condition often found in old horses. In a young and sound horse it should be gristly or elastic. This sidebone is to be found just above the heel of the hoof. It causes lameness and is an unsoundness.

The best way of examining the hock is to take the animal from different standpoints and compare the two hocks to see that there is no difference. Then feel for enlargements. The experience of the observer is important here, and some spavins are only to be detected by a very careful touch. After examining with the fingers, we pass on to examine the cannon bone, the fetlock and the pastern just in the same manner as in the foreleg. An injured or bruised hock will at once indicate an injury, very often done by the horse itself, thus proving it to be a kicker. It is an unsightly blemish.

Examine the hind foot for evidences of "thrush," which is more common in the hind foot than the fore foot, and the pastern for "scratches." Sidebone is unknown in the hind foot.

Examine the joints to see if they are of a normal size, as "knuckling" is another ailment in horses. This, however, is more due to hard work than unsoundness. Some horses are born this way.

Navicular disease is generally seen in contracted feet. Put the horse with contracted feet in motion, and we observe the peculiar way in which it moves, as if they were tender. This is an indication of sore feet.

## The Best Bred Horse.

A man in New York claims that he owns the best bred trotter in the world and this is the way he figures it out:

The horse was sired by Gayton 2:08½, dam Espero by Dare Devil 2:09.

Gayton was sired by Allerton 2:09½, dam Lucy Wilton (dam of Intact 2:19½) by Wilton 2:19½; grandam Ellen Gift by Mambrino Gift.

Dare Devil 2:09 was sired by Mambrino King, dam Mercedes by Chimes.

Mambrino King was sired by Mambrino Patchen, dam Belle Thornton by Edwin Forrest.

Chimes was sired by Electioneer, dam Beautiful Bells by The Moor.

Electioneer was sired by Hambletonian 10, dam Green Mountain Maid by Harry Clay.

Allerton 2:09½ sired Gayton 2:08½ and Alves 2:09½.

Chimes sired The Abbot 2:03½, The Monk 2:05½ and Fantasy 2:06.

Mambrino King sired Lord Derby 2:05½, Nightingale 2:08 and Dare Devil 2:09.

Electioneer sired Arion 2:07½, Sunol 2:08½ and Palo Alto 2:08½.

The question is up to those who delight to delve into the breeding problem.

## Oakley's Track Will Be Fast.

The management of Oakley Park, in arranging the program for the 1903 season, have decided to enter the 1903 purse \$10,000, from the 2:11 class to the 2:00 class trotting, believing that the change to a faster class will prove a more interesting event not only to prospective nominators but to the public as well. The track at Oakley Park is under process of regrading with the finest of clay loam for a depth of eight inches and Secretary Campbell says he has no hesitancy in stating that when fully completed it will be the fastest track in the United States. The track, consisting of nine miles with four inches of turf and grass on the loam cannot but make it not only a fine free from cupping, but will make it absolutely the speediest track in existence.

## Occidental Horse Exchange Sales.

The sale of the Macdonough and Rowell horses at the Occidental Horse Exchange Thursday night drew a large crowd. The record of the sale is as follows:

PROPERTY OF W. O'B. MACDONOUGH.

Montoya, ch g by Amigo-Paola, to S. J. Lauck for \$125.

First Call, b h by imp. Order-Ranette, to J. Nickelson for \$220.

## Big Fair for Portland.

The project of organizing a combined stock show and race meeting in Portland is meeting with public favor says the *Rural Spirit*. A number of prominent business men have subscribed stock in the association, and it now looks like Portland will at last be redeemed, and placed in the front rank by her best citizens in this movement. The North Pacific Fair Association allotted Portland dates following those of the Oregon State Fair, which will give Portland an opportunity of getting a very representative livestock show. The following are a few of the names who have subscribed for stock, and who will give the new association their hearty support: Charles E. Ladd, of Ladd & Tilton, bankers; T. D. Honeyman, of Honeyman Bros. Hardware Co.; W. L. Whitmore, proprietor Mayview Stock Farm; H. C. Bower, manager Portland Hotel; Frank A. Spencer, manager Allen & Lewis, wholesale grocers; Clossett & Devers, manufacturers; E. Ehrman, of Mason & Ehrman, wholesale grocers; I. N. and M. Fleischner, of Fleischner, Mayer & Co., wholesale dry goods; N. E. Ayer & Co., rolling mills; E. W. Spencer, manager Victoria docks; Sanford Hirsch, of Fleischner, Mayer & Co., and many more names of like standing.

## The Palo Alto Sale.

The breeders of the Pacific Coast should not forget that in the coming sale of Palo Alto Stock Farm the opportunity is offered them of securing two year olds that are high class, bred in lines that have been successful, and the individuals themselves looking like matured horses, give every promise with development, of continuing on adding future records of greatness to the great farm where they were bred.

Never before has such a collection of two year olds been placed before the public of California to be sold at auction. There are young stallions whose individuality and breeding give them claims to hold high places in the history of the turf; fillies from great mares that were race horses themselves, bred in lines that produce on. The catalogues for the sale are being issued by Fred H. Chase & Co., 1732 Market St., San Francisco. The sale takes place Thursday evening January 19, 1903 at 7:30 P. M.

RIO ALTO.

The champion pacer of New Zealand is a four year old called Ribbonwood, whose owners have recently issued a challenge to race him against any harness horse in Australasia, the champion New Zealand trotter, Fritz 2:14 not barred. Ribbonwood has a mile record of 2:15 4-5 and a two-mile record of 4:43. He is by the California bred sire Wildwood, a horse that was bred and raised at Palo Alto Stock Farm and sold to New Zealand years ago. Wildwood is by Good Gift, the son of Electioneer and Miss Gift by Wildile that Senator Stanford sent to the Czar of Russia. Good Gift is the sire of Prince Gift 2:12 and Lanaret 2:22. The dam of Wildwood was the mare Amlet by Fallis, and she was out of the mare Alameda by Langford. Wildwood has much of the thoroughbred infusion in his veins, but it does not prevent his siring speed at the trot and pace, as he is the leading sire of trotters and pacers in New Zealand.

## Cresceus in Grand Shape.

A New York dispatch says: George Ketcham, owner of the champion trotter of the world, Cresceus 2:02½, slipped into town the other evening, dashed around on a shopping tour for an hour or two and left on the 11 o'clock train for Toledo. Only a few of his intimate friends knew of his presence, and they visited him for a short time at the Hotel Navarre. It will astonish the horse world to learn that Mr. Ketcham's flying visit to the metropolis was for the purpose of getting some clothes.

Speaking of Cresceus, Mr. Ketcham said that the great horse is in as fine shape as he ever was in his life, and he did not think the Canadian trip would hurt him in the least. The champion had a strenuous campaign last season, having covered every portion of the continent, and sometimes two or more exhibitions a week; but he reached his Toledo home in fine condition and as hard as nails.

That is one of the remarkable things about this wonderful horse. As is well known, he was a puny, sickly colt; so bad, in fact, that it was decided to destroy him, but Tim Murnane begged to be allowed to try for a short time longer to bring him around, and that saved the champion of the world. Since he has been in training he has scarcely ever seen a sick day, and has been able to stand the hardest kind of work, and apparently thrives upon it. Even when he is not feeling just right he will go out and race or put up a struggle against the watch that is marvelous and a treat to see.

Mr. Ketcham told a story about him the other night which does not speak very well for Cresceus' gallantry, but brings out a phase in his character heretofore unpublished. He is a woman hater. His owner says he has no use whatever for the ladies, and that if one of the fair sex happens to be visiting his quarters and attempts to pat him on the neck or head he will immediately turn his back on her, and sulk in the corner of his stall until she is out of sight. "He exhibited that trait in a more pronounced way at Savannah last fall than ever before," said Mr. Ketcham. "Many ladies were anxious to see him hitched and unhitched, and they visited our quarters by the dozen. Of course they wanted to pat him and tell him how pretty he is, but he would not stand for it at all. Well, you know how quiet he always is—stands like a plowhorse, and all that sort of thing? You should have seen him when the lady visitors were around. He displayed his dislike for them in every way imaginable, laid back his ears, and acted in the most unamiable manner. I was really very much ashamed of his ungallant conduct. He don't mind how many men there are about, but he has taken a most unexplainable dislike to the fair sex, and I shall have to try and teach him better manners."

## Nutwood's Daughters Still Lead.

The daughters of Nutwood are again in the lead as the dams of new 2:30 performers. Fifteen of the new standard performers of 1902 are out of Nutwood mares. The daughters of Red Wilkes come next with eleven to their credit closely followed by Onward's daughters with ten. Robert McGregor's daughters produced eight of the new performers of last year, and no other stallion is represented with more than seven new ones produced by daughters.

## VETERINARY DEPARTMENT.

CONDUCTED BY

WM. F. EGAN, M. R. C. V. C., F. E. V. M. S.

Subscribers to this paper can have advice through these columns in all cases of sick or injured horses, cattle or dogs by sending a plain description of the case. Applicants will send their name and address that they may be identified.

C. L. D., Ferndale.—I would like to ask through the columns of the B. & S. what treatment I shall use on a valuable mare of mine. This mare got entangled in the buggy shafts and in struggling bruised her left hind leg, but did not break the skin or draw blood. It has swelled at the ankle to twice its size and is also swollen considerably up above the hock. We have used hot water and bandaged it. Please let me know at once what treatment to use to reduce this swelling. The mare is not lame or stiff now.

Answer.—Bathe the parts with warm water for about fifteen minutes, apply a lotion made up of 1 oz. tincture of aconite, 4 ozs. Goulard's extract and water to make a quart. Over this apply a bandage that has been saturated in warm water and cover this with a dry woolen or Derby bandage. After this application has been on about two hours, remove it, rub down the parts with alcohol (not too much) and apply dry cotton batting and dry bandage for the night. Leave the cotton and bandage on all the time, except when the lotion is applied, even when exercising. Give slow exercise daily, and leave the mare either in a large box stall or paddock. Don't bandage above the hock, but apply the lotion and moderate hand rubbing. Give the mare one dram of potassium iodide in food, twice a day, for two weeks. Don't feed grain.

## Notes and News.

The Palo Alto sale is next Thursday evening.

McKinney will have a grand lot of mares sent to his court this season.

John R. Gentry 2:00½ will be in the stud in Kentucky in 1903.

Four mares by Electioneer are the dams of new standard performers for 1902.

All the stalls at Pleasanton track are full and trainers are renting stall room on the outside.

Zephyr (4) 2:11 was bred to Beauseant 2:12, after going wrong last fall, and is reported in foal.

The Cleveland Road Riders Association is booming. Though new, it has over 200 members, with constant accessions.

Cobwebs 2:12 is not yet a has been. He recently defeated the fast young horse Tiverton 2:12½ on the New York Speedway.

Clay S. 2:13½ is getting into good form at Pleasanton. Ben Walker worked him a half to wagon in 1:06½ one day this week at Pleasanton.

John A. McKerron 2:05½ has been taken up at Walnut Hall Farm, Donerail, Ky., after a two-months' let-up, and is being jogged every day.

Five million dollars is the estimated amount of money distributed to the trotters and pacers of the United States during the last racing season.

Eight two year old stallions bred in the purple and all excellent individuals will be among the offerings at the Palo Alto sale in this city next Thursday evening.

There are twenty-five fillies bred at Palo Alto Farm to be sold by Fred Chase & Co. next Thursday evening at 1732 Market street, this city. The bidding should be lively when they are put up.

The North Pacific circuit has been arranged and dates fixed. It provides for sixty days harness and running races divided between fifteen tracks in Oregon, Washington, Idaho and British Columbia.

The Buffalo Grand Circuit meeting will probably be held at the Kenilworth race track, built there last year for the runners. Its running meeting was not a success, and the management is now involved in legal difficulties.

James Sutherland, owner, has built an addition to the Rose Hotel at Pleasanton. Since A. S. Olney & Son took the management of this hotel its popularity has increased so that more room is absolutely necessary.

Nushagak, sire of last year's winner of both the Occident and Stanford Stakes, will have some great mares bred to him this year. He is one of the hand-somest stallions as well as one of the best bred ones in California.

In extreme speed the Strathmore mares were the greatest producers of 1902. Rhythmic 2:08 and Baronde Shay 2:08½ are both out of Strathmore mares. The daughters of no other stallion produced two such fast trotters.

McKinney, strange to relate, was never bred to but two Nutwood mares during his entire stud career in California. Mr. C. A. Durfee bred a Nutwood mare of his own to him last year, and last week she died while very heavy in foal.

Two meetings will be held at the Seattle track this year, the first from June 6th to July 4th, and the other from August 1st to 29th. Running races will be the main portion of the programs, but purses will also be offered for trotters and pacers.

The first new 2:30 performer for 1903 dropped into the list January 1st, at Phoenix, Ariz. The newcomer is the three year old trotting colt Oakwood by Ashwood, who won a six-heat race, beating several others, taking a record of 2:28½ in the last heat.

But three of the grandsons and granddaughters of Nutwood Wilkes 2:16½ ever started in races. They are Alone 2:09½, champion four year old pacer of last year, and Iloilo 2:16½ and Miss Georgie 2:25. Alone is by his son Nearest 2:22 and the other two are out of daughters.

Stam B. 2:11½ at \$40 for the season is a case of full value for his money to the breeder. He is getting speed and a high rate of it, as several of his colts in training show. Good looks and soundness are inherited by him from both sides of his pedigree, and he transmits those qualities.

Another horse show is to be held at Hayward in March. The one held last year was a complete success in spite of a rain storm that unluckily came up while the parade was being held, but with fair weather this time last year's show will be greatly improved upon. All horse owners in Alameda, Contra Costa and Santa Clara counties should take advantage of this occasion to show their horses to the public.

There is a yearling filly by Klatawah 2:05½ out of a Nutwood Wilkes mare at the Nutwood Stock Farm that is a square nicely gaited trotter, and Mr. Carter thinks is very promising. He expected to get a pacer from this cross, but the filly shows no inclination for the lateral gait, but trots like one that means business.

A letter received from Mr. Geo. T. Beckers of Los Angeles states that on Wednesday, January 14th, Mr. William Garland, owner of the trotting mare Sweet Marie, stepped that mare a mile in 2:12½, beating the pacer Athnio 2:14½ by Junio a length. Sweet Marie went to the half in 1:05 and came the last quarter in 32½ seconds.

J. W. Marshall of Binghampton, Solano county purchased a mare by Robert McGregor at the sale of Mr. Chas. Griffith's horses held in this city a few weeks ago. She was heavy in foal to Bonnie Direct 2:05½ but probably received some injury while being shipped to Binghampton as she lost a big brown colt a few days afterwards.

Diablo's second season in Yolo county was more successful than his first inasmuch as the class of mares bred to him were an improvement over those bred the first year. A still further improvement will result this year. Quite a number of standard bred mares with fast records have already been booked to this fast son of Chas. Derby.

McHenry, who campaigned Dan Patch last season, was asked recently if he thought the great pacer would reduce his record this year, and he said he did, as Dan Patch paced a mile in 1902 better than 1:59½. It is said McHenry received half the net profits on the sale of Dan Patch. Mr. Sturgis bought the horse for \$20,000 and sold him for \$60,000.

Nutwood Stock Farm will breed one or two of its choice mares by Nutwood Wilkes to Searchlight this year. Mr. Carter owns a two year old daughter of Searchlight that he thinks very highly of and he says he wants a little more of the same kind. His mare, Lida W. 2:18½ (dam of Nutwood Wilkes 2:16½) by Nutwood is heavy in foal to Stam B. 2:11½.

Tom James of San Jose has had printed a very neat card containing a tabulated pedigree of his great young stallion Barondale 2:11½, together with a wealth of information in regard to the Baron Wilkes family. Mr. James, whose address is 1120 Alameda avenue, San Jose, will be pleased to send you one of these cards if you will send him your address.

Scott Hudson has a high regard for the green pacer Dr. Madara, which, though having shown his capability of a mile in 2:04 last year, starts the year of 1903 without a record. It is no secret that Hudson believes in the son of Simmons 2:28 he has the Dan Patch of the coming year, and is, if anything, anxious to have another go with the unbeaten Direct Hal 2:04½.

J. F. McKee, of Weston, Ohio, has sent his three year old bay horse, Crescent Route by Cresceus 2:02½, to Scott Hudson to be campaigned through the season of 1903. Crescent Route is one of the first of Cresceus' get and has a record of 2:24½, made in 1901. Mr. Hudson will also train Onward Silver if his owner decides to have the great son of Onward campaigned this year.

The youngsters by Welcome 2:10½ at the Meek Farm are attracting lots of attention. They are all of good size and for handsome proportions cannot be excelled. The trotter Iloilo 2:16½ by this horse that did so well on the circuit last season will reduce his record several seconds this year if no accident happens him. Welcome's service fee has been placed at the low price of \$25 this year.

Among the young things in William Cecil's string at Pleasanton is a three year old colt by Nutwood Wilkes out of a full sister to Coney 2:02. This colt was bred and is owned by Mr. J. W. Gardner and is one of the most promising young pacers in California. Cecil drove him an easy half in 1:08½ one day this week, which is more remarkable from the fact that the youngster has only been moved up a few times.

A novel match race has been made by Chas. Griffith and James Thompson of Pleasanton to come off over the track there during the latter part of March. The race is to be a half mile dash between a colt by Bonnie Direct belonging to Mr. Griffith and one by Monbells owned by S. Christensen and being trained by Mr. Thompson. The colts are yearlings and both pacers. The stakes are the carts which the colts will draw in the race.

William Hendrickson, owner of Clay S. 2:13½, recently purchased a full brother to him from Henry Schlosser of San Rafael. This horse is a gelding coming five years old and weighed 1230 pounds the day Mr. Hendrickson bought him. He is a square trotter, a good looker and quite promising, but entirely green, never having been worked for speed. He will be given a few lessons at Pleasanton during the next few weeks.

W. J. Andrews is quoted as saying: "Let the National Trotting Association repeal the rule which says that every horse in a race must be driven to win every heat, and then let the driving clubs make all races two in three and stop public betting except on the final result of the race, and I will stake my reputation as a driver that we shall hear no more complaints about laying up heats. I know it is often said that the tracks cannot get along without the revenue derived from bookmaking on the heats, but I don't believe it. Why, I remember when bookmakers were unknown on the trotting turf, and the tracks made more money than now."

Mr. Alfred Solano, of Los Angeles, is the proud owner of the first filly by Petigru 2:10½ foaled in California. It arrived January 5th, at the Sutherland farm near Pleasanton, where the mare is on pasture, and Mr. Sutherland writes that she is a brown beauty. Mr. Solano states that he will enter her in all the California stakes to which she is eligible, and we hope she will be as fast as her inheritance. Her dam is Belle Pointer by Sky Pointer, own brother to Star Pointer 1:59½.

John Donahue has Zolock 2:10½ in his string at San Bernardino, Cal., and is shaping him up to race this year in the 2:11 and free-for-all pacing classes. Mr. Donahue also has a four year old stallion by Onward that is a green trotter, a fine looker and a wonder for speed. Among a number of colts and fillies by Zolock and Zombro that Donahue is working is one by Zolock belonging to Ben Davies that is entered in the Occident and Stanford Stakes to be trotted this fall and that is expected to get part of the money.

When Robert McGregor was in the stud, George H. Ketcham got out a novelty to advertise him one season in the shape of a handsome chair bearing the stallion's name. About six hundred were sent out to prominent horsemen, and among others who received one was L. V. Harkness, proprietor of the Walnut Hall Farm at Lexington, Ky. Some correspondence followed, which resulted in Robert McGregor's being sent to Kentucky, where he was bred to twenty-two Walnut Hall Farm mares, got twenty foals, of which eighteen were fillies, and Mr. Ketcham received Mr. Harkness' check for \$6000, all for one chair!

Every trainer, driver and owner in the country is looking for a greater season on the trotting turf this year than ever before. More horses are being carefully jogged from Maine to California than ever before. From the character of the horses that went into winter quarters without being marked the past season, it looks like an absolute certainty that the slow classes will develop sensational performers by the dozen the coming season. Many of them were separately timed in races around the 2:10 mark, while others showed ability to go the mile at wonderful speed in their trials and were saved over for the slow classes next summer.

The career of a yearling bay colt, property of Mr. J. Malcolm Forbes, probably will be watched with greater interest than any other youngster in the country. The colt is by Bingen 2:06½ (son of May King and Young Miss by Young Jim), dam Princess of Monaco by imp. Meddler (son of imp. St. Gatien and Busybody by Petrarch, a strictly thoroughbred horse), her dam Nancy Hanks 2:04 by Happy Medium. Princess of Monaco is the filly that called out so much unfavorable comment from the no-close-infusion theorists when it was announced that her owner had decided to mate Nancy Hanks 2:04 with imp. Meddler, a thoroughbred race horse.

Cleveland's clever amateur reinsman, H. K. Devereux, made a record during the past season that has never been equalled. He participated in 68 wagon events, winning 34 races, securing 24 seconds, 7 thirds and being unplaced but 3 times. This is certainly a remarkable showing, and is made all the more creditable by the fact that he gave ten horses records of 2:13½ or better, also driving John A. McKerron to his record of 2:05½ at Memphis, and set a new world's record for half-mile heats to wagon by a trotter, winning with Invader 2:11½ in 1:04½ and 1:03½, at Memphis. He was separately timed in 2:11½ in a wagon race with Peko at Lexington.

Experimental feeding in the United States Army has resulted in establishing the following ration of forage for horses: Twelve pounds of oats and fourteen pounds of hay every day, with a salted bran mash twice a week. This may be the best way to feed an army horse, but a shipper who wants to put a high stepper in condition for the market usually feeds him all he will eat of a steam-cooked mixture made up of one part cracked corn, one part oats, two parts bran and one-half part whole flaxseed. An experienced feeder says this ration, with hay, will transform a thin horse into a fat, sleek, high lived one quicker than anything he ever saw.

On our cover page this week is a half tone engraving of that fast trotter of last year, El Milagro 2:11½ by McKinney. El Milagro was bred by Mr. Rudolph Jordan of this city and is out of the mare Adeline Patti (dam of Margaret Worth 2:15) by Effingham, grandam Kate by Gen. McClellan 143. Sam Gamble took El Milagro east as a yearling and sold him for Mr. Jordan at the Old Glory sale in New York for \$700. He trotted to a record of 2:14½ in 1901 and reduced this to 2:11½ on the 9th of October 1902 at Lexington in the fifth heat of a race which he won. He is now six years old, having been foaled April 27, 1897. Mr. Jordan owns a full sister to him that is three years old and is just as promising as El Milagro, but he does not intend having her raced until she is five.

A New York press dispatch says: "Arrangements are now being made to introduce next season a new style of trotting races for testing and developing the combined speed and stamina of the American carriage horse. Briefly stated, the plan is to have trotting races in heavy harness at the leading horse shows where the tracks are large enough, and to make such races a feature of some of the principal trotting meetings also. The men who are behind the movement purpose to introduce races for runabouts, gigs, phaetons, breaks, coaches and other vehicles, such as are commonly used for pleasure driving, with full weight up and with toe weights, overdraw checks and other artificial appliances barred. The horses will be required to go various distances from one mile up to 12 or 15 miles.

## No More "Infusions" Needed?

[WRITTEN FOR THE BREEDER AND SPORTSMAN.]

For more than a quarter of a century a tirade against admitting thoroughbred blood into trotting lines has been in progress. Had the autocratic advice of the "trotting instinct" school of teachers been followed Dr. Herr would have been obliged to discard Mambrino Patchen—"the full brother who could not trot"—because his dam was by a thoroughbred horse and his second dam by a horse probably thoroughbred and at least a son of a thoroughbred; for all of which, the most prominent of these teachers ridiculed the Doctor's efforts. Worse than all, the stubborn old Kentuckian adopted Mambrino King, a son of Mambrino Patchen, whose dam was all but thoroughbred, being by Edwin Forrest, a show horse with no special trotting proclivities, all of whose known blood was thoroughbred but who acquired a "standard number" by virtue of begetting two trotters from trotting mares. The second dam of Mambrino King was a stud-book thoroughbred mare. By all the teaching of the "instinct" school, against thoroughbred infusions, Mr. Hamlin should never have touched Mambrino King with a 10-foot pole, much less have used him as a premier stallion. If the instinct teachers had prevailed, Almonarch 2:24½, whose dam was a stud-book thoroughbred mare, would never have been bred, much less used in the stud by Mr. Hamlin. Without these horses Mr. Hamlin could not have bred The Abbott 2:03½, Lord Derby 2:05½, The Monk 2:05½, nor Fantasy 2:06 all of which have one or both of these horses in their composition.

Thus Village Farm has been enabled to breed all of its champion trotters of the last decade, in spite of the teaching against thoroughbred blood in the trotter and simply because a few such independent thinkers and experimenters as Doctor Herr, stubbornly went their own way despite the ridicule leveled against them by a lot of know-it-alls whose theories, had they been universally followed, would have put back the development of the trotting breed fifty years; for it is not at all probable that less than that additional time could have brought the breed up to its present perfection by using only purely trotting-bred elements kept apart from all refinement by thoroughbred infusions. It may be that no more infusions of thoroughbred blood are needed but those who assert that proposition now, like their dogmatical predecessors of the past twenty-five or thirty years, are careful not to probe the past to prove their argument.

The trouble with superficial students is this: when they see a stallion recorded with a standard number they consider him an all trotting bred, product. His number fixes his status as an adopted trotting element in future pedigrees. His transmission becomes "orthodox" trotting blood. The fact that he was bred by proceeding exactly contrary to the theory that thoroughbred blood is ruinous to the trotter, is overlooked. He gains his Standard number on the merits of his achievements either as a trotter or as the begetter of trotters and thereby becomes an adopted trotting element in the stud. No matter how heterodox the course that produced him, success once achieved he is orthodox to the back-bone. But his classification under the trotting Standard is merely a technical rating. That rating does not in the least change the inherited and innate quality of the horse, and when you use him in the stud he transmits to his offspring the physical character of his thoroughbred ancestry as well as that of his trotting ancestry. Thus, insidiously, the physical organism of the thoroughbred horse has become engrafted on the trotting breed. Take a string of trotters of to-day from any high class training stable and compare them with the average stable of thirty years ago, and what do you find? To look at them nobody would believe that they belonged to the same breed. Most of the old-time trotters obtained their trotting inclinations strongly from Canadian and Morgan sources and followed those types. They were a plain heavy boned coarse textured, plebeian lot. Occasionally you found one of Messenger and Bashaw extraction that was very blood-like but he was an exception to the general rule. Today almost every great trotter is a positively blood-bred type and it has come to him by modifications caused by the introduction of thoroughbred blood, at intervals to the strains that have come down, with their trotting instinct, from the earlier type.

And these infusions have been necessary and have shared in effecting the improvement of the breed. It is through them that the living lines from the old recognized trotting sources have been vitalized and preserved. Of course, those fountain heads which started off with a good share of thoroughbred blood, such as Messenger and his sons, Grand Bashaw, an Star, Edwin Forrest, May Day, William Belmont, and such essentially thoroughbred ones, did not need the same support from thorough-

bred infusion that the colder bred sorts did, because they already had the speed organism of the thoroughbred; but even these have lost nothing by such aid.

Therefore, the constituted Standard covers a multitude of sins of infusion which have imparted a goodly share of the physical quality of the thoroughbred to the present trotting breed. For this reason "orthodox trotting blood" is now a composite commodity, the creation of which was rank heterodoxy while in progress. Complacent theorizers now appropriate it without investigation, shut their eyes to its composition, and pronounce it paramount, at the same time inveighing against one of the most potent measures that raised it to its present perfection. But they were protesting against that very measure thirty years ago just as earnestly as they now are, and who knows that they are any nearer right to-day than they were then? What an awful hole would have been made in the 2:10 list as it now exists, if these superficial enunciators had succeeded in preventing the use of such animals as Mambrino Patchen, Mambrino King, Alma Mater, Whips, Almonarch, The Moor, Sophy, Stemwinder, Williamson's Belmont and his son, Miss Russell, Midnight, Dame Winnie, Kathleen, Beulah, etc., as they tried their best to do.

The falling off in experimentation with new thoroughbred infusions is perhaps not so much due to a distrust of the ultimate advantages that would accrue to that course as to the time it would take to realize them. Governor Stanford was fortunate enough to breed a world's champion stallion on the direct cross with a thoroughbred parent, and had a few other successes, of minor character, in that way; but his world's champion gelding and world's champion trotter, regardless of sex, came of one remove further along and that seems to be a safer reliance, as a culminating point. This requires a good while to wait and only those breeders who have the patience, and the capital to lock up for some years, can afford to follow their judgment by starting with thoroughbred mares. But perhaps the alleged abandonment of that course is not altogether an abandonment of the theory that lies back of it, and perhaps breeders are only taking a shorter cut. Governor Stanford bred with great care, and scattered broadcast over the country many mares and stallions with their modicum of thoroughbred blood and if the breeder of to-day can find this well prepared material ready at hand, why should he not avail himself of what his predecessor has well done and, by taking hold where the Governor left off, save the time and expense of going back to the first move. Before we are too cock-sure that none of these recent infusions are to make their mark, let us wait awhile and see. It takes some time for horse history to crystalize.

HARK COMSTOCK.

## Death of Prominent Eastern Horseman.

Frederick C. Sayles, proprietor of the Mariposa Farm, at Pawtucket, R. I., died suddenly of apoplexy at his home on Monday, January 12th, at the age of sixty-eight years. Mr. Sayles, who was a leading manufacturer of New England, and was first Mayor of Pawtucket, had been engaged in breeding trotters for about fifteen years, and his establishment, which comprised about 400 acres, equipped and appointed in a first class way, has during its existence been the home of some of the most noted horses in the country, among them Alix 2:03½, former trotting queen; Lady Mackay, dam of Oakland Baron 2:09½, etc. The stallions which have done service in the stud have been Campbell's Electioneer 2:17½, Symboleer (p) 2:09½, Sable Wilkes 2:18 and Handspring 2:18½ by Prodgal. Recently Mr. Sayles had purchased the aged Red Wilkes, who is still living on the farm. About twenty-five broodmares were used and altogether the total stock of animals will number about 135 head, which will now probably be sold.

## Los Angeles Driving Club.

An afternoon of matinee racing is to be given by the Los Angeles Driving Club at Agricultural Park in that city this afternoon. There are five races on the program, all heat races, best two in three.

The first race on the program is a free-for-all trot, best two heats in three, as are all the rest of the afternoon's events. The second race is a mixed handicap, the third a 2:20 class mixed, the fourth a free-for-all pace and the concluding number a 2:30 mixed. In the handicap event Sweet Marie gives two seconds to the others. William Garland, her owner, does not like to drive his mare to a cart as has been heretofore the means employed to get her to the level of the others.

Willard Stimson will do the starting. The judges will be Alfred Solano, W. A. Hendryx and J. A. Fairchild. The timers C. D. Hagerman, I. W. Ross and Dr. F. P. Cunningham.

Jackson's Napa Soda untangles the feet.

## Size of Broodmares.

[American Horse Breeder.]

While size is desirable in a horse intended for the market, it is a fact that many of the most noted producers of trotters have not exceeded the medium in size, and some have been below that. Men who breed horses for the track prefer mares of medium size, not exceeding 15.2 hands in height, to those that are sixteen hands and upwards. This is probably due to the fact that small and medium-sized mares generally show more quality, have more endurance, and possess a greater amount of gimp and nerve force than large ones.

As a rule, the greatest campaigners and best weight pullers as well as the most noted long-distance roadsters, have ranged in size from 14.2 to 15.2 hands in height. The practical English breeder of thoroughbred racing stock, William Day, author of "The Horse, How to Breed and Rear Him," in speaking of the selection of broodmares says:

For my own part I prefer small mares, low, long and compact, standing fifteen hands to 15.1 or 15.2. I do not mind if they are a little below that, provided they have substance; for I consider frame to be of more importance than height. A mare with plenty of strength, though short in the leg and not over fifteen hands, would be far preferable to a taller, leggy animal with a weak frame. . . . I know enough of small mares to affirm that they can and do breed good horses, generally larger than themselves, and the last more particularly when their ancestors were of good size.

Mr. Day was speaking of mares from which to breed or produce running race winners, but the same principle holds good in trotting stock. Homora, the dam of Fantasy, that holds the world's champion three year old trotting record, is only 15 hands high. Nettie King 2:20½, dam of The Abbot 2:03½, that holds the world's champion trotting record for geldings, was also a small mare, only 15 hands high. Carrie Russell by Magna Charta, was a small mare not much over 14 hands high, and was sold once for \$60. She produced the good game trotting campaigner Jack 2:12, winner of sixty-one heats in 2:30 or better, and after that she was sold for \$3000.

The great broodmare Minnehaha stood only 14.3 hands. She is the dam of eight in the list, all trotters, and one them, the renowned Beautiful Bells 2:29½, the dam of ten trotters with records of 2:30 or better. Beautiful Bells is 15.2 hands high. The noted trainer, Charles Marvin, who was for years at Palo Alto, then the most successful trotting breeding establishment in the world, in speaking of the size of broodmares, says in his work on "Training the Trotting Horse":

I like a broodmare of moderate size. The dam of Manzanita stood only 14.2, the dam of Bonita 14.3, Beautiful Bells and Dame Winnie 15.2, May Queen 15 hands. I prefer mares of rather blocky build, and they should have good heads, tempers and disposition.

Alma Mater, the greatest daughter of Mambrino Patchen as a progenitor of speed, stood only about 15 hands high, yet when well advanced in years a breeder of trotting stock in California paid \$15,000 for her.

The late B. D. Whitcomb, owner of Woodbrino 2:25½, paid \$2500 for Kitty Abbot 2:26½ for a broodmare. She was large, handsome and fast. At the same time he had a little mare only about 14.2 hands that he thought of little value. She was not only small, but so cranky that she could not be driven in harness. Both these mares were bred to Woodbrino 2:25½. The undersized, cranky mare produced Vega 2:10½ and Blackstone Brino 2:16½. Kitty Abbot 2:26½ produced Zerbrino 2:18½ and Malabar 2:21½. The cranky 14.2 hand mare was well bred. Her sire was Blackstone by Rysdyk's Hambletonian and her dam was by Godfrey Patchen, sire of Hopeful 2:14½.

If speed alone is the object sought, small mares are quite as likely to produce it as large ones. The small breeder in this country, however, should aim for size as well as speed, and if he uses small mares should select good-sized stallions to mate them with, and should feed the foals liberally, so as to produce animals that at maturity shall be of marketable size.

## A Winter Remedy.

Skin diseases and injuries, such as scratches, calks, skin cracks, etc., can be cured by Campbell's Horse Foot Remedy much better than by the use of salves. It's a liquid, and is easily applied in winter, and because it is a liquid it reaches all parts of the sores, and cleanses and heals them. A strong healthy foot can never be grown on a horse unless the coronet is healthy. Favored coronets are the rule, not the exception, during some portion of the year. If you use Campbell's Horse Foot Remedy you can prevent and cure this trouble.

## Prairie Dell Farm

Spohn Medical Co., TOPEKA, KAN., Nov. 29, 1901.  
Gentlemen: Please send me two more bottles of Spohn's Cure, for which I enclose \$1. I consider it the best remedy for all Distemper and throat trouble I have ever used.  
Yours respectfully, R. I. LEE.

A lot of McMurray carts just received. You need one right now to work your colts in this winter. Call at the Kenney Manufacturing Company, 531 Valencia street and take a look at these carts and other first-class vehicles they have for sale.

THE WORLD'S RECORDS.

TROTTING.

The world's champion—Cresceus, by Robert McGregor; Columbus, O., Aug. 1, 1901. 2:00 1/4  
Fastest mare—Alix, by Patronage; Galesburg, Ill., Sept. 27, 1899. 2:03 3/4  
Fastest stallion—Cresceus, by Robert McGregor; Columbus, O., Aug. 1, 1901. 2:02 1/4  
Fastest gelding—The Abbott, by Chimes; Terre Haute, Ind., Sept. 25, 1900. 2:03 1/4  
BEST RECORD FROM ONE-HALF TO ONE HUNDRED MILES.

Half-mile—Major Delmar, by Delmar; Memphis, Tenn., Oct. 23, 1902. 1:01  
One mile—Cresceus, by Robert McGregor; Columbus, O., Aug. 1, 1901. 2:02 1/4  
One and one-eighth mile—Major Delmar, by Delmar; Memphis, Tenn., Oct. 23, 1902. 2:12 3/4  
One and one-quarter mile—Lilly Young, by Young Fullerton; Memphis, Tenn., Oct. 30, 1902. 2:15  
Two miles—Cresceus, by Robert McGregor; Memphis, Tenn., Oct. 31, 1902. 4:17  
Three miles—Nightingale, by Mambrino King; Nashville, Tenn., Oct. 20, 1893. 6:55 1/2  
Four miles—Senator L., by Dexter Prince; San Jose, Cal., Nov. 2, 1901. 10:12  
Five miles—Zambra, by McKinney; Los Angeles, Cal., Nov. 1, 1902. 12:24  
Six miles—Long Time, by Jack Rowett; Denver, Colo., May 31, 1893. 16:08  
Ten miles—Pescari, by Pescarelli; New York, Nov. 2, 1893. 26:15  
Twenty miles—Captain McGowan, Boston, Mass., Oct. 2, 1895. 58:25  
Fifty miles—Ariel, Albany, N. Y., May 5, 1846. 3:55 1/2  
One hundred miles—Conqueror, by La Tourette's Bell-founder; Long Island, Nov. 12, 1853. 8:56 1/2

BEST RECORDS AT DIFFERENT AGES.

Yearling colt—Abdell, by Advertiser; San Jose, Cal., Sept. 28, 1894. 2:23 1/2  
Yearling filly—Pansy McGregor, by Fergus McGregor; Holton, Kan., Nov. 18, 1893. 2:23 3/4  
Two-year-old colt—Arion, by Electioneer; Stockton, Cal., Nov. 10, 1891. 2:10 3/4  
Two-year-old filly—Jennie, by Bow Bells; Lexington, Ky., Oct. 14, 1899. 2:14 3/4  
Three-year-old colt—Katherine A., by Wiggins; Lexington, Ky., Oct. 9, 1902. 2:14  
Three-year-old gelding—Endow, by Cecilian; Lexington, Ky., Oct. 14, 1899. 2:14 3/4  
Three-year-old colt—Arion, by Electioneer; Nashville, Tenn., Nov. 12, 1892. 2:10 3/4  
Three-year-old filly—Fantasy, by Chimes; Nashville, Tenn., Oct. 17, 1893. 2:08 3/4  
Three-year-old gelding—Peter Stirling, by Baronmore; Lexington, Ky., Oct. 8, 1901. 2:11 1/2  
Four-year-old colt—Directum, by Director; Nashville, Tenn., Oct. 18, 1893. 2:05 1/4  
Four-year-old filly—Fantasy, by Chimes; Terre Haute, Ind., Sept. 13, 1899. 2:06  
Four-year-old gelding—ohn Nolan, by Prodigal; Louisville, Ky., Sept. 28, 1898. 2:08  
Boralma, by Boreal; Lexington, Ky., Oct. 4, 1900. 2:08  
Five-year-old stallion—Ralph Wilkes, by Red Wilkes; Nashville, Tenn., Oct. 19, 1894. 2:06 3/4  
Bingen, by May King; Louisville, Ky., Sept. 26, 1898. 2:06 3/4  
Five-year-old mare—Fantasy, by Chimes; Des Moines, Ia., June 21, 1895. 2:06  
Five-year-old gelding—Major Delmar, by Delmar; Memphis, Tenn., Oct. 23, 1902. 2:05 1/2

Fastest two-mile heat—Prince Alert, by Crown Prince; Memphis, Tenn., Oct. 26, 1901. 2:00 1/4  
Fastest three consecutive heats—Star Pointer, by Brown Hal; Medford, Mass., Sept. 18, 1896. 2:03 1/4  
Fastest three consecutive heats by a mare—Edith W., by Ben Lomond, Jr.; Columbus, Ohio, Sept. 26, 1901. 2:05 1/4  
Fastest three consecutive heats by a gelding—Robert J., by Hartford; Indianapolis, Ind., Sept. 5, 1894. 2:04 1/4  
Fastest four-heat race—Robert J., by Hartford; Columbus, Ohio, Aug. 6, 1896. 2:02 1/4  
Fastest five-heat race—Frank Agan, by Mikagan; Providence, R. I., Sept. 11, 1896. 2:05 1/4  
Fastest six-heat race—Planet, by Bonnie McGregor; Columbus, Ohio, Aug. 7, 1897. 2:06  
Fastest seven-heat race—Planet, by Bonnie McGregor; Columbus, Ohio, Aug. 7, 1897. 2:06  
Fastest eight-heat race—Planet, by Bonnie McGregor; Columbus, Ohio, Aug. 7, 1897. 2:06  
Fastest nine-heat race—Dombey, Jr., by Dombey; Dover, N. H., July 28, 1899. 2:07  
Fastest ten-heat race—Kitty R., by Kirmis; Springfield, Ill., Sept. 26, 1898. 2:08  
Fastest eleven-heat race—The Maid, by Hal Index; Columbus, Ohio, Aug. 1 and 2, 1899. 2:08  
Fastest twelve-heat race—The Maid, by Hal Index; Columbus, Ohio, Aug. 1 and 2, 1899. 2:08  
Fastest thirteen-heat race—The Maid, by Hal Index; Columbus, Ohio, Aug. 1 and 2, 1899. 2:08  
Fastest fourteen-heat race—The Maid, by Hal Index; Columbus, Ohio, Aug. 1 and 2, 1899. 2:08  
Fastest fifteen-heat race—The Maid, by Hal Index; Columbus, Ohio, Aug. 1 and 2, 1899. 2:08  
Fastest sixteen-heat race—The Maid, by Hal Index; Columbus, Ohio, Aug. 1 and 2, 1899. 2:08  
Fastest seventeen-heat race—The Maid, by Hal Index; Columbus, Ohio, Aug. 1 and 2, 1899. 2:08  
Fastest eighteen-heat race—The Maid, by Hal Index; Columbus, Ohio, Aug. 1 and 2, 1899. 2:08  
Fastest nineteen-heat race—The Maid, by Hal Index; Columbus, Ohio, Aug. 1 and 2, 1899. 2:08  
Fastest twenty-heat race—The Maid, by Hal Index; Columbus, Ohio, Aug. 1 and 2, 1899. 2:08

PACING IN RACES ON HALF-MILE TRACK.

Fastest heat in a race—John R. Gentry, by Ashland Wilkes; Lima, Ohio, July 4, 1900. 2:04 3/4  
Fastest heat in a race—John R. Gentry, by Ashland Wilkes; Lima, Ohio, July 4, 1900. 2:04 3/4  
Fastest two-heat race—John R. Gentry, by Ashland Wilkes; Lima, Ohio, July 4, 1900. 2:04 3/4  
Fastest three consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest four consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest five consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest six consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest seven consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest eight consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest nine consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest ten consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest eleven consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest twelve consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest thirteen consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest fourteen consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest fifteen consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest sixteen consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest seventeen consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest eighteen consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest nineteen consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4  
Fastest twenty consecutive heats in a race—Prince Alert, by Crown Prince; Brockton, Mass., Oct. 5, 1899. 2:04 3/4

The Colorado Circuit.

Horsemen who take in the Colorado circuit this June will find awaiting them the largest purses that have ever been offered in the Rocky Mountain region. There will be stake races of \$1000 each and all the other purses will be \$500. Those interested in the circuit held a meeting in Denver on January 12th and another at Colorado Springs Thursday, January 15th, and much of the preliminary arrangements are now completed. Leadville and Rocky Ford have been admitted to the circuit and the dates fixed for those two places are as follows: Leadville, July 22, 23 and 24; Rocky Ford, September 2, 3 and 4. The dates for the June meetings were announced some days ago but since that time changes have been made and the corrected dates are as follows:

Trinidad..... June 2, 3, 4 and 5.  
Pueblo..... June 8, 9, 10 and 11.  
Colorado Springs... June 14, 15, 16, 17 and 18.  
Denver..... June 30 to July 4, inclusive.

No doubt harness horsemen will appreciate the arrangement of classes, for they will find the following events on the programs of all the June meets: 2:14 trot, 2:20 trot, 2:25 trot, 2:40 trot, free-for-all pace, 2:15 pace, 2:19 pace and 2:35 pace. Arrangements for a special train will be made so that the horses can be shipped through the entire June circuit with little or no inconvenience.

J. W. Coffey resigned from the position of secretary at the Colorado Springs meeting and Sam Bush was elected in his place. The officers of the circuit are now as follows: G. A. Wahlgreen, Denver, President; John H. Voorhees, Pueblo, Vice-President; Sam Bush, Colorado Springs, Secretary, and John Humphreys, Trinidad, Treasurer. With the exception of Judge Voorhees, the officers are the secretaries of the tracks in the cities in which they reside. Charles A. Gallo-way is secretary of the Pueblo association. The secretaries will hold another meeting in Denver on Monday, February 3d, and immediately thereafter the regular programs will be issued.

The Colorado Springs track is under new management, for it has been leased by Thomas F. Burns, a well known mining man who has backed the Colorado Springs baseball team. Much work has been put on all the tracks in the circuit and the owners and drivers will find all along the line many improvements since a year ago.

Sober up on Jackson's Naps Soda.

# THE WEEKLY BREEDER AND SPORTSMAN

F. W. KELLEY, PROPRIETOR.

Turf and Sporting Authority of the Pacific Coast.

—OFFICE—

36 GEARY STREET, SAN FRANCISCO.

P. O. BOX 2300.

TELEPHONE: Black 586.

Terms—One Year \$3, Six Months \$1.75, Three Months \$1  
STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, Cal.  
Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, January 24, 1903.

**THE TROUBLE AT LOS ANGELES** has finally culminated in the closing of the track to everybody (running and harness horsemen alike) and there is much feeling over the matter. The City Council, at its meeting last Monday, refused to rescind the ordinance prohibiting bookmaking and pool selling on horse races which had been passed the previous week and signed by the Mayor. It seems that there is a very strong sentiment among the people of Los Angeles against bookmaking and gambling in general, which the race meeting last fall only served to further arouse. The population of Los Angeles is largely made up of Eastern people who entertain what might be termed "puritanical" views on such things, and according to some of the leading papers of that city the ordinance meets the entire approval of a majority of the citizens. Mr. Brooks, who had advertised a thirty days' race meeting to begin on the 30th instant, now finds that his lease of the track is of little value, and all the money and time expended in arranging for the meet are thrown away. According to Los Angeles advices Mr. Brooks' lease is for one year at \$6000 per year, and his attorney has advised him that he cannot recover damages, provided racing of any kind is held on the track. According to the *Express* of that city, Mr. Brooks addressed a letter to President Shankland of the Driving Club, informing him that if that club would assume the obligations of the lease it could use the track for its matinees, otherwise the gates would be barred to the Driving Club and all other organizations that hold racing of any kind. Having issued this ultimatum Mr. Brooks had the gates locked and nailed up so that the track could not be used by anybody. This, of course, made all the harness-horse men who were training there very angry, and a war is on that will not be easily stopped. The Driving Club is composed of gentlemen who race their horses at matinees for pure sport. There is no admission fee charged at the gate, no purses are hung up, no entrance money asked, no betting permitted and no public bar even allowed. There are several hundred members of the club, and among them are the wealthiest and most representative business and professional men of the southern metropolis. If they cannot race their horses at Agricultural Park, they will very likely purchase a piece of ground and build a track of their own, and we understand that there is sufficient money ready to be subscribed for just such an enterprise. Besides the members of the Driving Club there are a large number of owners and trainers of harness horses who have always enjoyed the use of the Los Angeles track to train and drive their horses on, and they are now lining up with those who indorse the new ordinance, as they feel that the advent of the runners at the Los Angeles track will eventually result in barring them from the use of it altogether. There are close to two hundred harness horses now at the park, and their trainers are jogging them on the roads and wondering how the trouble will end.

Since the above was in type, the Los Angeles Driving Club brought injunction proceedings against Mr. Brooks, asking the court to restrain him from closing the track to them. The court granted the injunction and the club will hold its matinee at the track this afternoon. As Col. D. M. Burns went to remark during a particularly hot political fight, "the situation is truly delightful."

**THE GREAT SALE OF TWO YEAR OLDS** from Palo Alto Stock Farm will be held by Fred H. Chase & Co., at the popular old salesyard, 1732 Market st., next Thursday evening, beginning at 7:30 p. m. There has not been a sale in California for so long that was more talked about among horse breed-

ers and there is certain to be a large attendance. The catalogues which have been issued are very handsomely gotten up and a perusal of their pages show that no choicer lot was ever consigned to a sale by this great farm. From No. 1, a bay colt by that sire of speed, Mendocino 2:19½, out of Avena 2:19½ by the great Palo Alto 2:08½, to No. 49, a bay filly by Azmoor 2:20½ out of Nina, the dam of Ariel 2:27½ by Piedmont, there is not one in the entire catalogue but is well bred. There is Menselor, a chestnut colt by Mendocino (sire of Monte Carlo 2:09½ and Idolita 2:09½ and others), first dam Anselma 2:29½ (dam of Anselor 2:21½ and Anselita 2:29½) by Ansel 2:20; second dam the great Elaine 2:20 (dam of Iran Alto 2:12½, Palatine (3) 2:18, Anselma 2:29½, Norlaine (1) 2:31½ and Altoaine 2:29½) by Messenger Duroc; third dam famous Green Mountain Maid, dam of Electioneer and nine standard performers; then there is Moormont, a bay colt by Azmoor (sire of Betonica 2:10½) out of Rosemont, that is the dam of three and by Piedmont out of Beautiful Bells, greatest of all broodmares; another is Monbello by Monbells 2:23½ (son of Mendocino and Beautiful Bells) out of Laura C. (dam of Laurel 2:13½, Lauretta 2:14 and Langton 2:21½) by Electioneer. The eight two year old colts are large, handsome, well developed colts, broken single and double, but never trained for speed. The fillies are 25 in number. To a student of pedigree the breeding of these fillies is a pleasure to look over. They are, in most instances, out of dams that are from producing mares or have themselves produced, and in several cases the first three dams are all in the great broodmare list. There is one by Mendocino out of famous old Sally Benton, dam of four, one of which is a 2:10 performer; there is another by Monbells out of Expressive 2:12½, the greatest three year old race winning filly; another is by Mendocino out of a mare by Palo Alto 2:08½ and the dam of the great Arion is her granddam. There are many more as well bred as these mentioned and they will all be sold at the prices bid for them by the public. It is the grandest opportunity Californians have ever had. The entire consignment will be at the yards on Tuesday next and there is no doubt but they will hold a well attended reception until the night of the sale. Remember that these two year olds will be sold in a fire proof building by electric light on Thursday evening next.

**COLT STAKES** should be arranged for forthwith by the district associations in California that propose giving meetings this year. They should be confined to colts owned or foaled in the district and need not be expensive for those making entries. There is hardly an association but can afford to add \$200 to a stake for trotting or pacing foals, and by making the entire entrance fee \$20 a very respectable stake can be made up even with a few entries. Nothing will increase the interest in breeding any more than these district stakes, and the contests for the money will be among the most popular on the program. To make colt stakes attractive they must be announced early however and we respectfully suggest to Secretaries that they get to work immediately and arrange one or two for their meeting this year. Stakes can be made for two or three year olds or both with but little trouble or expense, and as the number of colts of these ages that will be trained for the Breeders Futurity, Occident and Stanford stakes this year is quite large the chances are for large entries even in the proposed district stakes. What association will be first to announce a stake for colts bred in the district?

**THE ATTENTION** of breeders and others is called to a very interesting article on another page of this issue of the BREEDER AND SPORTSMAN from the pen of that thinker and writer on harness horse matters, "Hark Comstock." Our correspondent takes strong ground in favor of the thoroughbred infusions in the production of the champion trotters, and advises breeders of to-day to begin where the late Senator Stanford left off. This advice is especially apropos at this time when a sale of two year old colts and fillies from Palo Alto Farm is about to take place, a sale however, which Hark Comstock, at the time the letter was written, doubtless knew nothing of.

**GOOD HAY COSTS MONEY** at the present time, a rise of a dollar per ton having occurred during the present week. Even with a favorable spring there is doubt felt among the large dealers as to their stock of hay lasting until the new crop is ready. Quotations are as follows in this city: Choice wheat hay, \$14 to \$15; good wheat hay, \$12.50 to \$13.50; other grades same, \$10 to \$12; wheat and oat, \$10 to \$12.50; barley and oat, \$9 to \$11; alfalfa, \$9 to \$11; straw, per bale, 45 to 60 cents.

Like all good things, Jackson's Napa Soda has a dozen counterfeits.

**DISTRICT AGRICULTURAL ASSOCIATIONS** can hardly be expected to make early announcements of their fairs and race meetings this year. The Legislature is in session and until it adjourns there will be doubt as to just how the districts will be treated as far as appropriations are concerned, as the General Appropriation Bill is usually the last one passed by that body. As the appropriation made by the last Legislature has been used, no more money will be available until a new appropriation is made and signed by the Governor. District associations should select their dates, however, and make the preliminary announcements of speed programs, etc. This will not cost anything, but will be of great assistance to trainers and exhibitors who intend making entries at the fairs if held. There is little doubt but the Legislature will make the usual appropriation and that the Governor will approve the same.

**THE HOLIDAY EDITIONS** of the Eastern journals devoted to horse matters are particularly interesting this year. The *Horse Review* issued a superb number, filled with statistical matter of great value; The *Horseman's* number was also a splendid specimen of the typographical and engraving arts, and the article on The Origin of Speed in Horses, by Casper Reidfeld, has aroused discussion all over the country. The *American Horse Breeder* issued a magnificent number that is filled with well written articles and splendid engravings, and *Sports of the Times*, *The Horse World* and *Spirit of the West* have also issued most creditable holiday editions.

**MARION BIGGS, Jr.**, a well-known orchardist and business man of Butte county, died at Sacramento last Monday from the effects of an operation for appendicitis. He was a native of Missouri, aged 51 years. Mr. Biggs was well-known to the horseman of this State, and was a patron of the sport of harness racing. During recent years his attention and time has been occupied with fruit and grain farming, in which he accumulated a fortune. His death will be sincerely regretted by a very large circle of friends.

## Another Great Sale.

We learn from Mr. William G. Layng the popular auctioneer that he will sell at the Occidental Horse Exchange in this city during the early part of February, a consignment of about fifty head from the justly celebrated Oakwood Park Stock Farm at Danville, Contra Costa county, the home of Steinway and Charles Derby and where were bred Klatawah 2:05½, three year old champion pacer, W. Wood 2:07, Much Better 2:07½, Agitato 2:09, Diablo 2:09½, Derby Princess 2:08½, Owyhee 2:11½, Don Derby 2:06, and many other great horses. The horses to be sold are by Steinway, Chas. Derby, Owyhee and other high class sires and race horses and out of mares that have produced standard speed. The Oakwood Park Farm has been a veritable cradle of speed and has turned out some of the fastest and gamest horses that ever trotted or paced on the Grand Circuit. There will be no more horses trained for the races on this great farm, but annual sales will be held of colts, fillies and aged horses that are thoroughly broken and ready to train or drive on the road. There should be a big demand for the fillies and colts from Oakwood Park for breeding purposes, as they are bred in the choicest speed lines and no farm in America can turn out handsomer individuals or better formed horses.

## Blooded Horses Sell Cheap.

Thoroughbreds were sold or rather given away last Monday evening at the Occidental Horse Exchange. They were from the Nevada breeding farm of Paul G. Lane, son of the well known mining man, who decided to retire and shipped all of his blooded stock to this city. They brought a total of only \$1300, less than one of the horses cost him. Cimiter, a daughter of the sensational broodmare Sabrina, was secured by Charles Kerr for \$45. Grinstead gave to the turf such sensational performers as Volante, Santa Ana, Santiago and Silver Cloud, yet Salonica, a Grinstead mare, went to the bid of Barney Schreiber for \$90. The auctioneer could only obtain \$50 for a mare by Impington, the sire of Kinley Mat, the only horse to win both the Brooklyn and Suburban Handicaps. A number of others brought \$15, \$20 and \$30. One reason for the small prices was the bad condition of the animals. They looked to be half starved.

Allie Nun, the great show mare that has swept everything before her in the East in the show ring for the past two seasons, was unplaced at the late exhibition in Kansas City, in competition for the Wolf prize of \$1000. Viometa 2:20½ by Superior 2:17½ won the prize. Another competitor was Theresa B. 2:16½ by Allie Wilkes 2:15, sire of Allie Nun.

## THOROUGHBRED DEPARTMENT.

The annual meeting of the stockholders of the California Jockey Club took place this week. Thomas H. Williams and Adam Andrew were re-elected President and Vice-President. The three directors elected were Colonel Dan Burns, Henry J. Crocker and J. B. Smith.

Bullman rode a remarkably listless finish on Barklayete in his last race. It looked as if he could not have lost had he gone to the bat an instant earlier. It is certainly very aggravating to a horse's backers to lose by a head after making up fully three lengths in the run through the stretch.

Corrigan was injured on Wednesday morning while being breezed through the stretch. A filly which was working with him became frightened at a passing train and, colliding with the brown colt, was killed. Corrigan was badly shaken and probably will not be raced again for a week or two. L. Woods, who was riding the filly, is suffering from a broken collar bone, the result of the accident.

The Adam Andrew Selling Stake, six and one-half furlongs, was won by Princess Titania, who ran a remarkably good race, stepping the distance in 1:19½ with 105 lbs. in the saddle; Glendenning cut out a fast pace at the start and finished second; Arabo secured the short end of the purse half a length away.

The mile and one-sixteenth handicap on Saturday last was a most peculiarly run race; everything seems to go as if it were greased for Dr. Bernays, who won very handily from a field which appeared to outclass him. The Doctor was heavily backed by his stable connections, who were reported to have made a handsome clean-up over his victory.

J. G. Follansbee's colors were seen at Oakland last Saturday for the first time in several years. Double Six from the Follansbee stable winning a nice race at six furlongs from a very good field of horses.

The Board of Stewards has reinstated Lee Jackson, who was suspended for suspicious looking rides on Howaho. Jockey Mounce has also been readmitted to the privileges of the turf.

Skeets Martin and Johnny Reiff were both at the Oakland track during the week. Neither will ride on local tracks this winter. Martin expects to return to France within thirty days. Reiff has grown considerable since he was last here but can still do 100 pounds.

Cunard showed some of his old time form in his last race, when he galloped a mile in 1:40 flat. He will be a hard one to beat from now on.

Kennilworth is still in the game. He picked up 127 lbs. on Tuesday and ran six furlongs in 1:13, winning easily from Money Muss, Sylvia Talbot and Flush of Gold.

The Fretter ran a nice race on Wednesday, showing great improvement over his previous efforts. Burns was in the saddle on this occasion and took no chances of allowing Ishtar to steal away the first part of the race, but ran her down before six furlongs were covered, afterwards having things all his own way.

### Death of Bend Or.

Bend Or, one of the greatest sires of modern times, died on the 10th of this month at the breeding farm of the late Duke of Westminster, who bred him. He was foaled in 1877. His race course debut occurred at Newmarket in July, 1879, when he defeated ten opponents for the Chesterfield Stakes, and, remaining unbeaten throughout the season, retired into winter quarters with the credit of successive victories in the Richmond Stakes and Prince of Wales Stakes, run on successive days at Goodwood, and a Triennial and the Rous Memorial, both at the Newmarket First October Meeting.

Bend Or's three year old career is mainly notable for his series of contests with Robert the Devil, and universal turfdom was for months divided into two great camps with regard to the respective merits of the two adversaries. In 1880 Bend Or started a hot favorite for the Derby, being at 2 to 1 in a field of nineteen, and won by a head from Robert the Devil, after one of the most tremendous struggles on record. Bend Or next ran at Ascot, winning the Prince of Wales Stakes but, although saved for the Doncaster St. Leger, he could finish only sixth to Robert the Devil. The pair next met in the Great Foal Stakes at

Newmarket, Robert the Devil now winning by only a head, and in their final setto of the season—the Champagne Stakes—Robert the Devil was again the victor, with such good horses as Charibert and Reveller practically beaten off.

As a four year old, Bend Or began the season by carrying 126 pounds to victory in the time honored City and Suburban Handicap, for which the American bred Foxhall (then a three year old) was second with 91 pounds. The entire turf world now awaited almost breathlessly the meeting of Bend Or and Robert the Devil in the Epsom Gold Cup, run over the Derby course just a year after the "Blue Riband" struggle. On the strength of their aggregate form of the preceding year Robert the Devil was made an odds-on favorite, but in another tremendous contest, Bend Or "turned the tables" by a neck. After defeating Iroquois and six others for the Champion Stakes at Newmarket in the fall, Bend Or failed to win the Cambridgeshire under 134 pounds, and was then retired to the stud.

Volumes might easily be written concerning Bend Or's splendid stud achievements. Had he never sired another great winner, the incomparable Ormonde, "the horse of the century," would himself richly earned equine immortality for the Eaton Stud's premier stallion. As a matter of fact, however, Bend Or's record receives but scant justice, even at the enumeration of such celebrated sons as Kendal, Orbit, Ossory, Orvieto, Orion, Martagon, Ormuz and Bonavista, to say nothing of a veritable host of other winners whose achievements richly merit mention in connection with the above group.

An America sons of Bend Or have done well at the stud, notably, Ben Strome and Golden Garter.

That Bend Or can lay just claim to a prominent position in the front rank of "broodmare sires" is warranted by the fact that his daughters have led all competitors in England in 1901 and 1902. In America one of his daughters furnished the Futurity winner, Ogden, and others have given the good performers Octagon, Bendoran, Isidor, etc.

Indeed, the world over, the blood of Bend Or has come to be ranked with Stockwell, Galopin and Hampton as doing equally well, whether through sons or daughters. This, to say the least, is thorough evidence of Bend Or's unequivocal standing in universal turfdom, and will amply account for the regret which will be everywhere felt at his decease.

### New Arrivals at Los Angeles.

ED. BREEDER AND SPORTSMAN—Mr. Harrison G. Arms of Chicago has contributed to the light harness horse ranks of California one of the best bred and best looking stallions ever seen in Los Angeles. This stallion is Limonero 33389, a blood bay with black points, no white marks. This horse is full 16 hands high, weighs over 1200 pounds and is one of the grandest looking individuals in America. His breeding is of the best and stoutest, he being a son of Piedmont, one of the best sons of the great Almont 33 and the grand broodmare Mag Ferguson by Mambrino Chief. On his maternal side Limonero's first dam is Lulaneer by Electioneer 125, second dam Lula, record 2:15, winner of 56 heats in below 2:30. Lula was sired by Norman 25 (sire of May Queen 2:20), the sire of four sires of 40 trotters and 3 pacers, and the sire of 12 dams of 17 trotters. Third dam Kate Crockett, dam of Sintella 2:21 and Star Hambletonian 2:23½. Following these exquisite producing blood lines comes such sires as the Morse horse 6, imp. Hooten and other producing thoroughbred lines. As a race horse Limonero is in the front rank, having won the Kentucky Futurity of 1894 in the good time of 2:15½, against a field of the best three year olds in America, and that was in his three year old form, which goes to show that he has the early extreme speed so much admired at the present time. He is perfectly sound and ready to race again, which he will no doubt do this fall over the California tracks.

As a sire of size, color and elegant conformation, no horse on earth can out-show him. Mr. Arms sent seven of Limonero's colts out to Los Angeles and as they are the oldest colts sired by this great horse it is Mr. Arm's intention to have them all trained and raced the coming season. The first colt led out for inspection was Kingman, a chestnut three year old stallion, dam by Pilot Medium. This young horse is a credit to any breeder of harness horses. He has size, good looks, speed and good manners. He is a beautiful gaited trotter. Next came a beautiful three year old bay mare, dam by Allerton. This mare has size, beauty and style; she is a pacer and a fast one. Next came a big brown four year old gelding that has size, speed, good manners and good looks; also a three year old bay mare that is simply perfection. A brown gelding four years old, about 16 hands high, with the best legs and feet possible; this horse acts like a genuine race horse. These colts certainly stamp Limonero

as a sire of uniform size, action, solid colors and soundness. Each colt has unmistakable evidence of speed. It is Mr. Arms' intention to place this grand young horse before the public at the Los Angeles track, and as he is a product of this State, having been bred and raised at the Palo Alto ranch, it is but fitting that he should be brought back to the State of California and especially at this time when so many good sires are being shipped away from the State. This grand young horse should be appreciated by the breeders of California and he should nick very profitably with mares by Zombro, McKinney, Neernut and other sires of California. Mr. Arms is coming here to live; he sent along a pair of high acting cobs and these steppers can certainly hold their own with the many high actors owned in California. Mr. Arms is certainly to be congratulated on the ownership of such a superb lot of horses, and he is also to be congratulated on the good form in which these horses arrived in Los Angeles, as each and every one is perfectly sound and without cough or blemish upon arrival at the race track.

Mr. Wm. Follett who brought these horses across the continent certainly comes in for the lions share of the praise as he certainly is a first class care-taker, and the condition of these horses, coming across the continent in the winter months speaks high praise for the Arms Palace horse car in which these horses were shipped from their home at Marshall, Michigan.

Mr. J. H. Williams will train these horses for Mr. Arms and Mr. Williams is very highly elated over them, says it has never been his pleasure in all of his forty years as a public trainer to receive such a uniform consignment of standard bred horses. Mr. Williams has Capt. Newton's stallion, Deracho by Direct, first dam by McKinney, second dam by Echo, in his stable. Deracho is a young horse and a good one; he is the sire of a three year old colt that in 60 days handling trotted a full mile in 2:29 for Mr. Williams. Mr. Williams is the owner of the beautiful black filly Zanut by Neernut, that is entered in the Hartford Futurity, and unless some accident befalls her she will render a good accounting as she is a high class filly and her owner, Mr. Williams is a first class, careful, successful trainer. It is to be hoped that breeders in this state will avail themselves of the services of Limonero as he is certainly a valuable addition to the light harness horse owners of California.

Yours truly,  
C. A. HARRISON.

### Forty Four years Old.

Eaton, Ohio, has a freak when it comes to the horse line. Jackson Christman, who lives east of the village, has a pony that is known as a positive fact to be forty-four years old. He was brought to Scuffletown, in this county, by some wandering traders in 1861, then being three years old. He was bought by a preacher who kept him until he came into the hands of his present owner. He was under the saddle for five days during the chase after Gen. John Morgan when he made his invasion into Southern Ohio. Since that time he has always been kept in the vicinity of Eaton. It is a treat to see the old fellow, as he is as fat as a mole, and very spry considering his extreme age.—Ky, Stock Farm.

California favorite hot weather drink—Jackson's Napa Soda.

## Horse Owners Should Use GOMBAULT'S Caustic Balsam

The Great French Veterinary Remedy.  
A SAFE, SPEEDY AND  
POSITIVE CURE.

**SUPERSEDES ALL CAUTION OF FIRING**  
Impossible to produce any scar or blemish. The safest best Blister ever used. Takes the place of all liniments for mild or severe action. Removes all Bunches or Blemishes from Horses or Cattle.  
As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, Etc., is invaluable.  
We GUARANTEE that one tablespoonful of CAUSTIC BALSAM will produce more actual results than a whole bottle of any liniment or spavin cure in nature ever made.  
Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. If ordered by mail, add 10% for postage.  
Directions for its use. Send for descriptive circular and testimonials, etc. A Horse.  
THE LAWRENCE-ALLIANCE Co., Cincinnati, O.

## ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

### Pacific Coast Field Trials Club's Trials.

By Albert Betz.

The twentieth annual trials of the Pacific Coast Field Trials Club were held at Bakersfield, Kern County, Cal., beginning with the Derby on Monday, January 12th, and ending with the Members' Stake, January 16th. Three stakes were run: The Derby, having fifteen starters; All-Age, fourteen; and Members' Stake six.

The Derby purse was \$450, of which 50% went to first, 30% to second and 20% to third. The All-Age purse amounted to \$300, divided in like manner. The prizes in Members' Stake consisted of trophies presented by the club or by members thereof.

Handsomely designed prize cups were offered as follows: By Mr. J. E. Terry, for the winner of the Derby; by *Western Field*, for winner of the All-Age, and by W. W. Van Arsdale, for winner of the Members' Stake. Winners of second and third in the latter stake will receive cups from the club. The Derby cup offered by Mr. Terry was won by his English Setter dog Kilgarif, and was by Mr. Terry re-donated to the club to be presented to the winner of next year's Derby.

Mr. H. S. Humphrey, of Indianapolis, Ind. Secretary of the Independent Field Trials Club, officiated as judge, and his decisions were generally approved. His efforts to give all competing dogs equal opportunities were highly appreciated by club members and owners of contesting dogs.

Kilgarif, winner of the Derby, a handsome black, white and tan English Setter, was far superior to any of the other Derby entries. Nellie Bang and Margarette, winners of second and third, are bitches of merit and are likely to be hereafter heard from.

Peach Blossom and Dr. Daniels, winners of first and second in All-Age, are too well known to require extended mention. This is equally true of Cuba Jr., winner of third, who has to his credit wins in our trials as well as in those of the Eastern circuit.

Lady, winner of first in Members Stake, is also well known to field trial patrons, and her Derby win and second in All-Age of two years ago are well remembered. Northern Huntress, third in that stake, has several times been a winner in the Pacific Northwest Trials, and divided third with Peach Blossom in the All-Age Stake of the Pacific Coast Trials last year. Countess Mark, second in Members Stake, a grand going dog, has several times appeared in our trials.

In the opinion of Judge Humphrey the dogs competing in the Pacific Coast Trials compare favorably with any shown in Eastern trials.

Weather conditions were not always such as to bring out the best work of the dogs. Birds, though in abundance, at times refused to lie, taking to trees, from which refuge it was next to impossible to dislodge them. At other times, while lying close, they appeared to emit no scent, for dogs known to possess finding instinct and noses of exceptional quality, would run over birds without showing evidence of game.

The trials were largely attended, not only by club members, but by residents of Bakersfield and vicinity and visiting sportsmen from Washington and Nevada. The hotels of Bakersfield vied with each other to provide for the comfort of club members, their friends and visiting sportsmen.

The annual meeting of the club was held in the parlors of the Southern Hotel, on the evening of January 14th, many members being present. The following officers were elected for the ensuing year: W. W. Van Arsdale, of San Francisco, President; Clinton E. Worden, of San Francisco, First Vice-President; H. W. Keller, of Santa Monica, Second Vice-President; Albert Betz, of San Francisco, Secretary-Treasurer. Executive Committee—C. N. Post, Sacramento; W. S. Lewis, Bakersfield; John H. Schumacher, Los Angeles; T. J. A. Tiedemann, San Francisco, and John W. Considine, Seattle, Wash.

It was decided to hold the next trials the second Monday in January, 1904, the place to be selected by the Executive Committee.

The following named gentlemen were proposed for and elected to membership: J. I. Woolley, Bakersfield; Thomas O'Brien, Bakersfield; Al Lindley, Bakersfield; J. A. Watkins, Seattle; F. R. Atkins, Seattle; John W. Considine, Seattle; C. W. Coggins, Igerna, Cal.; F. A. Dickson, Santa Clara; J. B. Coleman, San Francisco; W. W. Richards, San Francisco.

Judge Humphrey was elected an honorary member.

The following sportsmen were noted amongst those in attendance at the trials: W. W. Van Arsdale, W. A. Cutler, J. M. Kilgarif, Andrew Jackson, J. B. Coleman and wife, Frank Hayes, Clinton E. Worden, F. P. Butler, W. W. Richards, P. D. Linville, J. H. Hughes, M. J. Geary, T. J. A. Tiedemann, J. S. Dunham and others from San Francisco; J. E. Terry, Judge C. N. Post and friends from Sacramento; H. L. Bettin, Alameda; Albert Betz, Berkeley; George H. Johnson and F. A. Dickson, of Santa Clara; C. W. Lewis and H. S. Peach, of Igerna; J. H. Schumacher, Los Angeles; R. M. Dodge, Al Landley, W. J. Ben-

netts, J. I. Woolley, Thomas O'Brien, Dr. Taggart, John Elder, W. Brooks Jones, the Misses Ash and Pyle and many others of Bakersfield; Hervey Lindley, Klamathon; H. S. Humphrey, Indianapolis, Ind.; J. E. Lucas, San Rafael; W. B. Coutts, Fred Coutts, James Coutts and Charles Coutts, of Kenwood; Dr. C. E. Wilson, of Elko, Nev.; Frank Mayer, Dr. C. W. Hibbard, H. T. Payne and F. R. Atkins, J. A. Watkins and J. W. Considine, of Seattle, Wash.

### THE DERBY.

Fifteen Derby entries paid the starting fee, and the drawing, which was held in the parlors of the Southern Hotel on Sunday evening, January 12th, resulted as follows:

J. E. Terry's English Setter bitch Lou with P. P. Butler's English Setter dog Judge Hunter.

J. W. Flynn's Pointer bitch Nellie Bang with R. D. Linville's English Setter dog Plumas.

J. W. Flynn's Pointer dog Bang Up with Dr. C. E. Wilson's English Setter dog Clipper's Lad.

Stockdale Kennels' Pointer bitch Margarette with W. W. Van Arsdale's English Setter dog Detroit Joe.

W. B. Coutts' Pointer dog Fleetwell with C. W. Coggins' English Setter bitch Mountain Quail.

Clinton E. Worden's English Setter dog Jay M. with same owner's English Setter dog Harry H.

W. W. Van Arsdale's English Setter bitch Countess Mark with J. E. Terry's English Setter dog Kilgarif.

Stockdale Kennels' Pointer bitch Midget, a bye.

MONDAY, JANUARY 12.—Weather foggy and cold, clearing partially in afternoon.

Lou-Judge Hunter.—Cast off at 10:10 in a large, open field where birds were said to be. Lou handled by Coutts, Judge Hunter by Babcock. No birds were found, and the dogs had an opportunity to display only their range, speed and style. In these respects Judge Hunter excelled. Up at 10:50.

Nellie Bang-Plumas.—Down at 11 A. M. Nellie handled by Coutts, Plumas by Hughes. Plumas was scarcely up to a race, having been in handler's hands for but five weeks. After the dogs had been down for some time without finding birds, Mr. Fraser, upon whose grounds the heat was run, gave information that the birds were hiding in a near-by brush pile, from which shelter they were driven by the horsemen and scattered into an alfalfa field and weed patch. Both dogs being worked on the scattered birds flushed several, Nellie finally coming to point and being steady to shot. She made two more points in the weed patch and in each instance was staunch. Plumas failed to locate and appeared to be off his nose, though ranging well. He made one point, but no bird was found. Nellie had the better of the heat. Up at 11:30.

Bang Up-Clipper's Lad.—Down at 11:35. The former handled by Coutts, the latter by his owner, Dr. C. E. Wilson. Both showed fairly good speed and range, Clipper's Lad improving as the heat progressed. Few birds were seen and little work of consequence was done while the brace was down. Clipper's Lad appeared to be out of condition. Up at 12:08. Luncheon was then partaken of. After lunch the first brace down, in new country, was:

Margarette-Detroit Joe.—Cast off in open field at 1:25 P. M. Margarette handled by Dodge, Joe by Babcock. Joe soon raised a rabbit and chased for a long distance, his handler going after him on horseback. This performance was repeated later. Margarette, in the meantime, had worked faithfully but located no birds. On the return of Joe he was the first to find and pointed a small bevy in a weed patch, being steady to shot. Margarette pointed two singles, steady to shot and wing. Joe had more style and speed, but was not under control. Up at 2:05.

Fleetwell-Mountain Quail.—Down to 2:20 in the same field where former brace finished. Fleetwell was in charge of Master Charles Coutts. Quail in care of Peach. Neither dog showed much ranging ability and no birds were found until after crossing a fence and working a dry ditch near the railroad. Each dog made several points along the edge of this ditch but neither was very steady. Both missed opportunities. Up at 3 P. M.

Jay M.-Harry H.—Down at 3:05, on ground not before worked. Jay M. handled by Lucas, Harry H. by Coutts. Jay M. was footsore, and seriously handicapped. Both are good goers and stylish, Harry H. having the wider range though not under as good control as Jay M., and being inclined to chase fur. Birds were located in timber and each dog secured several points, each, however, missing many opportunities, birds being raised by spectators from ground over which dogs had worked. Up at 4:10.

Countess Mark-Kilgarif.—Down at 4:20, on ground adjoining that worked by the last brace. This was the last heat of the day, and the only really good work that was done, Kilgarif particularly distinguishing himself. "Kil" was handled by Coutts, Countess by Babcock. Both are speedy, stylish goers, "Kil" having the better range. He was staunch to wing and shot, while Countess was inclined to break in. The dog excelled in point work, having ten points to his credit. One point, made on the bank of a dry ditch was admired by all. His work was snappy and was performed like a veteran. At the conclusion of the heat many of the onlookers picked him as the coming winner.

TUESDAY, JANUARY 13.—Weather cold and foggy—Midget, a bye. Down at 11:10. Dodge, handler of Midget, was granted permission to run one of her kennel mates with her. Little was done in this heat. Birds were mostly in trees and refused to be driven out. Up at 11:45.

This ended the first series and the judge announced

that the following dogs would be carried into the second, viz: Harry H. with Judge Hunter; Lou with Mountain Quail; Nellie Bang with Margarette; Kilgarif with Jay M.

Harry H.-Judge Hunter.—Down at 11:50 in vineyard, where birds had been located. Both showed speed and range and were rather stylish, but ran over birds. No point work was done and they were ordered up at 12:05.

Lou-Mountain Quail.—Down at 12:15. Cast off in same vineyard and worked into open field where birds had been marked down. The dogs failed to locate until toward the end of the heat when Quail made one point in the open being staunchly backed by Lou. This was the only work of the heat. After lunch the first brace cast off was:

Margarette-Nellie Bang.—Down at 2:15, on new grounds covered with weeds and dry sunflowers. Nellie found first, pointing a bevy which flushed and scattered. Moving on the scattered birds both made a number of points, being steady to shot and wing. Each backed when opportunity offered. Both ranged well, Nellie having a little the better of it and being more snappy. Up at 2:50.

Jay M.-Kilgarif.—Down at 3 P. M. on grounds not before worked about one mile nearer town. Kilgarif ran another sensational heat. Coming back from a long cast he made a bevy point in fine style. The birds were flushed, and scattered in good cover. "Kil" worked the ground in grand style, finding and pointing bird after bird, and in each instance being steady to shot and wing. This work was but a short distance from and in full view of the spectators and was applauded by all. Jay M., whose feet had been encased in boots, seemed unable to locate birds, though having the same opportunity. He several times backed "Kil" and was in turn backed by "Kil," but his handler was unable to raise birds. Up at 2:30. Last brace of second series.

The judge then announced that Kilgarif and Nellie Bang would be put down for a short time, and it was evident that this was done merely to comply with the rules of the club, which require that the first and second dogs shall some time come together. They were down but a few moments, and on being called up a start was made for town.

After dinner Judge Humphrey announced the winners as follows: 1st, Kilgarif; 2d, Nellie Bang; 3d, Margarette.

### ALL-AGE STAKE.

Fourteen dogs qualified for the All-Age, and the drawing, held on Tuesday evening, January 13th, resulted as follows:

Stockdale Kennels' Pointer dog Cuba's Zep with W. W. Van Arsdale's English Setter dog Bell Boy.

Clinton E. Worden's Pointer bitch Pearl's Jingle with J. E. Terry's English Setter dog Kilgarif.

J. E. Lucas' Pointer bitch Fan Go with J. E. Terry's English Setter bitch Lady.

W. W. Van Arsdale's English Setter dog McCloud Boy with J. W. Considine's Lola Montez.

A. H. Nelson's English Setter bitch Sport's Destiny with Stockdale Kennels' Cuba Jr.

T. J. A. Tiedemann English Setter bitch Northern Huntress, with W. W. Van Arsdale's Pointer dog Dr. Daniels.

W. W. Van Arsdale's English Setter bitch Peach Blossom with I. F. Pratt's English Setter dog Bush.

WEDNESDAY, JANUARY 14.—Before the first brace was cast off the judge requested that Mr. J. H. Schumacher assist him during the running of the All-Age Stake. Mr. Schumacher not being on the ground Mr. H. L. Betten was pressed into service.

Cuba's Zep-Bell Boy.—Cast off at 10:10 on ground where birds had been found on previous day. Zep handled by Dodge, Bell Boy by Babcock. No birds were found and dogs were worked to an adjoining field across the road, where Zep soon located and pointed a bevy, which was flushed by Bell Boy running in. Zep made another point on one of the scattered birds and was nicely backed by Boy. Both were steady to shot. Bell Boy later pointed in tall weeds and was steady to wing. Boy had better range and style, but Zep excelled in bird work. Up at 11:30.

Pearl's Jingle-Kilgarif.—Former handled by Lucas, the latter by Coutts, Mr. Schumacher assisting Judge Humphrey. Cast off at 11:34 in field adjoining where last brace finished. The ground was covered with long, dry alfalfa, which made the going rather difficult. Jingle was the first to find, pointing a part of bevy when flushed, and shedropped to wing. Kilgarif made several long casts and finally drew to a beautiful point, the bird flushing behind him. He was staunch. After another point or two, one by Jingle on the bank of a ditch, the dogs worked into the field where Kilgarif had run his sensational heat of the day before. "Kil" came to point and was backed by Jingle, and both were steady to wing. Several more points were made. "Kil" had better range and quartered ground in better style, but was inclined to go in when birds were flushed. He had the better of the heat, but did not run to his form of the day previous. Up at 12:05.

Fan Go-Lady.—Down at 12:15. Fan Go handled by Lucas, Lady by Coutts, H. L. Betten acting with judge. Both ranged well and had speed and style, but seemed unable to locate, both running over birds. Lady made several false points, and the only point work was by Fan Go, backed by Lady. Lady had better range and was more stylish. After lunch the first brace down was:

McCloud Boy-Lola Montez.—Mr. Schumacher acted with Judge Humphrey during this heat and throughout the balance of the trials. Cast off at 2:05 on entirely new ground, comparatively open, but the dogs in making long casts soon came to timber. McCloud Boy handled by Babcock, Lola Montez by Lucas. Both were stylish and fast, Lola being especially so, though not in the best of condition. Lola made a point and was steady. McCloud Boy also had one point to his credit and was steady to wing. Although many birds were put up the dogs appeared unable to catch scent and locate. Up at 2:55.

Sport's Destiny-Cuba Jr.—Down at 3:10 in open field where cover was good. Destiny handled by Lucas,

Cuba Jr. by Dodge. Destiny was in no condition to run but showed that she is hard to surpass in range, speed and style. Cuba shortly found a bevy, ran in and flushed, the birds scattering. Destiny ranged wide but could not locate birds. Cuba working on the scattered birds, made numerous points in sight of all present and was steady to shot and wing. Destiny backed whenever opportunity offered. The dogs were worked across the railroad into an adjoining field, where both showed excellent range and speed, but found no birds. Destiny showed more range and speed but Cuba had all the credit for bird work. Up at 3:45.

Northern Huntress—Dr. Daniels.—A move was made to grounds nearer town before this brace was cast off at 4 P. M. Northern Huntress handled by Coutts, the Doctor by Babcock. The dogs were turned loose alongside a large ditch, and both making long casts to the right. Huntress ranged wider but the Doctor worked ground in better style. A bevy had been flushed by pedestrians and on the return of the dogs from their long cast Daniels was the first to find, and was steady to shot, the bird being killed by the handler. Huntress soon located and was steady to wing. Both dogs then closely hunted a small triangle of ground formed by two ditches and each made several points, Huntress making a particularly snappy one. Coming down with the wind she did not catch scent until after passing the bird, then whirled and stopped to a beautiful point. Crossing the ditch into another open field Daniels made a snappy bevy point in short weeds, and both dogs worked the scattered birds in fine style, making many points. It was difficult to make a choice but Huntress probably had a shade the best of it. This brace put up a splendid heat and all went to town in anticipation of the sport of the morrow.

THURSDAY, JANUARY 15.—Although an abundance of birds were found the dogs appeared unable to work to any advantage, and, with one or two exceptions, but little point work was done. Birds in many instances were marked down to be later on flushed by those following on horseback or in carriages after the dogs had apparently thoroughly worked out the ground. Many of the birds also took refuge in trees from which it was almost impossible to dislodge them.

Peach Blossom—Bush.—Last brace of the first series. Down at 10 A. M. Cast off in open field and Blossom at once made a long chase after a rabbit. She was gone over fifteen minutes before being rounded up by her handler. Bush in the meantime had worked across the railroad track into timber where Blossom was taken on her return. Both dogs several times pointed rabbits. Finally working down to a dry slough, the banks of which were covered with a heavy growth of weeds birds were found. Both ran over birds before pointing. Blossom was the first to stand, and later both made several points on scattered birds. Blossom made one point which aroused the admiration of all. Coming over the bank of the ditch she caught scent and being unable to stop slid half way to the bottom before catching herself, but held stanchly to the point. Steady to shot. Blossom showed much superior throughout the heat, in range, style and locating birds. Bush though making a couple of points seemed off nose. Up at 11:10.

After consulting with Mr. Schumacher Judge Humphrey announced the following ten dogs for the second series, viz: McCloud Boy with Sport's Destiny, Lola Montez with Dr. Daniels; Lady with Cuba's Zep, Kilgarif with Peach Blossom, Cuba with Northern Huntress.

McCloud Boy—Sport's Destiny.—The first brace in second series were put down at 11:45, in dense cover where birds had been marked, but on account of weather conditions or by reason of the high tangled cover no bird work was done. Both showed excellent range, speed and style. Destiny probably being the superior. During this heat McCloud Boy raised a wild cat and chased, followed by men on horseback and on foot. The cat was finally brought down by a well directed shot fired by "Coyote" Johnson, a noted grizzly hunter of the south. This episode caused no little excitement.

After lunch a drive of about two miles to the Gosford place, the first brace down was:

Lola Montez—Dr. Daniels.—Cast off in an orchard at 1:40. Although birds were found in abundance the going was difficult, the ground being covered with burrs, greatly handicapping the dogs. Both ran over birds, seemingly unable to locate. Lola ran in poor form, being sick. Daniels showed good speed and range, working his ground in a masterly manner, but no point work was done until the dogs were taken into an alfalfa field adjoining where flushed birds from the orchard had gone. Here Daniels did some very clever work, finding and pointing bird after bird, and being steady to shot and wing, also backing when opportunity offered. Lola made several nice points, was steady to shot and wing, and backed nicely. The heat was clearly Dr. Daniels'. Up at 2:35.

Lady—Cuba's Zep.—Down at 3 P. M. on new section of ground; cover, short weeds. Lady pointed two singles and was steady to shot and wing. This was the only point work. Zep, after his first cast, slowed up and worked close to handler, not showing the same vim as on former occasions. Lady held her speed and range throughout the run. Both missed opportunities and flushed birds. Up at 3:30.

Kilgarif—Peach Blossom.—Down at 3:40. No birds were found until after crossing railroad track, where "Kil" pointed, but flushed. He made another point and the bird flushing, was steady to wing. Blossom also had a point to her credit. Few birds were seen during this race.

Cuba Jr.—Northern Huntress.—Down at 4:40, last brace of the day. They were cast off on an entirely new section of ground where birds were said to be in abundance. None were found. Cuba worked under splendid control, while Huntress was several times out of hand.

The following dogs were carried into the third series: Dr. Daniels with Cuba Jr., Lady with Peach Blossom, Cuba's Zep with Kilgarif.

FRIDAY, JANUARY 16.—Morning cold and foggy. Birds were found in trees and it was difficult to dis-

lodge them. Driven from one they would fly to another, disliking, to all appearances, to alight on the cold ground.

Dr. Daniels—Cuba Jr.—Down at 10:10, in sunflower field where the rider had earlier located birds. A bevy was flushed before a point was made, the birds going to the trees. Cuba came to point, but no bird was raised. The dogs were worked through a vineyard without locating birds, but in an adjoining alfalfa field each scored a number of points. Daniels again worked his ground in grand style and showed better range and speed. Up at 11:20.

Lady—Peach Blossom.—Down at 11:40. They are litter sisters and show splendid range, speed, style and snap. Blossom pointed twice, no birds, however, being found. Lady backed nicely on each occasion. Lady next pointed, backed by Blossom. Blossom had probably a shade the better in range and speed. Up at 12:10.

Cuba's Zep—Kilgarif.—Throughout this heat Kilgarif sustained the best range and pace, though not showing up as well as in previous heats. Zep came to point but left it, after which the birds flushed. Both ran over birds and missed opportunities. End of third series.

While partaking of lunch the Judge announced that Dr. Daniels and Peach Blossom would be run together. They were cast off in an alfalfa patch near a schoolhouse, at 2:10. In this heat Blossom scored two points to the Doctor's one. Both had splendid range, the Doctor probably working his ground in better shape, but being a little unsteady.

At the conclusion of the heat the Judge delivered his decision as follows: First, Peach Blossom; second, Dr. Daniels; third, Cuba Jr.

#### MEMBERS' STAKE.

The Members' Stake had six entries, drawn in the following order:

C. N. Post's Lou with C. W. Coggins' Mountain Quail.

J. D. Terry's Lady with W. W. Van Arsdale's Count's Mark.

T. J. A. Tiedemann's Northern Huntress with J. B. Coleman's Kern of Kenwood.

Lou—Mountain Quail.—Handled by respective owners. Cast off at 2:45, in same field where last brace of All-Age Stake had run. Few birds were seen and the dogs had but little opportunity to show what they could do. Lou had the best range, speed and style. Up at 3:15.

Before the second brace was put down a move of about two miles was made to the Fraser place, and the dogs were turned down in open ground with good cover.

Lady—Count's Mark.—Handled by respective owners. Shortly after going down Lady pointed a large bevy. The birds were running and Lady roared, finally coming to a stanch point when the birds huddled together on bare ground. On being flushed some went to trees, others across a large canal into a weed patch. The dogs being taken across the canal did exceedingly clever work, while the handlers acted like veterans. In point work the dogs were about equal, each being credited with eight points, but Count's Mark was somewhat unsteady. Up at 4:40. This heat was about the finest bit of work done throughout the trials.

Northern Huntress—Kern of Kenwood.—Handled by respective owners. Down at 4:45. Cast off across ditch from where last brace ran. A few birds were flushed by handlers, one, being wounded by the handler of Kern, was pointed by Huntress, who was stanchly backed by Kern. Moving on to ground where Lady had found the bevy no birds were raised, and the dogs were taken across the canal to where Lady and Count's Mark had done such clever work. Huntress worked well to her handler, was stylish and fast, and made several good points, being steady to shot and wing. Both backed when opportunity offered. Kern was in no condition for a hard race, notwithstanding which he made two very nice points, one being on birds in a tree, the dog placing his forefeet on the trunk of the tree and pointing.

At the conclusion of the heat the Judge announced the winners: First, Lady, second, Count's Mark; third, Northern Huntress.

#### SUMMARIES.

Bakersfield, Cal., January 12, 13—Pacific Coast Field Trial Club's 20th Annual Derby, for Pointers and Setters whelped on or after January 1, 1901. Purse, \$480—Jos. M. Terry Cup and \$240 to first, \$144 to second and \$96 to third. Entrance \$5, \$5 second forfeit, \$10 additional to start; 38 nominations, 15 starters (10 English Setters, 5 Pointers).

Lou, black and white English Setter bitch (Orion—Mary Lou), whelped —, 1902. Jos. E. Terry (Sacramento), breeder and owner. W. B. Coutts, handler.

Judge Hunter, white and orange English Setter dog (Count's Mark—Verona School Girl), whelped April 10, 1901. Fred P. Butler (San Francisco), owner and breeder. C. H. Babcock, handler.

Nellie Bang, lemon and white Pointer bitch (Senator P.—Lady Belle), whelped July 9, 1901. J. W. Flynn (San Francisco), owner and breeder. W. B. Coutts, handler.

Plumas, white and lemon English Setter dog (Cavalier—Love-knot), whelped August 29, 1901. L. A. Linville (Santa Clara), owner; P. D. Linville (San Francisco), breeder. John Hughes, handler.

Bang Up, black and white Pointer dog (Senator P.—Lady Belle), whelped July 9, 1901. J. W. Flynn (San Francisco), owner and breeder. W. B. Coutts, handler.

Clipper's Lad, black white and tan English Setter dog (Clipper W.—Dixie Queen), whelped July 28, 1901. Dr. C. E. Wilson (Elko, Nev.), owner and breeder. Dr. Wilson, handler.

Margarette, black and tan Pointer bitch (Cuba's Zep—Jingo's Bagpipe), whelped November 1, 1901. Stockdale Kennels (Bakersfield), owner and breeder. R. M. Dodge, handler.

Detroit Joe, black, white and tan English Setter dog (Joe's Count Queen of Diamonds), whelped March 10, 1901. W. W. Van Arsdale (San Francisco), owner. Louis Hilsdegen (Detroit, Mich.), breeder. C. H. Babcock, handler.

Fleetwell, liver and white Pointer dog (Alec C.—Whisper), whelped July 31, 1901. W. B. Coutts (Kenwood, Cal.), owner and breeder. Master Chas. Coutts, handler.

Mountain Quail, black, white and tan English Setter bitch

(Charm—Jessie Gladstone III.), whelped January 2, 1902. Chas. W. Coggins (Ireana, Cal.), owner. G. W. Tibbitts (Colusa, Cal.), breeder. H. S. Peach, handler.

Jay M., orange and white English Setter dog (Colonel R.—Sport's Girl), whelped March 23, 1901. Clinton E. Worden (San Francisco), owner. Geo. E. Gray (Appleton, Minn.), breeder. J. E. Lucas, handler.

Harry H., white, black and tan English Setter dog (Why Not—Sue), whelped February 17, 1901. Clinton E. Worden (San Francisco), owner. Pierre Lorillard (New York), breeder. W. B. Coutts, handler.

Countess Mark, black, white and tan English Setter bitch (Count's Mark—Verona School Girl), whelped April 10, 1901. W. W. Van Arsdale (San Francisco), owner. F. P. Butler (San Francisco), breeder. C. H. Babcock, handler.

Kilgarif, black and white English Setter dog (Orion—Mary Lou), whelped —, 1902. Jos. E. Terry (Sacramento), owner and breeder. J. E. Lucas, handler.

Midget, black and white Pointer bitch (Cuba's Zep—Jingo's Bagpipe), whelped November 1, 1901. Stockdale Kennels (Bakersfield), owner and breeder. R. M. Dodge, handler.

A bye.

II.

Harry H. with Judge Hunter Lou with Mountain Queen.  
Nellie Bang with Margarette. Kilgarif with Jay M.

III.

Kilgarif with Nellie Bang.

RESULT

First, Kilgarif; second, Nellie Bang; third, Margarette.

Bakersfield, Cal., January 14-16, 1902. Pacific Coast Field Trial Club's All-Age Stake, open to all. Purse, \$300—Western Field Cup and \$150 to first, \$90 to second and \$60 to third. Entrance \$10, \$10 additional to start; 15 nominations, 14 starters, including the Derby winner, (9 Setters, 4 Pointers).

Cuba's Zep, black, white and tan Pointer dog (Cuba of Kenwood—Jacquina), whelped January 5, 1899. Stockdale Kennels (Bakersfield), owner and breeder. R. M. Dodge, handler.

With

Bell Boy, white and tan English Setter dog (Tony Boy—Lena Belle), whelped July —, 1900. W. W. Van Arsdale (San Francisco), owner. P. Lorillard (New York), breeder. C. H. Babcock, handler.

Pearl's Jingle, liver and tan Pointer bitch (Young Jingo—Pearl's Dot II.), whelped August 6, 1899. Clinton E. Worden (San Francisco), owner. Geo. E. Gray (Appleton, Minn.), breeder. J. E. Lucas, handler.

With

Kilgarif, black and white English Setter dog (Orion—Mary Lou), whelped —, 1902. Jos. E. Terry (Sacramento), owner and breeder. W. B. Coutts, handler.

Fan Go, white and tan Pointer bitch (Young Jingo—Abdallah Fan), whelped July 10, 1899. Mt. View Kennels (San Clemente), owner and breeder. J. E. Lucas, handler.

With

Lady, lemon and white English Setter bitch (Ch. Count Gladstone IV.—Pearl's Mark), whelped March —, 1899. Jos. E. Terry (Sacramento), owner. W. W. Van Arsdale, breeder. W. B. Coutts, handler.

McCloud Boy, black, white and tan English Setter dog (Tony Boy—Sadie Hopkins), whelped December 23, 1900. W. W. Van Arsdale (San Francisco), owner. Hugh Hopkins (Hanford, Cal.), breeder. C. H. Babcock, handler.

With

Lola Montez, black white and tan bitch (Llewellyn Drake—Zola Montez), whelped April 4, 1901. J. W. Considine (Seattle), owner. Frank Watson (Victoria, B. C.), breeder. J. E. Lucas, handler.

Sport's Destiny, black, white and tan English Setter bitch (Marie's Sport—Mark's Fleet), whelped July 16, 1899. A. H. Nelson (Tacoma), owner. H. B. Ledbetter (Farmington, Mo.), breeder. J. E. Lucas, handler.

With

Cuba Jr., liver and white Pointer dog (Cuba of Kenwood—Florida), whelped March 13, 1900. Stockdale Kennels (Bakersfield), owner and breeder. R. M. Dodge, handler.

Northern Huntress, white black and tan English Setter bitch (Ch. Joe Cumming—Mecca II.), whelped August 29, 1899. T. J. A. Tiedemann (San Francisco), owner. W. W. Titus (West Point, Miss.), breeder. W. B. Coutts, handler.

With

Dr. Daniels, liver and white Pointer dog (Plain Sam—Dolly Dee II.), whelped May —, 1899. W. W. Van Arsdale (San Francisco), owner. Dr. Daniels (Cleveland, O.), breeder. C. H. Babcock, handler.

Peach Blossom, black, white and tan English Setter bitch (Ch. Count Gladstone IV.—Peach Mark), whelped March —, 1899. W. W. Van Arsdale (San Francisco), owner and breeder. H. S. Babcock, handler.

With

Bush, white and lemon English Setter dog (Highland Chief—Gypsy Queen), whelped —, I. F. Pratt, (Coupville, Wash.), owner.

II.

McCloud Boy with Sport's Destiny. Lady with Cuba's Zep.  
Lola Montez with Dr. Daniels. Kilgarif with Peach Blossom.  
Cuba Jr. with Northern Huntress

III.

Dr. Daniels with Cuba Jr. Cuba's Zep with Kilgarif.  
Lady with Peach Blossom.

IV.

Dr. Daniels with Peach Blossom.

RESULT.

First, Peach Blossom; second, Dr. Daniels; third, Cuba Jr.

Bakersfield, Cal., November 16. Pacific Coast Field Trial Club, 20th annual Members' Stake. W. W. Van Arsdale Cup to first, club cups to second and third, \$10 to start, 6 entries (5 Setters, 1 Pointer), handled by owners.

Lou, Jos. E. Terry's English Setter bitch, handled by Chas. N. Post

With

Mountain Quail, Chas. W. Coggins' English Setter bitch.

Lady, Jos. E. Terry's English Setter bitch

With

Countess Mark, W. W. Van Arsdale's English Setter bitch.

Kern of Kenwood, John B. Coleman's lemon and white Pointer dog

With

Northern Huntress, T. J. A. Tiedemann's English Setter bitch.

RESULT

First, Lady; second, Countess Mark; third, Northern Huntress.

#### TRIAL NOTES.

Mary Lou, the dam of Kilgarif, the Derby winner, is a half sister to Champion Joe Cumming—the dam of both being Picciola. Orion, Kilgarif's sire, is a sturdy and stylish working dog. Mary Lou is also the dam of Hen Crocker's Chief winner of the 1900 Derby. He was sired by Iroquois Chief. Of Mary Lou's progeny but three have ever been trained for field trials. The third, Lou, was entered in the recent Derby and stayed in the second series. Mary Lou is owned by S. Christenson.

Nellie Bang is by J. W. Flynn's well known Senator P. who won the Manitoba Champion Stake, 12 starters, he was first in the Brandon Club trials All-A.

starters and third in the United States All-Age, 15 starters last year.

Senator P. J. (Senator P.-Lady Belle) was fourth in the Illinois Derby, 18 starters.

Senator P. was second in the Pacific All-Age 1899. Plain Sam, getting first and Cuba of Kenwood third. Senator also won first in the champion stake with C. on second.

Senator won first limit and open and was reserve winners at the S. F. K. C. show 1900.

Orion, sire of Kilgariff, is by Harold-Sunlit, and ran in the Pacific All-Age, 1898; he made third in the '96 All-Age.

Peach Blossom comes into a winning heritage as it were. Champion Count Gladstone IV. has a record too long to recount here. Peach Mark (Mercury-Betsy Mark) was first in Coast All-Age for 1898, 1900. Peach Blossom won first in the Coast All-Age, 1901, and was also second in the Derby, being beaten in the latter stake by Lady, with Maggie F. third. The other All-Age winners for 1901 were Lady second—a reversal—and third divided by Cuba's Zep and Merry Heart. In the All-Age last year Peach Blossom and Northern Huntress divided third.

Dr. Daniels made his Coast debut, after a promising Eastern beginning, in the 1901 Coast Derby where he only reached the second series. Last year he won the All-Age.

Cuba Jr. won the Derby last year at Santa Maria.

### DOINGS IN DOGDOM.

S. Christenson's Boston Terrier bitch Coronado Lithia (Counsel-Meg) is in whelp to Graham E. Babcock's Roundman. Roundman was purchased from Dr. Kendall for \$1000. He was the winner at the Boston show last year and is a litter brother of Remlik Bonnie, who is looked upon as the best Boston bitch living to-day. Kinsman, another out of the same litter, was the winner this year at Boston.

A chance to procure either red or black Cocker Spaniel puppies is offered today in our classified kennel "ads" on page 15.

Woodlawn Kennels now has the Bull bitch Lady Bethel installed as a brood bitch. She was purchased this week of the Ellesgy Kennels.

Mr. O. J. Albee of the Oak Grove Collie Kennels writes us as follows:

"I have three grand litters on hand and there are some splendid puppies amongst them. Seven from these three litters are already spoken for, but they are yet too young to ship. I have several other bitches due shortly, I also bred three bitches this past week. Inquiries about pups are tremendous, it takes almost all my time answering the mail and then I am continually behind. Since the Oakland show I have made several good sales.

Portland is to have a show in April so Mr. Nairn writes me."

There is a growing demand for Collies among the ranchers, stockmen and fruit growers of this state. Many people living in the country will not tolerate a dog of any other breed about their places. Collies, by their intelligence, docility and rare working qualities seem to fill the bill in the country districts of California.

Champion Ivel Rustic and his old pal Beaumaris Fortune were a couple of lucky dogs this week. For some time past both of these well known dogs have been in charge of a German who conducts a beer saloon on Central avenue and Geary street. The German claimed to have a bill of sale for the dogs—and likewise a board bill of greater or less proportions.

Fortune is old and on her last legs and appeared to be ready to succumb to old age when we last saw her curled up in the corner of a manure heap and covered with flies. "Billy," as Rustic is familiarly known from the vantage of the dunghill, was philosophically contemplating the cemetery on the opposite side of the street.

The condition of the old champion was sadly in contrast to what he had been when we first saw him. This change in his life was evidently not to the liking of a dog that had been the petted winner of many prizes and the privileged companion on many a jolly trip—memories of the good things he had enjoyed possibly made unpalatable the common fare of a boarded dog. At all events he had developed a very irascible temper, which he frequently vented on poor old Fortune.

"Billy's" change of life was due to a mortgage. A printing bill was unpaid—the printing of the catalogue for the show last year, so we are informed by Mr. S. C. Hodge, was not settled for and Ivel Rustic, Fortune and several other dogs were listed as security for the payment of the bill to the printing firm.

On Monday, a change came for Billy and his mate, who were both shipped to Mr. Prentice Maslin of Sacramento. The dogs were crated and taken away by Wells, Fargo & Co. to, it is to be hoped, more comfortable quarters than they have enjoyed for many months past.

### Something for Nothing

The Polk Miller Dog Co. of Richmond, Va., are manufacturers of Sergeant's Dog Roundup, the most popular line of preparations, intended for domestic use, to be used today, having received the highest endorsement of the leading dog men and kennel owners in this country and Canada. Read their advertisements appearing in the columns of our journal each issue. The firm referred to will mail absolutely free, on receipt of their celebrated book of dogs, if you will forward 3 cents towards postage. If your dog is sick, write them, enclosing stamp, and describe the symptoms as accurately as you can. They will cheerfully furnish the best information on any subject without charge. F. W. Branch & Co., of Los Angeles, California, have recently been made distributing agents for Sergeant's Dog Roundup on the Pacific coast.

### Game and Fish Protection Laws.

The game protection (?) legislation during the pending session of the State law-makers promises to be hot and fast. As usual, with many devotees of the gun and rod, whenever this question comes up each individual interested is strenuous in advocating measures that are particularly applicable to his own section—consequently there is a lack of unity in working for the desired results.

This state of affairs is amplified by the position taken by various associations, organized through the efforts of a deputy fish commissioner, which bodies, so far as accomplishing the purposes which the organizer claimed for them in fulsome reports furnished the press from time to time, will have the effect of confusion in settling the main question at issue.

We are not here attacking fish and game protective associations; we believe in them and will support all such bodies in all legitimate measures for fish and game protection. We will cudgel game protection fakery, however—those who follow blindly in the footsteps of the "apostle" may take umbrage at the truth, but we trust they will soon see through pretence and fanaticism and then take the right path in the way to proper game and fish protection.

Several bills have been presented in the interest of pernicious legislation tending to district the State into fish and game zones. One bill called for three districts, another for eight—the length of the open season for various kinds of game and fish being arranged for each section of territory districted. What these bills will be when they are finally thrashed into shape is a problem no man can solve now. One thing, however, is certain, to properly carry out the provisions of one of them a fund of at least \$100,000 per annum would be necessary. This is just what the "fakers" are after—paid positions to protect, in the words of one of the apostles, "a valuable food supply of the people."

Districting a state into game zones has proven a failure in numerous instances where it was instituted in Eastern States. The system was soon abandoned as unpractical in every state but one, we believe.

For years past the game protection shibboleth has been in the mouths of strenuous advocates of the sportsmen's interests. The millennium was promised for those who love the pleasures and recreation of field and stream. One signal omission nevertheless, was invariably the rotten spot in every game protection plank laid down, until the adoption of the present game law. And that omission was the introduction and advocacy of proper measures and methods to control the actions of the general army of loudly denounced "pot hunters" and the few club "game hogs." The shadow for the substance was the general dolo of game protection gruel dealt out. The present law is in many respects ample and with a few amendments—a close season on English snipe, protection for swans, the prohibition of the use of sneak boats, sink boxes and the like devices would fill the bill acceptably.

The county boards of supervisors control the duration of the open seasons, and could also take all necessary measures in policing their respective counties.

It was supposed that the limit bag would stop the operations of the market hunters. This, as experience has proven, is a fallacy. The commission and market men have handled more wild game this season than they had a demand for. The prohibition of the sale of quail has undoubtedly been a good feature, it has, to a great extent, stopped the wholesale slaughter of the birds and their destruction by trapping methods. The traffic has not been entirely stamped out, however, and arrests for violation of the law in this respect are not infrequent.

There is quite a delegation at present in Sacramento looking after various interests in the proposed game protection measures. What the outcome will be is problematical. At all events, bills for fish and game districts should not be passed if the real interests of fish and game protection are to be conserved.

The Victoria Kennel Club's second annual show is dated for April 1-4 to come off at Victoria, B. C. The northern circuit promises to be a good one this year.

### Kennel Registry.

Announcements of Visits, Whelps, Sales and Leases will be in serial hereafter, for advertisers, free of cost.

#### VISITS.

H. J. Kilgariff's black Cocker bitch Gypsy (— — —) to Plumeria Cocker Kennels' Plumeria Tweedlepunch (Ch. Hampton Goldie-Omo Girl), January 18, 1903.

W. H. Williams' Irish Water Spaniel bitch Belle Marsh (Handy Andy-Ch. Nora W.) to Dr. A. T. Leonard's Dennis C. (Ch. Mike C. Biddy C.), January 21, 1903.

#### SALES.

Woodlawn Kennels purchased from Leon S. Greensbaum, Jan. 20, 1903, the Bull bitch Lady Bethel (Guelph-Hour II).

#### WHELPS.

Naird Kennels' black Cocker Spaniel bitch Maid of Oakland (Woodland Jersey-Woodland Countess) whelped January 17, 1903, four black puppies (1 dog) to A. L. Hyler's Oakland Romance (Oakland Fascination-Oakland Tippeco).

### Coming Events.

#### Rod.

Nov. 1-April 1—Tro-t season closed.  
Nov. 15-Sept. 10—Season open for taking salmon above tide water.  
April 1-Feb. 1—Open season for taking steelhead in tide water.

#### Gun.

Aug. 1-Feb. 1—Dove season open.  
Oct. 1-Aug. 1—Deer season closed.  
Oct. 1-Feb. 1—Open season for quail, ducks, etc.  
Oct. 1-Feb. 1—Open season on quail in San Mateo county.  
Oct. 15-Jan. 15—Open season on quail in Marin county.  
Nov. 1—Quail season opened in Santa Clara county.

### FEATHER AND FIN.

Duck hunting recently has, for local sportsmen, been under the ban of heavy prevailing fogs and consequently but few good bags have been made. Several nice bags of canvasback, with a sprinkling of mallard, bluebill and teal were shot at and near the Petaluma creek railroad bridge last Sunday. Members of the Kennel Club and several sportsmen who were stopping at Pete Walsh's ark enjoyed the shooting. Eugene Sarthou sculled Petaluma creek, shot over decoys at blinds in the creek and also did some light shooting as bunches of "caas" and other ducks flew over the bridge. Mr. Sarthou was a guest at Walsh's ark for a week; he is a clever shot and good boatman and enjoyed the outing extremely.

Reports from Point Arena states that steelhead are running up the Garcia river and "are biting like dogs" all fine, good sized fish and full of fight. The rains have probably spoiled the sport now.

Russian river has not given anglers the sport anticipated. Last Sunday a number of anglers were on the stream and but few fish were caught. J. R. Kenniff landed a 9½ pound fish, the largest one caught there this year, several other smaller fish were caught.

Striped bass anglers are getting a few fish in San Antonio slough. A few bass have been netted in the coves of Angel island recently.

The day of the wooden decoy is gone so far as the Southern California duck clubs are concerned. Their shallow ponds allow of setting up the best of all attractions, the dead bird. Los Angeles shooters now regularly carry with them a bunch of sharpened stakes to impale their killing on. Many use stiff wires about thirty inches long, filed to a point at each end; the ribs of an old umbrella are perfect for the purpose. A little care in the first flight, selecting big male sprigs or "bull" widgeon, guarantees a man plenty of sport for the rest of the day, for no bird can resist the allurements of its own kind, if they be set up properly.

A press dispatch on the 22nd inst states that the Derby in the field trials of the United States Association was completed on that day, the prizes being awarded as follows: First prize, Alford's John, Pointer, owned by Salomonte Kennels; second, Iroquois, Setter, owned by Arent & Duryea; third, Question, Setter, owned by P. Lorillard. The only running in the All-Age Stake the same day was Senator P. with Annie Oakley.

I. L. Koppel was appointed Game Warden of Santa Clara county for two years by the Board of Supervisors this month, vice F. L. Foster, term expired. Five applications for the position came before the Board.

Deputy Fish Commissioner Kercheval, recently while off on a hunting trip for hunters, bagged unsuspecting and unsuspected game in the form of Ben Sill, proprietor of the Louvre restaurant at Bakersfield. Kercheval discovered quail on toast on Sill's bill of fare, and, after ordering and obtaining a pair of the birds nicely broiled, which he paid for, the deputy arrested Sill for violating the game law. The restaurant keeper went before Justice Millar, who fined him \$25.

That animals, feathered creatures and reptiles, however destructive or repulsive a particular species may be, have their sphere of usefulness in the economy of nature is well known. Instances are numerous, where much damage has resulted or a most unsatisfactory condition has ensued caused by the extermination or transplanting of birds or animals—where nature has been unbalanced, as it were, by man's short-sightedness. A recent case is noted in the damage claimed to be inflicted by a pest of muskrats in one section of Louisiana where the Supervisors of Plaquemine parish, extending along the Mississippi river for 100 miles from New Orleans, have passed an ordinance prohibiting any person from hunting, killing or trapping alligators. Plaquemine was formerly the home of the greatest number of alligators in the world, and a big business in alligator skins was carried on in its bayous.

An official report states that, in consequence of the killing out of the alligators, muskrats, upon which alligators mainly live, have increased so as to be a danger to the levee system of the parish. The rats bore holes through the levees. The water percolates through the rat holes and is the frequent cause of breaks in the levees. The alligator hunters say the action has been taken too late, as the alligators are nearly all killed off, and it will be twenty or thirty years before enough of them can be propagated to keep down the army of muskrats.

### California Cocker Club Meeting.

The annual meeting and election of officers of the California Cocker Club was held at 125 Geary St. on Wednesday evening January 14th at 8 o'clock, Vice-President John H. Dorian presiding in the absence of the President.

The following officers were elected to serve for the ensuing term—viz: Executive Committee—F. C. Meyer, James H. Jones, John H. Dorian; Ex-officio—Hon. William C. Ralston, Edward C. Plume; President, Hon. W. C. Ralston; Vice-President, John H. Dorian; 2nd Vice-President, J. H. Jones; Secretary-Treasurer, E. C. Plume.

The vote on Vice-President and Executive Committee developed quite a strong sentiment in favor of Messrs. Meyer and Ackerman, who have contributed not a little to the growth and development of the Club.

Secretary Plume's report showed the Club to be in a prosperous condition; and the holding of a Specialty Show during the year was discussed at some length. It was finally left to the Executive Committee. After having passed on many matters of importance, the meeting adjourned subject to a call from the Executive Committee. E. C. PLUME, Sec'y.

## Raising Calves on Milk Substitutes.

The Pennsylvania experiment station has just issued a bulletin (No. 60) on this subject. They started with the following formula for calf feed: Flour, 16½ pounds; flaxseed meal, 33½ pounds; linseed oil cake meal, 50 pounds. Take two and one-half pounds of this mixture per day for each calf. Scald it in boiling water, then add enough more water to make two gallons; add a little sugar and salt before feeding. A number of trials were made with this meal on calves 10 days to three weeks old at the beginning. This formula was recommended by one of the agricultural colleges of England. It did not prove satisfactory, and six weeks were spent in trying to find the right combination of foods—a combination that would be palatable and make the calves grow.

In October the following mixture was made up and proved very satisfactory: Wheat flour, 30 pounds; cocoanut meal, 25 pounds; nutrium, 20 pounds; linseed meal, 2 pounds. One pound of this was added to six pounds of hot water, stirred for a few moments, allowed to cool to 100 degrees, then fed to the calf from a pail or calf-feeder the latter preferably. The calf was taken at seven to ten days old and at first was fed twice a day on a ration of three pounds whole milk and one half pound of above mixture; in a few days—four to seven, depending on how the calf thrived—it was put upon the complete ration of calf-meal.

Wheat flour keeps the bowels from becoming too loose. Cocoanut meal contains 20 per cent protein and 9.03 per cent fat. Nutrium is skim milk evaporated to a solid and then ground to flour. It is virtually skim milk when dissolved in water. It is manufactured by a concern in New Jersey, and the product is sold to bakers principally, at 10 cents a pound; it is 7 cents a pound unground and unbolted. It has a slight laxative effect. Dried blood is highly nutritious, is tonic in effect, and cures scours.

Flour costs 2 cents a pound; cocoanut meal, 1½ cent; nutrium, 10 cents; linseed meal, 1½ cents; dried blood, 3 cents. Total cost of the calf meal per pound, 3.2 cents. By using second grade flour and the 7 cent nutrium, the cost would be less than 2 cents a pound. Feed two pounds a day for five or six weeks, then two and one-half pounds till weaning, say 100 days from first beginning to feed. This would cost about \$7 for the calf meal, besides hay and grain the calf eats, and the milk used before beginning on the meal. This would bring the cost up to \$8 and upwards at four months old. Keep the calves in warm dry, comfortable quarters.

Another mixture, used for three calves in these experiments was composed of corn meal, 13 pounds; nutrium, 20 pounds; flaxseed, 1½ pounds; dried blood, 2 pounds; flour, 30 pounds; cocoanut meal, 6 pounds; oats chop, sifted, 5 pounds. This costs about the same as the other mixture, is more palatable, but did not produce quite as good results, though this may have been the fault of the calves.

## Feed by Appetite, Not Measure.

When feeding dairy cows one should remember that they are a great deal like men and women in the matter of liking the various foodstuffs. One will like one thing and another another, just as one man likes sweets and another abhors them. Feeding by a set rule never produces the best results. One cow will eat bran greedily and another mince over her mess without exhibiting any appreciation of it. Some cows will eat anything that is offered them and others are hard to suit.

One will eat greedily and another deliberately. To get the best results the

one who feeds the cows must learn their individual preferences and little tricks of eating and then cater to it. A cow or other animal does better on that which is palatable to them. Give them the things they like as often as possible and always try to vary the feed enough to keep the appetite good. If a cow is a hearty eater, feed her well, for a hungry cow never does her best. If another member of the herd is dainty, treat her likes and dislikes with respect and she will repay you by an increased flow of milk.

We were one time watching a dairyman feed his cows. He was feeding bran with a little linseed oil meal in it. One cow smelled of her portion and refused to eat it.

"I always have to starve that cow into eating oil meal," said the owner. "When I give a cow anything to eat she's got to eat it before she gets anything else."

We thought that was about the poorest way to get profit out of a cow that we ever heard of, and time and experience have not changed our mind.

The good dairyman has an eye on the feed box and manger and feeds to suit each cow to the best of his ability; for a satisfactory ration brings content, and a contented cow does the best she possibly can in the way of milk production. Time spent in getting acquainted with the herd is never wasted.—*Dairyman.*

## Why Strippings Are Rich.

In referring to the matter of rich strippings, or last of the milking, *Hood Farm Topics* says:

"Numerous explanations have been given to the reason why strippings, or that portion of the milk which is last drawn from the udder, is the richest in butter fat, being of such low specific gravity compared with the watery portion of the milk in which it floats, has a tendency to rise to the upper portions of the udder, just as it does when the milk is set for cream raising. When the cream so rises it naturally follows that it will be the last to come away in the operation of milking.

"That there is a marked difference in the quality of milk first drawn from the cow, compared with that which comes away toward the finish, was clearly shown by an experiment carried out some time ago by a well-known dairy expert. He found that while the average percentage of butter fat in the first pint of milk withdrawn from the cow worked out to only 1.32 per cent, the butter fat in the strippings, or the last half pint, amounted to over 9 per cent. There was hardly any difference in the percentage of the other solids present in the first drawn compared with the last drawn milk."

A feeding test made with four farm horses required to perform light work showed that they maintained their weight on an average daily ration of 13.5 pounds of good alfalfa hay. The horses were allowed free access to water and a pile of oat straw, but were fed no grain. The amount of straw eaten was not recorded. In a second test made with two horses it was found that weight was maintained on an average daily ration of 13.75 pounds of alfalfa hay and 2.25 pounds of oat straw for each 1,000 pounds of live weight. It was calculated that this ration would furnish 1.85 pounds of protein, .14 pounds of fat and 6.27 pounds of nitrogen-free extract, the nutritive ratio being 1:3.5. This ration furnishes more protein, less carbohydrates and fat and has a narrower nutritive ratio than is called for by Wolff's standard.

A good balanced ration for feeding cattle, recommended by the United States department of agriculture, is composed of ten pounds of shelled corn, five pounds of wheat bran, two pounds linseed meal and ten pounds corn stover for steers or cows of 1000 pounds live weight.

## The Draft Horse Proper.

During the recent International Live Stock Exposition the draft horse was greatly in evidence in the show and on the market.

There are different types of draft animals and each has its admirers and advocates.

The primary object of breeding draft horses is to produce an animal that fills a commercial want.

If one produces horses for which there is a narrow and indifferent demand, he will find it a profitless industry.

An extraordinary impetus has been imparted to the fine draft horse husbandry by the interest taken in fine pairs and six-in-hand teams during the past five years.

The matching of pairs and the grouping of pairs in show and commercial teams has aided largely in popularizing the massive, blocky type draft horse.

The champion teams exhibited at the three International Live Stock Expositions were of low-down, massive conformation.

While the stilty, upstanding type may display more style and loftier action, they lack the substance, power and endurance to move heavy loads.

Enormous weight is incompatible with sensational speed.

The powerful freight engines that move the traffic of a nation are mounted on low trucks, while the fleet moguls that whirl the fast express trains across the continent at a speed of sixty miles an hour are equipped with high driving wheels.

Record speed is attained by eliminating the type of heavy traffic machines.

The freight engine would soon be disabled if express speed was required of it, and the fast mogul would soon be laid up for repairs if compelled to perform the services of a freight locomotive.

Power and endurance to move heavy loads demand that drafters should represent great substance, combined with low-down, blocky proportions.

Speed which comes from the stilty, upstanding types is always attended with proportionate loss of power.

Great weight moving ability demands short leverage, with conformation close to the ground.

The types that were the most attractive at the International Show were the short-legged, compact animals, with heavy bone and immense girth.

The champion draft pairs stood sixteen and one-half hands, were deep through the heart, with powerful bone, massive quarters, great breadth of breast, with necks of medium length and heavy upright shoulders.

The best types measured 10 to 12 inches around the cannon bone, with girth of 95 to 100 inches, and weighed 1700 to 2000 pounds.

The educational advantage of the late exhibit was of incalculable value to breeders as offering an object lesson of the true commercial type of a draft horse.

Breeders should aim to produce great weight, with compact conformation, as this form is best adapted to commercial uses of draft animals.—*Drovers' Journal.*

## The Profitless Cow.

The profitless cow is a subject that has been harped on now for a good many years, but we are sorry to relate, she still remains in the land. A cow census would show that, so far as the farmer is concerned, half of the cows could be sent to the butcher without loss to their owners. The public would, of course, be the loser, for a definite amount of milk would be taken out of trade, and the remainder would be in such demand that the price would be enhanced. On the farmer's side, however, the result would mean profit. Ultimately the general public might get its milk as cheap as at first, for the poor cows would no longer produce poor cows, but the entire supply of calves would come from profitable milkers. Now, year

after year, the farmer puts a certain sum of money, in the way of feed, into his cow, and gets back the same sum. He throws in his work. Most of the men that are doing this do not know it, for they have never kept an account of what they are doing. They have no idea as to the results from their milking operations. They take it for granted that the hard work they are putting in is profitable. Little by little the poor cows are being weeded out of the herds, but progress is slow. We need to use more universally the milk scales, the Babcock test and the lead pencil.

## Marketing Poultry.

Selling poultry is one thing that poultry growers will do well to give a good deal of study and attention. Much will depend on the manner anything is placed on the market. It is a fact that is most difficult to explain that some people will get a great deal more for poultry of no greater merit than others on the same market. There is a way to make the poultry presentable and in a way that does not appeal to the buyer. We have watched salesmen on the market and have observed the man who sells for the highest price. Before exposing his fowls for sale he has them well fattened, and just before he starts to market he thoroughly cleans their plumage and shanks so they will show up in a fine appearance. When he sells turkeys he always exposes each turkey in a coop by itself. The coop looks neat and there is no other turkey in that coop with which the purchaser can compare as to size and merit. The price is attached to that bird and it is sold; coop and all in some instances. By this method of selling the turkeys have plenty of room to show up well rather than in a cramped position. There is something in this way of presenting poultry to the view of the customer. Make them look well and they will sell well. Put on a good price and sell for that price. A small price leads the buyer to the belief that the bird is not right, and he becomes suspicious of it at once.

## Early Fattening.

Chickens of all ages are suitable for the table, many breeds being especially adapted for early and profitable killing. Take, for instance, the game varieties. From a fortnight old these are as plump as quail, and the black-red sorts in appearance are very similar to those much-sought-for and much-shot-at birds. Game chicken on toast is just as palatable as quail is in that quaint and savory form, and the poultry breeder who can regularly supply the proper sort of birds of the right age with regularity would be able to defray the expenses of his poultry establishment.

The earlier all birds intended for market are got rid of as they come into plump condition the better for the poultry-raiser's purse, and only the nearness of a specially favorable market should weigh with breeders in realizing on their stock promptly. But in any case no bird intended for killing should be kept on hand until over six months old. Young birds for table use will invariably realize better prices than will adults, and the difference in cost of feeding birds up to, say, three or months old, and those fully matured, will be found to be very considerable. Therefore it is a double advantage to fatten up quickly and sell off the birds as soon as they are in condition.

It is not so much the quantity of fluid in the milk pail that counts as does the number of butter globules it contains. Some cows are older and less profitable at eight years of age than others are at twelve. Difference in care is the cause of it.

The existence of the cattle disease known as bloody murrain in the vicinity of Santa Ana, Orange county, is a serious hindrance to the prosperity of the industry in that locality.

## Some Points of a Good Hog.

Prof. W. A. Kennedy, of the Iowa State College of Agriculture, says the following are some of the points a good hog should possess:

**Front Legs and Feet**—The legs should be short, straight, strong and squarely placed under the body. The pasterns must be short, straight, strong and the hog should stand well up on his toes. Many hogs are "knock-kneed," that is, the knees come too close together. This is a very common fault in many classes of hogs, but more especially in young animals, as it gets worse with age. Too much stress cannot be laid upon the set and strength of the legs.

**Chest**—This is a point which the butcher pays little or no attention to, but it is of vital importance to the breeder. Width and depth of chest gives stamina and constitution to the hog. The floor of the chest should be wide and close to the ground. There should be no falling away in the lower part, giving a "tucked in" appearance in the fore flank. A full and pendant hind flank is an indication of readiness for market.

**Hip**—The hips should be wide apart, low and smoothly covered with flesh.

**Rump**—The rump should be long, smooth and carrying width well back to tail head. There should be but very little depression or falling off from the hip joints to the tail head. Most hogs are inclined to drop off some but straightness in this region is desirable. In the eyes of many people a drooping rump in a hog is not considered to be objectionable. This must be due to the fact that they are more accustomed to seeing hogs of that formation than those straight or nearly so. More width of rump is found where the animal approaches straightness than is usually found in the animal possessing drooping quarters. The length of quarter to a certain extent seems to be governed by the same rule. Another very common objection, in fact one of the most serious faults to be found in a hog, is crooked hind legs and sprawly pasterns. The careful observer of animal form will soon notice that crooked hocks are nearly always associated with drooping rumps. Seldom, if ever, is the crooked hock found in the animal possessing a straight rump. Recognizing these points, is it not advisable for us to pay more attention to the breeding of hogs with straight rumps?

## Hold on to the Cow.

Perhaps it is not altogether to be regretted that when prosperity comes and nature smiles man is apt to forget the times of adversity. At the same time it is ungrateful, to say the least, to forget the instrumentality that pulled him through, and it is foolish to suppose that adversity is banished for good and prosperity will continue forever. It is not many years since the dairy cow stood between the western farmer and very hard times indeed. Money was scarce. Prices of grain, of beef cattle and other stock were low. Prospects did not seem very bright to the farmer. In this emergency the dairy cow stood between many a farmer and hardship. She brought in cash every week or every month. She bought shoes for the children, dresses for the women folk and—well, in some cases perhaps—beer for the men. She enabled some farmers to float over the period of depression and many a family to swim when with her they would have sunk.

The hard times have gone. The pig, the horse, the steer, grain, are all bringing good prices. Money is plentiful and cheap. Many farmers are earning a comfortable surplus. Under these conditions many a farmer is forgetting the good old cow that pulled him through. He is allowing the calf to run with her. He is forgetting that his children are not allowed to milk. The usefulness of the cow for the dairy is being destroyed. The turn of the tide comes and the farmer must turn to the cow again she

will not be able to serve him as she did before, not through any fault of hers but because of his neglect. Men cannot farm high priced land on horseback. Neither can they always afford to sit on the fence and watch the calf do the milking. — *Wallaces Farmer.*

After an experiment with feeding sugar beets and pulp to sheep at Ft. Collins station the following deductions are made: "Sugar beet pulp contains about ninety per cent of water, hence there is about 200 pounds of feeding material in a ton. Results showed about equal gains in weight for the dry matter in the corn and in the pulp when each were combined with alfalfa. Hence one ton of pulp is equal to 200 pounds of corn. Owing to the bulky nature of the pulp not enough of it can be consumed by lambs to produce sufficient fat to finish them, hence it should be fed to the greatest extent at the commencement of feeding. What is fed in the latter part of the feeding period should be used as an appetizer and a regulator of the bowels rather than for the fat it produces. Pulp fed in large quantities produces soft flesh. The matter of transportation is a very essential one for the farmer to consider in the utilization of pulp. For the profitable use the yards must be near the factory or to railway facilities. When large quantities of pulp are fed to animals confined in small lots the yards become very foul, much to the discomfort of the animals and loss to the feeder."

Strike!—if they don't give you Jackson's Napa Soda.

## THE OLD RELIABLE REMEDY

For Spavins, Ringbones, Splints, Curbs, etc., and all forms of Lameness in

THE ONLY CURE FOR BONE SPAVIN.

Perryville, Ark., Mar. 25, 1901.  
Dr. B. J. Kendall Co., Gentlemen—Please send me a copy of your "Treatise on the Horse and His Diseases." I have one of your books that a friend of mine gave me but it is a number of years ago and I am sure I can truly say that your Spavin Cure is the only thing that I have ever used on bone spavins that did the least particle of good. I saved a very fine mare by using same, and you may rest assured that I do not hesitate to recommend it to every one. W. G. McKean.  
Price \$1.50 per bottle. As a liniment for family use it has no equal. Ask your druggist for KENDALL'S SPAVIN CURE, also "A TREATISE ON THE HORSE," the book free, or address DR. B. J. KENDALL CO., ENOSBURG FALLS, VT.

LOOK YOURSELF  
SQUARELY  
IN THE FACE.

Be master of the situation. Let neither doubt nor influence prevent you from trying

## VETERINARY PIXINE.

It makes skeptics smile to read, but it makes a man marvel who turns to it after every known resource fails to cure chronic sores, abscesses and chafes. Ice, storms and rough roads develop scratches, grease heel and speed cracks. Veterinary Pixine counteracts effects of impure blood, penetrates to the depth of hardened fissures, sloughs off proud flesh, speedily soothes and will heal the severest and most chronic cases. Contains no gritty, harsh or poisonous substance. Money back if it fails.

2 oz., 25c; 8 oz., 50c; 5-lb. pkg., \$4.00.

At all druggists and dealers or sent prepaid.

TROY CHEMICAL CO., TROY, N. Y.

D. E. NEWELL, Pacific Coast Agent, 519 Mission Street, San Francisco.

## Growing Alfalfa Cannot be Taxed.

In Kern county the Assessor some years ago assessed the Miller & Lux firm \$60,000 for "alfalfa growing upon the land," which the owners claimed was illegal. The case was carried to the Supreme Court and last fall a decision was handed down which over-ruled the lower court. The decision stated that alfalfa, like fruit trees, has a permanent root, and the Court seems to hold that if the Legislature had intended to include the alfalfa plant among improvements it would have been specified as fruit trees and vines are specified. It therefore holds that neither the Court nor the Assessor has power to enlarge the definition of the Legislature by classing alfalfa as a taxable improvement.

A FIVE PER CENT SOLUTION  
of this Compound will KILL GERMS

of Distemper, Pink Eye, Epizootic, Catarrhal Fever and Influenza, under the microscope.

Given on the Horse's Tongue, it unites with the fluids of the alimentary canal, thrown into the Blood, passes through the Glands and expels the Germs of Disease. Absolutely safe and sure for Brood Mares, Baby Colts and all others. Do not depend on any other powder in this class of Diseases. Give it to Brood Mares in times of Distemper. Booklet, "Distemper, Causes, Cures and Prevention," free. Druggists and Turf Goods Houses sell Spohn's Cure. Fifty cents; \$5.00 per dozen.

## The Northboro Woolen Mills.

Chapinville, Mass., Nov. 21, 1901.

Railroad Station Telegraph and Express Offices Northboro, Mass.

Troy Chemical Co., Troy, N. Y.:  
Gentlemen—I purchased several bottles of "Save-the-Horse" Spavin Cure for myself and friends during the last four months. The first case on which I used it was a bad splint, and to my astonishment it not only took out the soreness but removed the splint.

Second case—My brother-in-law had a valuable mare with a bone spavin, and at my suggestion he tried "Save-the-Horse." In this case the bone is not entirely removed, but all the soreness and lameness is gone, and the mare travels as sound as a colt.  
Third case—I tried it on the well-known black pacer "Alhambra," record 2:08 1/2, sired by "Legal Tender, Jr." This horse was lame when I purchased him, with a strained tendon on high hind leg. I tried all kinds of liniment before using yours; yours at \$5 per bottle seemed a pretty high price; but I had to come to it, as none of the other liniments had done any good. I used one and a half bottles of "Save-the-Horse," and he seems to be entirely cured. I have him out every day and hardly ever take a ride but he gets one or two brushes before getting home. All I can say is that "Save-the-Horse" has done splendid for me, and I know of nothing its equal. Very truly,  
E. W. Chapin

ELIZABETH WAGON WORKS,  
B. F. STRAUSS, Prop'r.

35-41 South Spring Street,  
ELIZABETH, N. J.

Troy Chemical Co., Troy, N. Y.:  
Gentlemen—With three bottles of "Save-the-Horse" I removed a thoroughpin on one leg and cured a spavin on the other leg on one of my horses. I appreciate what "Save-the-Horse" has done in my case, and will show the horse to any one who desires to see it. Very truly,  
B. F. STRAUSS, Prop'r.

Horse can be worked with either shin or ankle boots, as no harm can possibly come by either destruction of hair or scalding of the limb. "Save-the-Horse" can be applied in all conditions and extremes of weather—hot or cold.

POSITIVELY AND PERMANENTLY CURES Bone and Bog Spavin, Ringbone, Curb, Thoroughpin, Splint, Capped Hock, Shoe Boil, Weak and Strained Tendons and all Lameness.

Contains no arsenic, corrosive sublimate or other forms of mercury, or any injurious ingredient.

Cures without scar, blemish or loss of hair.

\$5.00 PER BOTTLE.  
Written guarantee with every bottle, constructed to convince and protect you fully. The need of second bottle is almost impossible except in rare cases. Guarantee covers effectiveness of one bottle.  
Copy of guarantee sent upon application.

\$5.00, all druggists and dealers, or sent prepaid.

Manhattan Food Co.

1253 Folsom St., San Francisco

Ask your grocers or dealers for it.

## Growing Pigs.

The pigs that grow are the pigs that pay. If skim milk be fed to pigs that run to grass, one hundred pounds will make one-third more increase in weight than when fed to pigs not on grass.

If the pigs root out, dig a trench one foot deep beside the fence and tack poultry nets to the posts. Their sensitive noses will avoid it.

A good trough for little pigs will be made of a long narrow and shallow box of any kind. The first feed of wet bran will make it milk tight.

Don't keep 'em in a narrow nasty pen. Next to grass nothing grows pigs so fast with skim milk as corn meal, says the New York Experiment Station.

The squealer isn't the best feeder. Don't raise this type.

At ruling prices the breeding up of choice droves should be given a great impetus.

Notice if the English and American full Berkshires crossed are not among the quietest and most profitable stock.

Keep the sow for a breeder until she becomes awkward and too heavy if she produces good litters.

Pick up early fall pigs and winter them in warm pens on skim milk and oil meal. Dress and sell in the earliest spring at about 125 to 150 pounds, before prices drop too far.

Ring the pigs that are in the orchard. Then protect the tree trunks if they manifest a disposition to peel them.

A high bred sire ought to enrich a farm \$1000 if used right.—*Farm Journal*.

## Beef Cattle Sold.

The finest herd of Kings county beef cattle sold in Hanford this year was that sold by Thos. Gordon of Excelsior district to N. W. Hammond, the stock buyer, last week—forty-four head of two year olds—which brought him \$1946.26, or an average of \$44.22 per head. Last year Mr. Gordon sold forty-five head of three year olds that brought \$61 each. He breeds Durham stock only and says they bring the best results for beef.—*Hanford Journal*.

Skim milk is pasteurized, cooled to seventy degrees, a "starter" put in and it is allowed to thicken or clabber; the milk and prepared oil are mixed together, a perfect emulsion or churning; finally this emulsion is dropped from quite a height into almost freezing water, where it granulates, and it is then worked and salted as ordinary butter; this renovating causes it to sell for three cents more per pound than before the renovating.

Cows should be salted regular both in summer and winter, but with the green, succulent grass it is especially desirable. Some have it where it can be got at as wanted; others feed at stated times, but at any rate give it to them and all that is needed. Also there should be plenty of good clean water where it can be got at without too much trouble. This is a necessity where the best results are expected in milk.

Always keep an eye on the bull. A bull should always be regarded as dangerous. Under certain conditions and circumstances he is. Like the gun that is not loaded, the bull that is harmless usually does injury. The bull that is known to be cross and dangerous seldom does injury, since he is watched very closely.

The improvement in dairy utensils and conveniences for handling and managing milk and cream has vastly lessened the labor in the dairy while the cost is within the reach of all. Their adoption, and care in all of the details of management in butter making, will materially aid in securing a uniform good article.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Every feature connected with the **PALACE HOTEL** was designed and introduced for a double purpose—surrounding guests with comforts, conveniences and entertainment, and adding to the popularity and reputation of

### California's Colossal Caravansary.

In the center of the hotel is the famous court and off of this are the equally famous grill rooms. For your convenience telephone and telegraph offices, writing and reading rooms, barber shop, billiard parlor, carriage office, news stand and typewriter offices are directly off the court. Outside—the whole sale and shopping district, theaters, clubs, banks and railroad offices are a step from the entrance.

## ROOS BROS OUTFITTERS TO MEN BOYS 25 to 37 KEARNY ST. at POST

### FOR SALE.

Having concluded to retire from the business of breeding trotters, I have decided to sell all my horses, including the famous stallions

### Richard's Elector 2170

Sire of 16 in the list, son of Electioneer and Gilberta by St. Clair.

### L. A.

Sired by Richard's Elector, dam by Butterfield's St. Clair, second dam by Williamson's Belmont.

### Electric

Sired by Richard's Elector, dam by Yorktown (son of Speculation), second dam by Blackhawk 767.

These horses are in perfect condition and are offered at very low prices. Colts and fillies by these sires will be shown at my place, Grayson, Stanislaus county. For further particulars, prices, etc., address

L. A. RICHARDS, Grayson, Cal.

### FOR SALE.

### Three Standard-Bred Trotting Stallions WILKES STOCK.

One Seal Brown, 16 hands, foaled May 2, 1898; first dam Fearless by Fallis 4781 (record 2:23); second dam Jean Perault by Signal 3327.

One Golden Bay, 16.1 hands, foaled March 5, 1898; first dam Signal by Del Sur 1098 (record 2:24); dam of Guy Sine 2:29 1/4; second dam Lady Signal by Signal 3327.

One Brown, white points, 16.1 hands, foaled April, 1898; full brother to the bay.

These colts are all sired by Prince Airlee 28045, son of Guy Wilkes 2807 (record 2:15 1/4), and bred by Wm Corbett, San Mateo, Cal. They are pure bred and show wonderful speed for the little work they have done.

For further particulars apply to

P. H. McEVROY, Menlo Park, Cal.

### SONOMA PRINCE FOR SALE---\$600

CLYDESDALE STALLION, SIBED BY POLLOCK, he by Model Prince. Dam imp. Frodo of Cree. SONOMA PRINCE took first prizes at the California State Fair as suckling, yearling, two year old and three year old. He is one of the grandest looking draft stallions in California and a sure foal getter. His sire Pollock is the winner of six first prizes and the sire of 11 first prize winning colts. Pollock holds the champion walking match record at the State Fair with one ton of weight to a wagon with a driver. Apply to owner, D. M. FRAME, Lakeport, Lake Co., Cal.

## STAM B. 2:11 1-4 (TROTTER.)

REG. NO. 23444.

3-YEAR-OLD RECORD, 2:15 1-2  
(Timed second in 2:12 1/4)  
4-YEAR-OLD RECORD, 2:11 1-4  
(Timed second in 2:09 1/2)  
2-YEAR-OLD TRIAL, - - 2:26

Early speed is natural speed, and natural speed is inherited speed.

Reach for the top by breeding a good mare to STAM B.

Your chances are good for a 2:02 trotter or a Futurity winner, extra good for a handsome show or coach horse. It is a well-known fact that Baron Wilkes 2:18 has been recognized for years as the leading money-winning sire, and his blood and the blood of STAM B. is among the leading early speed performers, so much so that that well-informed and successful breeder, the late Col. R. G. Stoner, contemplated purchasing STAM B. as stud companion for Oakland Baron 2:03 1/4. Such blood produced Rhythmic 2:08, Baron Deshay 2:08 1/2, Gail Hamilton (3-year-old) 2:12, Peter Stirling (3-year-old) 2:14. By tabulating STAM B.'s pedigree, it is impossible to do so without figuring in all the champion performers' records—1:59 1/4, 2:01 1/4, 2:01 1/4, pacing; 2:02 1/4, 2:03 1/4, 2:03 1/4, 2:04, trotting—and the once champions of the show ring, Stamboul 2:07 1/4, Mambrino King and Almont Lightning, and such young Futurity performers as Champion Girl 2:12, Bugle (3-year-old) 2:14, Oxford Boy (2-year-old) 2:20, Wiggins (2-year-old) 2:19 1/4, sire of Katherine A. (4-year-old) 2:14, Hilgar (2-year-old) 2:15 1/4, Wigwag (3-year-old) 2:16 1/4.

STAM B. was sired by Stamboul 2:07 1/4, sire of 47 from 2:10 1/4 to 2:29, sons and daughters (24 from 2:07 1/4 to 2:27), showing that his blood breeds on and down. With his few foals, he compares favorably with the leading sires of the past. First dam Belle Medium 2:20 (dam of 3 from 2:11 1/4 to 2:30) by Happy Medium, sire of Nancy Hanks 2:04; 55 of his sons produced 282 from 2:07 1/4 to 2:30; 58 daughters produced 78 from 2:10 to 2:30, including Admiral Dewey (3-year-old) 2:15. Second dam Argenta (dam of 1 in 2:30) by Almont Lightning, sire of 1 in the list and dams of Zombro (3-year-old) 2:11 and King Princes 2:15 by Almont 33. Third dam Mary Adams by Mambrino Patchen, sire of dams of Guy Wilkes 2:15 1/4, Baron Wilkes 2:18, Patchen Wilkes 2:20, etc. Fourth dam Mambrino Belle by Mambrino Chief 11, sire of Lady Thorne 2:18 1/4 and dams of Director 2:17, sire of Directum (4-year-old) 2:15 1/4, Onward 2:25 1/4, sire of Beuzetta (4-year-old) 2:06 1/4. Fifth dam by Mason's Whip (thoroughbred).

Can it be possible that the service of such a bred stallion can be secured for such a low fee? Yes, for this season only. Grasp such a rare opportunity! STAM B. has the characteristic of transmitting speed, soundness, size and style, as his ancestors have size, soundness, speed and style. He is a handsome bay, two white hind ankles, 15 1/4 inches high, weight 1080 lbs., a typical Morgan in form, of the greatest stamina and of powerful muscular development. As a living game racehorse he is known nationally. In his career he beat such noted trotters as Klamath 2:07, Kentucky Union 2:07 1/4, Toggles 2:08 1/4, Altas 2:09 1/4, Jasper Ayers 2:04, Monterey 2:09 1/4, Zombro 2:11 and Stamboul 2:10 1/4. STAM B. 2:11 1/4 will make the season of 1903 at that well-appointed farm,

SANTA RITA FARM, PLEASANTON, CAL.

**Terms \$40 SPOT CASH**, at time of service. Best of care taken of mares and foals, but no responsibility for accidents or escapes. The public is cordially invited to attend our receptions at all times from February 15th to June 1st and see our gems.  
For extended pedigree and further particulars address

SAMUEL GAMBLE, Pleasanton, Cal.

## BY MACK By McKINNEY 2:11 1-4

Dam BY BY by NUTWOOD.

McKinney 2:11 1/4 (sire of Coney 2:02, You Bet 2:07, Charlie Mac 2:07 1/4, Jennie Mc 2:09, The Roman 2:09 1/4, Hazel Kinn-y 2:09 1/4, Dr Book 2:10, 22 in 2:15 list and 50 in 2:30 list); By By by Nutwood 600 (champion of all sires); grandam Rapidan (dam of Lockheart 2:08 1/4, Rapid 2:22 1/4, Capt. Mac 2:29); great grandam Madam Headley, dam of Export Prince 2:13 1/4.

BY MACK is one of the Best Bred Sons of the Great McKinney.

**Terms: \$25 for the Season.** Pasturage \$3 per month. No barbed wire fences. Usual Return Privileges.

For further particulars address

A. DONOUGH, Reclamation Station, Cal.

Ship mares to A. DONOUGH, Reclamation Station (California and Northwestern Railroad).

## CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is a very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 percent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its merits and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY. It is a quick and sure cure for the most troublesome cracks under the fetlock which injure and often ruin race horses.

All Trainers Should Have It in Their Stables.

PRICE—3 OZ. BOX, 75c; 1 LB. BOX, \$1.00.

Read our 'Gall Cure' Horse Foot Remedy in next issue of this paper.

JAS. B. CAMPBELL & CO., Mfrs., 412 W. Madison St., Chicago, Ill.

**Pedigrees Tabulated** and type written ready for framing. Write for prices. BREEDER AND SPORTSMAN, 36 Geary street, San Francisco, Cal.

## SEARCHLIGHT 2:03 1/4

THE FASTEST STALLION BY THE RECORDS EVER  
OFFERED FOR SERVICE ON THE PACIFIC COAST.

He still holds the World's Records for 4-year-old (2:04 1/2) and for 5 year-old (2:03 1/4).

SEARCHLIGHT is one of the fastest and gamest horses that ever raced on the Grand Circuit. He is a horse of rare individuality and is one of the most perfect specimens of horseflesh ever foaled. He has repeatedly beaten one minute to the half-mile pole in his work, and has pulled the heavy cart in which he now takes his exercise a half in 58 seconds with a dozen watches held on him.

Few stallions that ever stood for service in California have such royal blood lines. Darknight, the sire of SEARCHLIGHT, was like the great McKinney, a son of Alcione, and is a sire of extreme speed, having four 2:10 performers to his credit. The dam of SEARCHLIGHT is one of the great brood mares, having four with standard records and his grandam and great grandam are both in the great brood mare list. His oldest colts, now two years old, show that he imparts these qualities to his get, and he is certain to be a producer of early and extreme speed as well as size and good looks.

**Terms for the Season, \$75.**

## LECCO 2:09 3/4 The Blood that produced Dan Patch 1:59 1/2

LECCO 2:09 3/4 is a very handsome black stallion, a square trotter and as game a racehorse as ever looked through a bridle. He is by Bonnie Boy, one of the best producing sons of Patchen Wilkes, sire of the great Joe Patchen 2:01 1/4, that in turn is the sire of the unbeaten Dan Patch 1:59 1/2. The dam of LECCO is a great brood mare by Homer, and his second dam is a producing mare by Rochester and his third dam is a producing mare by Clark Chief. For four generations in the pedigree of LECCO there is not a sire or dam but is a producer of standard speed.

LECCO made a campaign through the Grand Circuit in 1899 that shows his wonderful speed and gameness. He met the best horses out that year and in seven starts won four first moneys, two seconds and was but once unplaced. His action is perfect and he cannot help siring a family of high class, handsome, fast and game trotters.

**\$50 for the Season.**

The above horses will stand at the PLEASANTON RACE TRACK, and all mares not proving with foal may be returned free next year, or in case the horse is not in California the service fee will be returned. It is the intention of the owner, however, to keep both SEARCHLIGHT and LECCO in this State for the next four or five years. Due care taken to prevent accidents or escapes, but no responsibility assumed should any occur. Good pasturage provided at \$4 per month, and all bills payable before mare is removed from my possession.

For further particulars and tabulated pedigrees address

EDW. MILLS, Rose Hotel, Pleasanton, Cal.

## NUSHAGAK

Reg. No. 25939

Black Horse 15-2; hands. Foaled 1890.

BRED BY WM. CORBETT.

ARISTO (3) 2:17 1/2 winner of  
and Stanford Stakes, 1902

MAJELLA B. (2) 2:29 Trial (4)  
2:13 1/4

THE BOQUET Trial (3) 2:21  
in 1902

Brown Filly Trial 2:20 1/4 as a  
4-yr-old in 1902

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15 1/4, Sabina 2:15 1/4, Sabledale (at 2 years) 2:18 1/2, Buffington (at 2 years) 2:20 1/4 and 36 others in 2:30 list. Dam, Fidelia (trial 2:35 at 2 years), dam of Fidette 2:38 1/2, dam of Mary Celeste (at 2 years) 2:17 1/4 by Director, sire of Directum 2:05 1/4, Direct 2:05 1/4, Nathan Straus 2:05 1/4, Direction 2:08 1/4, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H. 2:12 1/4, etc. Third dam by Lanet, son of McCracken's Blackhawk 705.

NUSHAGAK's sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro Wilkes 2:11 was one of the gamest colts that ever raced down the Grand Circuit. The Wilkes and Director blood is a successful cross as it has produced John A. McKerron 2:05 1/4, Nathan Straus 2:05 1/4, Ozanam 2:08, Dollade Wilkes 2:10 1/4, Oro Wilkes 2:11, Evangeline 2:11 1/2, Mary Celeste (at 2 years) 2:17 1/4, etc. Fidelia, NUSHAGAK's dam, is in the great broodmare list and she would have been a very fast trotter if given an opportunity, as with very little training she trotted a mile in 2:35 as a two-year-old. Mr. Corbett purchased her from Mr. Goldsmith for a broodmare, consequently her training was discontinued. The get of Reavis' Blackbird, the sire of NUSHAGAK's second dam, were noted for their remarkable gameness and vigorous constitutions. His two noted daughters, Mamie Griffin 2:12 and Vic H. 2:12 1/4, were exceedingly game. NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17 1/4, Majella B. (2) 2:29 (trial at 4 years 2:13 1/4), and The Boquet (trial at 3 years) 2:21. His other colts that have been handled some are: Brown filly, 4 years old in 1902, showed trial of 2:20 1/4 with three and one-half months' work; big g, 3 years old in 1902, with three months' handling showed mile in 2:35 1/4, last quarter in 35 1/2 seconds. His son Aristo (at 3 years) 2:17 1/4 took sick with the shingles the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake. Before taking sick we felt confident that Aristo would trot a mile close to 2:10 in his three-year-old form; the way he raced after being sick made us feel satisfied that we had made no mistake in our estimate of him. His third heat in 2:17 1/4 was equal to 2:13 1/4 or 2:14 over the Woodland, Santa Rosa or Stockton tracks.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

**Limited to 40 outside mares, at \$50 the Season,**

with usual return privilege if mare proves not with foal. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed should any occur. First-class pasturage for mares, \$3 per month; no barbed wire. Address

WALNUT GROVE STOCK FARM,

Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morshead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

### PALO ALTO TWO-YEAR-OLD SALE.

The greatest sale of standard-bred two-year-olds held in California for years was the dispersal sale of the Palo Alto two-year-olds by Fred H. Chase & Co., the live stock auctioneers at 1732 Market street, San Francisco, on Thursday evening of this week. The new pavilion at this popular salesyard seats 1000 people, and not only were these seats crowded to their utmost capacity, but two or three hundred chairs were brought in and occupied, while hundreds had to stand and crowded into the salesring. It was a crowd the like of which has not been seen at a sale since the old days, and there were present merchants, capitalists and farmers from all parts of the Coast, besides a number of Eastern gentlemen of wealth, who are sojourning on the Coast and who own stock farms and are interested in breeding the American trotting horse.

Among the leading buyers at the sale were Mr. Jas. Coffin, the well-known sugar merchant of this city; Mr. Martin Carter, capitalist, breeder of John A. McKerron 2:05½ and proprietor of the Nutwood Stock Farm; Monroe Salisbury, who is back in the business after a few years' retirement, and expects to have a few more as good as Alix 2:03½, Azote 2:04½, Directum 2:05½ and Direct 2:05½, all of which made records while in his string of campaigners; Mr. F. C. Lusk, the well known attorney and capitalist of Chico, and Mr. Alex Brown, proprietor of Walnut Grove and breeder of last year's Occident and Stanford winner, Ariston 2:17½, that led all the horses campaigned in California last year in the amount of money won. It would not be possible to give the names of all the prominent horsemen and breeders present in the audience of 2000, but nearly everyone of prominence in the State was there, and there was a general verdict that the sale was a success from every point and evidence that the harness horse is more popular than ever with the better class of citizens.

The arrangements made for the sale by Mr. Fred H. Chase & Co. were as near perfect as possible and they were certainly favored by the weather, and the big rain storm that has visited this coast during the present week cleared off beautifully a day before the sale and did not resume business until Friday morning.

Superintendent Covey brought the entire consignment of 49 two-year-olds up from the farm in fine shape and everyone was led into the ring sound and all right. Mr. Covey announced the breeding of each colt as brought in and touched briefly upon the great speed producing families from which they came.

Auctioneer Hord was in good voice in spite of a cold and kept the audience in good humor by his witty sallies and pleasant coaxing of "just one more bid" from the timid buyers.

The highest price of the sale was paid by Mr. Jas. Coffin of this city for the magnificent colt Cassian, a big bay fellow with white hind feet. \$1300 was the bid that secured this two year old that is by Mendocino (son of Electioneer and Mano by Piedmont) out of Cressida (3) 2:18½ by Palo Alto 2:08½, second dam the great broodmare Clarabel by Abdallah Star, third dam by Hambletonian 10, fourth dam by American Star. Cassian is entered in the following big stakes: Horse Review, \$10,000, 1903-04; Kentucky Stock Farm, \$7500, 1904; Kentucky Futurity, \$21,000, 1903-04; Hartford Futurity, \$11,000, 1904; Terre Haute Matron, \$10,000, 1903-04. He is a very high class colt and while like all these two year olds has never been trained, he showed speed enough when being broken to warrant the belief that he would take a low record if raced, while his individuality and breeding are such that he is fit to head any stock farm.

Monroe Salisbury, who campaigned Monte Carlo 2:09 on the Grand Circuit last year and refused \$12,500 for him before bringing the gelding home, wanted more Mendocinos. He paid the next highest price of the sale, \$1100, for Corleone, a splendid bay colt by Mendocino out of Coralie by Boodle 2:12½, second dam Coralie, dam of Corleone 2:20, and own sister to Anteco, Antevolo and others, by Electioneer. This colt's engagements are the Horse Review, \$10,000, 1903-04; Kentucky Futurity, \$21,000, 1903-04 and the Terra Haute Matron, \$10,000, 1903-04. Mr. Salisbury also purchased Mensel, a good looking chestnut colt by Mendocino out of the great broodmare Anselma by Ansel 2:29, second dam Elaine 2:20 (dam of Iran Alto 2:12½) and four others, by Messenger Duroe, third dam the good Green Mountain Maid, dam of Electioneer, second dam Bright four head, all by Mendocino.

Martin Carter secured Excella, a very fine filly out of Expressive 2:12½ for \$910, and Mr. Brown of Walnut Grove purchased Lauress by Mendocino out of Laura Drew (dam of Freedom the

first yearling to beat 2:30) and the gray filly Serpolo by Mendocino out of famous old Sally Benton. Both these gentlemen, following the line they have laid down to secure choice blood for their breeding farms, purchased these fillies to mate with their stallions, and Excella will be bred to Nutwood Wilkes and Serpolo and Lauress to Nushagak.

Mr. F. C. Lusk, of Chico, got some of the best bargains of the sale. He secured the colt Moormont by Azmoor out of Rosemont (great broodmare by Piedmont) for \$450, and purchased several large handsome fillies at low prices.

The beauty of the sale, to the writer's mind, was the colt Monbello that went to the \$650 bid of Mr. W. Ladd, of Hollister. Monbello is by Monbells 2:23½ (son of Mendocino and Beautiful Bells) out of Laura C. 2:29½, dam of two with records better than 2:15, by Electioneer; second dam Fanny Lewis, thoroughbred mare by imp. Buckden. Monbello is a beautiful dark bay and should make a great stock horse, and should also trot to a low record.

The total amount received for the 49 head was \$14,915, an average of \$304.75 per head. The record of the sale is as follows:

#### COLTS.

Avelon, b c by Mendocino-Avena by Palo Alto, to C. J. Berry of Fresno for \$500.  
Corleone, b c by Mendocino-Coralie by Boodle, to M. Salisbury of San Francisco for \$1100.  
Mensel, ch c by Mendocino-Anselma by Ansel, to M. Salisbury of San Francisco for \$675.  
Nazon, b c by Nazote-Aria by Bernal, to J. M. Hurd of San Francisco for \$550.  
Moormont, b c by Azmoor-Rosemont by Piedmont, to F. C. Lusk of Chico for \$450.  
Monbello, b c by Monbells-Laura C. by Electioneer, to W. Ladd of Hollister for \$650.  
Loring, blk c by Nazote-Ladywell by Electioneer, to F. M. Frary of Red Bluff for \$300.  
Cassian, b c by Mendocino-Cressida by Palo Alto, to James Coffey of San Francisco for \$1300.

#### GELDINGS.

Wildbell, br g by Wildnut-Bell Bird by Electioneer, to F. Ruhstaller of Sacramento for \$150.  
Alzor, b g by Altivo-Zorilla by Dexter Prince, to F. Ruhstaller of Sacramento for \$100.  
Sablealto, br g by Altivo-Sabling by Guy Wilkes, to Ike Deutsch of San Francisco for \$155.  
Wilmar, b g by Wildnut-Sweetwater by Stamboul, to J. F. Smith of Ukiah for \$175.  
Merrilan, br g by Wildnut-Maiden by Electioneer, to C. McCosky of San Francisco for \$175.  
Amos, blk g by Wildnut-Lady Agnes by Electioneer, to Ike Deutsch of San Francisco for \$150.  
Ellwell, ch g by Wildnut-Etta B. by Lottery, to Olsen Co. of San Francisco for \$105.  
Dexterville, ch g by Nazote-Dextress by Dexter Prince, to Thos. Ganeard of Stockton for \$150.  
Carmello, blk g by Wildnut-Carrie C. by Electioneer, to J. McCormick of Rio Vista for \$115.  
Claro, ch g by Mendocino-Clarion by Ansel, to Monroe Salisbury of San Francisco for \$300.  
Floristo, br g by Altivo-Flower Girl by Electioneer, to E. Jenkins of San Francisco for \$160.  
Elberon, ch g by Nazote-Ella by Electioneer, to J. Hodgkins of Stockton for \$170.  
Manos, b g by Altivo-Mano by Piedmont, to E. B. Towne of Palo Alto for \$110.  
Namar, br g by Nazote-Marion by Piedmont, to F. E. Wright of Sacramento for \$135.  
Azwood, b g by Azmoor-Alteewood by Altivo, to G. Gertner, San Francisco for \$105.  
Murphy, in g by Azmoor-Maggie R. by Billy Newell, to G. W. Condon for \$100.

#### FILLIES.

Serpolo, gr f by Mendocino-Sallie Benton by Gen. Benton, to Alex Brown of Walnut Grove for \$675.  
Excella, b f by Monbells-Expressive by Electioneer, to Martin Carter of Irvington for \$610.  
Ariola, b f by Mendocino-Aerolite by Palo Alto, to Monroe Salisbury for \$410.  
Alfana, ch f by Altivo-Wilfan by Mambrino Wilkes, to R. McGarvey of Ukiah for \$130.  
Allemtot, b f by Altivo-Wildmont by Piedmont, to Walter Maben of Los Angeles for \$145.  
Azar, b f by Azmoor-Sylla Barnes by Whips, to W. H. Pelton, Elmhurst for \$100.  
Rosote, br f by Nazote-Sweet Rose by Electioneer, to F. C. Lusk of Chico for \$270.  
Alista, b f by Altivo-Novelist by Narval, to T. F. Ricks of Eureka for \$290.  
Namenta, br f by Nazote-Memento by Electioneer, to Jos. Hill of Berkeley for \$220.  
Aloree, ch f by Altivo-Melrose by Sultan, to J. A. Clark for \$140.  
Altroso, ch f by Altivo-Lustroso by Boodle, to Martin Carter of Irvington for \$180.  
Lucretia, blk f by Nazote-Lucyneer by Electioneer, to O. Rich of San Francisco for \$510.

Aliska, br f by Altivo-Liska by Electioneer, to Jos. Hill of Berkeley for \$200.

Allie Thorn, blk f by Altivo-Lilly Thorn by Electioneer, to F. C. Lusk of Chico for \$170.

Azena, b f by Azmoor-Lena by Dexter Prince to W. P. Walkup for \$110.

Lauress, ch f by Mendocino-Laura Drew by Arthur-ton, to Alex Brown of Walnut Grove for \$725.

Nazia, b f by Nazote-Gertrude Russell by Electioneer, to F. C. Lusk of Chico for \$200.

Emira, b f by Nazote-Emeline by Electioneer, to F. E. Wright of Sacramento for \$160.

Corsicano, b f by Wildnut-Corsica by Dexter Prince, to John O'Keefe for \$235.

Clarette, blk f by Azmoor-Clarionette by Dexter Prince, to B. F. Wellington for \$180.

Atalene, br f by Nazote-Athena by Electioneer, to James Faris, Jr., of Sacramento for \$260.

Altosa, blk f by Altivo-Asombrosa by Azmoor, to Jos. Hill of Berkeley for \$200.

Arios, ch f by Mendocino-Ashby by Gen. Benton, to Jas. Coffin of San Francisco for \$450.

Nara, ch f by Nazote-Arodi by Piedmont, to F. C. Lusk of Chico for \$280.

Azina, b f by Azmoor-Nina by Piedmont, to D. Lynn for \$200.

#### An Electioneer in the Stud.

"The sweetest gaited trotter that ever turned for the word," is the way a horseman described Alta Vela, son of Electioneer, when he reduced his record to 2:11½ in the second heat of a race which he won at Stockton last September. One of the remarkable things in connection with this record is that Alta Vela was fourteen years old at the time, at which age few horses, especially stallions, are still racing on the circuit. Alta Vela was bred at Palo Alto Stock Farm, and is one of the few stallions by Electioneer that is now standing for public service in this State. His dam was Lorita 2:18½ by that successful race horse and sire Piedmont 2:17½, and his second dam the great broodmare Lady Lowell (dam of Ladwell 2:16½ and Lorita 2:18½) by Shultz's St. Clair, third dam Laura, the dam of Doc, the horse that sired Senator Stanford's first champion trotter, Occident 2:16½.

Alta Vela was used as a road horse for years in San Francisco and finally became the property of a young man who was a member of the Golden Gate Park Driving Club. In the club races Alta Vela soon showed that he was a trotter of no mean order, even though he had seen hard service over the roads, and in 1900 he was entered in the regular races on the California circuit. He closed that season with a record of 2:15½, which he reduced the following year by a quarter of a second. Last season he started in seven races on the circuit in the free for all classes. He won three races, was second in one and got third money three times. His record of 2:11½ was made at Stockton in the second heat of a race which he won and in which he defeated Petigru 2:10½ and Vic Schiller 2:11½. Alta Vela was purchased last week from S. H. Hooper by Mr. F. Gomet of this city, who has placed him in Hans Frelson's hands. Alta Vela will make a season in this city at Mr. Frelson's stables at Cassidy's on Point Lobos avenue. The service fee will be \$30. The blood of Electioneer is increasing in value every year and the chance to obtain it through a son that is a fine individual, and a game race horse with a fast record, is one that should not be overlooked by breeders. As Alta Vela has only been stood for limited public service during the past three years, his colts are not numerous, but he is a very certain horse and all of his get are large and show speed.

#### No Experiment.

Campbell's Horse Foot Remedy has been more extensively used during the last twenty years than any other, and it is no exaggerated statement when we say that a greater quantity of it has been sold during this period than the combined sales of all other hoof remedies. The merits of Campbell's Horse Foot Remedy have never been questioned. It will do all that is claimed for it, and a 50-page book would not contain the testimonials which have been received from celebrated trainers, prominent horse owners, veterinarians, teamsters, business firms, fire departments and public and private corporations.

William G. Layng will hold his first sale of trotting bred stock of the new year at the Occidental Horse Exchange 246 Third street, this city on Thursday February 5, 1903, commencing at 11:30 A. M. There are twenty-five grandly bred trotters and pacers in this consignment among them many valuable prospects sired by Antrim (sire of Anzella 2:06½, the greatest money winning mare of 1902), Oro Wilkes 2:11, Dictator Wilkes, Hawthorne, Brino Tricks 2:13, Wyoming Chief, etc. There will be sold also a number of fine double teams perfectly matched and single drivers. Also fifteen head of draft and all purpose horses and a number of first class vehicles, carts, harness, etc. All the harness horses will be shown to halter alongside a saddle horse, that buyers may see their gaits and get an idea of how they can go. There are some great prospects in this sale.

Like all good things, Jackson's Napa Soda has a dozen counterfeits.

## Notes and News.

John Pender is training McBriar 2:14 at Portland.

A full brother to Cresceus is said to be a very fast pacer.

The date set for the Haywards horse show is March 7th.

Bonnie Direct 2:05½ is being jogged at Pleasanton and looks in fine shape.

It is said that M. W. Savage, the recent purchaser of Dan Patch 1:59½ has insured the horse for \$112,000.

Costello 2:24½ by Echo will make the season of 1903 at Ukiah. His colts are very handsome and stylish horses.

James Thompson says he will take a carload of fast trotters and pacers to the Blue Ribbon sale at Cleveland in May.

Geo. B. McAuley, of Spokane, has purchased the fast pacer Le Roi 2:10½ by Altamont out of Bob, the dam of Klamath.

Sam Hoy recently purchased a four year old stallion by Demonio, the full brother to Diablo, that is a fine looker and a good prospect.

Tom James has booked quite a number of good mares to his grandly bred horse Barondale 2:11½ and the horse has already served one or two.

Nutwood 2:18½ is represented in the 2:15 list by but four trotters, as follows: Lockheart 2:08½, Commodore Porter 2:13, Blake 2:13½ and Salena F. 2:14½.

A two year old pacer by Direct out of a mare by Robert McGregor was driven a quarter in 35 seconds by Bert Webster at Pleasanton the other day.

The filly by Sable Wilkes out of the champion mare Alix 2:03½ is a pacer and said to be very promising at that gait. She will be four years old next August.

It rained over three inches at Pleasanton on Tuesday of this week, and the track was in such good shape Wednesday that the boys were stepping the horses some fast quarters.

Loupe Carrillo has another bunch of horses at Pleasanton from the Shippee ranch. Carrillo takes a dozen head to the track every spring and has them all sold before summer.

J. Michin, the venerable veterinary surgeon of Goshen, New York, who held the watch the day that Dan Mace gave Lady Thorn that now famous fast trial, says the mile was in 2:11½.

Royal R. Sheldon 2:04½, the fast pacer by Constantine 10870, that made his record in August 1901 at Glens Falls, New York, is now at Pasadena in this State. His owner died there last week.

The California bred pacers Goshen Jim 2:10½ by Moses S. and Hermia 2:19½ by Soudan are being driven to pole on the snow path at Minneapolis by their present owner, Mr. Al Gluck, of that city.

J. A. Middleton, of Shelbyville, Kentucky, is in very bad health and has decided to close out his stock farm. He owns Gov. Pacheco, a full brother to Palo Alto 2:08½, and Electric, own brother to Arion 2:07½.

Farmer Bunch moved up to Pleasanton last week with a string of trotters and pacers from the Meek Farm, Haywards. They are mostly by the farm's stallions, Welcome 2:10½ and Wm. Harold 2:13½.

John Dickerson is now trainer at Hillandale Stock Farm, near Mamaroneck, N. Y., the home of Bellini 2:13½. His brother, Will Dickerson, is still at the Parkway Farm, Goshen, N. Y., the home of Joe Patchen 2:01½.

Every horseman who goes to Pleasanton comes back with a good word for Ed Mils' stallion Lecco 2:09½. This horse should have a goodly number of mares sent to him this year, as he carries high class blood that is scarce in California.

Thornway was driven a quarter in 31½ seconds one day last week at Pleasanton by James Thompson, and Col. Kirkpatrick is confident that his grandly bred son of Steinway will yet get a low mark. He never looked better than now.

A number of young horses by Welcome 2:10½ and William Harold 2:13½ have been taken up on the Meek Farm at Haywards and are being broken and taught to work single and double. There are always some good ones for sale at this farm.

Secretary Gocher, of the National Trotting Association, writes that his book, "Tales of the Turf," will soon be off the press. It is a compilation of the stories told by the late William B. Fasier, who was probably the most widely known horseman in the world and the most popular. He wrote many good stories during his eventful life, and these have been preserved to the horse world by Mr. Gocher.

One of the fastest young things at Maplehurst Farm, Lancaster, Mass., is a yearling bay filly Milady by Direct 2:05½. Her dam is Baroness Ruth by Baron Wilkes 2:18; second dam Silverone 2:19½ (dam of Abdul Ameer 2:19½) by Alcyone 2:27, and is a pure gaited pacer.

P. W. Hodges has a colt coming three years old that he thinks is one of the most promising youngsters he ever handled. With but three months' work the colt stepped a mile in 2:38 and an eighth in 1½ seconds. He is by the Rose Dale Stock Farm stallion, Washington McKinney.

The Santa Rosa Stock Farm string of horses will be kept in training at Pleasanton and Millard Sanders will go East with them again this year. Millard has the best lot he has yet trained for this farm and the record horses, Sir Albert S. 2:03½, Dolly Dillon 2:07 and Anzella 2:06½ are all in fine shape.

Geo. A. Kelly, of Pleasanton, tells us his colt by McKinney out of Bonsilene 2:14½ by Stamboul is growing nicely and is now over fifteen hands high. He is certainly one of the greatest bred young stallions in the State and Mr. Kelly believes will be very fast if he can escape accidents and sickness. He ought to make a great sire of speed if there is anything in breeding.

John W. Considine and Joseph Hawkins of Seattle, were in Los Angeles last week and purchased a couple of pacers which they shipped north and will probably race them on the North Pacific Fair circuit. One of the horses is Nutway 2:17½ by Nutford, the other a green horse called Glendine that has shown trials better than 2:20.

The average price obtained for the Palo Alto two-year-olds at Cleveland in 1901 was \$315 per head. At the Cleveland 1902 sale \$460 was the average price, and \$1350 the top price. At the sale in this city this week of the two-year-olds from the same farm the average was \$304.75, and the top price \$1300. California markets compare very favorably with those in the East.

Neal Laymon of Sprackels has purchased from Los Angeles parties a fine young Nutwood stallion of aristocratic breeding. He is a four year old, bred at Paducah, Kentucky, and is by Buttonwood, son of Nutwood, out of a standard mare of Hambletonian blood. He is eligible to registration, as both his sire and dam are standard. He is known in Kentucky as Princewood.—*Salinas Journal*.

Walter Maben, the well known Los Angeles horseman, was in town this week. He reports the horses at Los Angeles as quite numerous with a good proportion of fast ones for this time of the year. He thinks the trouble over the track there will be all straightened out before the regular fair and race meeting is held, and that in the meantime the harness horse trainers will be permitted to work on the track.

Hi Hogoboom was in town this week attending the Palo Alto sale. He is still enthusiastic over his plan of having selling races for trotters and pacers, which he began advocating two or three years ago, and which many Easterners are now talking in favor and claiming to be the original author of. Hi says he don't care who gets the credit of originating the idea if the associations will only put it into use. It would help in getting entries for a meeting beyond a doubt.

Senator Mills, a trotter owned by Mr. A. B. Gwathmey, of New York, is one of the crack trotters of the famous speedway in that city and has defeated many of the very fleetest of the brush brigade. Senator Mills was bred by Col. Henry Exall, of Dallas, Texas, and was developed and trained, up to the time he was sold to Mr. Gwathmey, by John Phippen, the well known California trainer who recently returned from Texas and is located at Mayfield.

The Ottawa trotting meeting is scheduled for February 10th to 21st. There are six hundred entries for the thirty-eight races which are to be held on the finest ice track in the world. Among the entries we notice that B. H. Demarest has named the pacer Frank 2:10½ by Secretary. Frank was one of the sensational pacers of the half mile tracks over east last year and paced a heat in 2:11 over one of those rings in which he would have taken a record of 2:06 had he not been pulled to a walk to prevent it.

James Faris, Jr. reports the death of his mare Carrie C., two year old record 2:27½, three year old 2:24, by Electioneer, dam Maid of Clay (dam of four in the list) by Henry Clay 8. Carrie C. held the champion record of her day and was considered one of the most valuable broodmares in California. She was heavy in foal to Monbells at the time of her death, which resulted from colic. Mr. Faris is the owner of Edith by Geo. Wilkes, the dam of Idolita 2:09½, whose sale for \$11,100 at New York last Thursday adds value to the mare. Edith will be bred to Nutwood Wilkes this year.

There are three full brothers on the Donnemore Farm near Winters that will bear watching. The Giggler is jogged on the road every day, and is rounding into his three year old form in great shape; in looks and disposition he is not excelled by any three year old in the State. Tee Hee, bay gelding two years old is doing his work as though he enjoys it, and is following closely in the footsteps of his older brother. This colt is entered in the Breeders Futurity of 1903. Ha Ha, bay colt one year old (not broken) shows all the form and beauty of his older brothers, but unlike them, is a trotter, entered in Breeders Futurity 1904. The sire of these colts is Bayswater Wilkes, record 2:25, and their dam Claribell, dam of G. W. W. three year old record 2:23½, by Privateer.

The National and American Associations ought to pass a rule that on and after a certain date no horse can start in a race unless he has been registered; the fee could be made as small as possible to cover cost, and the local secretaries could issue them after they had been sent to the officers of the parent associations, and been checked and recorded. When a horse was transferred or sold, such change could be endorsed on the back of the certificate and duly recorded at the head offices. By this means every horse and his owner would be known and could be traced easily.—*Ky. Stock Farm*.

There is a yearling colt at Walnut Grove Stock Farm that it is proprietor Alex Brown's intention to keep entire, as he is a grand individual and on breeding cannot be excelled by anybody's colt. His sire is Nushagak, sire of Aristo 2:17½ and others; first dam Pioche (a mare that could show a 2:20 gait with very little training) by Dexter Prince, sire of three in 2:10; second dam Peko 2:11½ by the great Electioneer, third dam Penelope (dam of Peko 2:11½ and Pedlar 2:18½) by Mohawk Chief, fourth dam Planetia by Planet, fifth dam La Henderson by Lexington, sixth dam by imp. Glencoe, etc., etc. It will be seen that this colt combines the blood of Guy Wilkes, Director, Dexter Prince and Electioneer within two generations and within three generations are the sires of no less than fifteen 2:10 performers. He also has in his veins the blood of nine great broodmares, five of which, Green Mountain Maid, Dolly, Clara, Lady Bunker and Sable, are among the most celebrated broodmares in the Register. He traces five times to Hambletonian 10, four of which are through the four greatest branches of that family; four times to Mambrino chief, through the three greatest branches of the family, and three times to American Star. This is an extra strong trotting structure on a thoroughbred foundation that cannot be beaten, as the Planet, Lexington and Glencoe have all been highly successful crosses with the trotting families. This colt should be a most valuable one to improve the trotting stock of California, and should he take a low record when raced, will doubtless be much sought after by breeders.

### Driving As an Exercise.

While driving is usually regarded merely as an enjoyable recreation, says *The Road* (London), it is an exercise of peculiar value—an exercise possessing advantages found in no other. The term recreation is much misused. Many so-called "recreations" are injurious to both mind and body. Driving is, however, as all true exercise must be, both exercise and recreation. No other exercise known combines the same degree of physical activity, of functional invigoration and of pleasure, with such slight tax upon the vital powers.

The physical activity is the result of two causes: First, the jolting, jarring and swaying of the vehicle; and secondly, the vital stimulation incident to the pleasure of the drive. It is difficult to say which of these influences is the more important as a vital stimulant, the mechanical agitation or the exhilaration. The movement of the vehicle necessitates a certain amount of muscular action, mainly in the muscles of the abdominal region and the waist. Every swaying of the trunk backward, forward or to the side calls for a gentle contraction of these important muscles, and every such contraction accelerates by just so much, the action of the heart, lungs, stomach, liver and bowels. The mechanical agitation imparted to the body by the vehicle acts in quite a different way to emphasize the same effect—to encourage deeper respiration, heart action and peristalsis. Then the rapid movement through the air, bringing the skin constantly in contact with fresh supplies of air (thus creating a kind of artificial breeze) is of immense value in increasing the activity of the skin, both in carrying off body poisons and in increasing the amount of oxygen absorbed by it.

Not the less important, perhaps, as a vital accelerant is the influence of the mild and pleasureable excitement of carriage riding. The rapid motion, the constant change of scene, the many interesting events of the drive—all these have the result of sending into the higher governing nervous centers, brain and spinal cord, and indirectly to the sympathetic center, the "solar plexus," a vast number of stimulating impressions, which have a powerful influence in increasing the function of the heart, lungs and other vital organs.

Of course, when the individual has, in addition to this mental and physical stimulus, the care of the horse or horses, the result is a still greater degree of mental and physical activity, with their consequent benefits. Carriage riding is an exercise, which, while beneficial to all, is especially adapted to those debarred from more vigorous exertion. But driving, the management of a team, a tandem, a four-in-hand, or even of one spirited horse—here is work for a strong man. Here is work, mental and physical, which may at any moment tax the powers of the strongest muscles and the clearest judgment. To be driven in an easy sprung vehicle over average roads, involves very little output of vitality. But to drive a spirited horse, even under most favorable circumstances, an exercise not to be despised by the strongest.

### More Eastern Horses at Los Angeles.

BREEDER AND SPORTSMAN:—Mr. Geo. B. Easton, of Peoria, Ill., has arrived with a string of good ones—headed by Six Bells, black horse, four years old, sired by E. S. E. 2:11½, he by Chimes; first dam Miss Chimes by Chimes, dam of Aertonian, three year old record 2:29½; second dam Ruffles by Hamlin's Almont Jr., dam of Toesin Chimes 2:24½ and King Chimes 2:08½; third dam Gerster by Hero of Thorndale, sire of 5 in 2:30 and of sires of 2½ and of dams of 22 trotters; fourth dam by Woodford Mambrino, dam of 3 in the list, including the great race horse and sire, Superior 2:17; fifth dam by Norman 25, sixth dam by Mambrino Chief 11.

Six Bells is a coal black stallion 15.3 hands high. He is a horse of commanding appearance, with the best of feet and legs, round barrel, fine bony head, good neck, well set on the strongest of shoulders. Taken all in all, from tip to tip, he is what can be classed as a high class individual. As to his breeding, he is surely what the sage of pedigree experts, Mr. Wallace, calls a strictly thoroughbred trotter. Mr. Easton has only given him slow work, as he considers him a horse of great promise, and with his pure trotting gait it will be no trick to give him a low mark. Mr. Crowley, who broke and trained him and brought him to Los Angeles, worked him six times and drove him a half in 1:16 to a cart. This horse should be appreciated in California as a sire. His blood lines are of the best.

Mr. Easton also brought out the chestnut pacer Col. Smith 2:15½, sired by Red Regent 2:18½, a well bred son of Prince Regent, a son of Mambrino King. Col. Smith will be raced in California this season as stable companion to Six Bells.

A mare named Elizabeth, a chestnut in color, seven years old, sired by Red Regent, dam Miss Chimes by Chimes; second dam by Hamlin's Almont. She is a half sister to Six Bells, and she is a pure gaited trotter and will be campaigned in California. A yearling by Millerton by Allerton, dam by Aerton by Stamboul 2:07½. This yearling is a good looker.

Mr. Easton not only brought back the blood of Electioneer through Six Bells, but he has brought back a beautiful bay son of the mighty Stamboul in Aerton 12450. First dam Lady Graves by Nutwood 2:18, dam of Sullwood 2:20, Nadjay 2:26, Stamgraves, (sire of Cantorian 2:18, and dam of Ivanette 2:28); second dam Lady Babcock by Hambletonian 725 sire of 15 in 2:30 list and dams of 31 in list. Lady Babcock is dam of Elector 2:21 and Soudan 2:27.

Aerton is a high class horse of beautiful blood-like conformation, with great bone and muscle and high knee action. He is strictly speaking a show ring horse, and is so full of life that Mr. Easton only trained him 60 days and gave him a mark of 2:27½, which is no gauge of his speed. It is Mr. Crowley's intention to race him in California this season.

The bringing back of this horse to Los Angeles at this time is quite a coincidence as he is a product of Los Angeles county, bred by the late L. J. Rose, and sold to Mr. Easton for \$6000. He arrived just about the same day as Mr. Arms' California bred horse Limonero. The coming of these grandly bred stallions and the fact that Mr. Easton is going to reside here should certainly add prestige to the harness horse business of California. Mr. Easton has campaigned his horses for several years and thoroughly enjoys it. He came to California to enjoy life, has bought a beautiful home, and every good horse man will be pleased to know that such men as Mr. Easton and Mr. Arms are coming amongst us and bringing two such high class stallions at a time when our best horses are being shipped over East.

Mr. B. Crowley has been trainer for Mr. Easton's Aerton Stock Farm for the past 15 years, and is going to remain in California and campaign these young horses. Mr. Crowley is not only a good trainer but a most interesting gentleman. Mr. Easton is a bright business man, and Los Angeles is to be congratulated on the coming of such a valuable new citizen.

Los Angeles track is in a little difficulty just now, but it is to be hoped that the clouds of uncertainty will soon roll back. Mr. J. W. Brooks has had a raw deal. He has lost of friends here and it is to be hoped that he will be amply remunerated for his loss.

Los Angeles, Jan. 24, 1903.

Cresceus, the champion trotting stallion of the world, may make another visit to the Pacific Coast this summer. When he struck California in November, 1901, he met a warm storm that kept everything wet until he got to Los Angeles and his exhibitions at Sacramento and San Jose were declared all right to the disappointment of horsemen and breeders here. We learn that a correspondence has been held with Mr. Ketchum lately by the enterprising managers of the North American and Oregon, for a tour of a couple of years. It might be that Cresceus could be brought to California if inducements were offered.

### Breed for Disposition, Size, Style and Speed.

Secretary, whose services are offered to the breeders of California for the season of 1903, is a son of the great race horse Director 2:17, founder of one of the greatest families of champions and race winners the country has ever seen. Director sired the great Directum 2:05½, that held the world's stallion record from September 4, 1893, until September 5, 1900, when the mighty Cresceus trotted a mile in 2:04½ and secured the crown, which he still wears. Directum was a champion three year old, putting the mark in a third heat of a race at 2:11½, and as a four year old defeated all aged horses in the free for all class and placed the stallion record at 2:05½, where it stood for seven years. Director sired Direct 2:05½, that won through the Grand Circuit and decisively defeated the theretofore unbeatable Hal Pointer at Nashville and Columbia, thereby bringing the pacing championship to the Pacific Coast. In the stud Direct has sired Directly, that paced to a record of 2:07½ as a two year old (nearly three seconds faster than any other two year old has ever paced) and has since reduced this to 2:03½. Direct sired Direct Hal 2:04½, the greatest money winner on the Grand Circuit in 1902, and has 13 representatives in the 2:15 list.

On his dam's side Secretary carries the blood of Volunteer, the sire of St. Julien 2:11½, a world's champion of his day. Volunteer had 75 producing sons and daughters to his credit and is the founder of a great trotting family. The Volunteers are noted for size, beauty, fine legs and feet, and in these respects Secretary resembles them, and he transmits these qualities to his produce.

As a sire of disposition, size, style, soundness and speed Secretary is the peer of any stallion in California, and all know that his opportunities have been most limited. He carries the blood of the greatest broodmares of the trotting register, such as the Chas. Kent mare, dam of Hambletonian 10; old Clara, dam of Dexter and Dictator; Lady Patriot, dam of Volunteer, and Dolly, dam of Director and Onward. The blood of these pre-eminent equine matrons is assurance doubly sure that Secretary will breed on.

There is no quality more valuable in a road or track horse than a good disposition and this Secretary has to a marked degree and transmits almost invariably to his get. In the way of natural speed he is richly endowed and can show a 2:10 gait at any time. Monroe Salisbury said that he saw Mr. J. W. Knox drive Secretary when a two year old a quarter in 34 seconds two weeks after he was taken from the farm a green colt, and that he had more natural speed than any colt he ever saw, and he added that had the horse been judiciously handled he would have had all the trotting records at his mercy. One of the sensational pacers on the eastern half mile tracks last season was Frank, a son of Secretary. He won many races, taking a record of 2:10½. Secretary with scarcely any opportunities has sired five with records below 2:10 and has fourteen in the 2:30 list.

Secretary will make the season of 1903 at Elias Williams' place, corner of Union street and the speedway, at Alameda, near the race track. His service fee will be \$40 for the season with usual return privilege.

### Dan Patch Has Aroused Interest.

The great interest one horse can exert on the breeding and racing interests of the country has been well illustrated by Dan Patch. This great pacer has directly and indirectly caused hundreds to take an interest in the light harness horse, while the interest of thousands has been quickened because of his performances. He has been the means of thousands visiting the race tracks who never before had taken an interest in this line of sport, and by reason of his sale for the largest sum of money ever paid for a pacer he has strengthened the horse market throughout the country. He has also been the means of interesting scores of people in the breeding of the trotter and pacer. His influence has been so widespread that it is difficult to trace it in all the different ramifications, but it is patent to all that he is responsible for the expenditure of thousands of dollars in the breeding and racing of horses. Dozens of 2:10 pacers, a horse which at one time would have delighted the heart of the enthusiastic breeder, would not in these days have the beneficial influence on the sport that this one horse has. A great army needs a great leader and the appearance of Dan Patch has had the same influence in advancing the interests of the light harness horse as a great general at the head of an army. He has been the keynote of increased interest in the breasts of thousands of lukewarm adherents of the sport.

In 1901, the year in which he dazzled the harness world with his unbroken line of victories down the Grand Circuit, he gave national prominence to Dan Messner, of Oxford, Ind. This young man had little experience outside his own county, but with the vic-

tories of the young horse he bred he became a prominent figure throughout the country. The Oxford county band was changed to the Dan Patch band, a Dan Patch march was dedicated to the horse and his owner and scores of men in the county came to the conclusion that they could breed a champion as easily as Dan Messner and immediately set about it. Last year the people of the county became indignant when they learned that Dan Patch had been sold, but it only increased their determination to breed a better horse to take his place. As an exhibition horse and one which has clearly proclaimed his ability to wear the champion's crown, he aroused enthusiasm wherever he was shown. The climax came when he was sold to W. M. Savage for sixty thousand dollars, a record price for a pacing horse. The enthusiasm which had been manifested in Indiana was repeated on a larger scale when the horse made his appearance recently in his new home. Bands and fireworks helped the enthusiasm along and the majority of the citizens of Minneapolis acted as though they had a personal ownership in the great pacer.

There is no question but that a great interest in the breeding of the light harness horse will be developed as a result of this latest change in ownership, and the question as to whether or not fast race horses can be successfully bred in a cold northern climate will be settled. This question has been debated considerably of late. All agree that it is not reasonable to expect to breed the precocious youngsters which have gained fame as a breeding ground for Kentucky and California, but there are others, like H. D. McKinney of Wisconsin, who believe that with the right kind of sires and mares, the essential requisites in climes favorable to the breeding interests, that race horses of the best calibre equal to going out and racing successfully in the select company of the Grand Circuit can be successfully bred in the north. Mr. McKinney believes that the reason race horses of championship quality are not raised in the north is more because of hostile legislation than because of unfavorable climate. Perhaps the advent of Dan Patch to the northern latitudes will settle this question, for breeding in the north will be carried on on a more extensive scale than heretofore.—*The Horseman.*

### Trotting Bred Carriage Horses Sell Well.

Persons who have maintained that the American trotter is the greatest all-around horse in the world, will find a convincing argument to use to those who maintain that this breed of horse is a racing machine pure and simple—in a transaction which took place in the Union Stock Yards, Chicago, last week, says the *Horseman* of a recent date. One of the dealers purchased nine horses, the get of Baron Wilkes, Onward, Nutbearer and Ashland Wilkes, for \$20,500. This was an average of \$2265, and is evidence that the market with the right kind of horses is exceedingly strong. None of these horses had records, but they had size and quality to commend themselves to their buyer, who will prepare them for the heavy harness classes in coming horse shows. It is not known how much speed these horses possessed, and it is possible that none of them had been worked for the purpose of ascertaining that fact. The average price paid for these nine horses is a remarkable one, and it is questionable if they were racing prospects whether that much money would be paid for them; indeed, they would have to show more than the ordinary speed to induce any manager of a campaigning stable to pay so large a sum for the lot. Considered as coach horses pure and simple, for such is their probable destined purpose, it is a question if any acknowledged exclusively heavy harness horses would bring any such figure. These horses must have been possessed of great individual merit, and giving promise of being able to win blue ribbons, or else they would not have brought any such sum. The price is the more remarkable when it is considered that the dealer or the purchaser will have to spend considerable time in putting them in condition for showing purposes, and they will have to be sold at a good advance in order to bring him a reasonable profit. He must believe that the demand for horses of this type is exceedingly good, or he would not have invested any such sum of money were not the chances exceedingly bright that he would be able to resell them to advantage. Right on the eve of the new year this is the most encouraging indication, and breeders of the American trotter will also be encouraged to develop the show horse qualities of the stock they have been so busily engaged in producing. This sale is the best possible proof that can be asked in order to show that the American trotter is the greatest horse in the world.

A lot of McMurray carts just received. You need one right now to work your colts in this winter. Call at the Kenney Manufacturing Company, 531 Valencia street and take a look at these carts and other first-class vehicles they have for sale. \*

### The Size of the Stallion.

These are the days of big things—big cities, big crops, big men, big horses and big prices. Everything is big in price, but when it comes to the horse supply it is very far from big, the which is amply proved by the present range of values. The thoughtful breeder cannot see where the supply is to be made much larger for some years, and the longer he thinks about it the more rooted will become his conviction that there are many years of prosperity before him if his operations are guided by the demands of the market. It will be some years yet before there are horses enough to supply the demand, providing that the demand should remain stationary. But it will not. The business of the country is increasing at an enormous rate. Trade is expanding on all hands. Exports are very large. Population is growing larger day by day. By the time that the horses now growing up on farms shall have attained marketable age there will be need for them all and for more, too. There may be enough; there will not be too many, and let it be remembered that just as soon as prices begin to fall a little the export trade will be handy by to absorb such of the supply as suits its needs. Therefore in breeding let us order our operations aright in order that tail-enders may be few and high-priced colts and fillies many.

The exigencies of the present situation are forcing many men to breed from mares they do not exactly like. They cannot get better, therefore they must go ahead with what they have. They must grade up. In the minds of most men who breed drafters the first desideratum is size and the second more size and the third still more size. After that they take whatever more comes with the size. Is it necessary to say that this is all wrong? The stallion that has only his size to recommend him may be a most worthless brute, indeed a positive damage to all who use him. Again size ought to have a very different meaning to different men. This farmer-breeder has mares that are of entirely different type, stamp and weight to those of his neighbor, and yet size in the stallion may mean the same thing to them both. It is very long odds that in such a case best results would be attained from the use of at least two and perhaps four horses. The first man has three or four mares, let us say, that weigh around 1500 pounds each, and the second has as many that average 300 pounds less. A much larger horse ought to be used with the 1500-pound mares than with the 1200-pounders, but the chances are that being neighbors the two owners will use the same big horse. If one is right the other must be wrong, and to use the same stallion is merely for the latter to amerce himself a large sum of money.

What is size in a stallion? Must we have the scales to find out if a horse has size enough? When is a stallion big enough? A draft stallion is large enough when he would make a good draft gelding himself in working flesh—not before. A carriage or coach stallion is big enough when he has size to do good work in the harness in which his get are to go. The saddle stallion is big enough when he is up to carrying 185 pounds, and the roadster is big enough when he can comfortably pull a light four-wheeled vehicle at speed. We do not need the scale to tell us anything about any one of these horses or their weights.

Beginning with the drafter the ton horse, of course, is all the rage. A stallion of the Clydesdale, Suffolk, Percheron, Shire or Belgian breed must weigh a ton or he will not do. If he tips up the beam good and hard at 2200 so much the better. Does anyone think that if nine out of every ten ton-stallions at present in this country should be stripped down to reasonable working trim they would weigh anything like 2000 pounds? They would not, and 1650 to 1700 pounds would catch more of them than would mark 1900 on the scale beam. If a horse is actually only a 1700-pounder he cannot be expected to beget larger colts from mares that are not as big as himself. Nature is a great lover of a good average. When you see a horse that weighs 2000 pounds set up on little spindle shanks you can make up your mind that such an one is not big enough. He is merely a medium-sized one fed to weigh a ton.

On the other hand when you see a stallion which in the flesh he would work in to the best advantage weighs 1850 to 1900 pounds and is carried by proportionate bones you may make up your mind with equal positiveness that you have found one that is big enough, for there is a foundation on which you may pile a very large quantity of flesh and yet have a pleasing whole. It is better still if you can get a stallion in working flesh that scales 1900 pounds, other things being equal, but it must not be forgotten that it is only a very easy trick to pile 300, 350 or 400 pounds of meat on any mature horse that in working order weighs 1650 to 1700 pounds. The writer has known of horses that landed in this country weighing

1650, and not too poor at that, being made up into stallions that just touched the ton mark when ready for sale. Figure it for a moment. The cattle feeder aims to put 300 to 350 or 400 pounds of beef on an immature steer that weighs 1000 to 1200 pounds. It is just as easy, if not easier, to make beef on a horse as it is on a bullock. In a word, beef means size in a bullock; it does not necessarily in a horse. Discount your very fat stallion 300 to 400 pounds when figuring on his size. No matter what he weighs you will have to do a lot of feeding to get his colts up to drafter weight when they are four or five years old, and if he will not make a market drafter himself in drafter flesh he will not do at all as a sire. Let him be, however, heavy enough for that purpose rather under the right scale of condition, and he will be big enough.

Now, to the stallion that in working flesh weighs 1900 pounds, what mares may be bred? It is rather hard to draw any hard and fast line in this matter, but it may safely be fixed at 1500 pounds or thereabouts. If a horse is very fat, loaded down with beef, and weighs no more than 1900 pounds he may safely be mated with mares of 1200 or even less. But that sort of a stallion is not a real draft horse, and it is doubtful if he will ever get any of that kind unless he is bred to very large mares. It is folly to expect 1200 or even 1300 or 1400 pound mares to produce real drafters. They cannot do anything of the sort. They will, however, produce mares that ought to grow large enough to breed real drafters if mated with the right stallions in their turn. The man, consequently, who has only mares of 1200 to 1400 pounds in weight must hasten more slowly than the one who has them that weigh 1500 or over. The latter may reasonably expect that some of his mares at least will bring forth draft horses of the right sort, but even he will have more uniform success in the following generation when he has his 1700 and 1750 pound mares to mate with his 1900 pound stallion as described. Then he may reasonably expect to reach the limit of profitable size-production. Too great divergence in type is always to be avoided in the breeding of horses. Some men have succeeded in making very large stallions and very small mares do well together, but the evidence to the contrary is, as a rule, so overwhelming that the experiment need not be tried any longer.—*The Breeders Gazette.*

### Novel View of an Old Subject.

A Massachusetts horseshoer gives his views on the causes which make some horses fight the bit, in the *Horseshoers' Journal* as follows:

"How many times you hear the remark, principally by drivers of fast horses, that their horse fights the bit? Most generally the remark is heard on tracks among drivers who call on it as an excuse for their horse not going as well as it is known he can go, and very often those same men will look around the harness for a cause of the fighting or they will look over the bit or into the horse's mouth to try to discover just what is wrong. One of the first changes the most of these drivers will make is to change mouth pieces, bits, perhaps rig up the harness a little different, lower or raise the check-line or shorten or lengthen the ear-strap of bridle. Again some will try a different hitch, and buckle the horse either shorter or longer from the gear of wagon or sulky. The hold-back straps will be changed and a new trial given to the horse. And again, sometimes a veterinary dentist is called in, the teeth are examined, and it is very often found that there is where much of the trouble comes from. But, sir, how very seldom does it occur to most drivers that the cause of all this fighting of the bit is to be found at the very part not thought of, the feet?"

"A horseshoer who is acquainted with such a subject as I have here referred to, knows that it is a very common thing to have drivers of fast horses come to him with all kinds of complaints about his horse not going square. Scalping is probably the most common of all complaints of drivers of track horses, and between the two, shoer and driver, something is done to "straighten" the horse up in his going.

"We know, too, that many horses have the faults of loquacity either behind or in front, and, of course, the shoer is expected to get over this fault to the satisfaction of the driver (who is, if he be a competent man, a very valuable aid in the work), and to the profit of the horse. All such faults are common and are daily brought to the shoer for correction, but it is not so in the case of the bit fighter, which above all others seems to baffle the driver and rarely ever comes to the notice of the shoer as a straight out-and-out problem.

"But it is nevertheless a fact that in very many cases the trouble is to be traced to the extremest ends of the horse, the feet. And why? Because the slightest trace of unlevelness in the hoof will make the horse so uncomfortable that he cannot do himself justice. It is strange to make such a statement,

knowing that the man who shod the horse is a mechanic who can bring the hoof to a perfect level. Well, it is nevertheless true, this is the prime cause of more offhensiveness in travel than any other to be found.

"By taking up the leg and looking down the hoof from heel to toe it may appear perfectly level from the standpoint of the man whose eye is turned toward a good level bed for the shoe to sit on, but this is not levelness. A hoof to be level must conform to perfect regularity with the joint within it, aye, and with these above it, for the least off level will have severe effect on all alike.

"The great trouble with most horseshoers is that they will look no further than the sole of the hoof when trying to effect a level, whereas, if they would take into consideration the quarters, the toe and heel, and the full position of the foot while resting on the floor, and use their experience in obtaining a regularly qualified level from the standpoint of nature, they would win out every time.

"I do not believe there is a great deal to be gained by using a made leveler to produce the level hoof. The experienced eye can do, I think, all that is necessary, if the man will only use it intelligently. Nor do I believe that there is much in the theory or practice of putting on all the fangled notions of shoes which are used to correct certain faults of the horse. I tell you sir, that horseshoeing is but protecting the hoof. When done scientifically it will protect the foot by keeping it free from disease, such as corn, and if the hoof is kept level it will do more toward keeping away such diseases than all the bar shoes or pads in the market. We should all bear in mind that in his unshod state the horse is most natural. He is now for protection of the hoof, and the further we get away from the real idea of natural shoeing the more we are apt to set the animal off his driving scope. It is by too much experimentation with notions that the true line of shoeing, leveling the foot, is lost sight of, and because of this the horse fights the bit. Follow this line more closely, Mr. Horseshoer and Mr. Driver, and you will find that there is more simplicity in shoeing, and more good results from your horse's travel."

### New Conditions for Two Great Races.

The management of Charter Oak Park, Hartford, Conn., and Oakley Park, Cincinnati, Ohio, have decided to change the conditions of those two great trotting stakes, the Charter Oak and the Ohio this year. Both these races are for \$10,000 and are among the largest offered for fast trotters. They will both be for trotters of the 2:09 class this year.

In each the race will be of three heats, of one mile.

Money divided as follows: \$1500 to the winner of each heat and \$500 to horse second in each heat. At the conclusion of the third heat the horse standing best will be the winner and will receive \$2000 additional. The horses standing second, third and fourth will receive \$900, \$600 and \$500, respectively. If at the conclusion of the third heat two or more horses stand equal for first money they shall start again and trot it off. If in any of the three heats two or more horses shall make a dead heat for first place the money for said heat will be divided equally between them.

The entrance fee to be five cent straight. Nothing from winners, and the distance will be the same as in mile heats, 3 in 5.

If the managers of Charter Oak and Oakley Parks do not succeed by this plan in preventing the laying up of heats it will be little use to try.

### State Agricultural Society Directors.

The Board of Directors of the State Agricultural Society met at Sacramento last Saturday. Those present were Directors Spreckels, Chamberlin, Paine, Land, Johnson, Whitaker, Rose, Rush, Fox and Mackey.

President Spreckels stated the object in calling the meeting was to discuss matters appertaining to the interests of the society before the Legislature.

The President appointed a Legislative Committee to look after society matters before the Legislature as follows: Directors Fox, Paine and Land.

On motion of Director Johnson the meeting adjourned to meet again February 14th, at 1:30 o'clock, when all matters of business before the society, including the election of a secretary, will probably be settled.

### Village Farm

Spohn Medical Co. EAST AURORA, N. Y., May 21, 1907.  
Gentlemen:—We desire to express our thanks to you for calling our attention to the value of Spohn's Distemper and Cough Cure. We have tried it in many cases of different degrees of severity, and it has aided us greatly, and we will hereafter always keep a supply of it in our medicine case. We have found it the best thing made in its special line. Please send us six dozen more. Very truly,  
C. J. & HARRY HAMILIN, Props.  
JOHN BRADBURN, Supt.  
E. G. GEERS, Train.

Sober up on Jackson's Napa Soda.

# THE WEEKLY BREEDER AND SPORTSMAN

F. W. KELLEY, PROPRIETOR.

Turf and Sporting Authority of the Pacific Coast.

-OFFICE-

36 GEARY STREET, SAN FRANCISCO.

P. O. BOX 2300.

TELEPHONE: BUCK 586.

Terms: One Year \$3. Six Months \$1.75. Three Months \$1.  
STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, Cal. Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, January 31, 1903.

A LIST OF STAKES to be run at the spring and autumn meetings of the Westchester Racing Association at Morris Park will be found among the advertisements in this issue. Entries for the same will close Tuesday, February 10th. Entry blanks can be had at this office. For the spring meeting there are three stakes for two year olds, four for three year olds and eight for three year olds and upward, to all of which there is added money from \$1500 up to \$10,000. A good list of steeplechase and hurdle stakes is also advertised. The autumn stakes for two and three year olds are rich events, added money ranging from \$2000 to \$5000 in each stake. There is a liberal increase of added money for the Westchester fixtures, the Metropolitan handicap now having \$10,000 and all the stakes are increased from \$1000 to \$2000 over last year.

THE HANDICAPS for the spring and autumn meetings of the Washington Jockey Club, whose race track is at Bennings in the District of Columbia, are announced in our business columns to-day. There are three rich stakes, The Consolation, The Dix'e and The Vestal, that will close and name at midnight on Tuesday, February 10, 1903. The first of these is for the autumn meeting of 1903, the other two for the autumn meeting of 1904. Besides these are the Bennings Spring Handicaps, which will close and name also on February 10th this year, that are to be run on the first and last days of the spring meeting. All of these handicaps have liberal added money, the amounts being increased over last year, and owners should carefully read the conditions which appear in the advertisement. For entry blanks address this office.

THAT FASHION FOLLOWS SPEED is demonstrated every year in the salesring. Last season the Palo Alto stallion Mendocino had much attention drawn to him by the performances of his sons, Monte Carlo and Idolita, both of which reduced their records to 2:09½ in races and showed themselves campaigners of merit. Mr. Salisbury refused \$12,500 for Monte Carlo before he brought him back to California, and on Thursday evening last, at the Fasig-Tipton sale in New York, Idolita brought \$11,100, that amount being bid on him by Mr. J. J. Scannell, of New York, the owner of The Abbot 2:03½. On the same evening, in San Francisco, at the sale of the Palo Alto two year olds, the get of Mendocino were the ones sought after and brought the highest prices. It is the families that produce the speed that draw the buyers and breeders should never forget this. A man may own the best stallion in the world, but unless the get of that stallion are developed and show that they have the speed claimed for them, the stallion will never gain a reputation as a speed producer nor his colts sell for profitable prices. On his breeding and performance a horse may acquire much prominence and his first crop of colts bring good money, but unless they show on the track the promise of their breeding and looks, they will soon drop behind the professional sales and sell for less than it costs to produce them. Fashion undoubtedly follows speed and those that want the produce of their breeding farms to be considered among the "dress and class" races, must either develop the colts themselves or let a professional who are "that line."

## Producing Stallions From Producing Families.

Stallions that are by producing sires and out of producing dams are looked to by the best informed breeders a few days to a few weeks before the race winners and record makers of the future. Mr. George Gray, super-

intendent of the Meek Farm at Haywards, advertises two such stallions in this issue of the BREEDER AND SPORTSMAN and we desire to call the attention of breeders especially to them at this time.

William Harold 2:13½ is well known to every horseman in California. He is a horse of marvelous speed himself and took his record in a race. He is by the great sire of speed, Sidney 2:19½, that sired Lena N. 2:05½, Monterey 2:09½, Dr. Leek 2:09½ and Oddity 2:10½, all race horses and frequent race winners. Sidney has sired a long list of colts that held champion yearling and two year old records in their day and is one of the phenomenal sires of the earliest extreme speed. He is the sire of Sidney Dillon, who in turn sired Dolly Dillon 2:07, one of the greatest race mares and winners ever bred in California and that went down the Grand Circuit in 1901, meeting and defeating the crack trotters of that year. As a sire of speed that comes early and stays late Sidney has few equals.

Cricket, the dam of William Harold, is one of the most remarkable of mares. She paced to a record of 2:10 to a high wheel sulky and was the first California bred mare to enter the 2:10 list. She is by Steinway, sire of the champion three year old pacer of the world, Klatawah 2:05½, besides three other 2:10 performers, and his son Chas. Derby has also sired the same number in that exclusive list. Retired to the stud Cricket dropped into the habit of producing a standard performer every year. Her first was William Harold 2:13½ and then came the pacer Cricri 2:20, the trotter Isobel 2:29½ and last season Hopper 2:17½ that was a competitor in the five-mile race at Los Angeles last fall, in which he lowered the world's record for four miles by about twenty-four seconds. This makes four in the list for Cricket and there are two more, one two and the other three years old, that will be standard performer whenever they get ready to start.

William Harold is a great horse on his performances and breeding, but he has proved himself a producer in the stud. But one of his get was ever raced, the mare Janice that attracted the attention of the Eastern horsemen by getting a record of 2:08½ on the Grand Circuit and winning some of the best races of 1901. William Harold's get are all good lookers, with size and speed of a high order and at \$40 the season, he is one of the best sires in California to send mares to this year.

The other stallion at the Meek Farm is Welcome 2:10½ pacing and 2:27½ trotting. Welcome is one of the handsomest stallions that ever entered a show ring and has quite a bunch of blue ribbons to his credit. As a race horse he was game as a pebble and fast as the proverbial ghost. He won a long list of races in which he met the best in his class. His sire Arthur Wilkes is one of the best producing sons of Guy Wilkes and has sired no less than six with records below 2:15. The dam of Welcome is Lettie by Wayland Forrest. Lettie is not only a great brood mare, being the dam of three in 2:30 and two with records below 2:13, but she is a member of a great broodmare family. Her dam Mary by Flaxtail, is the only mare to produce two daughters that have in turn produced two with records better than 2:15. Mary is the dam of Grace, the dam of Daedalion 2:11 and Creole 2:15. Creole sired Javelin 2:08½. Grace also produced Ripple, the grandam of the wonderful pacer Sir Albert S. 2:03½. Gazelle another daughter of Mary is the grandam of that whirlwind pacer Kelly Briggs 2:10½. The family founded by old Mary is one of the most prominent in the list of those from which has come 2:15 speed.

Welcome has had but one of his get trained for the races and that one trotted to a record of 2:29½ in 1901 and was a good winner in 1902 closing the year with a mark of 2:16½. This was the bay gelding Iloilo, one of the gamest and best gaited trotters of the California circuit last year. Welcome's fee has been placed at the low price of \$25 and as he sires large handsome horses, he is the horse for the farmer as well as the breeder who wants speed and race horse qualities. Mr. Geo. Gray superintendent of the Meek Farm, Haywards will be pleased to send cards giving tabulated pedigrees of these horses to any who write for them.

## The Fastest Trotter of all the Wilkes.

No trotting stallion in America was more talked about last year than John A. McKerron, that won the final race at Cleveland for the Boston Challenge cup, defeating those two great trotters The Monk 2:05½ and Lord Derby 2:05½, and afterwards trotted to a record of 2:05½, which makes him the very fastest trotter of all the great family founded by Geo. Wilkes. As has been aptly said, he has done everything asked of him thus far, and is confidently expected to answer several more questions in the affirmative, even the request to lower his present record.

While McKerron was thus in the public eye, it would

naturally be supposed that much attention would be directed to his sire, and such was the case, for although Nutwood Wilkes has been recognized for several years as one of the greatest speed producing stallions ever bred on the Pacific Coast, the wonderful performances of his son naturally placed him more prominently before the breeders of America, as the position of sire of the champion trotter of the tribe of Wilkes is a proud one for a stallion to hold at the age of fourteen years.

When one stops to consider the fact that while Nutwood Wilkes has had but a limited number of his get trained for the track, there are twenty-four of them in the standard list, that in one year two of his three year olds took records of 2:12 and 2:12½, that six of his get have records better than 2:15, four of them being trotters, that one of his sons is the sire of Alone 2:09½, the fastest four year old pacing filly of 1902, and that the only two foals of his daughters ever trained took records of 2:16½ and 2:25 last year, no further proof is necessary that Nutwood Wilkes is one of the greatest speed producers in America. His record of 2:16½ was obtained in a race and is not the extreme measure of his speed by any means, as he was dog lame when he obtained it and was afterwards retired to the stud. As an individual he has few superiors anywhere and his produce are all endowed with size, speed and good looks to a very marked degree. The writer has seen many of his produce but cannot remember having ever seen a poor looking among them all, either as a colt or an aged horse.

The breeding of Nutwood Wilkes puts him right in the very front rank of fashionably bred stallions. He is by one of the greatest sons of Geo. Wilkes, founder of the greatest family of race winners, and his dam is by Nutwood, champion sire of 2:30 performers and champion sire of the dams of 2:30 performers. His second dam was by Geo. M. Patchen Jr., himself a great race horse and the sire of race winners, while his third dam Rebel Daughter was a thoroughbred mare that won many races and was by Williamson's Belmont, known as the Mambrino Patchen of the Pacific Coast. Tabulate the pedigree of Nutwood Wilkes back five removes and there is not a weak point in it.

California breeders should realize the fact this year that such a horse as Nutwood Wilkes is standing for public service here at the fee of \$50. He is a stallion that can be bred to with almost a certainty of getting a foal as he is one of the surest horses in America, and as his get are all large and fine looking they are saleable at prices that pay a profit on the investment. With a good mare the chances of getting a fast trotter or pacer are many, and of getting a road horse that will sell for a good price certain.

Those who are interested in breeding should visit Pleasanton and look over the string of young horses by Nutwood Wilkes that William Cecil has in training there. No finer looking or faster lot of horses by one sire can be found on any training track. Mr. Carter breeds for the market and these youngsters and many more at Nutwood Stock Farm, Irvington, are for sale at reasonable prices.

## Matinee at Los Angeles.

The Los Angeles Driving Club held its matinee at Agricultural Park last Saturday under an injunction issued by the Superior Court, and had a very large attendance. The Court held that as the track had been tendered to the club for its matinee, the track managers must comply with their promise, although it also held that none but club members could participate in any way in the use of the track. Consequently the sprinkling, harrowing and scraping of the course was all done by members of the organization, and none of the professional trainers were permitted to warm up the horses. The summary of the races held is as follows:

First race, free-for-all trot.		
Belle Patchen, ch m.....	(C. F. Nowlin)	1 1
Mowliza, br m.....	(R. B. Moorehead)	2 2
Margie May, b m.....	(Hagan)	3 3
Prince Howard, blk g.....	(B. Erkenbrecher)	4 4
Time, 2:27, 2:20.		
Second race, mixed handicap.		
Sweet Marie, b m (t).....	(William Garland)	1 1
Athlino, br g (p).....	(C. A. Canfield)	2 2
Cour de Lion, b g (p).....	(Bruner)	2 2
Time, 2:21½, 2:16.		
Third race, 2:30 class, mixed.		
Sweetheart, b m (p).....	(E. T. Earl)	1 1
Floretta Belle, b m.....	(B. Erkenbrecher)	2 2
Time, 2:18½, 2:18, (dead heat), 2:19½.		
Fourth race, free-for-all, pace.		
Undine, ch m.....	(C. E. Gayer)	1 1
Proctor, ch g.....	(Moshier)	2 2
Glenn, ch g.....	(P. L. Hudinger)	3 3
Monteito Boy, b g.....	(Edmonds)	4 4
Time, 2:23½, 2:20.		
Fifth race, 2:30 class, mixed.		
Would Be, ch g (p).....	(Dodge)	1 1
Tom Thumb, blk g (t).....	(R. V. Redpath)	2 2
Kitty, b m (t).....	(H. Goldschmidt)	3 3
Addie R., b m (p).....	(Bryson)	4 4
Blue Bill, ch g (p).....	(Thomas Hughes)	5 5
Time, 2:34, 2:34.		

## Professional Drivers Benefited by Amateurs.

A few years ago when matinee racing was given the impetus that has since resulted in bringing racing to wagon by amateur drivers into the prominence and popular favor it merits and now enjoys, it was freely predicted that the amateur sport would prove detrimental to professional racing. Time has proven, however, that matinee racing has had a wholesome, beneficial effect upon every branch of the light harness horse industry and the following paper, read by the well known professional reinsman, W. L. Snow, at the recent annual banquet of the Hornellsville (N. Y.) Driving Club, voices the general sentiment of all professional horsemen to a dot:

"Gentlemen and Members of the Hornellsville Driving Club:

The subject which you have invited me to read a paper upon this evening, is one in which my interest is unusually deep. As a professional trainer whose experience with light harness racing has extended over a score of years, beginning long before amateur racing was thought of, as we now know it, I am in a position to see its effects on all that pertains to racing and its allied interests, breeding and developing, better perhaps, than one whose participation in it began more recently.

"The history of early harness racing informs us that it was not at that time a sport in which the better element of the people took an active interest. For some years it was conducted under methods not calculated to draw to it the support of the class of men best able to make it popular. Probably the first factor in placing harness racing on a higher plane was the entry of the breeders into the racing arena. They were, on the whole, men of wealth and business integrity, who raced their horses to win, for the reason that the reputation of their stud was at stake. Their participation in racing brought to the race track men of position, who had previously taken little interest in this branch of sport, and to the men thus attracted may be said to be due the first real interest in trotting and racing as a recreative pastime.

"With this awakened interest, however, it took years to bring the era of amateur racing. The first men to attract attention by their purchases of fast trotters for pleasure driving, confined their use to the road, which was, after all, only the first step in the evolution of the amateur reinsman.

"In New York, Robert Bonner, Commodore Vanderbilt, Frank Work, and a little later W. H. Vanderbilt, made road driving a fashionable recreation, and both in the metropolis and other cities, men of wealth began to learn the joys to be experienced in the ownership of a fast trotter or pacer. Human nature is the same the world over, and, as was naturally to be expected, these men soon began to show a desire to measure the speed of their horses and their own skill with the reins in actual contest. For a time the road was regarded as a satisfactory ground for these friendly contests, but, finding that only on a track could their horses show to their best advantage, it was but a short and natural step to amateur racing.

"Gruesome predictions were made by many of the men engaged in professional racing as to the ill effect amateur racing would have on the future of the branch with which I am identified, but, happily, none of them has been borne out.

"The entry of the amateur racing man into the arena of harness racing has been productive of only good results. It has increased the demand for high class trotters and pacers; made higher prices possible; increased the interest in harness racing generally; widened the field of the professional trainer, and, best of all, it has raised the tone of the sport in a degree almost beyond comprehension.

"I am pleased to say, as one who favored the advent of the amateur on our tracks, that I believe amateur racing is yet in its infancy. To me it is apparent that it will in the near future share with professional racing the interest of the public, and as a professional trainer whose greatest wish is to see harness racing occupy the highest possible position in the list of American sports, I wish to say that I will gladly welcome that day."—*American Sportsman.*

The committee of the United States Senate to which was referred the bill appropriating \$2,500,000 for the purchase of draft horses for the Philippines, has reported favorably on the measure. The measure was prepared in response to a suggestion by Governor Taft, and the funds are desired to supply stock in place of that destroyed by disease. If California had a supply of draft stock it could do a large export business in draft stock for several years to come. But the supply of draft horses in this State at the present time is not equal to the demand, and it will take several years of breeding to catch up.

California favorite hot weather drink—Jackson's Napa Soda.

## SADDLE NOTES.

There was considerable adverse criticism by the various turf writers in the daily papers about the riding of The Major by C. Kelly in the race in which he was beaten by Epicure, and there was some talk as to the investigation of the race by the judges. A close observation of the race, however, showed that Bullman took Epicure to the front as soon as the barrier was released and set a heart-breaking pace, running the first four furlongs in fifty seconds and the next eighth in twelve seconds flat, making the five furlongs in 1:02 on a track that was not only heavy from mud but was also very slippery. This performance gave him such a commanding lead that the rest of the journey was an easy thing for him and no jockey on earth could have gotten The Major any closer to him at the finish.

"Boots" Durnell, who was suspended in France two years ago, has received the good news that his suspension would be removed by the French Jockey Club. This will mean the removal of the ban against him both at San Francisco and in the East. It will also

wire to wire and winning by a head from Lord Badge, with Durazzo a length away. Elliott was bred at Palo Alto and is not only one of the last thoroughbreds bred there but also one of the best which ever came from that establishment.

Professional tipsters who proclaim that they can successfully forecast the result of contests of skill, speed, power and endurance by man or beast, are hit hard in a bill introduced by Assemblyman Ulrich at Albany, N. Y., last week. The bill amends Section 351 of the Penal Code by substituting a new section, which prohibits the printing, writing or circulation of information foretelling the result of the contests mentioned. Predictions in newspapers inserted as news and not as advertisements are not included in the prohibition.

The broodmare Singing Burch (half sister to C. H. Todd), by imp. Goldfinch, dam Ros R., by Norfolk, foaled a bay colt by imp Sharpfell, at Mr. J. B. Haggin's Elmendorf Stud, Lexington, Ky., January 20.

The Grand Prix of Nice, one of the most valuable

ORMONDE

mean that McChesney and the other good horses of the Durnell & Herz string will be raced in the East at least a portion of the coming season. Referring to the news, Durnell said that he had made entries in the Western Stakes and may race in the West during the early part of the season.

Willie Shaw, who rides for Geo. E. Smith, has arrived here and had his first mount on The Fretter last Saturday. Judging from the race which he made The Fretter run his ability does not seem to have been over-rated, and he is a valuable recruit to the local band of jockeys. Shaw can do 108 lbs. and last season rode the winners of the Great American, Tidal, Double Event, Neptune, Standard, Rosebud, Vernal and other stakes.

It has been rumored that Caesar Young has leased the race track at Butte, Montana, and will give a race meeting there next summer. Despite the fact that numerous poolrooms are open in Butte during the summer months, it can be safely asserted that Caesar will hold his own both with them and the general public.

The thoroughbred stallion Bangor has been sold to Russian parties by Messrs. Burns & Waterhouse. He was shipped last week to Vladivostock.

Quiz II. changed owners after the third race on Wednesday. Entered to be sold for \$400, he was bid up to \$1000 by Chas. McCafferty, owner of Mr. Farnum, the second horse, and secured by him at that figure. In retaliation J. Crane, former owner of Quiz, claimed Mr. Farnum and secured him for \$725.

The races won by Quiz II. showed such marked reversal of form that they are the subject of investigation by the officials in the stand. Troxler, who rode Quiz in both of his previous races, has already furnished his usual glib account of how it happened.

The Lissak handicap last Saturday was won by Elliott, a three year old, giving away pounds of weight to a field of high class aged horses. He was perfectly handled by Tommy Burns and ran a remarkable race, standing a fierce drive for the entire distance from

steeplechases in the world, was run on January 20 and won by Clerval, by Vigilant, dam Clelie; Manuscript, second. The distance was about three miles and the race was worth \$20,000.

It is rumored that the Jockey Club will issue a license to Kenilworth track, Buffalo, which will be re-opened under new management. It is said that M. S. Denslow, of Buffalo, will take hold of the track after its affairs have been settled up by the receiver, in whose hands it is at present.

Should "Ed" Corrigan carry out his reported intention of erecting a race course and dividing dates with the now prosperous Crescent City Jockey Club at New Orleans, experts say that he will have beaten all records for race track promoting. He has built race courses at Chicago in two places, San Francisco (two courses) and is now interested in the new Kansas City track.

WILL NOT SCAR OR BLEMISH.

GOMBAULT'S  
CAUSTIC BALSAM

Is the safest and most effective lotion or blister for ailments of

HORSES and CATTLE

and supersedes all cantry or firing. It is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY Cleveland, Ohio

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

BIRD SLAUGHTER.

The Destruction of Beneficial Birds from an Ornithologist's Viewpoint.

The preservation of song birds, as well as other varieties of feathered creatures, is a subject of serious enough importance to have attracted international attention. This subject has also come under notice of the Federal authorities at Washington, the Department of Agriculture has devoted much time and research in determining the economic value of several birds that had the reputation of doing damage to crops, fruits, etc. The depredations of the plume hunter along the Atlantic and Gulf coast has also come under the investigating eye of the United States officials and many facts have been demonstrated showing the injury to the commonwealth arising from wanton and wholesale destruction of all kinds of birds. In various states laws have been passed for the protection of birds that are beneficial to the agriculturist.

In California several attempts have been made for protective legislation on this line, but little, if any good has resulted. Last session of the legislature a bill for the protection of song birds (so called) passed both houses but never was signed by the Governor and consequently did not become a state law. Legislation, whenever attempted for this purpose, has been combatted by powerful and ever watchful influences that seems to be potent enough to prevail. The commercial interests involved are great, but nevertheless the value of prohibitive legislation in protecting the birds is of a thousand fold more value to the whole community than any temporary benefits derived through the few commercial channels interested.

Efforts for the preservation and protection of game and fish should be paralleled with similar work in the protection of useful (as well as harmless) birds and animals. The birds particularly seem to have been sadly neglected. The columns of this journal have for years past pleaded the cause of the song bird and his congeners of the forest, field and shore.

Protection should appeal strongly to sportsmen as well as every other class. The support of the sportsman to this end is a move in the right direction and will redound to the benefit of all concerned, as well as make stronger the bulwarks of game protection (pure and simple) by a mutuality of interest.

We publish below a paper, read by W. Otto Emerson, of Haywards, Cal., before the California Fruit Growers Convention last year. While the writer's remarks were directed to the attention of a class, the matter is of the utmost importance to the whole community, the suggestions made in favor of protection should receive the earnest support of every citizen.

In describing some of the methods employed the speaker did not enlarge upon the magnitude and many netting and trapping devices used for the depletion of the orchard and woodland of its feathered friends of mankind. These abuses are extreme in their wholesale destructiveness and will surely result in the extermination of many useful birds unless checked.

The man with the gun is responsible for many wanton deaths of birds absolutely useless as game, but his work is Lilliputian compared to the netter and plume hunter. Another cause for useless destruction is ignorance. The meadow lark and oriole have been much maligned birds, their value and benefit is fully shown in a monograph by F. E. L. Beal, Assistant Ornithologist of the U. S. Department of Agriculture. Mr. Emerson spoke of birds principally which were known to the fruit grower. Many other birds can be mentioned, notably so the sandhill crane. This spear-billed bird is a valuable friend of the farmer, this statement can be interestingly verified by anyone that will take the trouble to watch a crane catching gophers, alfalfa fields are a favorite hunting ground for the longlegged sportsman.

Bulletin No. 13 issued by the Department of Agriculture contains some valuable information about blackbirds, bobolinks and grackles. The paper above referred to here follows:

How true is the statement of E. Seton-Thompson that "the life of a wild animal always has a tragic end." In all the ages we find that birds have played an important part in the life of man and in the surroundings of the human race. In early Egyptian times birds were held in great veneration and many were set up in their temples and their images adored for the supposed protection it was thought they could give the worshipper. Among the birds most venerated by the Egyptians were the Sacred Ibis and the owl. Among the ancient Romans birds entered largely into the religious life, and the manner of flight or the position of their entrails when slaughtered were interpreted for good or bad by the pagan priests. Even among our native Indian tribes birds have been regarded as being omens of good or ill.

The civilized man takes a more practical view of bird life and its destruction in farm or orchard most necessarily interest us more and more as our crops—fruit, seeds and vegetables are attacked by new pests. This is especially noticeable at the present time, when calls are constantly being made on our experts in ornithology to look into pests that are breeding out in different parts of the State, and to supply remedies or preventives for the different insect scourges which are continually attacking the crops, roots or fruit of the producing districts of the State. Experts in ornithology are co-operating with entomologists in their labor in most of our uni-

versities, while the horticultural departments and boards of horticulture are all working hard to the same end—the preservation of our crops from our insect enemies—and in line with this work investigating the benefits derived from the different species of birds from all sections of the country, studying their foods, habits and methods, in farm and orchard, and even in the wilderness.

HOW BIRDS ARE DESTROYED.—The destruction of beneficial birds is moving along in three lines, the elements, wild animals, and the hand of man. This destruction at the hand of man is for three purposes: adornment, food and scientific investigations, and the destruction is greatest in the order named.

A bird's life at the most does not range over five to fifteen years. Those of the order Anseres raptors and some of the pelagic forms live many years. The causes of destruction by storms or the elements on land and water is not noticeable in the diminishing of great numbers from any section of the country, in comparison with the trap or gun of man. Many are killed by storms and by coming in contact with the light stations of these coast, where they are attracted like moths to their death, by the blinding rays of light. Many are also killed by striking against the overhead wires, tall towers and spires of thickly settled cities. They become confused by these unnatural objects in their migrating northward to the summer home or southward to the winter home, and so the destruction by these tall fixtures and lights amounts to many hundreds during the nights of the migrating season. Others are driven far off shore to perish at sea.

Only a few, comparatively, are destroyed by wild animals, such as the weasel, coon, fox, wildcat, one or two species of owl and hawk, which prey, in part, upon bird life for their food.

The hunter kills thousands where the elements and animals destroy only tens.

A NEFARIOUS TRAFFIC.—In many States most admirable laws are being framed to stop the market and plume hunters from carrying on the wholesale destruction of bird life. A walk through any of the large markets of any of our large cities will show us the results of the trap, nets and guns. Well spread before the eye are hundreds of featherless birds, skewered by dozens on willow switches or sticks at from 30 to 50 cents a dozen, and this shooting and netting of birds is carried on the year round, excepting in the case of the robin and the meadowlark, and those game birds are protected by law. A few countries are trying to enforce ordinances for the protection of some song birds.

In examining the birds exposed for sale at the market stalls many beneficial species will be seen—three varieties of goldfinches (spinus), two melospiza, a pipilo, hundreds of pipits (anthus), some of the horned

larks (otocoris) shot in large numbers, four varieties of the family turnidae, besides many species of small shore birds. If we ask the salesman for reed birds, he will give us any of them, as they all go under that name, although the reed bird is known on the Atlantic Coast as bobolink (dolichonyx oryzivorus).

The market hunting grounds are the surrounding bay counties, but many are now found up the river valleys, where they have more liberty in their noxious trade.

Along the river banks and brushy sloughs may be seen the mode of taking birds by spreading fishnets over the low bushes, where several hundred birds will be taken at a setting. Two thousand birds is not an unusual day's trapping by this means. Nothing can escape the net. More birds can be destroyed in one day by this means than a man with a gun could get in a week's shooting. It will now be seen how the diminishing of bird life is going on in this one instance.

WHOLESALE MURDER.—The hunting of birds for the millinery trade outnumbers all the other means I have so far mentioned. For this purpose the slaughtering of our feathered tenants, regardless of kinds, from a wren to a pelican. All can be made use of, by coloring, for purposes of adornment.

From a circular letter which came into my hands last January, I learned of a go-between in Oakland who was connected with a sale of 40,000 bird skins shipped to an Eastern plume house. I was addressed on the subject of a market to be had for wings, breasts and skins generally of eagles, hawks, owls, gulls, terns, grebes and, in fact, any bright colored bird that would do for the trade.

Plume hunters are to be found all along our mountain lake borders as soon as the nesting season begins, collecting what may come to the lake for the reproduction of their kind. When the hunter has cleaned out the vicinity, he moves to another, taking in the whole gamut of lakes from California to Washington. In the everglades of Florida and bayous of Texas outfits of steam launches and sloops are sent to collect the nesting birds. In many sections species have become exterminated where formerly they were bringing up their young by thousands, and these, old and young, would later on have spread all over the continent, doing good by keeping down the countless numbers of noxious insects and small destructive animals.

The great record of one hunter in Florida is a disgrace to any man—killing in a single season 141,000 birds. A few years ago an order was sent to this Coast for 10,000 water bird's wings and breasts, which were collected from nearby bay shores, there being more than five men employed for the winter.

This destruction of vast numbers of birds must necessarily mean an increase of insect pests, which will require more vigilant care and a vastly greater expenditure of money on the part of the husbandman in protecting his crops. Wherever we see vegetable life weakened by insects feeding upon it, other ills, such as fungus growths, smut and scale, more readily take hold of the tree or shrub and soon spread disastrous results to the fruits.

NAMES AND FOODS.—The following list of useful birds is described as beneficial. There are many others that could be added that the layman would not be so familiar with as those named. Seven species are named as not worthy of protection:

USEFUL BIRDS TO FARM AND ORCHARD.

COMMON NAME.	SCIENTIFIC NAME.	CHARACTER OF FOOD.
Marsh hawk.....	Circus hudsonius.....	Small mammals, insects and reptiles.
Western red-tail hawk.....	Buteo borealis calurus.....	Squirrels, field mice and grasshoppers.
Red-bellied hawk.....	Buteo lineatus elegans.....	Squirrels, field mice and grasshoppers.
Swinson's hawk.....	Buteo swainsoni.....	Grasshoppers, crickets and mice.
Rough-legged hawk.....	Archibuteo ferrugineus.....	Grasshoppers, crickets and mice.
Pigeon hawk.....	Falco columbarius.....	Crickets, field mice and grasshoppers.
Desert sparrow hawk.....	Falco sparverius deserticolus.....	Crickets, field mice and grasshoppers.
Barn owl.....	Strix pratensis.....	Gophers, rats, mice, shrews and frogs.
Barred owl.....	Syrnium nebulosum.....	Gophers, rats, mice, shrews and frogs.
Short-eared owl.....	Asio accipitrinus.....	Gophers, rats, mice, shrews and frogs.
Long-eared owl.....	Asio wilsonianus.....	Small mammals and frogs.
California screech owl.....	Megascops asio bendirei.....	Mice, beetles and grasshoppers.
California pygmy owl.....	G. gnoma californiacum.....	Mice, beetles and grasshoppers.
Burrowing owl.....	S. cunicularia hypogaea.....	Mice, crickets, grasshoppers and beetles.
Cabanis' woodpecker.....	Dryobates villosus hyloscopus.....	Wood-boring larvae and insects.
Gairdner's woodpecker.....	Dryobates pubescens gairdneri.....	Wood-boring larvae and insects.
Nuttall's woodpecker.....	Dryobates nuttalli.....	Wood-boring larvae and insects.
California woodpecker.....	M. formicivorus bairdi.....	Wood-boring larvae and insects.
Red-shafted flicker.....	Colaptes cafer collaris.....	Codlin moth larvae and ants.
Arkansas king bird.....	Tyrannus verticalis.....	Injurious insects of all kinds.
Ash-throated flycatcher.....	Myiarchus cinerascens.....	Noxious insects, moths and larvae.
Say's phoebe.....	Sayornis saya.....	Noxious insects, moths and larvae.
Black phoebe.....	Sayornis nigricans.....	Noxious insects, moths and larvae.
Western wood pewee.....	Contopus richardsoni.....	Noxious insects, moths and larvae.
Western flycatcher.....	Empidonax difficilis.....	Noxious insects, moths and larvae.
Mexican horned lark.....	Otocoris alpestris chrysolaema.....	Insects and seeds of noxious weeds.
Arizona hooded oriole.....	Icterus cucullatus nelsoni.....	Caterpillars, larvae of wire worms.
Bullock's oriole.....	Icterus bullocki.....	Larvae of noxious insects and army worms.
Western meadow lark.....	Sturnella magna neglecta.....	Beetles, grasshoppers, wire worms and crickets.
Arkansas goldfinch.....	Astragalinus psaltria.....	Scale, aphids and noxious seeds.
Western chipping sparrow.....	Spizella socialis arizonae.....	Ants, spiders, seeds (spring and fall).
Oregon junco.....	Junco hyemalis oregonus.....	Noxious weed seeds (spring and winter), scale.
Samuel's song sparrow.....	Melospiza cinerea samuelis.....	Injurious insects of winter and spring.
California towhee.....	Pipilo fuscus crissalis.....	Weed seeds and larvae of injurious insects.
Black-headed grosbeak.....	Habia melanocephala.....	Larvae of wire worms, corn worms and beetles.
Lazuli bunting.....	Passorina amoena.....	Summer insects and noxious weed seeds.
California shrike.....	L. ludovicianus excubitorides.....	Crickets, grasshoppers and beetles.
Western warbling vireo.....	Vireo gilvus swainsoni.....	Injurious insects and larvae.
Vigor's wren.....	Thryothorus bewickii spilurus.....	Tree spiders and larvae.
Western house wren.....	Troglodytes adon aztecus.....	Spiders, bugs, caterpillars and larvae.
Plain titmouse.....	Parus inornatus.....	Injurious larvae and tree bugs.
California bush tit.....	Psaltiriparus minimus californicus.....	Scale, bark lice, minute insect eggs.
Russet-backed thrush.....	Hylocichla ustulatus.....	Spiders, beetles and ground insects.
Western robin.....	Merula migratoria propinqua.....	All kinds of earth worms.
Western bluebird.....	Sialia mexicana occidentalis.....	Caterpillars, spiders and grasshoppers.

BIRDS NOT WORTHY OF PROTECTION.

Sharp-shinned hawk.....	Accipiter velox.....	Young poultry, small birds.
Cooper's hawk.....	Accipiter cooperi.....	Game birds, and small, insectivorous birds.
Duck hawk.....	Falco peregrinus anatum.....	Game and insectivorous birds.
Red-breasted woodpecker.....	Sphyrapicus ruber.....	Girdling trees with rings of holes.
California jay.....	Aphelocoma californica.....	Destroys insectivorous bird nests and fruit.
House finch.....	Carpodacus mexicanus frontalis.....	Destroys fruits and blossoms.
English sparrow.....	Passer domesticus.....	Feeds on grain, fruit, buds and blossoms.

### The Cocker Spaniel.

The Ladies Kennel Association of Massachusetts have set the good example of having read before their meetings papers, by various members, descriptive of individual fancies for different breeds. Several of these papers have been already published in our columns. The following is by Mrs. E. H. Seagrave, President of the association and will be of interest to Cocker fanciers and breeders:

"In a short talk on Cockers it is scarcely necessary here to go into particulars as to their origin, further than to say that, being of the spaniel family, they represent one of the oldest varieties of sporting dogs known, or of which we have records.

The Cocker is the smallest of the sporting spaniel family and, perhaps, to this and his engaging disposition and merry activity, is due, in great part, his popularity as a companion.

In England, where most of the game is preserved, the shooting conditions are different, and the small covers and many hedgerows, afford ample scope for the Cocker's activity as a sporting dog. In America the Cocker is little used for its original purpose, and no better tribute can be paid to its many good qualities than the popularity it has attained as a family pet. Purely as a companion and with no regard to its sporting instincts, it has long assumed equal rank with the Fox Terrier and Collie. Over these breeds, however, it has the great advantage in docility of disposition and freedom from a desire to fight. In this alone the breed commends itself to women and children. But, perhaps, even more commendable, is the Cocker's superior intelligence, which manifests itself in so many endearing ways when a family pet. One is never lonely in the companionship of two or three Cockers. At home, I plead guilty of harboring five in the house, and a romp with them, for which they are always ready, is an excellent antidote for the blues. Each is individual in its little ways and oddities, and to study and minister to them constitute most of the pleasure derived from their society. I make it a point, however, to know all my Cockers, and those I find necessary to keep in the kennels are visited every day and made much of, and, when weather permits taken for a run in the woods near the house, in which they naturally take great delight, hunting rabbit tracks and other game trails to be found in the woods, showing how easily they could revert to their original purpose were it necessary.

The bright little Cocker is never cross, is easily controlled, not even the Poodle or Collie are more amenable to education, and they can be easily taught many little tricks that are both amusing and useful in the house. They are naturally cleanly in their habits as all house pets must be and are easily taught to be good.

Much has been said about sporting and pet Cockers. On this burning subject I do not care to say more than that, from my limited experience a small Cocker of from 19 lbs. to 22 lbs. (the limit in size and weight in my estimation for a companionable Cocker) if built on lines indicated in the standard is just as active and far more engaging in its ways than a larger dog, which is more suitable for the field than the house.

Before giving a description of the Cocker, something must be said about their keenness of scent. Authorities claim that they are even superior in this respect to the Pointer and Setter, in their ability to quickly discern bird scent. I can readily understand the justice of this claim, although my experience has been with chocolates rather than birds. Summer Girl, one of the lamented Ch. Omo's daughters, and her son Ony, seem to instantly divine when a box of candy or chocolate is brought into the house and no matter where it is placed, they will sit as near to it as possible and speak to me about it in the most impatient manner, until the package is opened and they get their share. This is a bad habit, I know, but then they are privileged ones.

The Cocker is divided at our shows by color—black; red or any other solid color, like liver; and particular, which includes black and white, red and white, the roan and black and tan. The black is conceded to be the most popular, though the reds push them close.

The general appearance of the Cocker should indicate an immensely strong, active little dog, compact in form, merry in disposition, with an eye that indicates love and fidelity. The head should be smaller, shorter in the muzzle and not so coarse and heavy in its lines as a Field Spaniel. Much of the quality of a Cocker's head is shown in the graceful contour of the skull as it reaches up from a very moderate stop and the slight furrow or median line between the eyes and the formation of the brow. The low set on of the ears intensifies the half circle dome of the skull and is a feature highly prized. The tips of the ears should not extend beyond the nose. The muzzle is moderately square and all tendency to snipiness should be avoided. The neck is long enough to allow the dog to put its nose to the ground and should be clean cut, devoid of loose skin and set gracefully into the sloping shoulders, which should not be loaded with muscle or fat, to interfere with their free movement. The body, which with legs and feet, is the most important part, should be compact and deep ribbed, but not so extremely short as to interfere with liberty of action. The forelegs are moderately short, but in comparison with its size should not be too low set as the Field Spaniel. They should be, at any rate long enough to enable the dog to gallop strongly and actively. They should be strong in bone and as straight as possible; the feet compact and well clothed with hair and legs well feathered; the hind legs are well bent at the stifle and hocks low set, so that though a compactly built little animal the Cocker stands over a good deal of ground, as all animals should, which are intended to gallop. The set on and carriage of the tail, which is docked, is important, the tail having a downward carriage and never, even when excited, should it be carried above the level of the back. Probably in no other dog is

the action of the tail more expressive of the dog's temperament than in this the merriest of the Spaniel family.

In 1901 the American Spaniel Club improved upon the old standard and reducing the weight limit to 24 lbs., has already brought about a more uniform size in the Cocker classes.

In conclusion I would like to say that anyone who has kept Cockers cannot but agree with a certain writer, who likened the breezy Cocker in their merry activity to a breath of fresh air in a heated room."

### The Chow Chow Dog.

Chows are evidently coming to the front in the East; efforts to form a club under the auspices of Mrs. Henry Jarrett and other leading fanciers are meeting with encouragement. The breed has a good standing with the English fancy and is under the fostering cynosure of the Chow Chow Club of England.

We have in this city quite a number of good specimens of the breed; entries have been made at different shows here. Mr. H. M. Pabst, of this city, has a fine black bitch and proposes to have her served by a good red dog owned here. There is no reason why local fanciers, with the material at hand, should not make a good start with Chows; indications point to a substantial Eastern and local encouragement for the breeder.

What our Chinese residents think of the breed and one of its utilities is shown in a number of garments we have seen in Chinese stores and also worn by individual "pig-tails." Blouses worn as overgarments are lined with the skins of Chows, the red colored dogs seemingly being the favorites for this comfortable predilection of the Chinamen. These garments are rich looking and seem to fill the bill acceptably. In this digression, however, it is to be hoped that our readers will not take us as seriously advertising a fur industry in the breeding and raising of Chows for their pelts. The breed is said to have enough desirable and admirable qualities to entitle it to man's consideration as a pet and companion.

The standard and points, as adopted by the Chow Chow Club of England, are as follows:

Head—Skull flat and broad, with little stop; well filled out under the eyes.

Muzzle—Moderate in length and broad from the eyes to the point (not pointed at the end like a fox).

Nose—Black, large and wide. (In cream or light colored specimens a pink nose is allowable.)

Tongue—Black.

Eyes—Small and dark. (In a blue dog light color is permissible.)

Teeth—Strong and level.

Neck—Strong, full, set well on the shoulders and slightly arched.

Shoulders—Muscular and sloping.

Chest—Broad and deep.

Back—Short, straight and strong.

Loins—Powerful.

Tail—Curled tightly over the back.

Forelegs—Perfectly straight, of moderate length and with great bone.

Hind Legs—Same as forelegs; muscular and with hocks well let down.

Feet—Small, round and cat-like, standing well on the toes.

Coat—Abundant, dense, straight and rather coarse in texture, with a soft, woolly undercoat.

Coat—Whole-colored black, white, red, yellow, blue, etc.; not in patches (the under part of tail and back of thighs frequently of a lighter color).

General Appearance—A lively, compact, short-coupled dog, well knit in frame, with tail well over the back.

Disqualifying Points—Drop ears, red tongue, tail not curled over the back, white spots on coat and red nose, except in white or yellow specimens.

N. B.—Smooth Chows are governed by the same scale of points, except that the coat is smooth.

### Portland Kennel Club.

The Portland Kennel Club held its annual meeting on January 8th. The following officers were elected for the ensuing year: Dr. E. F. Tucker, President; Frank B. Thorne, Vice-President; William Peaslee, Secretary; William Goldman, Treasurer and W. M. Davis, W. B. Fechheimer and W. H. Fleming, Directors.

Considerable argument was gone into over the question of the club's making application to join the American Kennel Club. The matter was left to the board of directors to settle.

The coming club show will be under Pacific Kennel League rules in April next. Medals will be given instead of cash prizes. The Treasurer's report showed the club to be in a healthy financial condition.

In debating the motion of Dr. Harry F. Mackay, that the club join the American Kennel Club several members discussed the question as follows:

"J. A. Taylor thought that there would not be enough time to make the change between now and the time of the bench show in April, and deemed it would be wise to cling to the Pacific League. It might have a bad effect on the show to change now, and Mr. Taylor suggested it would be a good thing to wait.

Dr. Mackay said it would be a good thing to take up with the American organization, and do it at once. He said that the members who objected to working under the American club rules were shortsighted, and that every man who would not pay twenty-five cents to have his dog listed with the American lists didn't deserve to have his dog on show.

"I move to amend the motion of Dr. Mackay by leaving the matter with the board of directors, who shall confer with the members of the Pacific League

at the next meeting," said F. H. Flemming. "We want to see if we can join the American club and at the same time, be members of the Pacific League."

"This talk about the Pacific League being of greater benefit to us," said W. B. Fechheimer, "has been aired repeatedly. Now, as far as I know, we get fewer dogs from Washington, which is the home of the Pacific League, than we do from California, which is American ground. The dogs we got from Seattle and Victoria last year were only sent for the purpose of getting the handler's prize. I am in favor of getting a good system of registration with the American organization."

Mr. Flemming's motion to amend was put and lost, and the club went back to the original motion.

E. F. Willis said that he thought that more dogs would come to Portland under the Pacific jurisdiction, and that the Pacific League had done a great deal for dogs in Portland.

"Well, I move you," said Walter F. Burrell, "that the matter be left to the board of directors, and that they be empowered to see if they cannot get certain concessions from the American club, in which case we will join the organization. I think it will be for the best interests of the club to take the national club rather than the coast league." Dr. Mackay withdrew his motion, which was before the house, and Mr. Burrell's motion was passed unanimously.

### DOINGS IN DOGDOM.

Mr. Winthrop Rutherford will judge Fox Terriers at the Westminster Kennel Club show in New York next month.

Entries for the Westminster Kennel Club show closed on the 26th inst. About 300 specials, cups and medals will be awarded to the winning dogs. The regular prizes are of a liberal nature. The bench show committee is composed of William Ransch, Walter Ferguson, Jr., and Richard H. Williams. Mr. James Mortimer, secretary and superintendent, has his office established at Room 701, Townsend Building, 1123 Broadway, New York.

The annual meeting of the San Francisco Kennel Club will be held very soon. Arrangements, we are informed, will be made for the spring show of the club. It is very probable dates about the middle or latter part of May will be selected for the bench show here.

The Christmas number of the *English Stock-Keeper* is full of good things for doggy people—and for the poultry fancier also. The illustrated supplement is splendidly printed on good paper; the half tones showing the pictures of the cracks of to-day in nearly every breed, portraits of prominent fanciers and some interesting "feather" drawings and photos is far ahead of the usual holiday issue and is well worthy of preservation.

In the Coming Events are listed a number of coming bench shows and field trials for this year, several of these fixtures being the inaugural events of the clubs giving them. This is a most encouraging showing and denotes a growing interest in bench affairs and also an increase in the following of the field trials enthusiast.

H. M. Papst's Fox Terrier bitch Humberstone Actress has improved remarkably since the Oakland show. She will be served by Irving C. Ackerman's wire hair Humberstone Bristles.

Prima Donna, his Great Dane bitch whelped, January 17th, 16 puppies (6 dogs) to Posen Great Dane Kennels' Blue Beard.

Mr. Papst will shortly bring out from the East a Bull bitch puppy from a leading kennel.

### Kennel Registry.

Announcements of Visits, Whelps, Sales and Leases will be inserted hereafter, for advertisers, free of cost.

#### SALES.

Nairod Kennels sold to J. P. Ferle the black Cocker Spaniel bitch Stella Silk No. 64646 (Buzz Silk-Bessie Trotwood), January 25, 1903.

### Coming Events.

Nov. 3, 4, 5, 6—Ladies Kennel Association of America.

# \$5000 Reward

to any person who will prove any letter or endorsement we publish to be fraudulent.

## Tuttle's Elixir

is of such well known and high quality that it does not need to bring any thing but honest statements to its defense.

Indispensable for all veterinary uses.

**Tuttle's Family Elixir** is unequalled as a remedy in the home. We send a sample free for 6c in stamps, merely to pay postage.

Send at once for our 100-page book "Veterinary Experience," which we mail free.

**Tuttle's Elixir Co., 4370 Farrell St., San Francisco, Cal.**

Beware of so-called Elixirs—none genuine but Tuttle's. Avoid all blisters; they offer only temporary relief, if any.

**WANTED.**  
**STRAWBERRY ROAN**  
WOULD BUY A STRAWBERRY ROAN Horse or Mare, 15 3 or 16 hands high; trotter, no pacer; 4 to 7 years old. Address, giving particulars, ALFRED SOLANO, 405 Stinson Block, Los Angeles, Cal.

**FOR SALE.**  
**Six Good Jacks**  
at reasonable prices, to close an estate.  
Address  
**W. R. MADDEN, Dixon, Cal.**

**LOOK YOURSELF  
SQUARELY  
IN THE FACE.**

Be master of the situation. Let neither doubt nor influence prevent you from trying

**VETERINARY PIXINE.**  
It makes skeptics smile to read, but it makes a man marvel who turns to it after every known resource fails to cure chronic sores, abscesses and chafes. Ice, storms and rough roads develop scratches, grease heel and speed cracks. Veterinary Pixine counteracts effects of impure blood, penetrates to the depth of hardened fissures, sloughs off proud flesh, speedily soothes and will heal the severest and most chronic cases. Contains no gritty harsh or poisonous substance. Money back if it fails.

2 oz., 25c; 8 oz., 50c, 5-lb pkg., \$4.00  
At all druggists and dealers or sent prepaid.

**TROY CHEMICAL CO., TROY, N. Y.**  
D. E. NEWELL, Pacific Coast Agent, 519 Mission Street, San Francisco.

**SHOEMAKER'S BOOK  
ON POULTRY**

and family almanac for 1903. Over 200 large pages of best book paper with fine colored plates true to life. Tells how to raise chickens profitably, their care, diseases and remedies. Diagrams with full descriptions of Poultry houses. All about INCUBATORS, BROODERS, THOROUGHBRED FOWLS, with lowest prices. You cannot afford to be without it. Only 15 cts.

**C. C. SHOEMAKER, Box 597, Freeport, Ill., U. S. A.**

**FOR SALE.**  
**English Shire and Clydesdale Stallion**  
FIVE YEARS OLD AND WEIGHS 1800 LBS.  
Price reasonable. For further information address  
**P. J. CARROLL, Mills Station, Cal.**

**JACK WANTED.**  
A WELL-BRED, HIGH-CLASS, THOROUGHLY acclimated JACK. Must be a sure foal getter and able to pass the strictest veterinary examination. California-bred Jack preferred. Address **F. W. KELLEY, BREEDER AND SPORTSMAN.**

# THE FIRST AUCTION SALE OF TROTTING STOCK

TO BE HELD THIS YEAR AT THE

## ACCIDENTAL HORSE EXCHANGE

246 THIRD ST., near Folsom,  
WILL TAKE PLACE NEXT

Thursday, Feb. 5, 1903

COMMENCING AT 11:30 A. M.

THIRTY FIVE GRANDLY BRED TROTTERS AND PACERS, THOROUGHLY BROKE, and among them are many "valuable prospects," sired by Antrim (sire of Anzella 2:06 1/2), the greatest money winner of 1902, Oro Wilkes 2:11, Dictator Wilkes, Hawthorne, Brino Tricks 2:13, Wyoming Chief. Fine double teams, perfectly matched, and single drivers.

I will also sell about 15 head of Draft and all-purpose Horses. Tally-ho Brake, cost \$1380; Four-in-hand Harness, cost \$500; Spider Phaeton, cost \$450; Two-seater, cost \$300; Frazier high wheel Cart, cost \$125. Single and Double Harness. All as good as new; have not been used twenty-five times.

These Horses will not be walked in to the Pavilion, but will be shown led to halter by the side of saddle horses, so that buyers can see what gait they have and get an idea of how fast they can go. Everything sold will be guaranteed just as represented.

Catalogues issued immediately.

WM. G. LAYNG, Live Stock Auctioneer.

**Iran Alto 2:12 1/4** Sire of Dr. Frasse 2:12 1/4  
Thomas R 2:15  
Vendome 2:18 1/4  
Dr. Frasse's Sister, 2:25 1/4

By **PALO ALTO 2:08 1/4** (world's stallion record to high-wheel sulky), sire of IRAN ALTO 2:12 1/4, Pasante (4) 2:13, Palita 2:16, Rio Alto 2:16 1/2, Palatine 2:18, and 11 others in 2:30 list.  
Dam **ELAINE 2:20** (world's 3 and 4 year old record in 1877 and 1878), dam of Norlaine, yearling record 2:31 1/2, and of 3 in 2:31 list, and the dams of 6 in 2:30 list.  
Second Dam **GREEN MOUNTAIN MAID**, dam of Electioneer 135 (one of the world's greatest sires), 9 in 2:30 list; sons produced over 300 standard performers.

**IRAN ALTO 2:12 1/4** is not only royally bred, but has proven himself a racehorse and a sire of speed. He is a splendid individual and has all the most desirable qualifications for a great stallion. Breed to him and you will get the kind of colts you are looking for.

Will Make the Season, 1903, at his home

## WASHINGTON JOCKEY CLUB OF THE DISTRICT OF COLUMBIA.

Race Course and Office during Race Meetings, Bennings, D. C.

Office in New York, Room 201. 571 Fifth Ave., "The Windsor Arcade."

STAKES TO CLOSE TUESDAY, FEBRUARY 10, 1903.

## SPRING AND AUTUMN MEETINGS, 1903, AND AUTUMN MEETING, 1904.

Spring Meeting, 1903, begins Monday, March 23d, to include Tuesday, April 14th—20 days

The Handicaps—The Consolation, The Dixie, The Vestal—as below, will close and name at midnight of Tuesday, February 10, 1903.

### The Bennings Spring Handicaps.

To be run on the first and last days of the Spring Meeting.

Handicaps for three-year-olds and upward. By subscription of \$10 each, which shall entitle the entry to start in the First and Second Handicaps, no payment of the additional starting fee of \$30 in each. To close and name at midnight of Tuesday, February 10, 1903, (the second Tuesday in February). Weights to be announced March 4, 1903.

CONDITIONS OF THE FIRST BENNINGS SPRING HANDICAP. Starters to pay \$20 additional, with \$1000 added, of which \$300 to the second, \$100 to the third. The winner to receive one-half of the subscription money, all of the starting money, and the balance of the added money, \$700.

Winners after the publication of the weights of a race to carry 3 lbs. extra; of two races of any value, or one of the value of \$1000, 5 lbs. extra; of three of any value or one of the value of \$1500, 8 lbs. extra. In case of horses handicapped at 118 lbs. or over, these penalties shall apply to the extent of one-half only. Six furlongs.

CONDITIONS OF THE SECOND BENNINGS SPRING HANDICAP. Starters to pay \$20 additional, with \$1500 added, of which \$250 to the second, \$150 to the third. The winner to receive the remaining one-half of the subscription money, all of the starting money, and the balance of the added money, \$1100.

Winners after the publication of the weights of a race to carry 3 lbs. extra; of two races of any value, or one of the value of \$1000, 5 lbs. extra; of three of any value, or one of the value of \$1500, 8 lbs. extra. In case of horses handicapped at 118 lbs. or over, these penalties shall apply to the extent of one-half only, except for the winner of the First Handicap, which shall carry 10 lbs. more than he carried in that race. Seven furlongs.

### AUTUMN MEETING, 1903.

THE GRAND CONSOLATION—\$3000 Added. The Grand Consolation, for two-year-olds, foals of 1901. Non-winners of \$10,000 at time of starting. To close and name February 10, 1903.

### NOTICE.

Entries for the above are received only and under the conditions as printed, and in all respect subject to and in accordance with the rules of The Jockey Club and Washington Jockey Club. For Entry Blanks address the BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco, Cal.

### AUTUMN MEETING, 1904.

THE DIXIE—\$2500 Added.

THE DIXIE, for three-year-olds, foals of 1901. To close and name February 10, 1903, at \$10 each. If not declared by January 5, 1904, to pay \$30 each. If not declared by June 1, 1904, to pay \$10 each. If not declared by September 1, 1904, to pay \$30 each. If not declared by November 1, 1904, to pay \$80 each. Starters to pay \$100 each. The Washington Jockey Club to add \$2500, of which \$500 to the second, \$300 to the third. Colts to carry 126 lbs., fillies and geldings, 123 lbs. Winners of any race of the value of \$10,000, as three-year-olds, to carry 5 lbs. extra. Other horses, if non-winners of \$5000 as three-year-olds, to be allowed 3 lbs.; of \$3000, 5 lbs.; of two races of \$3000 each, 7 lbs.; of three races of \$1500 each, 10 lbs. One mile and three-quarters.

THE VESTAL—\$3000 Added.

THE VESTAL, for three-year-old fillies, foals of 1901. To close and name February 10, 1903, at \$5 each. If not declared by January 5, 1904, to pay \$15 each. If not declared by June 1, 1904, to pay \$35 each. If not declared by September 1, 1904, to pay \$40 each. If not declared by November 1, 1904, to pay \$60 each. Starters to pay \$75 each. The Washington Jockey Club to add \$3000, of which \$500 to the second, \$300 to the third. To carry 123 lbs. Winners of any race of the value of \$7500 as three-year-olds, to carry 5 lbs. extra. Other fillies, non-winners of \$4000 as three-year-olds, to be allowed 3 lbs.; of \$2500, 5 lbs.; of \$1500, 7 lbs.; of two races of \$1000 each, 10 lbs. The winner of the Dixie to carry 5 lbs. more than she then carried. Mile and a half.

## "SAVE-THE-HORSE" SPAVIN CURE.

Need one wonder why our written guarantee, which accompanies every bottle, was constructed so it is equivalent to a bond?

E. W. CHAPIN, Manager, ROBERT ILLINGSWORTH, Supl. 465 Broome St., New York.

ELIZABETH WAGON WORKS, B. F. STRAUSS, Prop'r.

35-41 South Spring Street, ELIZABETH, N. J.

### The Northboro Woolen Mills.

Chapinville, Mass., NOV. 22, 1901.

Received from Telegraph and Express Office Northboro, Mass.

Troy Chemical Co., Troy, N. Y.: Gentlemen—I purchased several bottles of "Save-the-Horse" Spavin Cure for myself and friends during the last four months. The first case on which I used it was a bad splint, and to my astonishment it not only took out the soreness but removed the splint.

Second case—My brother-in-law had a valuable mare with a bone spavin, and at my suggestion he tried "Save-the-Horse." In this case the bone is not entirely removed, but all the soreness and lameness is gone, and the mare travels as sound as a colt.

Third case—I tried it on the well-known black pacer "Alhambra," record 2:08 1/2, sired by "Legal Tender, Jr." This horse was lame when I purchased him, with a strained tendon on right hind leg. I tried all kinds of liniment before using yours; yours at \$5 per bottle seemed a pretty high price; but I had to come to it, as none of the other liniments had done any good. I used one and a half bottles of "Save-the-Horse," and he seems to be entirely cured. I have him out every day and hardly ever take a ride but he gets one or two brushes before getting home. All I can say is that "Save-the-Horse" has done splendid for me, and I know of nothing its equal. Very truly,

E. W. Chapin

Gentlemen—With three bottles of "Save-the-Horse" I removed a thoroughpin on one leg and cured a spavin on the other leg on one of my horses. I appreciate what "Save-the-Horse" has done in my case, and will show the horse to any one who desires to see it. Very truly,

B. F. STRAUSS, Prop'r.

Horse can be worked with either shin or ankle boots, as no harm can possibly come by either destruction of hair or peeling of the limb. "Save-the-Horse" can be applied in all conditions and extremes of weather—hot or cold.

POSITIVELY AND PERMANENTLY CURES Bone and Bog Spavin, Ringbone, Curb, Thoroughpin, Splint, Capped Hock, Shoe Blist, Weak and Strained Tendons and all Lameness. Contains no arsenic, corrosive sublimate or other forms of mercury, or any injurious ingredient.

Cures without scar, blemish or loss of hair.

\$5.00 PER BOTTLE.

Written guarantee with every bottle, constructed to convince and protect you fully. The need of second bottle is almost impossible except in rarest cases. Guarantee covers effectiveness of one bottle.

Copy of guarantee sent upon application

\$5.00, all druggists and dealers, or sent prepaid.

**PRESENT HOLDERS OF VASE, CARRUTHERS & SHIELDS,** with the six-year-old chestnut horse, "Advance Guard," by imp Gr. at Tom, dam, Nellie Van. Two miles and a quarter. Withers Course.

## CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.  
IT PENETRATES AND DRIES IN quickly and DOES NOT GUM AND FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.  
It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLENESS quickly disappears.  
QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.  
It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.  
IT PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS A TOUGH, STRONG, ELASTIC WALL and HEALTHY FLESH—A FOOT WHICH WILL STAND WORK on race courses.  
Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds due to its use.  
It is a CERTAIN CURE for THRUSH and SCRATCHES.  
We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2½-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.  
Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.  
JAS. B. CAMPBELL & CO., Manufacturers, 412 W. Madison St., CHICAGO, ILL.

THE MONEY ON THE GRAND CIRCUIT OF 1902.

## BARONDALE 2:11 1/4

Reg. No.  
20,189.

IS A SON OF BARON WILKES 2:18.

His first dam, Nathalie, produced Barondale 2:11 1/4 and Grand Baron 2:12 1/4 and is by NUTWOOD, the greatest of all sires.  
His second dam, Beatrice is the dam of Patron 2:14 1/4, Prudigal 2:16, Patronage and Pangloss, all great sires, and is by Cuyler.  
His third dam, Mary Mambrino is the dam of Elvira 2:18 1/4, the producing sire Dunraven, and dams of Ponce de Leon 2:13 and four others.  
BARONDALE has two new ones in the list this year and is now the sire of four in the list.

Where Can You Beat This Breeding?

Season of 1903 at SAN JOSE RACE TRACK.

Terms, \$50 for the season, with usual return privileges.

For further particulars address TOM JAMES, 1120 Alameda Ave., San Jose, Cal.

## STAM B. 2:11 1-4

(TROTTER.)

REG NO. 23444.

3-YEAR-OLD RECORD, 2:15 1-2  
(Timed second in 2:13 1/4)  
4-YEAR-OLD RECORD, 2:11 1-4  
(Timed second in 2:09 1/2, 2:09)  
2-YEAR-OLD TRIAL, - - 2:26

Early speed is natural speed, and natural speed is inherited speed.  
Reach for the top by breeding a good mare to STAM B.

Your chances are good for a 2:02 trotter or a Futurity winner, extra good for a handsome show or coach horse. It is a well-known fact that Baron Wilkes 2:18 has been recognized for years as the leading money winning sire, and his blood and the blood of STAM B. is among the leading early speed performers, so much so that that well informed and successful breeder, the late Col. R. G. Stoner, contemplated purchasing STAM B. as stud companion for Oakland Baron 2:08 1/4. Such blood produced rhythmic 2:08, Baron Deshay 2:08 1/4, Gail Hamilton (3-year-old) 2:12, Peter Stirling (3-year-old) 2:14. By tabulating STAM B.'s pedigree, it is impossible to do so without figuring in all the champion performers' records: 1:59 1/4, 2:01 1/4, 2:01 1/4, pacing: 2:02 1/4, 2:03 1/4, 2:03 1/4, 2:04, trotting—and the once champions of the show ring, Stamboul 2:07 1/4, Mambrino King and Almont Lightning, and such young Futurity performers as Champion Girl 2:12, Bugle (3-year-old) 2:14, Oxford Boy (2-year-old) 2:20, Wiggins (2-year-old) 2:19 1/4, sire of Katherine A. (2-year-old) 2:14, Hilgar (2-year-old) 2:15 1/4, Wigwag (3-year-old) 2:18 1/4.  
STAM B. was sired by Stamboul 2:07 1/4, sire of 47 from 2:10 1/4 to 2:29, sons and daughters (24 from 2:07 1/4 to 2:37, showing that his blood breeds on and down. With his few foals, he compares favorably with the leading sires of the past. First dam Belle Medium 2:30 (dam of 3 from 2:11 1/4 to 2:30) by Happy Medium, sire of Nancy Hanks 2:04; 55 of his sons produced 283 from 2:07 1/4 to 2:30; 58 daughters produced 78 from 2:10 to 2:30, including Admiral Dewey (3-year-old) 2:15. Second dam Argenta (dam of 1 in 2:30) by Almont Lightning, sire of 1 in the list and dams of Zombro (3-year-old) 2:11 and King Princeps 2:15 by Almont 33. Third dam Mary Adams by Mambrino Patchen, sire of dams of Guy Wilkes 2:15 1/4, Baron Wilkes 2:18, Patchen Wilkes 2:29, etc. etc. Fourth dam Mambrino Belle by Mambrino Chief 11, sire of Lady Thorne 2:18 1/4 and dams of Director 2:17, sire of Directum (4-year-old) 2:05 1/4, Onward 2:25 1/4, sire of Beuzetta (4-year-old) 2:06 1/4. Fifth dam by Mason's Whip (thoroughbred).  
Can it be possible that the service of such a bred stallion can be secured for such a low fee? Yes, for this season only. Grasp such a rare opportunity! STAM B. has the characteristic of transmitting speed, soundness, size and style, as his ancestors have size, soundness, speed and style. He is a hand-some bay, two white hind ankles, 15 1/2 inches high, weight 1090 lbs. a typical Morgan in form, of the greatest stamina and of powerful muscular development. As a living game racehorse he is known nationally. In his career he beat such noted trotters as Klamath 2:07, Kentucky Union 2:07 1/4, Toggles 2:08 1/4, Altas 2:09 1/4, Jasper Ayers 2:09 1/4, Monterey 2:09 1/4, Zombro 2:11 and Stamboulletta 2:10 1/4. STAM B. 23444 (2:11 1/4) will make the season of 1903 at that well-appointed farm,

SANTA RITA FARM, PLEASANTON, CAL.

Terms \$40 SPOT CASH, at time of service. Best of care taken of mares and foals, but no responsibility for accidents or escapes. The public is cordially invited to attend our receptions at all times from February 15th to June 1st and see our gems.  
For extended pedigree and further particulars address

TERMS \$40 the Season.

For further particulars and cards with tabulated pedigree address

## SEARCHLIGHT 2:03 1/4

THE FASTEST STALLION BY THE RECORDS EVER  
OFFERED FOR SERVICE ON THE PACIFIC COAST.

He still holds the World's Records for 4-year-old (2:04 1/2) and for 5-year-old (2:03 1/4).

SEARCHLIGHT is one of the fastest and gamest horses that ever raced on the Grand Circuit. He is a horse of rare individuality and is one of the most perfect specimens of horseflesh ever foaled. He has repeatedly beaten one minute to the half-mile pole in his work, and has pulled the heavy cart in which he now takes his exercise a half in 58 seconds with a dozen watches held on him.

Few stallions that ever stood for service in California have such royal blood lines. Darknight, the sire of SEARCHLIGHT, was like the great McKinney, a son of Alewife, and is a sire of extreme speed, having four 2:10 performers to his credit. The dam of SEARCHLIGHT is one of the great brood mares, having four with standard records and his grandam and great grandam are both in the great brood mare list. His oldest colts, now two years old, show that he imparts these qualities to his get, and he is certain to be a producer of early and extreme speed as well as size and good looks.

Terms for the Season, \$75.

## LECCO 2:09 3/4

The Blood that produced Dan Patch 1:59 1/2

LECCO 2:09 3/4 is a very handsome black stallion, a square trotter and as game a racehorse as ever looked through a bridle. He is by Bonnie Boy, one of the best producing sons of Patchen Wilkes, sire of the great Joe Patchen 2:01 1/4, that in turn is the sire of the unbeaten Dan Patch 1:59 1/2. The dam of LECCO is a great brood mare by Homer, and his second dam is a producing mare by Rochester and his third dam is a producing mare by Clark Chief. For four generations in the pedigree of LECCO there is not a sire or dam but is a producer of standard speed.

LECCO made a campaign through the Grand Circuit in 1899 that shows his wonderful speed and gameness. He met the best horses out that year and in seven starts won four first moneys, two seconds and was but once unplaced. His action is perfect and he cannot help siring a family of high class, handsome, fast and game trotters.

\$50 for the Season.

The above horses will stand at the PLEASANTON RACE TRACK, and all mares not proving with foal may be returned free next year, or in case the horse is not in California the service fee will be returned. It is the intention of the owner, however, to keep both SEARCHLIGHT and LECCO in this State for the next four or five years. Due care taken to prevent accidents or escapes, but no responsibility assumed should any occur. Good pasturage provided at \$4 per month, and all bills payable before mare is removed from my possession.

For further particulars and tabulated pedigrees address

EDW. MILLS, Rose Hotel, Pleasanton, Cal.

## NUSHAGAK

Sire of

ARISTO (3) 2:17 1/2 winner of  
and Stanford Stakes, 1902

MAJELLA B. (2) 2:29 Trial (4)  
2:13 1/4

THE BOQUET Trial (3) 2:21  
in 1902

Brown Filly Trial 2:20 1/2 as a  
4-yr-old in 1902

Reg. No. 25939

Black Horse 15-2 1/2 hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15 1/4, Sabina 2:15 1/4, Sableade (at 2 years) 2:18 1/2, Buffington (at 2 years) 2:20 1/4 and 36 others in 2:30 list. Fidella (trial 2:35 at 2 years), dam of Fidette 2:38 1/2, dam of Mary Celeste (at 2 years) 2:17 1/4 by Director, sire of Directum 2:05 1/4, Direct 2:05 1/4, Nathan Straus 2:05 1/4, Direction 2:08 1/4, etc. Second dam by Reavis' Blackbird 2:32, sire of Mamie Griffin 2:12, Vic H. 2:12 1/4, etc. Third dam by Lanet, son of McCracken's Blackhawk 2:07.

NUSHAGAK's sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro Wilkes 2:11 was one of the gamest colts that ever raced on the Grand Circuit. The Wilkes and Director blood is a successful cross as it has produced John A. McKerron 2:15 1/4, Nathan Straus 2:05 1/4, Ozanam 2:08, Dollade Wilkes 2:10 1/4, Oro Wilkes 2:11, Evangeline 2:11 1/2, Mary Celeste (at 2 years) 2:17 1/4, etc. Fidella, NUSHAGAK's dam, is in the great broodmare list and she would have been a very fast trotter if given an opportunity, as with very little training she trotted a mile in 2:35 as a two-year-old. Mr. Corbett purchased her from Mr. Goldsmith for a broodmare, consequently her training was discontinued. The rest of Reavis' Blackbird, the sire of NUSHAGAK's second dam, were noted for their remarkable gameness and vigorous constitutions. His two noted daughters, Mamie Griffin 2:12 and Vic H. 2:12 1/4, were exceedingly game. NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17 1/2, Majella B. (2) 2:29 (trial at 4 years 2:13 1/4), and The Boquet (trial at 3 years) 2:21. His other colts that have been handled some are: Brown filly, 4 years old in 1902, showed trial of 2:30 1/4 with three and one-half months' work; blk g. 3 years old in 1902, with three months' handling showed mile in 2:35 1/2, last quarter in 35 1/2 seconds. His son Aristo (at 3 years) 2:17 1/4 took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake. Before taking sick we felt confident that Aristo would trot a mile close to 2:30 in his three-year-old form; the way he raced after being sick made us feel satisfied that we had made no mistake in our estimate of him. His third heat in 2:17 1/4 was equal to 2:13 1/4 or 2:14 over the Woodland, Santa Rosa or Stockton tracks.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

Limited to 40 outside mares, at \$50 the Season,

with usual return privilege if mare proves not with foal. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed should any occur. First-class pasturage for mares, \$3 per month; no barbed wire. Address

WALNUT GROVE STOCK FARM,

Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morshead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

## CAMPBELL'S

## EMOLLIO IODOFORM

## GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL FOR BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY. It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables.

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

Read our "ad." on Campbell's Horse Foot Remedy in next issue of this paper.

San Francisco, Saturday, February 7, 1903.

A HARNESS RACING CIRCUIT is needed in California, and if a half dozen of the leading interior tracks could perfect some sort of an organization under energetic and intelligent management, a successful circuit could be arranged for 1903, in which there would be no provision made for the runners. The Breeders Association gave a very successful meeting at Fresno last year and other tracks can do as well with programs providing solely for trotting and pacing races. California is about the only State in Union where harness and running racing are held on the same day at the same track, the eastern associations finding years ago that the two classes of sport do not mix much better than water and oil. A circuit comprising the towns of Santa Rosa, Napa, Vallejo, Woodland, Stockton, Pleasanton, San Jose, Fresno and Los Angeles could be arranged that would attract all the best trotters and pacers that are trained on this coast with the exception of two or three strings that go east to compete on the Grand Circuit, and by united action on the part of those most interested in horse breeding in California, such a circuit could be made profitable alike to the horsemen participating and to the associations holding the meetings. The harness horse is more popular and in greater demand now than for many years and this is the year to arrange a circuit of harness racing on new and up-to-date lines. It only needs the prompt and energetic action of a few horsemen in each of these towns to accomplish this. The district fair associations would be only too glad to join in with the horsemen on such an enterprise. But the horse breeders and owners should take the lead. There are enough in any one of the towns above mentioned to organize a club or association for the purpose of giving a harness meeting this year, and they are the ones who should take the initiative in this matter. "The Lord helps those who help themselves," and this old proverb applies to the horse business as well as to any other legitimate enterprise.

THE BREEDING SEASON has opened and the indications are that the number of trotting bred mares sent to standard stallions this year will far exceed that of last season. It is the increased prices for track and road horses that will cause this, and as all dealers are confident that the supply of this class of horses cannot possibly equal the demand during the next few years the outlook is excellent for those who breed intelligently this year. We desire to call the especial attention of our readers to the stallions advertised in these columns that will stand for public service in California. We think it will be found a good rule that where other things are equal, the stallion that is advertised is a better one to patronize than the one whose owner keeps him in seclusion. In these days, the majority of men who breed mares read the horse papers to ascertain the blood lines of stallions and the records and performances of the families from which they come. Those who train and race trotters and pacers are the ones who blaze the way for thousands to follow who never race at all but who comprise a vast majority of the breeders, and it is the records made by the horses that race which establish the standing of the sires. A horse that is not worth advertising is as a general thing not worth breeding to, although of course there are exceptions to every rule. Many horses are kept as private stallions, only being mated to mares that are carefully selected with a view to aid the stallion in siring extreme speed or high class show horses, but the owners of these know full well the value of advertising and read with pleasure the records of the Year Book and the published summaries of every race in which the get of their horses show up well.

Judicious advertising pays a large profit on the investment, and the files of any turf paper for the past ten years will show that the stallions advertised were the ones patronized. Of course, there can be found a dead and alive owner now and then who expects one advertisement to do all the work, but these men are very few and it will be found that the stallions advertised continuously are the ones that get the largest patronage. In our advertising pages this week will be found the cards of stallions that are worthy of the patronage of the breeders of California. All the leading strains of trotting and pacing blood of America are represented and the list is one of which any State might be proud. Study them over and mate your mares where your investigations and reasoning tell you they should nick well.

THE HAYWARDS HORSE SHOW, the date of which has been set for Saturday, March 7th, should attract a very large entry list and be a complete success, weather permitting. There are no prizes nor awards given at this show, no entrance fee nor admission charged, nor is there any expense to exhibitors except the inconsiderable one of taking their horses to Haywards for that day. It is expected that a very large proportion of the horses shown will be owned in Alameda and adjoining counties, but horse owners everywhere are invited to participate in the exhibition and enter their animals in the parade. No breeds or classes of horses are barred from exhibition. Stallions, mares, geldings colts and fillies of all ages will be given a place in the procession, and animals can be led to halter, drive single, double or any other way or shown under saddle. The thoroughbred, the standard trotter or pacer, the draft horse, the carriage horse and the pony are equally welcome, and those that have stallions to show or horses to sell are invited to bring their animals and exhibit them to the large crowd that is certain to be in attendance. Mr. George Gray of Haywards is President of the Association under whose auspices the show is to be given and editor Geo. Oakes of the Haywards Journal is Secretary. Either of these gentlemen will be pleased to answer any correspondence in relation to the exhibition, and will send entry blanks on application.

DREAMWOLD, the magnificent farm owned by Thos. W. Lawson at Scituate, Mass., advertises its stallions in this issue of the BREEDER AND SPORTSMAN. As will be noticed, the farm offers the services of two of its choicest stallions free to a few approved mares. Dare Devil and Ponce de Leon will be booked to 20 approved mares at \$200 each and Glorious Red Cloud, Glorious Bonnie and Glorious Lonnie will be permitted to serve 10 approved mares each at the same figure. The Dreamwold advertisement, which fills a half page, is most interesting reading.

## Diablo 2:09 1-4 at Woodland.

The advertisement of that grandly bred and handsome stallion Diablo 2:09 appears in this issue. He will make the season of 1903 at Woodland, Yolo county, California, where he has stood for the past two years.

The breeders of California do not need to be told of the many good qualities of this great race horse and sire as he has proven himself great on the track and in the stud and has had a large patronage during recent years from the leading breeders of this State.

Last year his son Sir Albert S. reduced his record to 2:03½ in one of the greatest pacing races of the Grand Circuit, and is looked upon as a coming two minute performer by many of the best posted eastern horsemen.

The Diablos all have size, good looks and speed, and as race horses they have acquired a reputation of being dead game.

In the 2:15 list Diablo is represented by nine race winners, as follows: Sir Albert S. 2:03½, Clipper 2:06, Diodine 2:10½, Daedalion 2:11, Diawood 2:11, El Diablo 2:11, Tags 2:11½, Hijo del Diablo 2:11½ and Inferno 2:15. Every one of them made his record in a race.

Diablo was bred at the Oakwood Park Stock Farm, stands 15 3 hands high and is a rich dark chestnut in color. He has a clear head, intelligent eye, good ear, splendid forehead and wide jaws. His neck is arched and well set on good slanting shoulders. His back is short, and over the coupling full and strong. He has well sprung ribs, heavy quarters, long muscular gaskins and arms, splendid knees and hocks, clean, short cannon bones, backed up by strong cords and tendons, all sustained by the best of feet and pasterns, make him a model horse in every respect. No stallion on earth has a better disposition. Diablo is by a great producing sire and out of one of the greatest of broodmares. As a uniform sire of size, style, good looks and extreme speed he is the peer of any horse on this Coast. At \$50 the season he is in the reach of every breeder that owns a good mare.

## A Coming Sire.

At Winters, Yolo county, in this State, is located a stallion whose produce in the next few years are destined to attract great attention from the breeders of the whole Pacific Coast. This stallion is the property of that popular and level headed horseman Sam H. Hoy and is known as Bayswater Wilkes 2:25½, sire of Kelly Briggs 2:10½. Bayswater Wilkes is by Sable Wilkes 2:18 as a three year old, son of Guy Wilkes and the great broodmare Sable by The Moor. The dam of Bayswater Wilkes is Fanny Bayswater, a thoroughbred mare that has produced two standard trotters, one the subject of this article, the other Senator L. 2:23½, holder of the world's four mile record of 10:12.

Last May at the town of Dixon, Solano county, there was held a day's racing over the rather rough little half mile track there, and on the program were two colt races, one for two and the other for three year olds. The two year old event was half mile heats, three in five. This went to The Giggler, a son of Bayswater Wilkes, in three straight heats, the last in 1:20, pretty good time for a green two year old in May. The three year old race was also won by a son of Bayswater Wilkes, Donwater, in straight heats, best time 2:37, which could have been 2:30 if necessary. These colts and Kelly Briggs are the only ones of the get of Bayswater Wilkes to start. Kelly Briggs, as all know, is one of the fastest pacers ever raced in California. He was only beaten a neck by Miss Logan in 2:06½ last year in a third heat at Woodland and is expected to pace in 2:05 this year to a certainty.

Bayswater Wilkes sires size and good looks as well as speed and he should be well patronized this season at \$40.

## McKerron's Brother.

The advertisement of the stallion Nearest 2:22 appears in our business columns to-day and he will make the season again at San Jose. Nearest is an own brother to the famous John A. McKerron 2:05½, champion trotter of all the Wilkes tribe. At eight years old Nearest has a 2:10 performer in Alone 2:09½, the fastest four year old filly of 1902. This is a distinction no other stallion has yet gained and highly creditable to this grand looking son of Nutwood Wilkes. Nearest is a large horse of splendid proportions and all his get are large, fine looking horses. They not only have speed, but they are fit for the show ring and have perfect dispositions and make ideal roadsters. Mr. T. W. Barstow, owner of Nearest, will be pleased to answer all correspondence in regard to his stallion and send cards containing full pedigree and all particulars.

## Answers to Correspondents.

OSCAR DUKE, Selma—Mendocino, the Palo Alto bred stallion, was foaled in 1889. He is a bay horse, 15 2, hind feet and ankles white. His three year old record is 2:19½, and he is the sire of Idolita 2:09½ and Monte Carlo 2:09½. His sire is Electioneer, his first dam Mano (dam also of Electant 2:19½) by Piedmont 2:17½, second dam Mamie (dam of Mamie W. 2:17½, Hyperion 2:21½, Memento 2:25½ and Mithra (p) 2:14½) by Hambletonian Jr. No. 1882, third dam Gilda (thoroughbred) by imp. Mango, fourth dam Juliet by imp. Sovereign, fifth dam imp. Jane Shore by Whisker.

Avena, ch m, foaled 1890, is by Palo Alto 2:08½, first dam Astoria by Gen. Benton, second dam Asthore by Kentucky Prince, third dam Sheba by Hambletonian 10, fourth dam Queen by Hambletonian 2.

## The Latest.

The newly opened harness emporium of Jepson Sons & Kraft, at Nos. 1145-7 Market street, is fitted up in a manner to not only show goods so that one has a chance to thoroughly inspect all goods offered, but also to facilitate and expedite sales. They carry in stock every requirement for the horse, whether for track, stable or road work, and as their stock is most extensive and the proprietors are thoroughly conversant with the business and very much alive to the situation, one will have no difficulty in here filling his varied wants. It is the aim of this new firm to so effectually fill the demands of all classes of horsemen and they invite an inspection of their warerooms. In connection with their salesroom they also have on the premises a factory where any article not carried in stock will be made to order and in every instance entire satisfaction is guaranteed. Give them a call—we commend them.

## The Best Testimonial.

The best and most convincing testimonial of the great merit of Campbell's Horse Foot Remedy is that there is not, and never has been, a firm putting a horse foot remedy on the market whose agents have not claimed for their goods that it equaled Campbell's, thereby acknowledging Campbell's Horse Foot Remedy to be the standard. The annual sales of Campbell's Horse Foot Remedy in 1902 are greater than those of any previous year. It is the only remedy which prevents sound feet from becoming unsound and cures diseased feet. Buy a can. If not satisfactory ask your dealer to refund the money paid. He is authorized by us to do so.

A lot of McMurray carts just received. You need one right now to work your colts in this winter. Call at the Kenney Manufacturing Company, 531 Valencia street and take a look at these carts and other first-class vehicles they have for sale.

SAN BENITO.

[illegible]

A number of members of the Los Angeles are agitating the opening of the track again, and it is to be hoped some of them are to be elected, such there from. In any case the present struggle may show just what condition this 9th agricultural district is in. At the present time Mr. Brooks has a bona fide lease, and the action of the City Council prohibiting pool selling prevents him from giving a winter meeting. Such a meeting would have done a lot of good in a financial way in Los Angeles, and many hundred people would come here to enjoy the races at this beautiful track, in this the best winter and summer climate on earth.

Mr. Brooks intended to give a spring harness meeting at a good one. It is at Los Angeles that the spring racing should start, and a spring meeting would be a good one. We should, and could, get horses here from El Paso and points in Arizona. Everyone is prosperous here in spring. The Arizona and New Mexico visitors are here at that time to spend the summer, while when the fall meeting comes on, the Arizonians have gone back to the land of sand, fleas and gold mines. Possibly the people who got Mr. Brooks balled out will get sensible and make it possible for him to retain the track. Smoke the pipe of peace, if there's anything legally wrong with the 6th district, get into court or out of it, and clean it up. It was real business to wash the dirty linen of years' accumulation when Mr. Brooks had his lease. He should have been allowed to give his meeting. The time to remedy these things was years ago. The Daving Case had a lease, and, strange to say, while the lease was in force no fault was found. Poor Brooks comes in and gets clipped in the first flush. Of course it makes some difference whose ox is being gored.

The Los Angeles Driving Club is made up of the very best men in the county. The club is, I believe, highly prosperous, and no doubt these club members, who are all first class business men as well as lovers of good horses, will either get Mr. Brooks to open his track, or build a new one, as the city must have a track.

W. C. Deafoer, training 30 head of good horses. His great stallion, Peter, 2 1/4, is in big demand. Mr. Deafoer has 30 well-bred mares for Peter; Coronado, the best looking son of McKinney, is also in good demand. Mr. Deafoer has several high class individuals in his stable. While Mr. Deafoer is training about 35 good looking horses, several by Zombro. Walter speaks highly of the horses, saying they are uniformly good and of good speed. Mr. Kent has about 25 head of good horses, mostly of the gates. Kent was one of the best riders in the ground. Bert Crowley, the best of the gate boys, says he has had a taste of the good horses. A Bert is certainly not ready to say much about the horses, but he is out of bed and on his feet, and is saying some. In fact, this good horse has been a great deal of help. His grand old horse, a son of Peter, is one of the most famous horses in the country.

[illegible]

There is a good Yankee trainer that fits good man-  
 ues and speed to all his horses.

“He can say to you, next week that the L.S. Association is open; that the kickers are all pleased; that the spirit of peace has been tiled and smoked, and that the books is to stay, and that every trainer has several fine performers for the spring meeting.”

C. A. HARRISON.

The breeders of America may not be aware of the fact, but it is nevertheless a fact, that the industry of producing the light harness horse is in a healthier state than ever in its history. The market is strong and steady. There is not that tremendous demand that amounted to almost a craze a dozen years ago, yet the demand is greater than the supply. In the days of inflated prices the supply was greater than the demand, and this fact ruined the industry. Inflated prices are dangerous to the stability of any commodity. While the demand at present is strong, it is a legitimate one, and is for that reason better for the business, as it separates the wheat from the chaff and puts a premium on quality. The strongest proof of the strength of the market can be found in the summary of sales held at the various sales marts. To-day any well formed, sound trotter of speed, whether extreme or moderate, will sell for his full value, and his selling price will be regulated by his real merit, not by his blood lines, as was the case ten years ago.

The surest way to ruin any industry is to flood the country with worthless material. This was done before the depression. Men were forced out of the business, either through insolvency or disgust, or both, by having thrust on them inferior animals. Good horses have never ruined anybody. Men can not be expected to pay out thousands of dollars for trotting-bred failures and go back after more. Some have done it, but their pocketbooks have been longer than their judgment. To-day the trotter that is a trotter is a valuable commodity; he is both a purchasable and salable article; the demand for him is based on legitimate reasons. He is either a source of pleasure or of profit. The genuine trotter of to-day has two purposes; he can either be used as a money-making machine or as a pleasure-giving luxury. As the latter he possibly has the highest fictitious value, for rich men will pay more for pleasure than men of moderate means can afford to pay as an investment.

The American trotter is no longer a rainbow to be chased after; he is a certainty, and can be produced with a greater degree as such than ever before in his history. There are hundreds of men to-day willing and anxious to pay for the real trotter. To supply this demand the entire country can not be searched closely enough to furnish the material. Buyers are plentiful, yet really excellent trotters are scarce. No little of this change in the affairs of the trotting turf is due to the rich futurities and colt stakes that have been given during the past few years. To-day well formed, sound and well gaited colts and fillies that have speed sell on their prospects, not on their pedigrees alone. Horses frequently trot in spite of, not by reason of, their breeding. The pedigree may be the foundation stone of the capacity, but unless the horse is a reality the pedigree avails nothing.—*The Horseman*.

## The New Challenge Cup.

Mr. T. C. Abbey, the well known horseman of Eureka, Humboldt county, visited San Jose last Monday and took away with him the three year old bay colt *Grego* by McKloney 2:11½ out of the producing mare *Alein* 2:26½ registered as *Alein* by Antee 2:16½, second dam *Lou Milton* dam of three in the list and also dam of the sensational green mare *Lou Dillon* that *McHard* Sanders worked in 2:08½ last season by *Milton Medium*, son of *Happy Medium*.

Green is a natural trotter, good gaited and fast and is entered in the Ocala Stake to be trotted this year. His breeding is first class and is a combination of the Wakes, Liberator and Happy Medium families, all holders of world's records. Again, the dam of Green has already produced two fast trotters in the names Mount 2:20 by Soudan and Sister 2:20 by W. K. King. She is a daughter of Antico 2:16 that is the great-grand-sire of one of the great locomotives ever bred by W. W. Richmond, Lou Milton, the second fastest trotter in 1910. Mare 2:25, Redwood 2:21 and Auro 2:20, with her daughter Lou Duden 2:20, are considered one of the fastest green trotters ever bred in California.

One of them is only a fast trotter but a very handsome, easily handled, he will breed a very valuable horse to him, and next season Mr. Carey will train Green to harness this year after making a short season with him in the stall, the number of mares being very limited. Those who get an opportunity to breed to one of this season will be lucky.

Hollister is the county seat of San Benito county, with a population of 2500. It is a prosperous, growing and up to date town, 75 miles south of San Francisco, on the line of the Southern Pacific, with three trains a day to and from said city. Hollister is 25 miles east of Monterey bay and is 284 feet above the sea level. The annual average mean temperature based upon public records is 58.9. The climate is as near perfect as can be found in California, which excels in climatic conditions. The average rainfall is from 12 to 15 inches. A cool breeze comes in from the sea coast on the west, which tempers the warmest summer days, and both summer and winter are very inviting.

## HOLLISTER CREAMERY.

We have one of the best regulated creameries in the West, with Mr. J. N. Keiser as buttermaker. In the State contest, with over 40 creameries and private buttermakers contesting, the Hollister Creamery won the first prize and gold medal for the best butter made in California, with a score of 97.13 points out of a possible 100. All the butter from this noted creamery is sold right at the creamery—no freight or commission—at 1c a lb. premium above the highest San Francisco quotations and during the summer months more orders are received than can be filled. To produce these flattering results it requires good water, good feed and good climatic conditions, as well as a prize buttermaker. There are also twelve cheese factories throughout the county.

HOLLISTER HAY.

This county is particularly noted for the quality and quantity of the hay it produces. Hollister hay commands the highest market price, and is known all over the Coast for its superior quality. The average annual yield marketed from the county is 35,000 tons, which is something over one-fifth the State's supply. The largest hay warehouses ever built in any country are to be found in Hollister.

## POULTRY BUSINESS.

This county also excels in the poultry business, the perfect climatic conditions, with the absence of fogs, extreme heat or cold, contribute largely to the success of this industry. The eggs and poultry shipped from Hollister are something almost beyond comprehension. The wonderful fertility of the soil and the health-giving climate are great inducements to home seekers to settle here.

### AMONG OTHER INDUSTRIES

Are the raising of wheat, barley, oats, apples, peaches, pears, prunes, plums, apricots, cherries, grapes and various other fruits. Palmtag's vineyard in this county covers 405 acres, producing 14 varieties of grapes, received awards at the Chicago World's Fair at the California Mid-winter Fair and at the Paris Exposition. Among products are almonds, walnuts, berries, garden truck, thousands of tons of sugar beets, alfalfa for hay, also for grazing purposes, dairying and stock raising. A large area of alfalfa and fruit land is subject to irrigation by water from the Hollister Irrigation Company, artesian wells and from a number of private pumping plants scattered here and there throughout the valley, making the fertile soil very productive. The New Idria Quicksilver Mines the richest in the world, are situated in the southern end of this county.

GOOD OPPORTUNITIES.

There are numerous good chances for people with large or small capital in this county. We invite you to come and be convinced. If you cannot come, write for a booklet and poultry folder, which give more information and devote more space to detail. Address: San Benito County Improvement Club, Hollister, Cal.

When the famous Boston challenge cup was offered early in the summer of 1900, amateur racing was in its infancy everywhere excepting in Cleveland, and one could hardly expect that under such conditions all the contingencies could be covered in the deed of gift, though John A. McKerron had hardly won the first leg of the contest for the trophy when it was apparent that several clauses could have well been added to the racing conditions. The Cleveland club is not only the oldest of the prominent amateur driving clubs, but also the most enthusiastic and active club in the country. As is well known the Cleveland club, after securing its great three-time victory with McKerron, decided to offer a new cup for the best wagon trotters of the land. At one time the intention was to give the cup for 2:10 trotters, in order that the trophy be open for more owners, but it was finally decided to make the race for trotters of any record. This will in all probability narrow the contest down to four or five possible starters. Those trotters which, on their last year's form appear to be worthy to contest for the trophy, are: John A. McKerron, Lord Derby, The Monk, and Major Delmar. The first plan was to offer a cup valued at \$2000 but it was finally decided to pay \$500 for it. If any club wins the cup three times it becomes the property of that club. The contest will be open only to amateur reinsmen, and an amateur is defined in the deed of gift as one who has never accepted wages or hire as a trainer or driver. The cup is sure to greatly stimulate interest in amateur harness sport.

### Big Racing Circuit Planned.

James W. Brooks, manager of the Los Angeles Jockey Club, which organization was recently prevented from holding a thirty-day race meeting by the passage of a city ordinance preventing betting or races in Los Angeles, has about completed the organization of a racing circuit which is on the largest scale of anything heretofore attempted for spring and summer racing on this Coast. According to the Los Angeles Herald, Mr. Brooks and his associates, Jim Davis, Bart Cavanaugh, L. B. Eaton, Caesar Young and Zick Abrams, propose to establish a circuit of six cities along lines similar to those of the Western Jockey Club and have already completed their negotiations in securing a foothold in Butte, Mont., and Great Falls. Work is now being done in Seattle, and Portland will probably be made a part of the circuit. Sacramento and Los Angeles are also included in the scheme, the former to be the place for a short spring meeting and the latter to have the closing meeting of the season, as it is believed the Los Angeles council will not restrict fall racing in the southern metropolis, but amend the ordinance so as to permit it. The Herald says:

"A winter meeting in the south would be a part of the scheme if certain conditions could be made to work in harmony with the plan of the promoters. There is some talk of taking in Denver and Salt Lake, but Manager Brooks, who is presiding judge and manager of the combination, hardly favors going so far east.

Brooks was asked if the new proposition did not mean a syndicate book. He stated that conditions in each of the cities would probably govern that part of the matter. In the northwest the betting fraternity does not know what any other kind of a book looks like, as the worst "cinches" in the history of the sport have been regular features there.

"We intend to give liberal prices, for we will be able to offer them," says Mr. Brooks. "Our plan is to have the circuit arranged as nearly on the Western Jockey Club plan as possible. Each club would be represented at our meetings. We would have a regular governing body and intend to allot dates as they are desired, having an eye always to decreasing the railroad hauls of the horses. The scheme would be a splendid one for the horsemen, and I believe it would elevate the sport greatly here in the West, for there has always been a need of some such governing power as that we propose to offer. We could get the best horses, and with them would be sure of the right kind of sport. Of course, much of our planning hinges on the Los Angeles end, but if we cannot get our foothold here we will race north."

Brooks states that the capital stock of the project is ample and that the scheme should be a good money-maker eventually, though there will be a loss to foot the first year or so.

### Grand Circuit Dates and Doings.

Last year the Grand Circuit opened at Detroit, July 14th. This year the date is July 20th, or a week later. This gives Cleveland the old dates of the last week in July. This season the circuit runs in a straight line, or nearly so, along the Lake Shore, and the detour to Columbus the week following Cleveland has been abandoned. Buffalo follows Cleveland, and then a big jump of 450 miles to Empire City Park, N. Y. The following are the agreed dates as fixed by the stewards of the Grand Circuit in Boston, January 27:

Detroit, July 20 to 24; purses \$50,000.  
Cleveland, July 27 to 31; purses \$40,000.  
Buffalo, August 3 to 6; purses \$30,000.  
Empire City Park, August 10 to 14; purses \$40,000.  
Brighton Beach, N. Y., August 17 to 21; purses \$50,000.  
Readville, Miss., August 24 to 27; purses \$55,000.  
Providence, August 31 to September 3; purses \$45,000.  
Hartford, September 10 to 14; purses \$50,000.  
Syracuse, September 14 to 17; purses \$40,000.  
Columbus, September 21 to 24; purses \$40,000.  
Cincinnati, September 28 to October 2; purses \$40,000.

During the meeting the proxy question was discussed and another committee was appointed to investigate, just as if an investigation was needed. The question of professional judges was also debated, without action.

The question of barring hoppers from non-record pacing races was debated, and then voted on. The vote stood 7 to 3 in favor, but as a unanimous vote was required, the question was lost.

The stewards were invited by W. G. Pollock to meet in Cleveland in 1904 and an invitation was also received from the two New York associations, but the vote was unanimous for Cleveland and the date was set for January 15, 1904.

The annual meeting resulted in the re-election of D. J. Campan, of Detroit, as president, and Charles M. Jewett, of Boston, was elected secretary in place of

Secretary Giles, of Cleveland, who retired on account of ill health.

Readville will repeat the \$20,000 Massachusetts; Hartford its \$10,000 Charter Oak, and Detroit the M. and M., with its \$10,000 purse. Providence will continue the single member giving a five-figure premium for the pacers, as it will renew the Park Brew for the 2:10 pacers, and also its \$10,000 stake for the trotters; Brighton Beach again hangs up \$10,000 in the Bonner Memorial, as does Cincinnati in the Ohio.

Cleveland will give no big stakes, and its program will be made up of five \$1500 purses, two heats in three races each day. Detroit, Cleveland, and Readville, will stick almost entirely to the two heats in three plan.—*American Sportsman*.

### About Luck.

A good horse is often the making of a good driver. Many a prominent trainer dates the beginning of his success to the day when some good horse, by a combination of lucky circumstances, was added to his stable. Now, we may have the greatest admiration for and appreciation of the great abilities which have brought our leading drivers to the front, but we should be able to see merit in that careful, conscientious majority which toils on year after year "unhonored and unsung."

"Success begets success," and the general public is slow to see virtue in a race driver unless he wins. It's just the same with horses. They don't see the second horse, though he may be at the saddle girths of the winner. Some people who are veritable hero-worshippers would lead one to believe, by their speech, that some of our latter-day sulky stars could win the M. and M. with a 2:20 horse by pure generalship. But they couldn't.

We read in the current turf dispatches that five or six of the well known trainers have had sent to them green trotters that have shown trials from 2:09½ to 2:11½. Now, why shouldn't they make a showing, with such raw material? Do any of these hero-worshippers, who always speak disparagingly of the trainer who hasn't had the "luck," believe that throughout the country we couldn't find hundreds of capable men who could steer such horses to creditable victories?

The trainer who shines in the glare of the limelight of public attention has, as a rule, horses brought to him, bred right, gaited well and accredited with a very fast trial. How is it with Mr. Up Against It?

The horses generally brought to his stable are thought well of by the owners. They are half broken, poorly wintered and their pedigrees, if followed up, trace directly to some manure heap. And yet the trainer is expected to develop from such material race winners, in these days when a 2:20 horse is only fit to carry the traps for the genuine article. And unless that trainer ultimately gets an animal that nature made for a high class race horse, one that has the breeding, the gait and that almost indescribable nerve force, he will go down to turf history and in the minds of the race-going public as a failure.

Once in a while we see an owner who thinks, and who is not misled by the hysterical shouts of the public, pick out some good, able and conscientious trainer who has not had the "goods" and give him a chance. But such owners are few.—*W. L. Duntley in Am. Horse Breeder*.

### A Bad Amendment.

John P. Haines, President of the New York Society for the Prevention of Cruelty to Animals, has issued a circular in protest of the passage of a House of Representatives bill to amend Section 4386 of the revised statutes. Under the statute which it is proposed to amend, railroad companies and other parties transporting horses, cattle, sheep, swine or other animals from one State to another, are prohibited from "confining the same in cars, boats or vessels for a longer period than twenty-eight consecutive hours without unloading the same for water, feeding and rest for a period of at least five consecutive hours." The amendment proposes to change the word "twenty-eight" to "forty," which will increase the time during which the animals may be kept in crowded confinement by twelve hours. President Haines' protest is well made and timely and will command the approval of every shipper and every humanitarian. The amendment is undoubtedly inspired by the desire to spare the carrying companies a little inconvenience and save them a little expense. There is no justification for this economy when it involves a sacrifice of the comfort and safety of the companies' charges or the interests of their patrons. Our horse breeders in Congress should arraign themselves solidly against this measure.—*Trotter and Pacer*.

The appropriation for the support of the United States army for the fiscal year 1903-1904 carries an item of \$450,000 for the purchase of horses. The appropriation for the past year was \$600,000.

### Splan's Sale a Good One.

John Splan's big sale at the Union Stock Yards, Chicago, which took place week before last, shows that horses are bringing good prices in Chicago as well as in San Francisco and New York.

One of the highest priced ones of the sale was Lilly Young, the 11-year-old mare that took her record seven years ago of 2:10½, and for several seasons thereafter failed to be a good one in her class. In 1901 she was beaten several times when the time was no better than 2:20 and was considered a "has been," but she raced like a real crackerjack at Lexington and Memphis last year, winning a heat at the first named place in 2:11½ and being a close second to Ferenio at Memphis in 2:07½ and 2:08. She also beat a good field and won the mile and a quarter race in 2:44. This surprised the horsemen, but they were more surprised when she sold for \$3375 at the Splan sale, as it was not supposed such a price would be paid for a mare eleven years old.

Three of the get of Limonero, the stallion that was recently brought back to California and located at Los Angeles were disposed of at the sale. They brought \$360, \$210 and \$175, respectively.

Thistle 2:13½, the black stallion by Sidney out of famous Fern Leaf by Flaxtail, was sold for \$625. He is the sire of To Order 2:12½ that is in turn the sire of Miss Mark 2:10½.

Maud Newman and Neerbell, the pair of roan mares which Chas. Newman of this city formerly drove on the road, passed through the sale. These mares were taken East last year by Budd Doble and were finally consigned to Splan's sale. They sold as a pair for \$1,425.

Geo. H. Ketcham, owner of Cresceus, was a buyer at the sale, and the chestnut stallion, The Conqueror, by Egotist, went to his bid of \$3000. Mr. Ketcham also purchased several well bred mares, paying from \$200 to \$300 for them.

Bert Herr 2:20½, the erratic brother to Charley Herr 2:07, went to an Ontario horseman for \$710.

One of the features of the sale was a consignment of five head by Stamboul 2:07½, and one out of a daughter of this great but dead stallion. The six head brought \$5345, an average of \$890. A Chicago daily says they were a very handsome lot.

California McGregor, a stallion by Silver Bow out of Leap Year by Tempest, brought \$250.

The mare Litka by Chas. Derby out of Susie Mambrino, bred at Oakwood Park Farm, has been mated with a mare by Elyria since she left California. The two make a very handsome and fast pair, and they brought \$3,200. They have a horse show win or two to their credit.

Rosaro, the black mare by McKinney out of By By by Nutwood, that was sold last year at Cleveland by Pierce Bros., was consigned to the Splan sale, and the price she brought—\$1,000—shows that the McKinney's are appreciated in Chicago. L. M. Newgass, the well-known Chicago horse dealer, was the purchaser, and he doubtless saw his way clear to making a handsome profit on the mare.

The highest price of the sale was \$4,000, paid for the chestnut gelding Tom Keene by West Egbert, dam by Kentucky Prince.

### Mr. Perren's Views.

"I am inclined to think," says A. E. Perren, one of the New York State Fair Commissioners, "that a great deal of the trouble about laying up heats can be avoided by talking with the drivers before the rule is violated and giving them to understand that unlawful work will be severely punished. Let them understand that no mild fine of a hundred or so will be the punishment, but that they will be ruled off for periods of time commensurate with the offense. They don't like to take a chance of being set down and will be very careful about infringing the rules. Some of them will pay a fine of \$100 or \$200 and laugh at it as a good joke; almost any one would pay that price for a chance to make a couple of thousand or more. But when it comes to being suspended they will do a little more thinking before they will deliberately violate the rule."

### Kenney's Opinion of Major Delmar.

Ben Kenney, the well known and popular driver and trainer of Lexington, Ky., when speaking about Major Delmar 2:05½, stated that he considered Major Delmar the most dangerous rival for championship honors which Cresceus 2:02½ has. Kenney says he has timed Major Delmar twice, when he went a half in 1:00½, and he believes with fair luck the coming season and all conditions favorable, the son of Delmar will crowd the mark of Cresceus to the limit, and, "mark my word," says Kenney, "Major Delmar has only to live and stay sound to get closer to the minute mark than any horse foaled."

## NEW YORK MIDWINTER SALE.

## Fasig-Tipton Company Secure Good Prices for Many Horses.

The Fasig-Tipton Company opened at Madison Square Garden, New York, on Tuesday of last week, with 500 horses catalogued. On the opening day but few high class horses were offered, the majority being just the ordinary trotting and racing horses, and this kept the average down, which was \$11.80 per head for the day. The first horse to bring four figures was a stallion called Baron-dale, a son of Baron Wilkes out of Lemonade, the dam of W. G. Durfee's stallion Petigru 2:10½. This horse brought \$1000 and was purchased by J. M. Adams and Co., Maine. Nigger Jack 2:14, a black gelding by C. J. Belmont out of Maid of Aberdeen, brought a bid of \$1000 from R. C. Taylor, of Worcester, Mass., and was sold at that figure. The Major 2:13½, a trotter by Dr. Hooker, brought \$1025, and Grace Eldred 2:17, the trotting filly by Cecilian, fetched \$1400. The highest price of the day was paid by Mr. G. Schwab of New York for Beldia 2:09½, a trotting mare that is considered a rare good one for the 2:10 classes this year. She went for \$4000. During the day one hundred head sold for \$30,180.

There was a marked improvement in the attendance and in the quality of the offerings the second day. An uncommon incident was the appearance of the horse Star Dillard, a trotter, pacing bred and registered in the pacing stud book, being by Hal Dillard 2:04½. Trotting bred and registered horses that pace are common, but a pacing bred trotter is rare indeed. He brought \$925.

The event of the day was the sale of the trotter Prince of Orange 2:07½, and the bidding was a striking illustration of what amateur sport is doing for the best interests of breeders and the general market. Of the five bidders, four were patrons of the speedway and the Matinee Club at the Empire track. The first bid was \$2500, made by Moise Geisman of New York. Then came \$3000, by R. L. Davis, acting for F. G. Schmidt; and M. C. Harrison bid \$3500; E. E. Smathers bid \$7100. Opposed to these amateurs was J. Y. Gatcomb, the partner of Scott Hudson in the most successful stable out last year. When Mr. Schmidt bid \$5100 Mr. Gatcomb raised it \$100, and the horse became his property.

The National Horse Show winners, Ruritania and Dainty Daffo 2:13½, went to Thomas W. Lawson of Boston at \$3900. Effie Powers 2:08½ the champion campaigner of pacerdom, sold at \$2000, and went back to Baltimore. George M. Webb of Philadelphia, who sold Ruritania and Dainty Daffo, bought the show pair, Matilda Wilkes and Millie Franklin, both by Onward, out of daughters of Ben Franklin.

The California pacer Connie 2:15½ by Ketchum 2:16½ out of Birdroe 2:11½ brought \$1310 and was purchased by Geo. H. Schneider of Cleveland, Ohio.

Domino, the black pacer by Rect 2:16½ that was sent to the Blue Ribbon sale at Cleveland last year by Mr. C. L. Griffith, and sold for \$1700, was consigned to this sale and went for \$1000, this bid being made by Erwin Clark of New Haven.

Vendome, the bay gelding by Iran Alto out of Linda Oak by Guy Wilkes that Farmer Bunch campaigned in California two years ago and that reduced his record to 2:18½ last season over east, brought \$700 at this sale and went to John McGuire of New York.

The total amount received for the second day's sale was \$55,370, for 100 head, an average of \$553.70.

The average was still further raised on Thursday, the third day of the big Midwinter Sale, and ninety-seven head were sold for \$61,595, or an average of \$641.50 per head. Idolita 2:04½ by Mendocino brought the high figure of the day and of the sale—\$11,100, and is now the property of John J. Scannell, of New York, who turned her over to John Kelley to train. Idolita is a bay horse by Mendocino out of Edith by George Wilkes. Idolita as a two year old trotted a sensational mile, making a record of 2:21½. While this time was far from the two year old world's record, it was considered a sensational performance on account of the unfavorable weather conditions which existed when the record was made. The colt the same year won the New England Futurity for two year olds.

It was not until he was a three year old that he made himself famous. During that season he won more money on the Grand Circuit than any other horse's performance. He did this in two races. The first was the New England Breeders' \$10,000 stake and the other the Horse Review \$20,000. In both these races he won a hand's breadth over a tight heat. In the Horse Review Stake he trotted the first heat in 2:12½, a new world's record.

The same season Idolita won the first two heats of the Kentucky Futurity. The race was finally won by that great gelding Boralma. Last season the son of Mendocino finished second to Anzula in the great \$10,000

000 trotting purse at Charter Oak Park, Hartford, after winning the first two heats.

Idolita was bred at Palo Alto Farm. His sire is Mendocino 2:19½, son of Electioneer, and Mano (also dam of Electant 2:19½) by Piedmont 2:17½. Edith is by George Wilkes 2:22. She is also the dam of the noted sire Hummer (sire of Bouncer 2:09, a winner of the great Transylvania and other stakes). Edith's dam was Edith Carr, the dam of Campbell's Electioneer 2:17½, and a 2:10 sire.

The Prime Minister, a two year old son of Idolita, who is engaged in futurities worth \$49,500 and who has shown eighthis in 0:18½, brought the third highest price at the sale, \$2200. He was purchased by Mr. A. C. Maynard of New York City and will be campaigned the coming season on the Grand Circuit.

Among the high priced ones sold Thursday was Col. Carter, a chestnut horse by Nutwood Wilkes 2:16½ and of Spry Ruth by Boodle. He was one of the consignment from the Maplewood Farm, owned by the late Senator Jones of New Hampshire. He never had a day's training but showed a quarter in 37 seconds and is good gaited. After a spirited bidding he went to McElwaine Farm, Springfield, Mass., for \$1650, which was the highest price paid at the sale for a green untried horse.

Betonica 2:09½ by Azmoor out of Nadine brought \$1200.

Those that brought \$1000 or upwards during the day were:

Her Ladyship, a very fast three year old by Wilkes Boy out of Twinkle by Dictator. She is entered in \$42,000 worth of stakes and trotted miles last year in 2:28 and quarters in 34 seconds. It is thought she will trot in 2:12 this year. W. L. Snow got her for \$3200.

Orator 2:23, bay stallion by Dictator, sire of Major Chew 2:13½ and others, brought \$1775. He is seventeen years old. Bertha Red, a ten year old mare by Red Wilkes, was purchased by Thomas Lawson for \$1500. Phoebe Onward 2:12½ by Shadeland Onward brought \$1200 and Sunlight Chimes, a brother to Midnight Chimes 2:16½, was sold for \$1000. The pacer Hal B. 2:04½ brought \$2900, the trotting gelding A. J. D. 2:09½ sold for \$4200, Mary Anna, a green pacing mare, fetched \$1350; Wilque 2:09½, the trotting gelding by Queechy, brought \$2500; Asbland Cassell, a green trotter by Asbland Wilkes, sold for \$1110; the pacer Gyp Walnut 2:08½ by Walnut Boy went for \$1100 and a green pacer by Strawn sold for \$1475. The balance of the ninety-seven head brought less than \$1000 each. Carrie Caswell, a Palo Alto bred mare by Altivo, brought \$875 and was one of the bargains of the day.

Bargain hunters had an inning Friday at the midwinter sale in Madison Square Garden. There were many good offerings that failed to arouse any enthusiasm, and the greater number were bought by New York buyers. The chestnut trotter Unabell 2:13½, by Young Fullerton 2:20½, brought the highest price of the afternoon, \$550, and was cheap at that. She was a good race mare and has shown fast work over the Speedway. One of the bargains was the chestnut pacer General Agent 2:10½, in the same consignment. He had shown well on the Speedway and ranked in the first flight, yet \$280 was all the auctioneer could coax out of the crowd. The pacer McJoe 2:11½, brought \$510, and will join the Staten Island Speedway contingent.

Azra A. a bay filly by Azmoor brought \$250. Joe Archer a three year old gelding by Geo. W. Archer sold for \$200. The total for 101 head sold during the fourth day was \$21,070 an average of \$208.62.

Friday's offerings closed the sale. During the four days 409 head were sold for \$167,940 an average of \$410.62, which is proof that the market is strong and the demand ahead of the supply.

## Sues for the Gift.

Fred McKee, driver of Nella Jay, winner of the Kentucky Futurity here last fall, on January 22, at Lexington, Ky., brought suit against George R. Woodin, of Boston, owner of the filly, for \$9000, stated to be due him from the winning. The petition alleged that Woodin in the presence of a number of persons before the race told McKee that he would give him the entire first money of the stake if he won. It says Woodin only paid him \$1000, promising to pay him \$9000 later, but that he collected the stake money from the association and failed to keep his promise with McKee. A number of horses in McKee's hands owned by Woodin, including Nella Jay, have been attached to satisfy the debt.

## Training Department, Bitter Root Farm.

In the Grand Circuit, Sept. 4, 1898.

Spohn's Distemper and Cough Cure is what every owner and handler of horses everywhere should have. I have used it for the various forms of contagious diseases, and the throat affections of horses with the most gratifying results. It is a safeguard against exposure of horses to all sorts of distempers, pink eye, and the like.

Respy,

JOS. REA, Trainer.

Jackson's Napa Soda untangles the feet.

## President Wright Denies a Conspiracy.

[Los Angeles Herald, February 5th.]

E. T. Wright, president of the District Agricultural association No. 6, a private corporation, and chairman of the Sixth District Agricultural association, a State organization, says regarding the agitation in regard to the future of the Agricultural Park race track:

"I want to say that no attempt at legislation to that end is being attempted, so far as any member of the board of directors of the District Agricultural association No. 6 is concerned. We have entertained no intention of subdividing or selling the park at this time, though we believe that we have a perfect right to do so if we so desired.

"The present agitation can easily be traced to the passage of the 'poolroom' ordinance, and the refusal of the city council to allow our tenant to use the park as he desired. Mr. Cattern's interest in the matter is also evident. He is a son-in-law of J. C. Newton, who was dropped from the state board by Gov. Budd, and he is probably looking for a fee when he recommends the beginning of litigation."

I. N. Moore, he says, was the original owner of the property, by trust deed, and the association's title was gained from him after Moore purchased the land from the sheriff. The land was turned over to the local company, which, though unincorporated, issued stock and carried on business.

The association has no certificate of title, as the directors never tried to get one, says Mr. Wright. They recognize that certain things have to be straightened out before a title can be obtained. He claims the land belongs to the local organization.

But Mr. Cattern takes issue with President Wright. He says the lands were set aside to the State directors of the district in trust for the people for all time by a deed of trust. This deed was dated May 29, 1888, and signed by W. J. Mayberry and William Ferguson as trustees in behalf of the donors. The property was bought in at a mortgage sale held January 13, 1889, for the sum of \$12,500, which was raised by the voluntary subscription of 118 citizens. Improvements costing \$50,000 have been made and the property is now valued at about \$300,000. "Before the final deed in question was executed," said he, "William Niles, general superintendent, secured the execution of a deed by the trustee and redemptioner, I. N. Moore, conveying the property directly to the subscribers for a limited period of twenty-five years, the grounds afterwards to become the property of the grantees. This action appears to have been in direct opposition to the intention of the parties, and Mr. Moore afterward said he signed the deed without reading it.

"Any attempt of persons connected with the agricultural association to subdivide and dispose of Agricultural Park, or to plow up the track, as was reported to be the threatened intention, would be clearly in violation of the law. A legislative act authorizing the sale of these grounds would be an illegal attempt to devote public property to private use, and a clear interference with vested rights. A similar proceeding has been attempted on a previous occasion and the attempt met with failure."

## Iran Alto 2:12 1-4.

Breeders who aim at producing the best must patronize the best bred sires and in looking over the list of stallions standing for service in California this year it will be hard to find one that ranks higher in this respect than Iran Alto 2:12½, son of the great Palo Alto 2:08½ out of Elaine, the great producing half sister to the mighty Electioneer.

Iran Alto was himself a good race horse and although his services in the stud have been very limited he has to his credit that fast and game trotter Dr. Frasse 2:12½, besides Dr. Frasse's Sister 2:21½, Vendome 2:18½ and Thomas R. 2:15, a trotter that will yet enter the 2:10 list in all probability.

Iran Alto will make the season of 1903 at the Vendome Stock Farm, near San Jose, at the low fee of \$50 the season. He comes from a family of race horses, was a race horse himself and begets race horses. No better bred one was ever foaled on the Palo Alto Stock Farm and no better individual can be found in California. As Superintendent F. W. Covey of Palo Alto says: "He is by a champion who was a fast colt trotter, out of a champion mare who held the world's records for three and four year olds, and produced a champion yearling Norlaine 2:31½. He comes from a family of extreme speed that produces extreme speed."

If you are looking for the best, the sort that breeds on and will produce the kind you want, send your mares to Vendome Stock Farm. A letter to James W. Rea, San Jose, proprietor, will bring a card containing tabulated pedigree and all particulars. See advertisement.

## Notes and News.

Bessie Booth by Sweepstakes is in foal to Silver Bow 2:16.

Cresceus is a grand daddy, and the youngster is now a yearling.

Harrie Jones will probably have the McKinney pacer You Bet 2:07 this season.

Jay-Eye-See 2:06½ is still alive and in fairly good shape at the age of twenty-five years.

Twenty thousand dollars in money and plate is offered for the spring Horse Show in Boston.

Stam B. 2:11½ will arrive at Pleasanton on the 14th of the present month to begin his stud duties for 1902.

William Miller is training the California horse Duke of Waldstein 2:23½ at the Everett, Washington, track.

Charley Durfee owns a yearling colt by Direct 2:05½ out of a mare by McKinney 2:11½ and says he isn't for sale at any price.

Monroe Salisbury has a string of big ones at Pleasanton. The majority of the horses he has in training are 16 hands or over.

Chester Abbott 2:09½, the horse that was on the Oregon and Washington circuit last season, sold for \$925 at the Splan sale.

Lena N. 2:05½, Sunland Belle 2:08½ and Nerva Patchen 2:08 will be seen at the Brooklyn, N. Y., matinees this summer.

The ice trotting carnival at Ottawa is to open next week. Mr. Ketcham will attempt to lower the ice record of 2:18½ with Cresceus.

The great young Illinois sire, Parole 2:16, is the only western stallion to have two two-year-old trotters make records below 2:30 last season.

They are building more stalls at Pleasanton and more room for the guests at the Rose. Mine hosts, Olney & Son, know how to keep hotel.

Mr. Ed Sewell of Santa Paula, Cal., writes that he is the owner of a full sister to Waldo J. 2:08. She is entered in the Occident Stake for 1905.

Atlantic King 2:09½, the sire of Frank Bogash 2:03½, is the kingpin sleigh horse in Fort Wayne, Ind., and his son, Wayne King is ditto in Detroit.

J. Malcolm Forbes, who has paid as much money as any one for trotters, owns the great stallion Bingen 2:06½ and is driving him on the snow this winter.

George H. Ketcham has appointed Mr. John McCartney, a well known and able Ohio turf writer, as secretary of Ketcham Farm for the coming season.

The Cleveland Grand Circuit meeting will have an open ring next summer and will do away with the syndicate bookmaking that has always been the rule there.

Prince Direct 2:07 is wintering in Dick Benson's stable at Kansas City, and will remain there until March 1, when M. E. McHenry will again take him in charge.

The Charter Oak and Ohio stakes, which will be for the 2:09 class this year should get large entry lists. The horse that can win both races will earn \$13,000 for his owner.

Thos. Charlton of Ukiah has sold his handsome stallion, St. Patrick by Carr's Mambrino, to parties who will probably take the horse to Petaluma for the season of 1903.

Denver dates are from June 20th to July 4th, which will give the horsemen thirteen days' racing at that point instead of four days as has been announced by some of the papers.

Brook Curry, of Lexington, Ky., has sold to C. Jefferson the seven year old brown stallion, Alfred Star 2:14½ by Alfred G. 2:19½; dam Becky by Mambrino King. Price, \$2000.

John R. Gentry 2:00½, the celebrated pacing stallion, owned by Mr. E. H. Harriman, has been leased to George Campbell Brown, of Ewell Farm, Columbia, Tennessee, and will be placed in the stud there.

There are but few of the get of Stam B. that are old enough to train, but every time one is taken to a track it shows speed. Stam B. is certain to be one of the great speed sires of California.

D. S. Matthews, of Ryde, California, owns a very promising two year old colt by Stam B. out of a mare by Dexter Prince that he wishes to sell or will lease for two years. Read his advertisement in this issue.

Among the rules of a livery stable in New York are the following: "No man will be employed who drinks intoxicating liquors. No man shall speak loud to any of the horses. No man shall use profane language in the hearing of the horses."

If current reports are to be relied upon Ed Geers will campaign 387 horses this season, while Scott Hudson's stable will contain 239. These figures are complete only up to the time of going to press.—*American Sportsman*.

Last year's Lexington meeting was the most profitable ever held by the Kentucky Trotting Horse Breeders Association, and Secretary Shanklin has been re-elected and complimented by the Board of Directors.

To the credit of the Wilkes family are fifty-eight 2:10 performers, against twenty-six for the Electioneer family, although the family of Electioneer has the two extreme ones in point of speed in The Abbot 2:03½ and Azote 2:04½.

The *American Horse Breeder* says: "Horsemen who have seen her step predict that trainer W. L. Snow will make the crack green trotters move lively next season to beat Julia M., a daughter of Zombro 2:11, now in his stable."

Mrs. Sol. Runyon of Trask, this State, has sent four mares to Walnut Grove Stock Farm to be bred to Nushagak this year. They are Caressa and Dextress by Dexter Prince, Altenwood by Altivo, and a black mare by Alta Vela 2:11½.

The Canadians will have more fun on the ice this winter than ever. As soon as the Ottawa meet is over the 200 or more horses competing will be taken to Montreal in special cars, and on February 24 a five days' meet will commence at Delorimir Park.

Scott Hudson is jogging Rhythmic 2:08, the star money winner of 1902, and Chase 2:07½, daily over the snow on the road, and the three year old queen of last year, Gail Hamilton 2:11½ has entirely recovered from her recent illness and is once more receiving slight exercise.

The sensitive, excitable colt in proper hands can be made steady-going, tractable and reliable, or he can be ruined as easily as the blowing out of a candle. It only needs a quick-tempered trainer that will be harsh in language and rough in handling and the ruin will be complete.

At a public sale of Percheron horses at Kansas City, Mo., on January 22d, the offering was of good quality, but as about one half were weanlings and yearlings, the prices were not high. The top price for stallions was \$600; for mares, \$285; for weanlings, \$185. Twenty-two head brought \$535½; average, \$243.40.

Arner, the full brother to Diablo, will make the season of 1903 at San Lorenzo. Arner is one of the hand-somest stallions in California and very fast, although he has never been raced. After a limited season in the stud Arner will be put in training and a mark below 2:20 should be easily within his reach.

Mr. Geo. E. Sheldon, who died at Pasadena recently, where he had been living for the past year for his health, was a very prominent capitalist of Boston, Mass., and treasurer of the Lowell Trust Company. His horse Royal R. Sheldon 2:04½, which he brought to Pasadena and drove on the road, may be returned East.

Ansel 2:20, by Electioneer, dam Annette (thoroughbred), by Lexington, for whom the late Robert Bonner paid Gov. Stanford \$20,000 in 1889, is spending his declining years at Woodlane farm, Mt. Holly, N. J. He is 23, and Ambert 2:22½ last season, is the only new performer by him that has shown up for the past three years.

John A. McKerron's salesroom on Mason street is a very busy place these days. Horsemen from all over the Coast visit it daily and either take away with them something in the way of harness, boots, blankets or something else for their horses. Made by McKerron is a sufficient guarantee that it is the best that can be put together.

Mr. Joseph H. Bohon, of Redlands, has sold his handsome seven months old colt by Zolock 2:10½ out of Hytu by Happy Prince to Mr. F. A. Ramsey. The colt is entered in the Breeders \$6000 Futurity, for foals of mares bred in 1901, and the transfer of ownership has been duly made. \$350 was the price paid by Mr. Ramsey for the colt.

And now some of the eastern turf writers are saying that a big mistake was made when the Charter Oak and Ohio ten thousand dollar purses were made for a 2:09 class as it lets Monte Carlo in and he will scare the others out. It's a two to one bet that the horse owners will not be half as scared about entering as the horse editors are, and that both races will fill.

Among the Eastern breeders who have booked mares to McKinney 2:11½ this season are W. F. Redmond, New York City, four; William Simpson, New York City, three; Terrace Farm, Titusville, Pa., three; Hill-and-Dale Farm, Mamaroneck, N. Y., two, and Senator John McCarty, Parkway Farm, Goshen, N. Y., two. Sixty-one out of a hundred mares have so far been booked to McKinney at a fee of \$200.

Just about the handsomest road horse in California is the pacer Yellow Jacket 2:20½, owned by A. B. Rodman, of Woodland. Yellow Jacket is a light chestnut with flaxen mane and tail and if driven through our park roads would make everybody "rubber" that likes a handsome horse. Mr. Rodman also owns a gray pacer that is a great prospect for the track. He was never trained, but is a fast and rugged strong fellow that can pull a buggy with two in it at his full speed. Both these horses are for sale at very low prices. See ad.

The chief advantage of the pneumatic is freedom from vibration and its tendency to hug the ground and follow the horse on the turns. By tilting the shafts up at an angle the driver gets his weight back of the axle, thereby improving the draught, and he lowers the seat until he is down behind his horse, where atmospheric resistance is reduced to a minimum.

Kinney Lou, Dan R. 2:04½, John A. McKerron 2:05½, and other outside horses now at Walnut Hall Stock Farm, will be sent to the Lexington track in March under the care of John Beuyon. Mr. Harkness has recently given instructions to Ed. Benyon to take his campaigning stable to the same track about the first of May, instead of to Louisville as originally intended.

The Hollister gentleman who purchased the very handsome colt Monbello at the Palo Alto sale last week is Mr. L. M. Ladd, instead of W. Ladd, as printed in the account of the sale. Mr. Ladd has one of the best bred young stallions in America, and as an individual there are few equals of this two-year-old. He is a valuable addition to the breeding ranks of San Benito county.

The young Zombros at Los Angeles are attracting great attention, and every eastern horseman that arrives in that city immediately inquires where the son of McKinney is stalled. Geo. Beckers has several of his stallions get to show visitors and all are enthusiastic over them. No horse that ever stood for service in California begot a more uniform and high class lot of colts and fillies.

Judge W. E. Green's old mare Lady Langtry is one of the comparatively few broodmares that have produced four with standard records. She is the dam of Dudley 2:14, Ed B. Young 2:11½, and last year added the names of Lily Direct 2:21½ and Estelle 2:26½ to her list. The last named mare took her record at the Hollister meeting last October. Both are trotters, while Dudley and Ed B. Young are pacers.

There is a crackerjack colt by P. J. Williams' great trotter Monterey 2:09½ owned by Gretna Farm, Gretna, Illinois, according to the last issue of the *Horse Review*. This colt is a three year old called Irish and his dam is Julia D. 2:14½ by Hylas Jr. Last season this colt showed very fast at the trot, but wore a great deal of weight. He has been shifted to the pace and Ab. Fullager, his trainer, thinks he has a coming crack side wheeler in him.

The four year old Directum colt owned by Judge W. E. Greene, of Oakland, is now in Monroe Salisbury's string at Pleasanton. One day last week Ben Walker was giving the little black counterpart of Directum his exercise and let him step an eighth. Everybody that saw the stunt opened their eyes and Walker says he never rode any faster for the same distance behind any trotter, and the youngster never lifted his head or offered to break.

The announcement made in these columns that a sale of the Oakwood Park Stock Farm horses would be held early in February in this city by William G. Layng was premature. Mr. John F. Boyd, proprietor of this celebrated farm, informs us that no such sale has been arranged yet; that Superintendent Fred Booth is selling horses at private sale and at good prices right along and that it may be some time before an auction is held.

George H. Ketcham secured a grandly bred stallion to share the honors of the Ketcham Farm stud with Cresceus when he bought The Conqueror 2:12½. Sired by Egotist, one of the best sons of Electioneer, dam by Harold; second dam by St. Elmo; third dam, the famous Midnight, dam of Jay-Eye-See 2:10, etc., by Pilot Jr., he has a remarkably well balanced pedigree. Although a young horse The Conqueror has 13 standard performers to his credit, including that great race mare Contrato 2:10.

There never has been a good argument against registration. Every pure breed of animals has its stud books, and it should be a matter of pride on the part of breeders to register their stock, yet it is a lamentable and notorious fact that many of them do not. Unfortunately the Register Association having no jurisdiction over the trotting association can not compel registration, and the American and National Associations have never seriously discussed the question.

At the Memphis track there is a string of horses in charge of trainer Harrison that consists of thirteen "range horse" as they are called. These horses were sired by Conrad, son of Electioneer, and are nearly all out of mares by Chas. Caffrey. They were foaled on a western Nebraska ranch and permitted to run wild until they were four and five years old—not even being halter broken up to that time. Seven of them have shown eights in from seventeen to nineteen seconds and all go on a square trot and show none of the "broncho."

There will be a grand opportunity next Tuesday, February 10th, to purchase first class stallions Wm. G. Layng will sell at the Occidental Horse Exchange, the Oro Wilkes stallion Black Wilkes, the Director stallion A. A. Moore and the Altoona stallion Black Cloud. Besides these, there will be a number of fine trotters consigned by Mr. Thos. Roman, Dayton, Washington, sired by standard trotting stallions. There are several fine driving and carriage teams, elegant surreys, buggies, harness, etc. Besides these, there are a number of very useful all-purpose and draft horses. The sale is positive. Everything must be sold.

Three sons of Prince Airlie 2:04½, son of Guy Wilkes are offered for sale by Mr. P. A. McEvoy, of Park. Their description and breeding will be in our advertising columns. Prince Airlie Chantilly, a great broodmare by Nutwood.

## The Lawson Prizes Awarded.

In January, 1902, I offered the following prizes:

**Horse Name Prizes:** 1st, \$250; 2d, \$100; 3d, \$50. The prize of \$250 was won by "Dreamer," the farm of Thomas W. Lawson, Scituate, Mass., will pay the prize to the owners of horses registered in 1902 with the American Trotting Register Association, during the year 1902, who supply said horses with the prettiest and most appropriate names. Mr. Lawson will immediately after the close of the year, in deciding he will take into consideration only prettiness and appropriateness of the names, and the names which led to their selection. If, for instance, "Dreamer" and "Boralma," which Mr. Lawson considers two of the prettiest names ever possessed by horses, had been registered during 1902 and submitted with the explanation that "Dreamer" was selected solely because of its prettiness, and "Boralma" because pretty, and in addition as "Bo" was for his sire "Boreal" and "ralma" for his dam "Earalma," "Boralma" would win over "Dreamer." As the only object of these prizes is to encourage the giving of pretty and appropriate names to American bred horses, it is hoped all breeders of 1902-named horses will compete. There can be no question that a horse with a round-sounding pretty name is more valuable than one with a name which labels a good horse, and makes a bad one worse. Is there a horse lover in the world who would not pay more for Boralma than if his name was "Barrel of Stale Beer" or "John Robert Smith"? Let us hope not. No one believes Mambrino Chief, Hambletonian, Abdallah, Green Mountain Maid, Electioneer, Almont, Beautiful Bells, Baron Wilkes, The Abbot, Chimes or Crescens could possibly have been the horses they were had they been obliged to struggle through the world as "Piece of Candy," "Mamie W.," "J. P. Adams," "Overall Sewer," "Railroad Station," "Box of Onions" or "Della Ryan," or that "My Head Carpenter," "Car Conductor" or "I Sell Tripe" could have drawn as many lovers of the horse to a race as "Nancy Hanks," "Peter the Great" or "Dainty Daffo." All competitors should write giving their horses' names, and reasons for selecting same, on or before January 3, 1903, to Dreamer, the farm of Thomas W. Lawson, Scituate, Mass.

In conformity with the above I have decided to award the prizes as follows:

First, "Rondo Bell," submitted by Jno. D. Scanlon, Syracuse, N. Y. Sire, Sheldon; dam, Train Bell by St. Bell; his dam Beautiful Bells. Reasons: "Round sounding name, 'Rondo' because of repetition of the strains on both sire and dam's side, and 'Bell' for the greatness of Beautiful Bells through her son St. Bell and his daughter Train Bell."

Second, "Baron Lavish," submitted by A. H. Danforth, Washington, Ill. Sire, Prodigal; dam, Josephine Farrell by Baron Wilkes. Reasons: "The 'Baron' was suggested by dam's family, 'Lavish' by the sire."

Third, "Onward Flight," submitted by Frank T. Fowler, Chicago, Ill. Sire, Onward; dam, Flight by Baron Wilkes.

Fourth, "Exalma," submitted by F. W. Harris, Galesburg, Ill. Filly, sire, Expedition; dam, Maybab by Allerton. Reasons: "Expedition, Allerton, Maybab."

Fifth, "Ravenetta," submitted by Frank Webster, Oswego Falls, N. Y. Filly, sire, Ravenscroft, 2344; dam, Stanetta; and "Korolance," submitted by William Jardine, Jardineville, N. B. Dam, Korama; sire, Lancelot.

In addition I will make a sixth of \$10 for each of the following:

"Heir-to-Royalty," submitted by Ernst Z. Bower, Olney, Ill. Br filly, sire, Heir-at-Law; dam, Genette Wilkes by Roy Wilkes.

"Rose Rumor," submitted by B. F. Relyea, Mount Vernon, N. Y. Reasons: "She is by Rumor and her dam was Rose Leaf."

"Hagess Grace," submitted by A. H. Danforth, Washington, Ill. Sire, Heir-at-Law; dam, Grace Lee. Reasons: "Grace" represents both sire and dam and sounds well."

"Albion," submitted by T. M. Woods, Brockton, Mass. Reasons: "Albion for his sire Alavolo and 'neer' for Halloween."

"Albion," submitted by Walter T. Pierce, Boston, Mass. Reasons: "Albion for his name."

"Lady Dare Devil," submitted by G. A. Taylor, Johnstown, N. E. Br filly, sire, Dare Devil; dam, The Belle of Johnstown. Reasons: "Dare Devil because I thought it appropriate, being daughter of that noted horse and almost exact counter part of her sire. Mr. Bradborn, the superintendent of Village Farm, as was Mr. Harry Hamlin, endeavored to get the 'Lady Dare Devil' to register one of their own when they have by Dare Devil, and was very to learn that the name had been taken by myself.

Mr. Hamlin and Mr. Bradborn both wrote me and congratulated me on selecting so beautiful and appropriate a name for my filly."

"Albioner," submitted by Mrs. J. W. Hull, Minneapolis, Minn. Colt. Reasons: "'Al' from Allerton Alkebell and 'bo' from Bonita, his dam, and 'neer' from Electioneer."

"Aurelette," submitted by E. D. Thomas, Colony, Kan. Chestnut mare; sire, Aurelian; dam, Palisette. Reasons: "Combination of Aurelian, the sire, and Palisette seemed very appropriate, being not only pretty, but indicating the parentage as well."

In making my selection from the thousands of names which have been submitted—and I will say here that competition has met with a response beyond anything I expected, so much so that I will continue it for next year—I have been governed by a desire to select those which, while being prettily euphonious, have carried an intelligent meaning either in the name itself or in its selection, or both, after selecting all those which would meet these requirements, to grade them by a standard of perfection of those different qualities. If you will allow me the space—and I think it will be well employed in educating your readers for my next competition—I will endeavor to give you my reasoning in making the above selection:

"Rondo Bell," while being euphonious, and prettily so, was to my mind more boldly so than others equally sweet sounding. At the same time it was almost perfection in the meaning it carried in the name, while in the reason for its selection was displayed more ingenuity with a minimum amount of "farfetchedness" than in any of the others.

"Baron Lavish" is unquestionably euphonious and pretty and "horse-sense" good, while the ingenuity displayed in making the combination of the two famous Baron and Prodigal families by the way of "Lavish" to identify Prodigal was of a high order, and caused me to place it in the top list of awards; in other words, everything else being equal, if there had been a "Baron Prodigal" and a "Baron Lavish" I would have given an extra value to the "Lavish" over the "Prodigal" for the ingenuity displayed in creating "Lavish" over the already created "Prodigal."

I was tempted to place "Onward Flight" even with "Baron Lavish," as the name is to my mind so perfect in its sweet euphony, its bold horse beauty and in every other way which speaks for itself, and I was only decided in dropping it a peg lower because of the fact it was "born to order" and called for little effort on the part of the owner of the horse that is to bear it. That is, while I think "Onward Flight" fully as pretty and in every way the equal of "Baron Lavish," notwithstanding all flight is necessarily onward, I believe the ingenuity of inventing the equivalent of Prodigal in "Lavish" should put it just a little ahead of the one that was created by simply putting the two names that belonged to the sire and dam into one, although I do not wish to be misunderstood as wishing to take away from the good work displayed in giving a horse such a pretty and appropriate name as "Onward Flight" from whatever source it was secured.

"Exalma," I placed ahead of those that follow, that are equal to it in all other ways, because of the extraordinary combination of meaning syllables.

The two that follow, "Ravenetta" and "Korolance" to my mind are more sweetly pretty.

I think all will see why the eight in the last division should be just behind the others, and yet well ahead of many that I have discarded and thousands of names now in use. For instance, "Lady Dare Devil" is so perfect it should be in the first division were it not that it was almost already made to order, and made to order without being unusual in either the "Lady" or the "Dare Devil" divisions of the name.

I sincerely hope the winners of my prizes will agree with me in my selection, and also breeders generally, for if they do not, the object of my competition is nullified, for my only desire is to encourage the giving of the prettiest and most appropriate names possible to the grandest and sweetest of all the animal kingdom. I am quite sure all would agree with me, if they saw the mass of names and arguments I have been obliged to work through, and the many temptations I have resisted. For instance, one enterprising breeder submitted as follows:

"Lord Lawson of Dreamworld 36270, sire Baron Wilkes, dam Mercedes Thayer." Reasons: "I think Dreamworld, the largest breeding establishment in the United States, and perhaps in the world, with such stallions as have been collected together must be a success. 2d, because every ship has to have a navigator in order to carry her safe from port to port, and you, I think, can fill the bill, because since you have been deeply interested yourself in breeding stock and trotting them we see that you are always ready to trot them with all corners, for any amount of money, and give it to the poor." While another dangled the following dazzling flower in front of my amazed optics:

"Goldenrod, golden chestnut colt. Sire Allerton, dam Queenwood by Nutwood." Reasons: "Goldenrod is Nebraska's flower and is, I believe, to become the nation's flower, so Goldenrod the colt, clothed in

his beautiful coat of gold, and making his appearance just at the time the flower begins to unfold its beautiful petals of gold, is surely destined to have a state, national—yes, world-wide fame. Why? Because nature has given him strong, straight limbs, a short back, sloping shoulders, long neck well-out at the throat, a medium sized bony head, broad between the eyes, which are large and expressive; nostrils large and as thin and soft as silk velvet; disposition positive yet quiet and gentle; and then his speed inheritance—sired by the great and beautiful Allerton, who was a world's champion as a race horse, and since his retirement has been in a class by himself as a sire of speed; and the sire of his dam the greatest sire of speed and the greatest sire of broodmares living or dead, and some one has said 'all great men have great mothers,' and I believe the same will prove true of our equine friend, hence his right to state and national fame, for has he not four great mothers in one unbroken chain of descent, and in future years as the goldenrod unfolds its beautiful petals from the east to west and from the south to north so will you see and hear of Goldenrod, the horse, coming down the homestretch, now after a Boralma's or a Lord Derby's scalp, a Crescens' gold, a Joe Patchen's applause, a Star Pointer's and Dan Patch's fame."

## "GOLDENROD."

They call me Goldenrod, and why?  
Because on Nebraska's fertile plain,  
Because of national worth and fame  
I, like a flower, shall take a place  
And to a world's record pace.

They call me Goldenrod,  
For on the plain and through the dell  
And on the track at top of bell  
I'll lift my lofty shining crest  
And all the world will know the rest.

Yes, they call me Goldenrod,  
Few there are will pass me by,  
Some will gaze with eyes awry,  
But still I'll bow and smile and dash,  
And o'er the tracks like lightning flash.

Swipe calls me Goldenrod,  
But I'm for the Goldenrod of old,  
Because of my shining coat of gold,  
And Goldenrod will be my name  
When I shall gain both speed and fame.

My godfather grand Thos. Lawson is,  
And it through him I prize I win,  
With confidence I will begin:  
And education I shall gain,  
Redounding to Tom Lawson's fame.

To all those who are prone to criticize the wisdom of my selections I make the plea of the dazed black boy in the South, who, when asked if he could give any good reason why he should not be lynched, replied: "I've got a mighty good reason, dis am my first murder, an' ef you, gemmen gib me another chance, I'll do de next a right smart better."

As there are so many good names I am obliged to discard, I think I will in next year's competition offer in addition to the money prizes a very desirable and particularly appropriate one for each of the very good names other than those that are awarded the main prizes.

THOMAS W. LAWSON.

January 24, 1903.

## Grand Circuit Notes.

C. A. McNally says the 2:12 trot—the Bonner Memorial—will be for a \$15,000 purse in 1903.

Secretary Detrich, of Cleveland, already has his program arranged. It will consist of 25 races, all on the two in-three plan. The fastest trot will be for the 2:06 class and the fastest pace for the 2:04 class.

President Campau announced that all races on the Detroit program would be two-in-three, with the exception of the M. and M. and the Chamber of Commerce.

John B. Sage was non-committal on just how the Buffalo association would arrange its program, but it is more than likely that most of the races will be three-in-five.

Readville will give its entry program on the two-in-three plan and hang up purses to the amount of \$55,000.

Secretary Moon, of Providence, says they will have both of their \$10,000 stakes over again in 1903. That, with the 2:14 Roger Williams trot and the Park Brew for 2:10 pacers, will be on the three-in-five plan, but that at least one-half of the events will be on the two-in-three plan.

Andy Welch was enthusiastic over his new plan, as announced for the 2:09 trot at both Hartford and Cincinnati, and thinks it is the coming system of racing.

President Baker and Secretary Shepherd, although new men to the Grand Circuit officials, created a very favorable impression.

An intellectual attempt to bar hoppers was made by the introduction of a proposition to bar them in the green classes.—Horse World.

C. R. Bentley, formerly with the American Horse Breeder, and recently connected with the Chicago Horseman, has bought an interest in the Buffalo Horse World and has been made vice-president of the company controlling that paper.

## THOROUGHBRED DEPARTMENT.

Jay Rausch sailed for Paris on the steamer La Champagne, on January 28th, to report to the Vanderbilt Stable for their lightweight riding during the coming season in France. Nash Turner, who left last week, will do the heavy weight riding and also assist in training the stable. It is said that Mr. Vanderbilt will have one of the largest stables in training in France this season; his establishment is one of the most picturesque in France. It was formerly the old race course of Poissy, and is an ideal spot for the purpose it is intended. A grass gallop of about a mile and one-half can be obtained, besides which splendid sandy tracks have been laid out. A riding school stands in the very center of the course and insures plenty of exercise for the horses in all sorts of weather. This covered track is just a quarter of a mile, and at the turns there is a slope similar to those used on covered cycle tracks, so that a horse can gallop around at full speed. At Villebon, some thirty miles from Poissy, Mr. Vanderbilt has his stud farm, where the famous stallion Halma by Hanover-Julia K. is at the head of the stud.

Some of the talk heard on the ferry boats, coming from the races, regarding the running of the horses would be very amusing if it were not so absurd. There is a certain class of race-goers who, as they term it, "figure" horses, and their criticisms and comments when their selections fail to win are very entertaining. Some of the newspaper men are also very loud in their denunciations of the racing and submit an array of figures and compilations of "lengths" calculated to prove their proposition, that the picking of winners is an exact science and when the horses fail to run to what they expect them to do there is something wrong. Taken as a whole, the racing this season has been very clean and much better than could have been expected from such ordinary fields of selling platers as have been running here; the class of the horses and the muddy condition of the track have been responsible for most of the reversals of form and until these matters can be mended the racing will not improve. As far as protecting the public, about which one turf writer is so greatly solicitous, the public has the remedy in its own hands and is not forced to bet its money on muddy tracks or on poor class horses unless it so desires.

The Westchester Racing Association and the Washington Jockey Club of the District of Columbia advertise for entries to their stake events, which will close on February 10th for both associations. The Washington Jockey Club spring meeting will be held at Bennings, S. D., and will commence March 23d and run for twenty days to include April 14th. The amount of stakes and conditions to same will be found in another part of this issue of the BREEDER AND SPORTSMAN.

Yellow Tail showed some of his old time form last Monday when he galloped a mile in 1:41½ over a very slow track, making the field opposed to him look very cheap.

Another race was lost by the assistant starter holding a horse at the post on Monday. Byrondale's chances were entirely ruined by the assistant starter holding him until his field was away. Every starter in a race is entitled to an even break and this practice of holding a horse at the post should be discontinued.

The California Oaks was decided on Saturday last over a muddy track. Six fillies were sent to the post, Esherin from the Schorr stable ruling favorite throughout at eight to five. The Jennings pair, Dainty and Nigrette, was much fancied at twos, while Gravina received some support at thirteen to five. Shaw, who had the mount on Nigrette, took her to the front at once and held the lead well into the stretch where he was passed by Esherin, who finally won by a length from Nigrette. Gravina secured third money four lengths away. The winner was perfectly ridden by Bullman who, for once in his life rode a waiting race. Nigrette ran a surprisingly good race as she was carrying much more weight than has been her custom. Dainty proved a disappointment, as she did not run nearly as well as she had worked. Probably the condition of the track was responsible for her bad showing.

The *Examiner* of last Sunday is authority for the statement that the judges employed by the California Jockey Club have decided to use their discretion in placing horses disqualified for fouls, thus deviating from the time honored custom of placing a disqualified horse last and allowing him such a position in the race as in their judgment may seem fit. It is difficult to

see what good purpose can be served by such action and it is to be hoped that the *Examiner* erred in making a statement to that effect. It has always been the rule throughout the world that a disqualified horse shall not be entitled to receive any part of the purse, or any of the money wagered upon his chances of winning, and the enforcement of this regulation has met with the unquestioned approval of all persons interested in racing. The exercise of discretionary powers by judges as to the extent of disqualifications is too open a proposition and such authority in the hands of an incompetent or dishonest presiding judge might be used with the most harmful effects; for which reason it is to be hoped that the precedent will not be established and that the old rule, which has proved satisfactory since the beginning of racing, will be strictly adhered to.

Bon Mot gave such an exhibition of his bad qualities at the post last Saturday that the judges decided to refuse his entry in all future events. This, of course, will not bar him from starting in the stakes to which he is eligible.

The selling race war is still going merrily on at Emeryville; on Saturday last Quiz II. was bid up \$400 above his entered price and on Monday Tower of Candles, Mexicana and Frank Woods all received substantial boosts. This state of affairs, while very profitable for the Jockey Club, is very costly to the horsemen and it seems hard to understand why it is that they continue to pursue the custom. As it is very evident that the sole desire of those bidding is not to purchase the horse, but merely to deprive the winner of the purse, it would be a good idea to restrict the privilege of bidding on winners of selling races to the owners of starters in the same race.

J. Burrows has disposed of two of his string, Maggie Felix going to J. J. McAlester and Selected to W. M. Rogers.

Owing to the improved showing made by Quiz II. in his last two races, the stewards at Oakland track have told Roscoe Troxler to accept no more mounts at the meeting.

There appears to be a well defined feeling that Jockey Henry will withdraw his suit against the Jockey Club of France. There has nothing definite been said, but it is in the air that this will be the ultimate result, and there is little doubt among those who "know their Europe" that this will be an exceedingly wise move. In fact, whoever advised the lad to bring the suit was entirely wrong, and it was the very worst course which could have been adopted. The history of past troubles between the governing body of the turf and individuals has always had one ending. The individual has always found that the Jockey Club has been a law to itself! That whatever course has been taken, no matter what the public view may have been, it has been well defined, and that from their verdict there has been no effectual appeal.

This will prove the case in France. The French Jockey Club makes no specific charges in detail! It gives no evidence! It simply says, in effect, we take away your license for what to our mind is "cause." Whether said "cause" appears in the same light to the jockey, matters not. The Jockey Club does not want the individual any more than a lady of a house may want a cook. It says, "Go elsewhere, I do not care about you here any longer. Cause? Oh, that is another matter. We have nothing to say on that point," and there the matter ends.

It was the same in England! Tod Sloan was simply told he had best not apply for a license, and there the matter ended! There was never any charges made! Sloan knew, or he did not know, what the trouble was. The English Jockey Club is perfectly willing he should race or ride elsewhere, or he would, probably, be permitted to train horses in England, but as a rider on the English turf they simply do not want him. And that settles it!

Consequently any advantage Henry may expect to reap from the French turf governing body must be obtained along other lines than a suit at law. The French Jockey Club will be found to be a law to itself.

Filibuster and Ulloa both changed hands out of the mile and fifty yards selling race on Wednesday. C. M. Cafferty boosted Filibuster one hundred dollars above his entered price and secured him for \$500. S. Judge, the former owner of Filibuster, thereupon claimed Ulloa for \$725 and seems to have gotten a good bargain at the figure.

During the present meeting of the California Jockey Club Kenilworth has started seventeen times, scoring eleven winning brackets. Through interference, the son of Sir Modred ran unplaced in the Lissak Handicap, which was but the second time that he was outside the money. He has won from five and one-half

furlongs to a mile, with weight varying from 120 to 133 pounds. Tommy Burns has had wonderful success with this horse, winning the last four times that he rode the horse. Kenilworth has run six furlongs in 1:13 with 127 pounds in the saddle, and has won on all kinds of tracks. He is worthy successor to Beadoran, who was also sired by Sir Modred.

Racine, the sire of Sly, Elliott, Potente and other good horses, is making the season on a Maryland stock farm at the exceedingly low fee of \$25 for service.

Jockey Tommy Burns has ridden six consecutive winners. He piloted three winners on Monday and three again on Tuesday. His winners on Monday were: Mexicana, at 1 to 2; Sofia, at 4 to 1, and Axminster, 4 to 1. His wins Tuesday were on The Major, at 4 to 5; Kenilworth, 1 to 2, and Urchin, at 3 to 1. This is certainly a remarkable record, especially as it required great judgment and skill to win, with possibly two exceptions.

Golden Cottage was run up \$200 above his entered price by Andy Blakeley on Tuesday last. There was no change of ownership.

There is or was a dispute as to the services of W. Waldo in the Burns Handicap. Some days ago Green Morris got first call on the lightweight from the boy's father, Dave Waldo. Prior to this Johnny Mellin secured a contract on Waldo's services to ride either Watercure or Eonic in the Burns through Chris Martin, who made the boy's engagements. Waldo at that time was a free lance. Waldo, Sr., claims Martin had no authority to make any stake engagements. If Martin's authority covered overnight events why did it not cover stake engagements as well? The judges ruled differently, though, and Waldo will probably pilot Durazzo on Saturday.

Burns & Waterhouse expect to send Corrigan to New York next spring, having entered him in the Brooklyn and Suburban Handicaps. He ran a good race in the Burns Handicap last winter as a three year old and with the improvement since shown by him might have a chance to earn some money in either of the events above mentioned.

One of the latest innovations is said to be a company incorporated under the laws of the State of New York governing limited liability companies, called "The Steeplechase Insurance Company." Its object will be to insure amounts wagered on jumping races from loss occasioned by the horse falling during the race. If a man plays a horse for \$100 against \$2000, and insures his \$100 for, say, \$20, if the horse stands up he has a chance of winning \$2000, less the \$20 insurance; but if the horse should fall he would lose only the \$20. A refusal, peck, bolt or spilling of the jock count for nothing; the insurance goes only when the horse is actually down. Of course, the company has the jockey on its side, because no rider is going to throw his horse, even if that were possible; the results are too serious. This scheme illustrates the possibilities which the industry of racing opens up to the mercantile American mind.

California favorite hot weather drink—Jackson's Napa Soda.

### Horse Owners Should Use GOMBAULT'S CAUSTIC BALSAM

The Great French Veterinary Remedy.  
A SAFE, SPEEDY & POSITIVE CURE.

Prepared exclusively  
by J. E. Gombault, ex-  
Veterinary Surgeon to  
the French Government  
Stud.

#### SUPERSEDES ALL CAUTERY OR FIRING.

Impossible to produce any scar or bluish. The safest best Blister ever used. Takes the place of all blisters for mild or severe action. Removes all Bunches or Blebs from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. WE GUARANTEE that one tube spoonful of Caustic Balsam will produce more actual results than a whole lot of any liniment or ointment ever before made. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sent by express, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address:

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

## ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

### The Game Bill.

Gov. Pardee signed the game bill Monday afternoon. The act goes into effect immediately.

The law makes the open season for valley quail, partridge and wild duck from October 15 to February 15; for mountain quail, grouse or sage hen, September 1 to February 15; for doves, July 1 to February 15; for deer, July 15 to November 1. The law also makes it illegal to sell the pelt of any male deer or to have in possession the pelt of any spotted fawn or male deer, except those imported from foreign countries.

The Governor, knowing the desires of the duck shooters, was not hesitant in favoring them with a chance for more sport, and he signed the bill promptly.

When the measure was introduced the Assemblymen from the mountain counties and the southern part of the State offered many amendments, looking toward changes in the deer and duck season, but they were all voted down. These members complained that the bill was being railroaded through.

Greer said the measure had been discussed ever since the opening of the session by the Fish and Game Committee of each House, and the California State Fish Commission, and that full opportunity had been given to make amendments.

The opposition made a desperate fight, but the bill was finally passed.

The newly enacted law is in the following terms:

Section 1. Section 626 of the Penal Code of the State of California is amended to read as follows:

Section 626. Every person who, between the fifteenth day of February and the fifteenth day of October of any year, hunts, pursues, takes, kills, or destroys, or has in his possession, whether taken or killed in the State of California, or shipped into the State from any other State, territory or foreign country, any valley quail, or partridge, or any kind of wild duck, or any curlew, ibis or plover; or who between the fifteenth day of February, and the first day of September of any year, hunts, pursues, takes, kills or destroys, or has in his possession, whether taken or killed in the State of California, or shipped into the State from any other State, territory or foreign country, any mountain quail, grouse or sagehen is guilty of a misdemeanor.

Section 2. Section 626a (section six hundred and twenty-six a) of the Penal Code of the State of California is hereby amended to read as follows:

Section 626a. Every person who, between the fifteenth day of February and the first day of July of the same year, hunts, pursues, takes, kills or destroys, or has in his possession any dove, is guilty of a misdemeanor.

Section 3. Section six hundred and twenty-six f, of the Penal Code of the State of California is hereby amended as follows:

Section 626f. Every person who, between the first day of November and the fifteenth day of July of the following year, hunts, pursues, takes, kills or destroys, or has in his possession, whether taken or killed in the State of California, or shipped into the State from any other State, territory, or foreign country, any male deer, or any deer meat, is guilty of a misdemeanor.

Section 4. Section six hundred and twenty-six h of the Penal Code of the State of California is hereby amended to read as follows:

Section 626h. Every person who buys, sells, offers or exposes for sale, barter or trade, the hide, pelt or skin of any deer, or who transports, carries or has in his possession, the skin, pelt or hide of any female deer, or spotted fawn, or any deer hide or pelt from which the evidence of sex has been removed, is guilty of a misdemeanor; provided, however, that the provisions of this section shall not apply to the skin, pelt or hide of any deer killed or taken in a foreign country.

Section 5. All acts and part of acts in conflict with this act are hereby repealed.

Section 6. This act shall take effect immediately.

Other sections of the law in force prior to the passage of the law where they do not conflict are still in force and effect.

### The Late John H. Durst.

We are sorry to note the passing away of a genial sportsman and prominent member of the Empire Gun Club. John Haines Durst, ex-City and County Attorney of San Francisco, was called away on Monday morning at the residence of his father in Wheatland. He was a native of California, aged 43 years. Mr. Durst was elected City and County Attorney of San Francisco on the Republican ticket in 1890, and served two years.

He was a native of Colusa, where he was born in 1859. He attended the common schools and went through the State University. His course there being interrupted by two years as a school teacher. After graduating in 1880, he taught school for a year and a half more and for a brief time owned and edited the *Wheatland Farm Gazette*, he then entered the Hastings Law School, graduating in 1885, when he devoted himself to the law, most of the time practicing in San Francisco. For six months, in 1888, he was in partnership with Senator Jones in Oroville.

After his term of office as City and County Attorney Durst resumed his law practice in this city, where he continued for a number of years. Mr. Durst was a familiar figure at the trap shooting meetings, was a keen sportsman and always foremost in every movement of interest to sportsmen.

### Destruction of Crops and Fruit Not Sanctioned by the Game Laws.

The question has been raised, we have noticed in several exchanges, concerning the rights of farmer, orchardist or rancher, in protecting his growing crops, fruit or vegetables from the ravages and destruction of wild game, birds and animals, protected in close season by the State game law. From San Bernardino county came a particularly strong complaint, setting forth the damage done to orchards by deer and the hardships entailed for the reason that the ranchers were debarred from killing the deer because such action would be in violation of the game law—killing bucks in close season, does or spotted fawns at any time, or more than the legal limit of three bucks during open season. We have also read numerous statements that quail were responsible for much damage in the vineyard, that the bird ate up enormous quantities of grapes. This latter allegation we doubt very much the truth of as well as other equally frivolous statements, that quail pulled up and ate sprouting beans, etc. Quail shot under these alleged conditions will be found, upon examination of their craws, to have been feeding almost exclusively upon insect life that was far more destructive to the vineyard, orchard or garden, than any growing vegetation the birds may have eaten, and even in that event only in very small quantities. This small tribute levied on the rancher would come far from paying the board of the birds, value for value, considering the vast amount of insect life they feed upon and destroy. Wild ducks and geese, particularly the latter, are given a bad reputation for the damage done the wheat fields.

Geese are found in some sections of this State in countless thousands; they generally, however, have all left for the far north by the end of April.

Two years ago, in February, we believe, the daily papers were full of accounts concerning the depredations of robins in the olive orchards; the birds made their appearance in the foothills in flocks of thousands and it was claimed that some orchardists sustained losses of almost the entire olive crop just ripened, when the birds appeared.

In this State the annual expenses, for years past, in patrolling and driving geese from cultivated ground, has amounted to quite a sum of money; there has been no question raised as to landowners' rights in protecting their crops from damage inflicted by geese.

This same right of protection as against the destructiveness of other wild creatures will apply to the safeguard of the orchard, vineyard or garden. We will caution in this respect, "be sure you are right then go ahead." No State game law ever placed on the statute books can stop an owner, lessee or agent from killing a deer, of any sex or age at any time when discovered in the act of destroying property. There is the same correlative right of protection against wild game that there is against the thief or incendiary.

The quail stories we believe are mainly imaginary, we are also inclined to think, that that is a "nigger in the woodpile" who is responsible for some of the deer stories. But in case of actual and continuous destruction of property the right of reprisal with gun or rifle, or any legitimate means of destroying the marauder, can not be questioned, nor do we believe that the state authorities will go so far as to institute a prosecution that will be futile—providing however that the aggrieved party or parties are absolutely sure and can prove their losses. Law and reason will stand as the barrier against inroads of *ferae naturae*—furred or feathered in whatever degree. There is protection against damage resulting from domestic animals and fowls, in this, that the damaged party always has redress by civil action against delinquent, negligent or careless owners, there are also precautionary laws against possible damage by strays, in the authority vested in the poundmaster or constable to impound. It will surely appear preposterous to agree that wild creatures, under the protecting mantle of game law clauses can receive favorable consideration or immunity, for which domestic animals or fowl, under similar conditions, are placed under penalty of being shot or the owner mulcted in amount for proven damage.

The close season on quail in Marin county commenced on January 15. The season under the previous law being shortened by the county board of supervisors. There seems now to be some little confusion as to the status of the county ordinance. The new game law is certainly not retro-active, the ordinance was passed by county officials who had full power so to do. The new game bill extends the season throughout the State on quail—as well as other feathered game, until February 15th. The state law is certainly paramount to a county law. But the question the shooter wants settled is whether or no he can shoot quail in Marin county until February 15th despite the prohibition already placed by the supervisors. This seems to be a problem requiring the aid of legal advice, meanwhile it is reported, the county officials are not making any arrests for shooting quail, in the absence of any strict interpretation of the law. It is probable the Marin county game protective association will take action in the matter through the medium of a test case for the purpose of establishing the validity of the county ordinance.

### Fly-Casters' Annual Meeting and Banquet.

The San Francisco Fly-Casting Club at their annual meeting last Tuesday evening elected the following officers for the ensuing year: Walter D. Mansfield, President; Colonel Carlos G. Young, First Vice-President; H. F. Muller, Second Vice-President; T. W. Brotherton, Secretary-Treasurer. Executive Committee—Colonel G. E. Edwards, F. H. Reed, Edw. Everett, James Turner and P. J. Tormey.

Dr. George W. Lane and F. O. Harron were elected to membership.

The report of the treasurer shows the club in a strong financial condition.

During the evening a silent and standing toast was drunk in memory of the late Professor C. M. Walker.

This season's casting program will consist of twelve contests—a series of six for classification and six class contests, the first commencing at Stow Lake, on the 28th inst. During the month of July there will be no club contests. The accuracy event will be conducted in the future so that the scores resulting will be made under conditions more in conformity to the work done on the stream in trout fishing. The highest general average improvement for the season will result in a new medal awarded to the proficient rod-wielder.

Among the speakers during the evening after the usual banquet were President Mansfield, Judge John Hunt, Alex T. Vogelsang, Colonel Edwards, Adolph Muller, Colonel Young, James Turner Dr. Lane and others.

Among those present were Walter D. Mansfield, H. F. Muller, T. W. Brotherton, John Lawrence, Judge John Hunt, H. Battu, Dr. W. E. Brooks, W. F. Bogart, A. S. Carman, Edward Everett, A. B. Finch, J. Homer Fritch, W. Hanson, R. Isenbruck, T. C. Kierulff, C. H. Kewell, C. R. Kenniff, Charles Klein, Dr. Lane, George W. Lane, A. Muller, W. A. L. Miller, W. H. Shadd, John X. DeWitt, R. A. Smyth, S. Rosenheim, P. J. Tormey, James Turner, Alexander T. Vogelsang, George Walker, J. W. Wilson, Colonel C. G. Young, Colonel George C. Edwards and others.

### New York Casting Tournament.

A letter from William Mills & Son, New York, to Clabrough, Golcher & Co., of this city, states that it is understood now that a casting tournament is a fixture for the Sportsman's Show this month in Madison Square Garden. The writer requests:

"Will you please make it known to the San Francisco club members. We should be glad to have some of them come to New York. We think your Mr. Golcher, who has the longest cast to his credit, ought to arrange to come here at that time.

"The management of the Garden has stated that they intend to locate the tank for casting better than ever they have done heretofore and to arrange it in such a manner that it will be long enough for the longest casts that will be made. There is plenty of room in the Garden for this and we think they intend to do just what they say."

### W. W. Richards Becomes a Benedict.

Grace Episcopal Church was the scene Thursday evening, January 29th, of a beautiful and impressive wedding—that of Miss Elizabeth Robeley and W. W. Richards. The ceremony was performed with a full choir accompaniment of eighteen male voices, an unusual feature in a San Francisco church wedding. Under an arch of ferns, before the altar banked with white roses, while Rev. Dr. Foute pronounced the service the choir sang Cowen's bridal chorus, "Tis Thy Wedding Day."

The tall and graceful bride looked charming in her gown of white peau de soie and duchess lace; her veil was held by orange blossoms. Mrs. Richards has been organist and choir director of an Episcopalian church near Boston and has been most successful in her musical work. Mr. Richards is a well known and popular San Francisco business man and sportsman. He is secretary-treasurer of the California State Game and Fish Protective Association, the secretary of the Sempervirens Club and a member of the Fly-Casting Club.

After the ceremony there was a bridal supper. J. F. Siebe and Walter D. Mansfield acted as ushers at the church. After two months in Southern California Mr. and Mrs. Richards will return to this city, to remain until summer when they will go East for a visit. They will make their home in San Francisco, taking occasional trips to Boston and the East.

The new game bill in a way kills the State districting scheme, which was one of the most dangerous pitfalls the cause of game protection ever was called upon to avoid in California. With all sections of the State pleased, there is no need for subdividing the State, and a common cause of confusion is thereby done away with.

The old provisions regarding night shooting are understood to have been adopted, and excepting the changes in the law already noted, the old measure was re-adopted, all of its best features being retained, such as the bag limit, and no sale clauses.—*Los Angeles Herald*.

### Kennel Registry.

#### WHELP.

E. L. Dutertre's R. C. St. Bernard bitch Nairod Tomah (Grand Master Muro-Princess Nairod) whelped February 1, 1903, three puppies (6 dogs) to Nairod Kennels' Grand Master II. (Ch. Grand Master-Bonnie Doone).

#### SALES.

Nairod Kennels' sold to Mrs. J. A. Driffel, January 31, 1903, one black and two red Cocker Spaniel dog puppies by Plumaria Beau II, x Nairod Impostor.

## FEATHER AND FIN.

A meeting of many sportsmen, representing over fifty gun club organizations, was held in this city Thursday evening last week.

At this meeting the preliminary details were arranged for the formation of a State association of rod and gun clubs. The organization committee is composed of Walter D. Mansfield, San Francisco Fly-Casting Club; Mr. McAllister, Ibis Gun Club; Mr. Boyd, Country Club; J. B. Hauer, Empire Gun Club, and Dr. E. S. Knowles, Alameda Sportsmen's Gun Club. The committee will arrange and formulate a plan of organization and procedure in the interest of fish and game protection and propagation and will in the near future call a meeting of representatives of the many State clubs for the purpose of effecting permanent organization.

The record for striped bass fishing, with rod and line, is held by Mr. Seth Burton French and Mr. John Whipple, two members of the Graves Point Fishing Club, Newport, Rhode Island. Ten bass having a total weight of 495 pounds and averaging forty-nine and a half pounds, was the result of a morning's fishing from 6 until 11 o'clock. These fish weighed respectively forty-two, fifty-three, forty-six, forty-nine, fifty-one, fifty-eight, fifty-four, fifty-six, fifty and thirty-six pounds, and were caught with bait—lobster tails and shedder crabs—on a rising tide and with a heavy sea on.

The best local record is a twenty-nine and three-quarters pound fish caught by Fred H. Bushnell in San Antonio creek. The net fisherman have caught bass running as high as sixty pounds.

The San Francisco Striped Bass Club will hold a tournament at Golden Gate Park on February 8.

When fish are scarce or coy, the ingenuity of the angler brings into play many resources in the nature of stories, more or less true, or sometimes tinged with a degree of humor, the latter quality generally used in large doses for the exploitation of another angler's foibles or an exaggeration of his mishaps.

Mr. Sam Wells is authority for a tale giving the unprofitable experience of a young medical student who recently spent his vacation on a fishing trip at Duncan's Mills in search of the elusive steelhead trout, which were supposed to be basking in Russian river already cooked, with knives and forks sticking in their grilled sides and all singing in chorus the refrain, "Come and take me those who'll eat me."

The young medico spent considerable time and money just before his vacation in fitting himself out with a six-ounce bamboo rod and a generous assortment of lines, spoons, flies and hooks, all these supplemented with a large box of "Salmon Roe Jack's" infallible bait—mushy spawn.

Sawbones, Jr., is a great angler when the fish come his way, but on this trip they were all "suckers" and "hard-mouths," nary a trout could he land, try as he would. A return empty handed to the city, after the many promises given to friends and the confident boasts of his unflinching prowess as a rod artist was a state of affairs not to be contemplated. A hefty creel—weighted down with gum boots, gave credence to the story of his good luck he told on the train coming down from Russian river. On arrival in the city, he did exactly what many another luckless rodder before him has done—went straightway to the first fish stall and purchased a seven-pound steelhead trout. A little manipulation of the fish's jaw with a penknife was necessary to make somewhat credible the thrilling story—told to several friends during the fish dinner, about how gamely the fish fought and how lucky he was in getting Mr. Speckled Beauty with the gaff, "just as the leader broke in two." And of such is the kingdom of the fisher fold.

This is the tale of a shark which was caught in Moreton Bay, Australia, one day last year.

Everybody that possibly could took a hand in hauling the fish, which proved to be about twelve feet in length, to the surface. The ugly brute was tugged to the forepart of the Cormorant, and the hook of the anchor tackle was lowered over into his jaw, and he was thus as it were rehooked, an attempt to lift the shark on to the vessel by throwing a rope around him having failed. The tackle hook pierced one of the eyes of the fish and, possibly, a portion of the brain. The fish was then hauled out of the water, and when drawn as far as the tackle could pull him, his tail just touched the sea.

"Joe," with his sleeves tucked up, and armed with a sharp butcher's knife, began his deadly work. Plunging the knife into the shark just below his lower jaw, the sailor ripped the fish to the tail, and proceeded to cut his insides out. The whole of the organs and contents of the interior, which included a number of feathers, were thrown into the sea, and the gleeful satisfaction with which "Joe" did his work seemed to suggest that he revelled in reversing the too frequent fearful order of things—that was, that man this time was reddening the sea with the blood of the shark.

When the whole interior of the fish had been cut out, and from the vertical position of the body, practically every drop of blood had run out of the fish, "Joe" proceeded to secure the spoils by hacking out both upper and lower jaws, with the object of securing the teeth. The shark was now absolutely clear from head to tail, and one of the naval jokers suggested that "you could now get inside him, and it would make a rare 'ammock.'" This cutting up process had occupied about twenty minutes, and the only prominently noticeable movement on the part of the fish was the working of one of its treacherous looking eyes. "I suppose he is dead now, I remarked to one of the crew, who replied that "he believed that he was as dead as a door nail, and that when we let him go he would go down wollop." This belief that the fish was dead was general, and when all was ready to lower it into the water, a rush was made to the side to see the shark "go wollop."

Immediately the disembowelled fish reached the

water, it made a dash off, and startled those of the ship's company, numbering nearly a dozen, by deliberately swimming off in the direction of the shore. After going about fifty yards, as near as could be estimated, it turned round and came back to the steamer. The uncanniness of this proceeding produced a joking comment from one of the crew: "Why, he's coming back for his innards." When the fish reached the bow of the steamer it swam off in a seaward direction, and, after going about thirty yards, it again turned round, and made for the steamer once more. This time it struck the vessel amidships on the port side, and then continued its swim past the steamer, and was still seen swimming astern at the rate, it was estimated, of about four or five miles an hour, when it was finally lost to the view of the eye. "Well, I'm——" That was the comment of one member of the astounded ship's company, who has witnessed wonders of the sea nearly all his life.

## San Francisco Kennel Club.

The annual meeting of the San Francisco Kennel Club was held at the Occidental Hotel, February 1, 1903. The following officers were elected: President, William C. Ralston; First Vice-President, John E. de Ruyter; Second Vice-President, E. Courtney Ford; Secretary and Treasurer, Charles K. Harley. Directors—Messrs. W. C. Ralston, John E. de Ruyter, E. Courtney Ford, Charles K. Harley and W. S. Kittle. Bench Show Committee—Messrs. W. C. Ralston, J. L. Cunningham and Charles K. Harley. All medals and prizes won at the sixth annual dog show will now be promptly paid by addressing the Secretary, Charles K. Harley, 844 Harrison street.

## DOINGS IN DOGDOM.

J. C. Brown of Riverside, the owner of one of the finest orange grooves in that section of Southern California, has a fancy for Fox Terriers and has now some good ones in his kennels. Garston Perfect, first puppie and reserve winners at Oakland in December, is now in good fettle and coming on splendidly. He will be seen on the bench of the northern circuit and in this city at the May show.

A recent litter by Terence out of Garston Mischief, nine puppies, are now in fine condition, several of them of more than extra promise. Cairnsuir Favour, first novice, second limit, Los Angeles, 1902, whelped January 31 four puppies (two dogs), all now strong, healthy and doing finely. Mr. Brown writes: "I am looking for something quite good from this litter as they are by Terence and Favour had not been bred for eighteen months previously. When I sent her East soon after the Los Angeles show she was in first class shape and has been very well ever seen." Garston Perfect has been put in the stud.

The list of judges for the New York show is the following: Miss A. H. Whitney, Lancaster, Mass.; St. Bernards, Newfoundland and Pugs; Miss Elizabeth Marbury, New York, French Bulldogs; F. Freeman Lloyd, New York, Bloodhounds, Greyhounds, English Foxhounds (except packs), Retrievers, Dalmatians, Old English Sheepdogs, Whippets, Chow Chows, Welsh Terriers, Skye Terriers, Black and Tan Terriers, Schipperkes, all Toys, and miscellaneous classes; C. H. Mantler, New York, Great Danes; Wm. Tallman Brooklyn, New York, American Foxhounds and Setters; G. Muss-Arnolt, Tuckaboe, New York, Pointers, Chesapeake Bay dogs, Griffons, Basset Hounds and Dachshunds; Geo. Douglas, Woodstock, Ont., Sporting Spaniels; Wm. C. Hunter, Fayetteville, Pa., Collies; Chas. D. Bernheimer, New York, Poodles; E. K. Austin, Brooklyn, New York, Bulldogs; W. S. Gartner, New York, Bull Terriers; John L. Arden, N. Y., Airedale Terriers; Winthrop Rutherford, Fox Terriers; P. J. Brickley, Boston, Mass., Boston Terriers; A. J. Purinton, Palmer, Mass., Beagles; O. W. Donner, Rye, N. Y., Irish Terriers; W. P. Fraser, Toronto, Ont., Scottish Terriers.

The English Kennel Club Committee has revised the rules as to the preparation of dogs for exhibition, deciding that they should come into force July 1, 1903.

Our American rules are too indefinite and action should be taken by some one looking to a more definite specification of what improperly tampered with suggests. The English will henceforth disqualify a dog when it is proved to the committee,

1. That any dye, coloring, whitening or darkening matter has been used and remains on any part of the dog.
2. That any preparation, chemical or otherwise, has been used, which remains on the coat during the time of exhibition, for the purpose of altering its texture.
3. That any oily, greasy or sticky substance has been used and remains on the coat during time of exhibition.
4. That any part of the dog's coat or hair has been cut, clipped, singed or rasped down by any substance.
5. That the new or fast coat has been removed by pulling or plucking in any manner.

Note—The coat may be brushed and combed, so that old and shedding coat and loose hairs may be removed.

5. That if any cutting, piercing, breaking by force, or any kind of operation or act which destroys tissues of the ears, or alters their natural formation or carriage, or shortens the tail, or alters the natural formation of the dog or any part thereof, has been practiced or any other thing that has been done calculated in the opinion of the Committee of the Kennel Club to deceive, except in cases of necessary operation certified to the satisfaction of the Kennel Club Committee.

7. That the lining membrane of the mouth has been cut or mutilated in any way.

Exceptions—1. Shortening the tails of dogs of the following breeds will not render them liable to disqualification: Spaniels (except Irish Water), Fox Terriers,

Irish Terriers, Welsh Terriers, Airedale Terriers, Old English Sheepdogs, Poodles, Toy Spaniels, Yorkshire Terriers, Schipperkes, Griffon Bruxellois, or such varieties of foreign dogs as the committee may from time to time determine.

2. Dogs of the following breed may have their coats clipped: Poodles.

3. Dewclaws may be removed in any breed.

Mr. Charles K. Harley will take in the New York show this month.

## Kennel Suggestions.

## SHOWING DOGS.

Now that the show season is coming on a word or two about showing dogs and the preparation necessary to put them down in that condition which best pleases the judge, may not be out of place, writes The Kennelman in *The Am. Stock-Keeper*. I have already alluded to several necessary precautions to be taken in the matter of Bull Terrier "fetting," not faking. These apply to other smooth Terriers like white English and Black and Tans, excepting that the ears are not shaved. In exhibiting Black and Tans and all dark colored dogs that are expected to beshown in the pink of sheen, after the regular grooming that is supposed to cleanse the dog, and render waiting unnecessary except at rare intervals, a good rub over with a natural wool swab is a splendid shiner. There is just sufficient natural oil in the wool to give a beautiful gloss without leaving a trace that could be detected by the most critical judge. This is the wool as it comes from the sheep, and before it is carded. Our judges, however, are not critical or the many unseemly cases of powdering Bull Terriers' coats until the dust rises as the judge puts his hand along the dog's back, or the charcoaling or black leading of the Black and Tan, would receive more condign condemnation at the hands of the authorities. This dusting is really a detriment, for not only does it clog the coat and skin, but it deadens the natural gloss of the hair. Besides, it is a lazy man's method. If powder is put on to clean a dog's coat, flour, chalk, magnesia or what not, should be brushed out at once, if the dog is to go into the ring.

In the case of long coated dogs like Collies, combing should be avoided, for the undercoat should be preserved at all hazards. The best brush to use is a "dandy" brush, which is rough enough to straighten out the outer coat, but does not penetrate to the undercoat. Hand rubbing and the chamois are wonderful gloss producers on these coats, but it is obvious that where a rather harsh texture of coat is desired, as in the Collie, Scottie, wire hair and similar dogs, the wool pad, alluded to above, is not desirable, owing to its tendency to soften the hair. It may be used on St. Bernards, Greyhounds, Setters and like soft coated dogs.

It is always well to smarten up a Collie's ears and remove with thumb and forefinger the little tags of hair around the base and tips, so that the ear stands clearly and well defined from the head, besides, this heightens the lengthy look of the head. Remove any superfluous feather below the hocks, it is not required, and a clean cut appearance there adds to the effect of abundance of feather above the hocks, which, with the feather on forelegs and the heavy tail feather, should be brushed out almost to separate hairs. In the case of a flat ribbed dog, tumbling his coat on back and sides will offset the flat sided look to some extent, and will allow the dog to pass muster if the judge does not handle him. The latter remark may seem strange, but with some of the English judges we have had over, handling a Collie would seem to be one of the last things they think of.

In exhibiting a Collie or any breed where the hair is expected to be profuse around the neck, a plain round collar, as thin as possible compatible with strength, is the best, as it then fits into the skin and allows the hair to fold over and is invisible. Always brush the mane well to the front and ruffle it out and make as much of this and the frill as possible.

It is best to wash the white parts, but a preparation of flour and a little blueing rubbed in and left on till the dog is ready to show and then thoroughly brushed out, is generally used. Washing, however, just before exhibiting serves to fill out the hair and makes it look more profuse, but, of course, the dog must be entirely dry before going into the ring.

In showing a Collie or Terrier some bait, like boiled liver, to attract his attention is almost a necessity and will be found a great help in securing a sprightly appearance and attitude. But more of this anon.

Not so many of the rough haired Terriers are shown as natural, as was the case in former years, for the reason, perhaps, that most of them are exhibited by kennels who have experienced men, or else by handlers, who, in a fashion, trim them up more or less as occasion requires before they go in the ring. However, beyond clearing away with a comb that is made for the purpose, or with the thumb and forefinger, the "dead" hair (termed "dead" from motives of policy) around cheeks and neck, little can be done in the way of impromptu trimming that will not leave traces more conspicuous, perhaps, than the original plenitude of coat.

[To be continued.]

## Dog Owners!! Read This!!

We are carrying in the advertising columns of this journal an advertisement of "Sergeant's Dog Remedies," a popular line of preparations for which F. W. Braun & Co., of Los Angeles, California, have been made distributing agents on the Pacific Coast. The goods have few equals and are superior to any other remedy having received the highest endorsement of the leading dog men and kennel owners of the country and Canada. They are manufactured by PERK MOTHER DOG REMEDIES, Va., who invite all persons having stock dogs to send a stamp describing symptoms, and the writer will send the best possible advice without any charge what copy of their book on "Dogs" sent free on receipt of cover postage.

### Twenty-Two Calibre Rifles.

American riflemen have never taken kindly to arms of large calibre. So far back as the old French and Indian wars, unless our authorities are at fault, of the rifles used by colonial volunteers, most of whom were trained hunters and woodsmen, there were very few adapted for round balls of more than a half-ounce weight. It may be our forefathers believed in economy in the use of ammunition. At any rate, the favorite rifle was one whose bullets averaged about 40 to 60 to the pound, for this size was found sufficiently large for ordinary hunting purposes, shooting well up to 200 or 300 yards. The smaller size mentioned contained approximately the same amount of lead as a .32-20 Winchester bullet, but, being round, was of larger calibre. In comparison, it lacked penetration, but gave a greater express shock and would naturally stop the game quicker and bleed it better. Rifles for squirrel shooting ran much smaller in size, with bullets from 120 to 200, and sometimes 250 to the pound. The exact calibre expressed in 1-100th of an inch is not easily given, but divide a pound by 250 and you get 28 grains. This is two grains less of lead than is contained in our .22 short rim-fire cartridge. The proper powder charge for such a bullet in a muzzle loader would be about 8 grains—enough, according to the old rule, to cover the ball in the palm of the hand; in the .22 short, the charge is three grains and it gives perfect accuracy up to 50 yards range.

Until the introduction of breech loading rifles, indoor practice was never popular and in consequence the possibilities of small calibre arms was very imperfectly understood. It took too much time to charge a muzzle loader; they fouled quickly and were difficult to clean; as a rule, those of extreme small calibre were not accurately bored and rifled. With the best of such arms practice was very unsatisfactory, and for similar reasons they were not particularly desirable for hunting purposes.

Many years of experimenting and improvement were required to perfect the .22 calibre cartridge. Possibly there is still room for its betterment, but during the first ten years that this cartridge was on the market it made about as many enemies as friends. Some shooting galleries discarded it altogether after a trial, preferring air rifles and those unique arms which discharged a single shot loaded from the muzzle and propelled by the fulminate in a percussion cap, which was seated upon a central tube about midway of the barrel. But in time, the .22 cartridge was brought to such a stage of perfection that its good qualities could no longer be denied. It has since achieved a universal popularity, is used almost to the exclusion of other cartridges in indoor practice, and in hunting serves ends for which one would think it wholly unfitted because of its miniature size and ridiculously light charge of powder and lead. Since the production of the .22 long rifle cartridge, we are continually hearing of geese, quail, duck, etc., wild turkeys, wolves, deer and even black bears being killed with this admirably proportioned load, and for small game at short range it has no superior. Its performance at the target is too well known to require extended mention here. Suffice it to say that, under favorable conditions, it can be depended upon to make satisfactory groups at distances up to and including 150 yards.

Because of the popularity of .22 calibre cartridges nearly all of our rifle manufacturers have brought out light, neatly designed models of their arms adapted to handle them. The list is already a long one and will be longer, for the .22 rifle is now far and away the best seller on the market and in growing demand in every section of country. The first .22 rifles were clumsy, because of the endeavor to fit standard models for heavier loads to the little cartridge. Most of us can remember the '73 Model Winchester 22, and some of the older Remington and Ballard rifles of this calibre, which may be mentioned as examples. They were quite up to the excellent standard of their respective makers in every respect, but in weight and barrel length were out of proportion to the cartridge. A demand for a more suitable arm was not long in developing, and it has been fully and consistently supplied. The purpose of this article is to show how thoroughly and well the new field has been covered by our many manufacturers working to a common end. All reference to the heavier models of .22 rifles will be omitted, though these arms are still made expressly for the use of target shooters, and in weights ranging as high as 10 pounds. The weight of the tiny rifles described here is generally not more than half so much, and in many cases a great deal less still.

The Remington Arms Co., Ilion, N. Y., have a very popular arm in the "Remington No. 4," which is now a pocket taken-down attachment, something which is very materially to the value of any arm, making it convenient for packing when traveling. This is the regular Remington hinged breech-block and automatic shell ejector, and is distinguished

by the perfect material and superior workmanship which characterize all arms from the Ilion factory. It weighs 4½ pounds, has 22½ inch barrels, and can be had, if desired, for the .25 and .32 R. F. Cartridges. List price, \$8. A later arm is the "Remington No. 6," adapted to .22 cartridges only. This arm was specially designed to meet the demand for a light weight and reliable take-down rifle at a moderate price. The action is a modified type of the Remington system. It is a pound lighter than the arm first mentioned and the barrel is shorter by 2½ inches. It has been only a short time on the market, but, at its list price of \$5, is finding a ready sale.

In the Model 1890 .22 repeater, the Winchester Repeating Arms, of New Haven, Conn., made its first departure from the old guard lever action, for the sliding fore-end, which has since been made so popular by the Winchester repeating shotguns. In other respects this repeater marked a radical change from existing types, particularly in the matter of weight, which was only 5½ pounds. The majority of riflemen

Remington Take Down No. 4.

considered it ridiculously light—well enough, perhaps, for a single shot arm, but not for a repeater, which must possess a magazine and other additional parts. But it speedily achieved popularity. The trombone action was remarkably handy for snap shooting, and in manipulation did not require removing the trigger hand from the grip. Shooting galleries installed the rifles in place of the heavy '73 Models, which Winchester lovers—and their name is legion—persisted in demanding; hunters fell in love with the special .22-7-45 cartridge and square pointed bullet for which this new arm was adapted and which was introduced at the time of its appearance. No better .22 cartridge has ever been perfected, though the long rifle cartridge is in more common use and for that reason, principally, has made more records at the target. The Winchester Model 1890 is made only with 24-inch octagon barrel, plain trigger and rifle butt-stock. It is adapted to the .22 short, .22 long and the special cartridge referred to, but they will not interchange in the same arm, nor will the action handle the .22 long rifle cartridge. The

Winchester Repeater.

barrel is instantly removable from the stock by releasing a thumb-screw at the side.

The action of the Winchester Model 1900 single shot rifle is of the bolt type, safe, reliable and of very few parts. This is the only .22 bolt action rifle yet produced, and as such has been compelled to face a considerable amount of prejudice, which might not have been easily overcome by an arm lacking the support of a Winchester reputation, and the fact that it is finding a ready sale speaks well of its ability to gain friends on short acquaintance. The gun is cocked by pulling rearward on the firing-pin, which is made with a knurled head to afford a good grip, and when cocked the action is locked against opening until the firing-pin falls. It has an 18-inch barrel, straight grip stock and plain trigger, weighs about 2½ pounds, and lists at \$5.

As a class, the little rifles described owe their present popularity to several reasons. Their exceedingly low price places them within reach of everyone, however limited his means may be, and the cheapness of ammunition is also to be considered. The .22 short cartridge retails for \$2.50 per 1000, and the conical bullet breech caps for a trifle less. Consequently there is no need of observing economy in practice, the marksman being free to shoot to his heart's content, at any and every target that catches his eye, and with the agreeable knowledge that his bank account will not suffer from his self-indulgence. But, unquestionably, the chief charm of these miniature rifles lies in their lightness and their handiness for packing away in trunks, strapping to grips or pitebing under the seats of road

Winchester Model 1902 Single-Shot Rifle.

vehicles when the owner is preparing for a day or week in the country. There is no possible excuse for leaving them behind, and there is rarely an occasion when their companionship is not found desirable. The rifle and 100 rounds of ammunition, weighing in the aggregate anywhere from 5 pounds to half of that weight, is not burdensome, even if carried in the hand. Leather cases, either full length or of the Victoria pattern for the arm when taken down, can be had of any dealer in sporting goods, and they are usually furnished with sling straps for carrying over the shoulder. Thus carried, the hands are left free and the arm is by no means an incumbrance or a burden, whether its bearer is mounted or on foot. The weight hangs easily on the shoulder, and there is no "lopped-sided" feeling, such as one experiences when carrying

even a light revolver in the coat pocket.

And when the game is in view, the .22 calibre rifle is "right thar." It has been said that accuracy is the first requisite of a hunting arm, and this the .22 rifle possesses to as great an extent as any of the larger calibre. It will shoot as straight as any marksman can hold, and, with the long rifle cartridge, as far as the majority of hunters would think of risking a shot at game. It has its limitations, to be sure, but its range and its penetrative powers are so wholly out of proportion to calibre and the charge of powder and lead, that even those who have longest used this rifle and cartridge are daily discovering new excuses for enduring faith therein.

It is worthy of comment that there has been no positive effort toward perfecting a cartridge smaller than the .22 calibre. Apparently, it was early taken for granted that a rifle of lesser bore would be impracticable, because of the difficulty of grooving it properly. When black powder was in common use the trouble experienced in cleaning the barrels of .22 rifles was sufficient to restrain any lingering desire for an arm of smaller calibre, but the adoption of smokeless powder has done away with fouling, so that this objection no longer obtains. With the improved machinery now in use, the production of .15 or .18 calibre rifles is quite practicable, and there would be no difficulty about building cartridges to match.

### A New Single Trigger.

Messrs. T. Bland & Sons, of London and Birmingham, have brought out a new single trigger mechanism invented by Major Tighe, of the Indian Staff Corps. Its chief recommendation is its simplicity and the solidity of the parts. In place of the ordinary trigger-blade, a plate, with steps on either side of a center ridge, is provided. The ridge normally lies under the right sear and on pulling the trigger lifts the sear tail and fires the right barrel. The front part of the plate below the ridge falls away in a curved recess, and when the trigger is fully released, after the first discharge, the right sear-tail slips over the ridge and falls into the curved recess below. During this movement the involuntary pressure on the trigger takes place, and, on consciously pulling a second time, the shoulder to the left of the ridge raises the left sear and discharges the second barrel. Selective action is provided by thumb-pieces projecting on either side of the trigger plate. By pushing in the thumb-piece, the center ridge is carried under the left sear, and the left barrel is discharged first, the right barrel being subsequently fired by the shoulder to the right of the ridge. There is no really new principle involved in the invention, but the mechanism is sufficiently distinctive to be interesting.

### Belgian Guns.

A correspondent in Liege of the *Sporting Goods Dealer*, writes that American orders for fire-arms are beginning to come in, prices generally remaining about the same as last year. As yet, however, the market is rather quiet, the chief orders on hand being for goods which are not required for delivery on any special date. Revolvers for the Orient have been sold in considerable quantities, and prices for them are a little firmer. The demand for hammerless guns continues to increase, and in consequence of the big orders received earlier in the year, prices have been very reasonable. The output continues to increase and there is some probability—although certain departments of the trade have not done so well—that the record figure of 2,322,620 barrels, which passed through the Belgian proof-house last year, will again be reached. Cycle trade, owing to the very contrary weather, has not been so good as usual, and dealers have not had a satisfactory season. Motor cars and motor cycles, as manufactured at Liege, have been in steady demand, and this department of Belgian business is likely to become very prosperous.

### Coming Events.

- Rod.**  
Nov. 1-April 1— Trout season closed.  
Nov. 15-Sept. 10—Season open for taking salmon above tide water.  
April 1-Febr. 1—Deer season closed in this State.
- Gun.**  
July 1-Feb. 15—Dove season open.  
Oct. 15-Feb. 15—Open season for quail, ducks, etc.  
Oct. 15-Jan. 15—Open season on quail in Marin county.  
Nov. 1-July 15—Deer season closed.
- Bench Shows.**  
Feb. 10, 11, 12, 13—Westminster Kennel Club. 27th annual show. Madison Square Garden, New York. James Mortimer, Superintendent.  
Feb. 18, 19, 20—New Jersey Kennel Association. Second annual show. Orange, N. J. C. G. Hopton, Secretary.  
Feb. 19, 20, 21—Colorado Kennel Club. Denver, Col. W. H. Kerr, 1451 Arapahoe street.  
Feb. 23, 24, 25, 26—New England Kennel Club. 19th annual show, Boston, Mass. Wm. B. Emery, Secretary.  
March 4, 5, 6, 7—Duquesne Kennel Club. Pittsburg, Pa. F. S. Stedman, Secretary. Lewis Building, Pittsburg.  
March 10, 11, 12, 13—Rochester Kennel Club. Rochester, N. Y. W. J. Gram, Secretary, 701 Lake avenue.  
March 11, 12, 13—Coshocton Kennel Club. Coshocton, Ohio. F. V. Mizer, Secretary.  
March 17, 18, 19, 20—Twin City Kennel Club. Ulrichsville, Ohio. C. S. Walker, Secretary.  
March 25, 26, 27, 28—Chicago Kennel Club. Annual show. Mrs. John B. Naylor, Secretary.  
March 31, 31—St. Louis Collie Club. 5th annual show. St. Louis, Mo. John A. Long, Secretary.  
March 31, April 1, 2, 3—Buffalo Kennel Club. Inaugural show. Buffalo, N. Y. Edw. P. Sharp, Secretary.  
April 1, 2, 3, 4—Victoria City Kennel Club. 2d annual show, Victoria, B. C. T. P. McConnell, Secretary.  
April 1, 2, 3, 4—Southwestern Kennel Club. Inaugural show. New Orleans, La. John Dewhurst, Superintendent.  
April 8, 9, 10, 11—Atlantic City Kennel Club. Atlantic City, N. J. Thos. H. Terry, Secretary.

# THE FARM.

## High-Class Imported Jersey Cattle.

EDITOR BREEDER AND SPORTSMAN—When the famous Jersey bull Flying Fox, was imported in 1901, by Mr. T. S. Cooper, he was inspected at quarantine by a well known expert who sometimes officiates as judge at fairs, who said that he knew of but one bull in the country that could stand against him in the show ring. This was exceedingly high praise of its kind, though show ring honors are not the highest measure of a dairy bull's value and it was hardly that qualification that made him fetch \$7500 at auction in May, 1902. This year there stands at Linden Grove, in Flying Fox's stall, a younger half brother, the last Island bred son of Sultan's Rosette, the famous dam of great bulls. This younger bull is called Forfarshire, and as an individual he is magnificence itself. Landseer might have taken him as a model for a Monarch of the Pasture to match, in personification of royalty, his "Monarch of the Glen." Much as I anticipate, I dare not say that Forfarshire will ever be as great a sire as Flying Fox has already proved, nor would I claim that Picton, who got him, was the equal of Golden Fern's Lad, who got Flying Fox, though both are descendants of Golden Lad. A sire's merit can only be settled finally by the dairy quality of his daughters and Forfarshire has not reached the crux of that question. Until he has we may expect but may not claim. He is much larger than Flying Fox with no more daylight under him and that, in his case means both greater height and far greater length. Indeed, he is an immensely long bull without a slack point in his make up and with an upstanding grandeur that carries off the pronounced masculinity of his arching withers and crest in a sweep of the neck and poise of the head that belongs only to a Monarch by right. His size, style and finish have given an appearance of maturity so that he looks a year older than Flying Fox, while in fact he is a year younger.

I incline to think that Forfarshire comes a little nearer being 'his mother's son' than any of her other bulls, although his loftier style may not be altogether a sex variation from her type and perhaps he owes something to Picton for it. He gives a lot of style to his sons and one of them, in Mr. Cooper's sale of last year, which I hoped to get for my herd, so caught the fancy of the bidders, that he quickly mounted to second place in the prices for bulls and Mr. Lawson took him along with Flying Fox, to Dreamworld. Now that was not bad for a Forfarshire bull on what was eminently a Flying Fox day, on which account too I had thought to pick him up cheaply. Mr. Frank C. Ward's recent importation is headed by a Forfarshire bull twenty months old that has the size and carriage of a three year old, a splendid fellow whose dam is bred much like his sire—of Golden Lad and Welcome blood. He will doubtless be the first of the Forfarshires to come under the hammer next spring—a fact worth remembering.

The get of Forfarshire average very large and the heifers type much after Rosette. If they carry out that resemblance as closely, in the lacteal machinery, as they now promise to, they will make a tribe of whacking big Jerseys and whacking big milkers as well. This extra size has many admirers. A small cow is good enough for me until I see a big one that can beat her at the churn. A good big one can beat a good little one when everything else is equal, but there are many cases where the little one yields the most, and when so she has my 'ruthers.' Giving a pound of butter for an ounce of beef makes a poor swap, but that is what it comes to if you put up with a poor dairy

cow for the sake of her final fattening value. But Rosette, through her sons and daughters, has had a faculty of producing offsprings that fill the churn as well as her stall. To the Jersey world she is "a good thing" and Forfarshire, in my opinion will prove a worthy rival of Flying Fox, Ravachol and John Bull in "passing her on."

Mr. Cooper got Forfarshire in an odd way. After his sale of 1900 he was so impressed with the value of Rosette's descendants that he went to the telegraph office and cabled his agent on the Island: "Buy Rosette's other son," meaning John Bull, but avoiding the name as there was another John Bull. Ravachol had previously been butchered and he already had a "call" on Flying Fox. Now it happened that John Bull had turned cross and had just been butchered, before his great worth was known, but Mr. Cooper was unaware of that fact. When word came that Rosette's son had been bought for him he supposed he owned John Bull and it was months before he found that he had secured Forfarshire, Rosette's last calf, that had slipped out of his mind. But luck was with him for Forfarshire in due time reached higher honors than John

## Making the Institutes More Useful.

The board of agriculture of Missouri has made a new move to improve the interest and usefulness of the farmers' institutes in that State. They propose to take along with the institute lecturers an exhibition and demonstration car. When the meetings are in stock sections they will take representatives of improved breeds of cattle from the college herd and will hold a stock-judging school. Where the dairy is the more important industry the car will be equipped with proper apparatus and will be a traveling dairy school.

In the horticultural sections the car will have an outfit of spraying apparatus, fruits and trees, so as to give practical lessons on the prevention of diseases and insect pests, the pruning and planting of trees, etc. Some seats will be in the car so that at times a short stop can be made and a meeting held therein. In the places where a full meeting is to be held the car will be unloaded and the material taken to the place of meeting. This is certainly a move in the right direction. Object lessons are far more useful than lectures and the average farmer is much better im-

## The Cow's Vacation.

The record of the dairy herd at the Minnesota Experiment Station shows invariably that the cows do better when given a rest of from six to ten weeks than when milked up till a week or two before calving. Some cases would indicate, however, that cows are much more subject to milk fever after a long rest than a short one. There can be no set rule as to how long a cow should be dry, as this will depend upon the age, condition, breed and quality of the individual animal. A heifer or young cow should be milked longer than an old cow. If the heifer gets a long rest the first year she may form the tendency to dry up early. A cow much run down in flesh and strength should be given time to build up. A good dairy cow will milk longer than a poor cow. It would be practical to milk the dairy cow ten months of the year, while in case of some common cows it might not be profitable to milk more than seven. Taking it all in all, it will be found most practical to give the cows about two months' rest between milking periods, and on the average Minnesota farm this rest should be in midsummer when the other work of the farm is most rushing.

## Swine Breeding.

In order to promote successful swine husbandry there are a few things that it will be well to keep in mind. There has been too much of a tendency for brood sows to produce litters small in number and as one goes about among the breeders reports are frequent of litters of four and five pigs. There are several causes for this, but one is a matter of inheritance. Sows from pigs that have farrowed such small litters should not be used for mothers. A process of selection should be adopted, and every breeder should have a standard to be adhered to excepting under unusual circumstances. Sows should farrow litters of eight or more, and should easily rear, barring accident litters of ten at least, if that number are farrowed. Strength of bone and limb is also essential in successful swine husbandry. A pig should have a strong, good sized bone as shown in the leg, and ought to stand up well on his feet, and have an active movement. If our breeders will cull inferior animals from their herds more severely, and in breeding will seriously consider strength and bone they will make a wise improvement in the character of their stock, and eventually be better off.

## The Ayrshire Cow as a Butter Producer.

Several of the experiment stations in America have been conducting trials to establish the capabilities of the Ayrshire cow as a butter producer. Some of the results are given below.

There were seven herds tested for a full year under the direction of the various experiment stations, making about seventy cows in all. Two of these cows gave over 500 pounds of butter, eight gave over 400, forty gave over 300. One cow gave over 10,000 pounds of milk, seven gave over 9000, 20 gave over 8000, 33 gave over 7000 and 52 gave over 6000 pounds of milk.

Five cows owned by E. J. Fletcher, of Greenfield, N. H., won the first prize, giving an aggregate of 42,020 pounds of milk and 2050 pounds of butter; George H. Yeaton, Dover, N. H., won second, with 42,417 pounds of milk and 1936 pounds of butter, and W. V. Probasco, Cream Ridge, N. J., won third prize with 38,326 pounds of milk and 1835 pounds of butter.

For single cow prizes, L. S. Drew, of South Burlington, Vt., won first prize with Miss Ollie, giving 514 pounds of butter; E. J. Fletcher, Greenfield, N. H., won second with Durwood, giving 506 pounds, and C. M. Winslow & Son, Brandon, Vt., won third with Acelista, giving 421 pounds.

Imp. SULTAN'S ROSETTE 149740 (Rosette 5th P-2881-H. C.)

Champion winner over the Island of Jersey. Dam of the famous bulls Forfarshire, Flying Fox, Ravachol, John Bull, etc. Her son Flying Fox and her daughter Olicante were both champion winners over the Island of Jersey, and Flying Fox sold at auction for \$7500, in T. S. Cooper's Importation Sale, May, 1902, to Thos. Lawson, Boston, Mass. Olicante went into Lord Rothschild's herd in England.

Bull. While foreign ownership debarred Forfarshire from competing against the Island, at the Royal, he won first and sweepstakes at St. Saviour and Grouville Show and First States Prize, beating, with different judges at each show, the bulls that were first and second over the Island at the Royal. He was exceedingly popular and earned handsomely for Mr. Cooper, while on the Island Rosette's blood is ever marching on. Pity that such a cow could not have a hundred sons to engraft her worth upon the breed of American Jerseys. She is a "Beautiful Bells" in the butter cow world. Her son Forfarshire is likely to prove a "Chimes" or a "Bow Bells" to the herd that secures him.

PETER C. KELLOGG.

There is no other one feature of the business of beef production quite so important as to have the right kind of an animal, an animal possessing the desired form combined with plenty of quality. Bear in mind that width of back, loin and hindquarters are indispensable in the good steer. The three factors which determine the selling price of the steer on any of our leading markets are percentage, that is, per cent of dressed weight to live weight; quality, that is, a thick covering of good flesh over back and loin, and proportion, which means as much weight as possible in the back, loin and hindquarters, where the high priced cuts are to be found.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

pressed by what he sees than by what he hears and soon forgets.

He will be interested in the exhibition of these things that particularly concern his specialty and will not forget what he sees and handles, while the spoken lecture often leaves no permanent impression. The school on wheels is a good idea and we would like to see it carried out more fully. One of the most useful things we have noticed was the plan adopted several years ago by one of the trunk lines of railroad running south. They had a whole train containing steam rock crushers and rollers for illustrating road making, road scrapers for dirt roads, a canning outfit with an expert canner to show how to put up fruit and vegetables, plows, cultivators and other things and a corps of lecturers in attendance.

Stops were advertised weeks ahead and the train was always met by a crowd. One car was a complete dairy school and in another an attempt was made to show how to grow ornamental plants in window boxes and the whole outside of the car was decorated with these filled with plants.—Field and Farm.

The value of Coconut Oil Cake as a food for young growing stock is recognized by the highest authority. On the 21st inst we printed a report of the State experiment station of Pennsylvania, in which the use of Coconut Oil Cake was highly endorsed. We have a local factory for the manufacture of this desirable product in San Francisco, The El Dorado Mills whose card is printed in our advertising columns. They keep in stock a fresh lot and will sell in lots to suit.

## As a Butcher Sees It.

Paper by Phil Danneily, Lebanon, Mo., read before the Missouri Improved Live Stock Breeders Association at Springfield:

About twenty years ago I engaged in the butcher business, and from that time up to the present time I have always raised, bought and fed my own butcher stock. I commenced to find there was a difference in the amount of beef that I could get from some cattle and the small amount others would net me.

A short time thereafter while I was riding through the country looking for a herd of beef cattle I met a farmer who had a very fine herd to sell. The market price at that time was only 34¢ per pound. After looking the cattle over very closely I decided to give him the price asked. Taking the cattle and butchering them I found that I could well afford to pay him the extra half cent, as his cattle netted me a great deal more than any I had ever handled. They dressed about 10 per cent more than the common cattle which I had been using, or in other words a 1200 pound steer was worth \$6 more than a common steer of the same weight and appearance. We do not buy cattle for what they weigh alive, but for what we think they will weigh dressed.

This experience taught me a lesson and after that I always looked for the better grade of steers. I began to look for those straight legs, broad hips, straight backs and deep flanks. I always had a fancy for nice cattle, always looked for cattle of good color. Once in particular I found that I had a great many more than would be consumed by our home market and decided to ship a load to the St. Louis market. After my cattle had arrived at the yards I noticed the buyers did not take hold very well; they would look at my stock and pass it by. I asked the cattle salesman who had charge of my stock why it was we were not getting any bids. He informed me that most of my cattle were southwest cattle and that they did not sell as well or bring as good prices as native cattle on the market. I informed him that part of my cattle were as good as any native cattle. He said they were and that he could pick out part of my cattle and get native prices for them.

We divided the cattle in two lots. I noticed that in picking the cattle he put all the reds and roans in one lot and the others in another lot. He sold the best bunch at 5 cents per pound or at the same price of the native steers. The other cattle, same age and about the same weight, sold for \$3.10 per hundred or \$1.90 per hundred less. It was the difference in breeding. Now these off colored cattle ate as much and cost the farmer as much as the cattle that sold for \$1.90 more. The lesson is plain. The modern farmer has on his farm improved stock; he keeps his cattle until they will weigh about 1300 pounds and sells them at an average of 5 cents per pound, thus netting \$65 per head. The old style farmer will keep his cattle until they will weigh about the same weight, but as a rule will sell them for \$3.10 or about \$25 less per head.

## Wonderful Clover of Egypt.

Seeds of a wonderful plant called "berseem" have been brought to this country from Egypt by the Department of Agriculture, and efforts will probably be made to introduce it in regions of the United States to which it is adapted. It is otherwise known as "Egyptian clover," being nearly related to ordinary clover.

Berseem is likely to be especially valuable to the irrigated and orchard lands of California and Texas, and it is thought that the Colorado desert, with its rich soil and abundance of water obtainable by irrigation, would furnish an ideal place for a trial of the plant. Its yield of seed is much heavier than that of clover, and it develops at a marvelous rate, outgrowing most weeds and actually killing out the

latter, reports the *Saturday Evening Post*. Dr. David Fairchild, agricultural explorer of the Department, says that while Egypt's great money making crop is cotton, the foundation of her prosperity rests upon berseem.

Dr. Fairchild says that there are few countries in the world to-day where agriculture pays better than it does in Egypt, though the methods of plowing and seeding practiced by the people have scarcely changed at all in thirty centuries.

A million acres of berseem is grown in the Valley of the Nile, where it affords a conspicuous feature of the most beautiful crop checker-board to be seen anywhere on earth. Its white flowering heads present a lovely spectacle when adorning extensive areas, and one learns that not only farm animals but the Fellaheen themselves eat it.

Though the origin of the plant is unknown, it seems to have been introduced into Egypt in comparatively recent times, no representation of it being found on any of the ancient monuments. To-day all the cattle are fed on it, as well as the camels and donkeys, and in the cities every cabman has a sack of it under his feet with which to feed his horse. In early morning all the avenues leading to the City of Cairo are lined with long files of camels and asses, half hidden under their loads of the green forage.

The hollow stems of the berseem are very succulent, and the whole plant is decidedly more delicate than either clover or alfalfa. Once introduced into the United States, it would probably be a great success, in some regions of the country at all events, and would prove an important addition to our agricultural products.

A salesman in looking over a stock-yard where several thousand cattle were penned said: "It's strange that people won't learn. There are few cattle in that whole number that show any evidence of careful breeding, and yet they come from a territory that has had a chance to use good blood for years." It is strange indeed that when every other industry in the land is looking for the most economical and profitable methods farmers neglect the great economy and profit of improved blood.—*National Stockman*.

It is claimed by the German dairymen that the quantity of milk is increased one pound per day by having the cows drink warm water. They claim that a cow will drink 73 pounds of warm water and 63 pounds of cold water. They, however, found that from the cows drinking warm water, the milk had no increase of solids although they ate about a pound more food daily, which means that the milk from the cows that drank warm water had a greater per cent of water in it than did the milk of cows drinking cold water.

## High Class Roadsters For Sale.

**YELLOW JACKET 2:20 1-2**, pacing (only beaten a head in 2:12). The handsomest roadster in California. Chestnut with flaxen mane and tail, and a perfect horse. Fine driver, sound, kind and gentle; has been driven by a lady. Get his fellow and he will attract attention on the park roads or speedway.

**Double-gaited Grey Gelding** excellent road horse, single or double; sound, fast and a great weight puller. Never trained, but paced a mile in 2:27, last quarter in 34 seconds. A good prospect for the track, and a high class roadster anywhere. For prices and particulars address

A. B. RODMAN, Woodland, Cal.

## THE HIGHLY BRED STALLION

Full Brother to John A. McKerron 2:05 1-4.

NEAREST 35562, Rec. 2:22 1-2.

Sire of ALONE (4) 2:09 1-4.

Jepsen Sons & Kraft  
MAKERS  
HARNESS

FOR THE  
ROAD  
TRACK  
CARRIAGE

Horse Boots  
Riding Saddles

We carry a full line of popular Horse Remedies and all stable requisites  
Agents for Power Clippers and Campbell's Horse Foot Remedy.

Inspect our new store.

1145-47 Market Street

Phone: South 1032.

## FOR SALE.

## 3 CLYDESDALE STALLIONS

**POLLOCK**, 12 years old, and **CLYDEBOY**, 7 years old; both choice breeders. Also **PRINCE S**, 3 years old May 28th. All prize winners, with best of action, color and breeding. Can be seen at the Petaluma Race Track at any time. For further particulars address T. A. NUFER, P. O. Box 63, Petaluma, Cal.

## FOR SALE OR LEASE.

I WILL SELL OR LEASE FOR TWO YEARS a my two-year-old colt **EDWARD B** by **Stam B** 2:11 1/4, first dam by **Dexter Prince**, second dam by **Elect**, third dam thoroughbred. He stands 15 1/2 square on his feet without a blemish and is a bay in color. His carriage is naturally high, stylish; of good conformation with plenty of bone, sinew and muscle. He is a trotter from the word "go," and will make some one a racehorse. For particulars address

D. S. MATTHEWS, Ryde, Cal.

## JACKS FOR SALE.

3 YOUNG, BLACK, MONMOUTH JACKS, 2, 3 and 5 years old. From the best Kentucky and Missouri stock. Speak quick if you want to buy. Stock can be seen at Hanford. Address

Phone: Red 205.

JAS. W. MCCORD,  
Hanford, Cal.

## RACING

EVERY WEEK DAY  
RAIN OR SHINE.

New California Jockey Club

## INGLESIDE TRACK

SIX OR MORE RACES DAILY

RACES START AT 2 P. M. SHARP.

Reached by street cars from any part of the city. Trains leave Third and Townsend streets at 12:45 and 1:15 p. m., and leave the track immediately after the last race.

THOMAS H. WILLIAMS, President.  
PERCY W. TREAT, Secretary.

## COCOANUT OIL CAKE

THE BEST FEED FOR  
STOCK, CHICKENS AND PIGS

FOR SALE IN LOTS TO SUIT BY

EL DORADO LINSEED OIL WORKS CO.  
208 California Street, San Francisco, Cal.

THE FIRST  
AUCTION SALE OF TROTTING STOCK

TO BE HELD THIS YEAR AT THE

ACCIDENTAL  
HORSE EXCHANGE

246 THIRD ST., near Folsom,

WILL TAKE PLACE NEXT

Tuesday, Feb. 10, 1903

(Postponed from last Thursday on account of illness of Mr. Layng)

COMMENCING AT 11:30 A. M.

CONSISTING OF

Sons and daughters of Oro Wilkes 2:11, Director 2:17, Arthur Wilkes 2:28, Arranax 19027, Meredith 1368, Ingersoll 4624, Alexis 2:18, Washika Chief, etc. Finely broken Trotters and Pacers, besides a number of all-purpose horses. Some mares by Osito 2:13 in foal to Alta Vela 2:11 1/2, etc. A number of Buggies, Surreys, Harnesses, etc.

Catalogues ready. Horses can be seen February 8th at yard.

WM. G. LAYNG, Live Stock Auctioneer.

## THE HIGHLY BRED STALLION

Full Brother to John A. McKerron 2:05 1-4.

## NEAREST 35562 RECORD

2:22 1-2

(Formerly WILKES DIRECT)

Sire of ALONE (4) 2:09 1-4 and the Only 8-year-old Stallion with One with a Record below 2:10.

By **NUTWOOD WILKES** 2:16 1/4, sire of John A. McKerron 2:05 1/4, Who Is It 2:10 1/4, Stanton Wilkes 2:10 1/4, Claudius 2:13 1/4, George B 2:12 1/4, Bob Ingersoll 2:14 1/4 and 16 other standard performers

Dam **INGAR** (dam of John A. McKerron 2:05 1/4, Nearest 2:22 1/4 and Thursday 2:24) by the old champion Director 2:17, sire of Director 2:05 1/4, Direct 2:05 1/4, Direction 2:10 1/4, Evangeline 2:11 1/4, Margaret S. 2:12 1/4 and others; second dam **Annie Titus** (dam of Ann e C 2:25) by Echo #2, sire of Echora 2:23 1/4 (dam of Direct 2:05 1/4) and 16 others in list; third dam **Tiffany** mare (dam of Ibratlar 2:23 1/4, sire of Our Dick 2:10 1/4, Homestake 2:14 1/4 and others) by Owen Dale, son of Williamson's Belmont.

**NEAREST** is a Dark Bay, 15 1/2 hands and weighs 1700 pounds; well formed and of kind disposition. Will make the Season of 1903 at the Stables of T. W. BARSTOW on the Alameda Avenue

Near Race Track, San Jose, Cal.

FROM FEBRUARY 1st TO JUNE 1st.

TERMS, - \$40 THE SEASON.

Good pasturage \$3 per month. No wire fencing. Every care taken to prevent accidents or escapes, but no responsibility should any occur. Address

T. W. BARSTOW,  
SAN JOSE, CAL.

Telephone No.: West 141.

## Bitter Milk.

A bitter condition in milk may be induced by a variety of causes, but true fermentations that produce bitter products are the result mainly of bacterial action, says Dr. H. L. Russel of the Wisconsin experiment station. This type of fermentation is caused by widely different bacteria. The writer has isolated a pure acid organism, one that soured milk without the production of any gaseous product, and yet milk impregnated with this organism developed a taste as bitter as gall. Many of the digestive or peptonizing fermentations develop bitter flavors. Where butyric acid is formed in milk a bitter taste is often noticed.

In heated milk especially bitter flavors frequently occur. This condition arises from the fact that the heating process destroys the normal lactic acid bacteria and as these bitter ferment germs are usually spore bearing organisms they are able to resist the heating process. Bitter milk or cream is sometimes noted in the winter. Some of the bacteria that are able to form bitter substances can grow at considerably lower temperature than the ordinary sour milk forms, and so, if milk is kept where it is near the freezing point, these bitter forming species develop more rapidly than the lactic species, thus giving the peculiar flavor to the milk, unless it is too pronounced, disappears when the product is made up into butter or cheese.

## Poultry on a Dairy Farm.

The dairyman who sells his butter fat to a creamery is in the best possible position to make a flock of poultry profitable. There is nothing that is good to increase the flow of milk which is not also good to increase the production of eggs. This is true of clover hay, for the shattered leaves and heads make an excellent poultry feed in winter, taking the place of grass and other green feeds. Wheat, middlings, oats and corn are all grains that are good for poultry, while a mess of finely chopped silage is as greatly relished by a flock of hens as it is by a herd of cows. Then, too, the cows themselves furnish one of the best feeds for laying hens. This is milk, which is a valuable egg food in any form. The Missouri experiment station says in discussing profitable ways of disposing of skim milk:

"Another way of disposing of the surplus skim milk with profit is to feed it to the poultry. As a feed for poultry it furnishes the material for making growth in a palatable, easily digested form. For this reason it is easily valuable as an addition to the grain ration, which is liable to lack in the materials to make growth."

I have never found anything that would hold up the flow of milk in the late fall and early winter in the line of roots that would equal the turnip, but they must be handled with much care or they certainly will taint the milk. They must be fed immediately after milking and must not be housed in or near the stable, and the root cutter should be in some adjoining building and only as many taken in at a time as will be eaten up clean.—*Dairy and Creamery.*

Every feature connected with the **PALACE HOTEL** was designed and introduced for a double purpose—surrounding guests with comforts, conveniences and entertainment, and adding to the popularity and reputation of

### California's Colossal Caravansary.

In the center of the hotel is the famous court and off of this are the equally famous grill rooms. For your convenience telephone and telegraph offices, writing and reading rooms, barber shop, billiard parlor, carriage office, news stand and typewriter offices are directly off the court. Outside—the wholesale and shopping district, theaters, clubs, banks and railroad offices are a step from the entrance

## FOR SALE.

### Three Standard-Bred Trotting Stallions WILKES STOCK.

**One Seal Brown**, 16 hands, foaled May 2, 1895; first dam Fearless by Fallis 4781 (record 2:23); second dam Jean Perault by Signal 3:27.  
**One Golden Bay**, 16.1 hands, foaled March 5, 1898; first dam Signal by Del Sur 1098 (record 2:24); dam of Guy Sino 2:29; second dam Lady Signal by Signal 3:27.  
**One Brown**, white points, 16.1 hands, foaled April, 1898; full brother to the bay.

These colts are all sired by Prince Airlee 38045, son of Guy Wilkes 2807 (record 2:15.4), and bred by Wm Corbett, San Mateo, Cal. They are pure gaited and show wonderful speed for the little work they have done.

## CURES

DISTEMPER, INFLUENZA,  
PINK EYE, EPIZOOTIC,  
CATARRHAL FEVER.

Prevents these diseases, no matter how horses are exposed to them. Heaves, Bad Throats, Chronic Coughs, Catarrh, Laryngitis, etc., are effects of Distemper. SPOHN'S CURE will cure any or all such if case can be cured. Distemper, etc., are caused by bacteria or germs that get into the horse's system. They attack the glands, and millions of their dead bodies must be expelled to cure a horse. SPOHN'S CURE is guaranteed never to fail, or your money back. It is used by so many racing stables, stock farms and other handlers that we need not mention any names. You want FACTS, not names. Just what we are giving. ONE SIXCENT BOTTLE TO CURE ONE CASE. This is the guarantee. Send for our 32-page booklet, "Distemper," free. All Druggists.

## WASHINGTON JOCKEY CLUB OF THE DISTRICT OF COLUMBIA.

Race Course and Office during Race Meetings, Bennings, D. C.

Office in New York, Room 201, 571 Fifth Ave., "The Windsor Arcade."

STAKES TO CLOSE TUESDAY, FEBRUARY 10, 1903.

## SPRING AND AUTUMN MEETINGS, 1903, AND AUTUMN MEETING, 1904.

Spring Meeting 1903, begins Monday, March 23d, to include Tuesday, April 14th—20 days

The Handicaps—The Consolation, The Dixie, The Vestal—as below, will close and name at midnight of Tuesday, February 10, 1903.

### The Bennings Spring Handicaps.

To be run on the first and last days of the Spring Meeting.

Handicaps for three-year-olds and upward. By subscription of \$10 each, which shall entitle the entry to start in the First and Second Handicaps, on payment of the additional starting fee of \$20 in each. To close and name at midnight of Tuesday, February 10, 1903, (the second Tuesday in February). Weights to be announced March 4, 1903.

CONDITIONS OF THE FIRST BENNINGS SPRING HANDICAP. Starters to pay \$30 additional, with \$1000 added, of which \$200 to the second, \$100 to the third. The winner to receive one-half of the subscription money, all of the starting money, and the balance of the added money, \$740.

Winners after the publication of the weights to carry 3 lbs. extra; of two races of any value, or one of the value of \$1000, 5 lbs. extra; of three of any value or one of the value of \$1500, 8 lbs. extra. In case of horses handicapped at 118 lbs. or over, these penalties shall apply to the extent of one-half only. Six furlongs.

CONDITIONS OF THE SECOND BENNINGS SPRING HANDICAP. Starters to pay \$30 additional, with \$1500 added, of which \$250 to the second, \$150 to the third. The winner to receive the remaining one-half of the subscription money, all of the starting money, and the balance of the added money, \$1140.

Winners after the publication of the weights of a race of any value, to carry 3 lbs. extra; of two races of any value, or one of the value of \$1000, 5 lbs. extra; of three races of any value, or one of the value of \$1500, 8 lbs. extra. In case of horses handicapped at 118 lbs. or over, these penalties shall apply to the extent of one-half only, except for the winner of the First Handicap, which shall carry 10 lbs. more than he carried in that race. Seven furlongs.

### AUTUMN MEETING, 1903.

THE GRAND CONSOLATION—\$3000 Added.

THE GRAND CONSOLATION, for two-year-olds, foals of 1901. Non-winners of \$10,000 at time of starting. To close and name February 10, 1903.

### NOTICE.

Entries for the above are received only and under the conditions as printed, and in all respect subject to and in accordance with the rules of The Jockey Club and Washington Jockey Club. For Entry Blanks address the BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco, Cal.

## Books for Stallion Owners.

### 1. HOOVER'S STALLION SERVICE RECORD.

The most complete book for recording stallion service ever placed before breeders. Not a pocket edition. No more disputing of sires. No more mixing of dams where this book is used. There is space for entering 100 mares, giving their full breeding description, dates of service, dates of foaling, with a page for tabulating pedigree of stallion in use, etc., etc., with index complete; size 10x7. Each book is handsomely and substantially bound. Can be used for any kind of pedigreed stock.....\$2.00

### 2. THE STANDARD STALLION SERVICE BOOK.

The nearest Service Book published, containing space for entering 100 mares, giving space for full description, pedigree, dates of services and refusals, date of foaling, etc., with index complete, neatly bound in leatherette, suitable for pocket use. Can be used for any kind of pedigreed stock.....\$1.00

### 3. BREEDER'S NOTE AND CERTIFICATE BOOK

AND STALLION SERVICE BOOK COMBINED.

This book contains 75 blank certificates to be given to owners of mares, certifying that said mare has been bred to a certain stallion. Also 75 notes suitable for owner of mare giving to owner of stallion on account of stallion service fee. This book is well bound, and makes a book like No. 2, after certificates and notes have been removed. Can be used for any kind of pedigreed stock.....\$1.00

Sent by mail prepaid on receipt of price.

**BREEDER AND SPORTSMAN,  
San Francisco, Cal.**

## KENDALL'S SPAVIN CURE

There is no use taking chances on a lump. You can never tell what it may develop. If you have a supply of "Kendall's" on hand you are safe from Spavin, Ringbone, Splints, Curb and all forms of

Lameness. The U. S. Army knows good things and buys only the best. Experience of a Government Teamster.

On sale at all druggists. Price \$1.16 six bottles for \$5. Unequaled liniment for family use. Book "A Treatise on the Horse," mailed free. Address **DR. B. J. KENDALL CO., Enosburg Falls, Vt.**

## MANHATTAN STOCK FOOD.

Awarded Gold Medal At California State Fair 1892. Every horse owner who values his stock should constantly have a supply of it on hand. It improves and keeps stock in the pink of condition.

Manhattan Food Co.

Harness Horses**

WALTER SEALY, Manager.

THE BARON WILKESSES WON 25 PER CENT OF ALL  
THE MONEY ON THE GRAND CIRCUIT OF 1902.

**BARONDALE 2:11 1/4** Reg. No. 20,189.

IS A SON OF BARON WILKES 2:18.

His first dam, Nuttall, produced Barondale 2:11 1/4 and Grand Baron 2:12 1/4 and is by NUTWOOD.  
His second dam, B. is the dam of Patron 2:14 1/4, Prodigious 2:16, Patronage and Pangloss, all great sires, and is by Cuyler.  
His third dam, Mary Mambrino is the dam of Elvira 2:18 1/2, the producing sire Dunraven, and dams of P. de Leon 2:13 and four others.  
BARONDALE has two new ones in the list this year and is now the sire of four in the list.

Where Can You Beat This Breeding?

**Season of 1903 at SAN JOSE RACE TRACK.**

Terms, \$50 for the season, with usual return privileges.

**STAM B. 2:11 1-4** { 3-YEAR-OLD RECORD, 2:15 1-2  
(Timed second in 2:12 1/4)  
4-YEAR-OLD RECORD, 2:11 1-4  
(Timed second in 2:09 1/2, 2:09)  
2-YEAR-OLD TRIAL, 2:26

(TROTTING.)

REG. NO. 23444.

Early speed is natural speed, and natural speed is inherited speed.  
Reach for the top by breeding a good mare to STAM B.

Your chances are good for a 2:12 trotter or a Futurity winner, extra good for a handsome show or coach horse. It is a well-known fact that Baron Wilkes 2:18 has been recognized for years as the leading money winning sire, and his blood and the blood of STAM B. is among the leading early speed performers, so much so that that well informed and successful breeder, the late Col. R. G. Stoner contemplated purchasing STAM B. as stud companion for Oakland Baron 2:09 1/2. Such blood produced Rytmar 2:08, Baron Deshay 2:08 1/2, Gail Hamilton (3-year-old) 2:11 1/4, Peter Stirling (3-year-old) 2:11 1/4. By tabulating STAM B.'s pedigree, it is impossible to do so without figuring in all the champion performers' records—1:59 1/4, 2:01 1/4, 2:01 1/4, pacing; 2:02 1/4, 2:03 1/4, 2:03 1/4, 2:04, trotting—and the once champions of the show ring, Stamboul 2:07 1/4, Mambrino King and Almont Lightning, and such young Futurity performers as Champion Girl 2:12, Bugle (3-year-old) 2:14, Oxford Boy (3-year-old) 2:20, Wigwag (2-year-old) 2:19 1/4, sire of Katherine A. (2-year-old) 2:14, Hilgar (2-year-old) 2:15 1/4, Wigwag (3-year-old) 2:16 1/4.

STAM B. was sired by Stamboul 2:07 1/4, sire of 47 from 2:10 1/4 to 2:30, sons and daughters (24 from 2:17 1/2 to 2:30), showing that his blood breeds on and down. With his few foals, he compares favorably with the leading sires of the past. First dam Belle Medium 2:30 (dam of 3 from 2:11 1/4 to 2:30) by Happy Medium, sire of Nancy Hanks 2:04; 55 of his sons produced 282 from 2:07 1/4 to 2:30; 58 daughters produced 78 from 2:10 to 2:30, including Admiral Dewey (3-year-old) 2:15. Second dam Argenta (dam of 1 in 2:30) by Almont Lightning, sire of 1 in the list and dams of Zombro (3-year-old) 2:11 and King Princeps 2:15 by Almont 33. Third dam Mary Adams by Mambrino Patchen, sire of dams of Guy Wilkes 2:13 1/4, Baron Wilkes 2:18, Patchen Wilkes 2:20, etc. etc. Fourth dam Mambrino Belle by Mambrino Chief II, sire of Lady Thorne 2:18 1/4 and dams of Director 2:17, sire of Directum (4-year-old) 2:05 1/4, Onward 2:25 1/4, sire of Beuzetta (4-year-old) 2:06 1/4. Fifth dam by Mason's Whip (thoroughbred).

Can it be possible that the service of such a bred stallion can be secured for such a low fee? Yes, for this season only. Grasp such a rare opportunity! STAM B. has the characteristic of transmitting speed, soundness, size and style, as his ancestors have size, soundness, speed and style. He is a handsome bay, two white hind ankles, 15 1/2 inches high, weight 1080 lbs., a typical Morgan in form, of the greatest stamina and of powerful muscular development. As a living, game racehorse he is known nationally. In his career he beat such noted trotters as Klamath 2:07, Kentucky Union 2:07 1/4, Torgles 2:08 1/4, Altan 2:09 1/4, Jasper Ayers 2:09 1/4, Monterey 2:09 1/4, Zombro 2:11 and Stamboulletta 2:10 1/4. STAM B. 23445 (2:11 1/4) will make the season of 1903 at that well-appointed farm,

SANTA RITA FARM, PLEASANTON, CAL.

**Terms \$40 SPOT CASH**, at time of service. Best of care taken of mares and foals, but no responsibility for accidents or escapes. The public is cordially invited to attend our receptions at all times from February 15th to June 1st and see our gems.  
For extended pedigree and further particulars address

SAMUEL GAMBLE, Pleasanton, Cal.

**Pedigrees Tabulated** and type written ready for framing  
Write for prices. BREEDER AND SPORTSMAN, 36 Geary street, San Francisco, Cal.

## SEARCHLIGHT 2:03 1/4

THE FASTEST STALLION BY THE RECORDS EVER  
OFFERED FOR SERVICE ON THE PACIFIC COAST.

He still holds the World's Records for 4-year-old (2:04 1/2) and for 5-year-old (2:03 1/4).

SEARCHLIGHT is one of the fastest and gamest horses that ever raced on the Grand Circuit. He is a horse of rare individuality and is one of the most perfect specimens of horseflesh ever foaled. He has repeatedly beaten one minute to the half-mile pole in his work, and has pulled the heavy cart in which he now takes his exercise a half in 58 seconds with a dozen watches held on him.

Few stallions that ever stood for service in California have such royal blood lines. Darknight, the sire of SEARCHLIGHT, was like the great McKinney, a son of Alecyone, and is a sire of extreme speed, having four 2:10 performers to his credit. The dam of SEARCHLIGHT is one of the great brood mares, having four with standard records and his grandam and great grandam are both in the great brood mare list. His oldest colts, now two years old, show that he imparts these qualities to his get, and he is certain to be a producer of early and extreme speed as well as size and good looks.

**Terms for the Season, \$75.**

**LECCO 2:09 3/4** The Blood that produced Dan Patch 1:59 1/2

LECCO 2:09 3/4 is a very handsome black stallion, a square trotter and as game a racehorse as ever looked through a bridle. He is by Bonnie Boy, one of the best producing sons of Patchen Wilkes, sire of the great Joe Patchen 2:01 1/4, that in turn is the sire of the unbeaten Dan Patch 1:59 1/2. The dam of LECCO is a great brood mare by Homer, and his second dam is a producing mare by Rochester and his third dam is a producing mare by Clark Chief. For four generations in the pedigree of LECCO there is not a sire or dam but is a producer of standard speed.

LECCO made a campaign through the Grand Circuit in 1899 that shows his wonderful speed and gameness. He met the best horses out that year and in seven starts won four first moneys, two seconds and was but once unplaced. His action is perfect and he cannot help siring a family of high class, handsome, fast and game trotters.

**\$50 for the Season.**

The above horses will stand at the PLEASANTON RACE TRACK, and all mares not proving with foal may be returned free next year, or in case the horse is not in California the service fee will be returned. It is the intention of the owner however, to keep both SEARCHLIGHT and LECCO in this State for the next four or five years. Due care taken to prevent accidents or escapes, but no responsibility assumed should any occur. Good pasturage provided at \$4 per month, and all bills payable before mare is removed from my possession.

For further particulars and tabulated pedigrees address

EDW. MILLS, Rose Hotel, Pleasanton, Cal.

**NUSHAGAK**

Sire of

ARISTO (3) 2:17 1/2 winner of Occident and Stanford Stakes, 1902

MAJELLA B. (2) 2:29 Trial (4) 2:13 1/2

THE BOQUET Trial (3) 2:21 in 1902

Brown Filly Trial 2:20 1/2 as a 4-year-old in 1902

Reg. No. 25939

Black Horse 15-2 1/2 hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15 1/4, Sabina 2:15 1/4, Sabledale (at 2 years) 2:18 1/2, Buntington (at 2 years) 2:20 1/4, and 36 others in 2:30 list. Dam, Fidella (trial 2:55 at 2 years), dam of Fidette 2:28 1/2, dam of Mary Celeste (at 2 years) 2:17 1/2, by Director, sire of Directum 2:05 1/4, Direct 2:05 1/4, Nathan Straus 2:05 1/4, Direction 2:08 1/4, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H. 2:12 1/4, etc. Third dam by Lancet, son of McCracken's Blackhawk 1897.

NUSHAGAK's sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro Wilkes 2:11 was one of the gamest colts that ever raced down the Grand Circuit. The Wilkes and Director blood is a successful cross as it has produced John A. McKerron 2:15 1/4, Nathan Straus 2:05 1/4, Ozanam 2:08, Dollade Wilkes 2:10 1/4, Oro Wilkes 2:11, Evangeline 2:12 1/4, Mary Celeste (at 2 years) 2:17 1/2, etc. Fidella, NUSHAGAK's dam, is in the great broodmare list and she would have been a very fast trotter if given an opportunity, as with very little training she trotted a mile in 2:35 as a two-year-old. Mr. Corbett purchased her from Mr. Goldsmith for a broodmare, consequently her training was discontinued. The get of Reavis' Blackbird, the sire of NUSHAGAK's second dam, were noted for their remarkable gameness and vigorous constitutions. His two noted daughters, Mamie Griffin 2:12 and Vic H. 2:12 1/4, were exceedingly game. NUSHAGAK has only not eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17 1/2, Majella B. (2) 2:29 (trial at 4 years 2:13 1/2), and The Boquet (trial at 3 years) 2:21. His other colts that have been handled some are: Brown filly, 4 years old in 1902, showed trial of 2:30 1/2 with three and one-half months' work; big 3 years old in 1902, with three months' handling showed mile in 2:35 1/2, last quarter in 31 1/2 seconds. His son Aristo (at 3 years) 2:17 1/2 took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake. Before taking sick we felt confident that Aristo would trot a mile close to 2:10 in his three-year-old form; the way he raced after being sick made us feel satisfied that we had made no mistake in our estimate of him. His third heat in 2:17 1/2 was equal to 2:13 1/2 or 2:14 over the Woodland, Santa Rosa or Stockton tracks.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

**Limited to 40 outside mares, at \$50 the Season,**

with usual return privilege if mare proves not with foal. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed should any occur. First-class pasturage for mares, \$3 per month; no barbed wire. Address

WALNUT GROVE STOCK FARM,  
Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morhead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

# "SAVE-THE-HORSE"

—TRADE MARK—

## SPAVIN CURE.

Need one wonder why our written guarantee, which accompanies every bottle, was constructed so it is equivalent to a bond?

R. W. CHAPIN, Manager,  
ROBERT ELLINGSWORTH, Supt.

LOUIS BACHMANN,  
463 Broome St., New York

ELIZABETH WAGON WORKS,  
B. F. STRAUSS, Prop'r.

35-41 South Spring Street,  
ELIZABETH N. J.

Troy Chemical Co., Troy, N. Y.  
Gentlemen:—With three bottles of "Save-the-Horse" I removed a thoroughpin on one leg and cured a spavin on the other leg on one of my horses. I appreciate what "Save-the-Horse" has done in my case, and will show the horse to any one who desires to see it. Very truly,  
B. F. STRAUSS, Prop'r.

Horse can be worked with either shin or ankle boots, as no harm can possibly come by either destruction of hair or scalding of the limb. "Save-the-Horse" can be applied in all conditions and extremes of weather—hot or cold.

POSITIVELY AND PERMANENTLY CURES Bone and Bog Spavin, Ringbone, Curb, Thoroughpin, Splint, Capped Hock, Shoe Boli, Weak and Strained Tendons and all Lameness.

Contains no arsenic, corrosive sublimate or other forms of mercury, or any injurious ingredient.

Cures without scar, blemish or loss of hair.

\$5.00 PER BOTTLE.

Written guarantee with every bottle, constructed to convince and protect you fully. The need of second bottle is almost impossible except in rare cases. Guarantee covers effectiveness of one bottle.

Copy of guarantee sent upon application

\$5.00, all druggists and dealers, or sent prepaid.

Troy Chemical Co., Troy, N. Y.

Also manufacturers of Veterinary Pixine.

D. E. NEWELL, Pacific Coast Agent,  
519 MISSION ST., SAN FRANCISCO.

## The Northboro Woolen Mills.

Chapinville, Mass., Nov. 21, 1902.

Railroad Station Telegraph and Express Offices Northboro, Mass.

Troy Chemical Co., Troy, N. Y.:  
Gentlemen:—I purchased several bottles of "Save-the-Horse" Spavin Cure for myself and friends during the last four months. The first case on which I used it was a bad splint, and to my astonishment it not only took out the soreness but removed the splint.

Second case—My brother-in-law had a valuable mare with a bone spavin, and at my suggestion he tried "Save-the-Horse." In this case the bone was not entirely removed, but all the soreness and lameness is gone, and the mare travels as sound as a colt.

Third case—I tried it on the well-known black pacer "Alhambra," record 2:08½, sired by "Legal Tender, Jr." This horse was lame when I purchased him, with a strained tendon on high hind leg. I tried all kinds of liniment before using yours; yours at \$5 per bottle seemed a pretty high price; but I had to come to it, as none of the other liniments had done any good. I used one and a half bottles of "Save-the-Horse," and he seems to be entirely cured. I have him out every day and hardly ever take a ride but he gets one or two brushes before getting home. All I can say is that "Save-the-Horse" has done splendid for me, and I know of nothing its equal. Very truly,

R. W. Chapin

## Iran Alto 2:12½

Sire of Dr. Frasse 2:12½  
Thomas R.....2:15  
Vendome.....2:18½  
Dr. Frasse's Sister, 2:25½

By PALO ALTO 2:08½ (world's stallion record to high-wheel sulky), sire of IRAN ALTO 2:12½, Pasante (4) 2:13, Palita 2:16, Rio Alto 2:16, Palatine 2:18, and 11 others in 2:30 list.

Dam ELAINE 2:20 (world's 3 and 4 year old record in 1877 and 1878), dam of Norlaine, yearling record 2:31½, and of 3 in 2:30 list, and the dams of 6 in 2:30 list.

Second dam GREEN MOUNTAIN MAID dam of Electioneer 125 (one of the world's greatest sires), 9 in 2:30 list; sons produced over 300 standard performers.

IRAN ALTO 2:12½ is not only royally bred, but has proven himself a racehorse and a sire of speed. He is a splendid individual and has all the most desirable qualifications for a great stallion. Breed to him and you will get the kind of colts you are looking for.

Will Make the Season, 1903, at his home

## THE VENDOME STOCK FARM, SAN JOSE.

Fee \$50. Usual return privilege. Good pasturage and mares well cared for. For Tabulated Pedigree address

JAMES W. REA, San Jose, Cal.

Breed for Size, Disposition, Style and Speed.

## SECRETARY

Son of the great Director and a mare by Volunteer,  
Will make the Season of 1903

AT ALAMEDA.

SECRETARY is a black horse, 16 hands high, a model of symmetry and conformation. His disposition is perfect and he can show as much natural speed as any trotting stallion in California. He sires speed, quality, substance and splendid dispositions, and his produce are always in demand.

FEE \$40 THE SEASON.

For card containing tabulated pedigree and other information address

ELIAS WILLIAMS,

Cor Union Street and Speedway, Alameda, Cal.

## BAYSWATER WILKES 2:25½

Son of Sable Wilkes 2:18  
and Fanny Bayswater  
Dam of 2 in 2:30

Sire of KELLY BRIGGS 2:10½

WILL MAKE THE SEASON OF 1903 AT

## WINTERS, YOLO CO., CAL. FEE \$40.

BAYSWATER WILKES is a sire of speed, size, good looks soundness and gameness. The only two year and three year olds of his get to start last year were race winners. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of last year's winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L, holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.

Excellent pasturage for mares \$2.50 per month

For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

## BY MACK

By McKINNEY 2:11 1-4  
Dam BY BY by NUTWOOD.

McKinney 2:11½ (sire of Coney 2:02, You Bet 2:07, Charlie Mac 2:07½, Jennie Mc 2:09, The Roman 2:09½, Hazel Kinney 2:09½, Dr. Book 2:10, 22 in 2:15 list and 50 in 2:30 list); dam By By (own sister to Lockheart 2:08½ and dam of Mureno King 2:24½) by Nutwood 2:10, champion of all sires); granddam Rapidan (dam of Lockheart 2:08½, Rapid 2:22½, Capt. Mac 2:29); great granddam Madam Headley, dam of Export Prince 2:13½.

BY MACK is one of the Best Bred Sons of the Great McKinney.

Terms: \$25 for the Season.

Pasturage \$3 per month. No barbed wire fences. Usual Return Privileges.

GLORIOUS LONNIE,	10	" " " 200

NOTE. If we are given option to buy foal at year old, rebate on each of above \$50.

### A WORD TO BREEDERS.

I believe the set of the above stallions will prove to be amongst the best in the world; that of Ponce de Leon, Dare Devil, and Dreamer (because of speed combined with beauty) for the track and road, or, if not fast enough for track, for carriage and show ring because of beauty combined with action; that of Glorious Red Cloud, Glorious Bonnie and Glorious Lonnie (because of beauty combined with action) for carriage, trap and show ring.

After years of search I selected the above stallions, regardless of expense, because from all information obtainable I concluded they would produce the best of the most desirable class of horses, provided they were given every facility possible, regardless of expense. I have gathered a band of broodmares, each one filling the requirements of the very highest standard—breeding, health, freedom from inherited defect or blemish, beauty, stamina, and speed, and have housed them in the best possible way known to modern science for comfort, health and development—having expended on Dreamwold between a million and a half and two million dollars. Each animal at Dreamwold has the benefit of specially constructed broodmare, stallion, foaling and training stables, driving and training academy and hospital; all under separate roofs, with every protection against fire, including our own fire department of 35 trained members. All buildings are heated

with modern hot-water apparatus which insures uniform heat in all kinds of weather. All stall floors are guttered, drained, and of modern sanitary construction. Each broodmare stall is 14x18, and the buildings are fitted with sleeping and living quarters for men, which insures constant attendance during the twenty-four hours.

The extent and quality of our stable accommodations will be appreciated when it is taken into consideration they cover 2,600 running feet, the buildings devoted to broodmares costing \$942 for each mare, and balance \$860 per horse.

Our animals have the benefit of a modern constructed half-mile track, consisting of an outer racing track, an inner soft track, and the center six-acre grass plot, all drained in twelve foot squares with drain-pipe.

Animals are cared for by a force of 125 men, including managers, trainers, veterinary and experts specially selected for their knowledge of animal health, feeding, training and conditioning.

With these facilities and a determination to develop nothing but perfect get and to race nothing younger than five-year-olds, except in unusual cases, I believe we will in three years, in connection with a bunch of two and three-year-old Ponce de Leons we now own and the fifty and odd young Dare Devils in the hands of Messrs. Hamlin and others make the names of our stallions, particularly Ponce de Leon and Dare Devil, famous

wherever a beautiful, speedy and perfect horse is desired, or known.

An idea may be had of the scarcity of good horses when I say I have for the past two years been endeavoring to get together a band of 125 broodmares to meet our standard, and have, so far, although willing to pay any reasonable price, only been able to purchase less than 50. In the past year we have only been able to find one, Expectation, the dam of Major Delmar, that would meet our requirements.

We have limited the service of Ponce de Leon and Dare Devil to 50 mares each, and as we have not sufficient of our own, we will book 20 to each, and would urge those who are desirous of making their mares with these stallions to do so this season, for when our own band has been filled, they will be withdrawn from public service.

As I am very desirous of giving our wonderfully beautiful and speedy Dreamer and Dreamwold Oxford Boy an opportunity to cover a few of the very best mares, and as we have but 3 to spare to Dreamer and 2 to Dreamwold Oxford Boy we will give their services free to 10 and 5 mares which we will approve. They must be very well bred, free from defects, beautiful individuals, with inherited speed. Bear in mind, if Dreamer's services were for sale, the price would be \$20, as he is, in our opinion, the best son of Oakland Baron, Dreamer's

three-year-old record in a six-heat race being 2:14, at the same time being the champion show ring horse, and the same with Dreamwold Oxford Boy, who is unbeaten in the show ring, winning first in his one, two and three-year-old forms and being the champion two-year-old trotter and Kentucky Futurity winner in 1901.

would impress upon those desiring the services of our stallions that if they are after speed alone they may do as well, but I do not believe there is the equal of Ponce de Leon or Dare Devil when speed, beauty, and carriage-horse getting qualities are taken into consideration. The get of these stallions that are not good enough for the track make the best show-ring carriage horses, and the day is now here when an ideal carriage horse will bring more money on the average than even the best race horses. Breeders will pardon me when I say I speak by the card having in my stables over thirty show horses, exclusive of combined show and racing horses, that have cost an average of over \$3000 apiece, and twelve show horses, exclusive of race horses, costing an average of \$5000 apiece, and that I have more than three times as many ribbon winners as have ever been in one stable including four champions (different years) of the National Show: Glorious Blucher, 1898; Glorious Red Cloud, 1899; Glorious Lady Algy, 1900, and Glorious Flying Cloud, 1901.

### A POINTER FOR BREEDERS.

It is only a phenomenal green race horse that will sell for \$3000. I will buy as many perfect (as individuals and trained) green four or five year old carriage or trap trotting-bred horses as are offered me at \$3000 each.

MORE WILL BE HEARD FROM THE GET OF OTHER STALLIONS DURING THIS AND POSSIBLY NEXT YEAR THAN FROM THOSE OF PONCE DE LEON AND DARE DEVIL, BUT IN THE NEXT FIVE YEARS I BELIEVE PONCE DE LEON AND DARE DEVIL WILL "BE THE RAGE," BUT IT WILL THEN BE TOO LATE TO BREED TO THEM.

## Dreamwold, The Farm of Thomas W. Lawson Co Scituate, Mass.

### THE BEST WAGON IN THE WORLD

Entirely Different and away ahead of any other wagon ever made. It is easier to pull and faster than a sulky. Thoroughly practical, handsome and durable.

WEIGHT 48 to 65 Lbs.

### THE BENJAMIN RACING WAGON

### ITS GOOD POINTS.

entirely new. It is absolutely noiseless and positively prevents the axle from swinging. Our Axles are the strongest that can be made and are in a continuous piece. **Wheels.** We make our own wood and wire wheels complete. Our **Ball Bearings** are the best made and are water and dust proof. The **Shafts** are handsome and strong and can be instantly removed. They are steel plated top and bottom, free from bolts in any part of them, and so attached to the wagon they cannot rattle, as they have no springs, catches or traps to get out of order. The cross pieces are steel plated and trussed, making them very light and stiff. The **Whiffletree** is held by our own device and cannot rattle and when desired can be quickly removed. We manufacture truss poles and neck yokes. Our **Truss Poles** are very attractive and are free from braces to bond and rattle. Should any accident happen it cannot snap off like an ordinary pole. The neck yoke presents a handsome appearance, is light and strong, and like the pole cannot snap off. The pole passes through the neck yoke, which holds it securely and carries it several inches higher than an ordinary kind. Tubing is not used on our wagons, as it is unreliable. Send for prices and catalogue.

T. H. SPEDDY, 23 DAVIS STREET, SAN FRANCISCO,  
Sole Agent for the Pacific Coast.

### Grease Heel, Scratches,

**MUD FEVER, HOOF ROT, SPEED  
CRACKS**—Cases where ulcerations extend, with transverse cracks which open at every step and often bleed, no matter how complex, aggravated, deep seated or chronic, if treated according to directions, as given on circular with every box, positively cured with

### Veterinary Pixine

**After Blistering.** Veterinary Pixine is the very best application that could be indicated. It absorbs all inflammatory exudate and hastens the reparatory process. Will heal the most severe cases without scar, and will prevent loss of hair.

**As a Preventive**—If a light application of Veterinary Pixine is used before speeding, driving in wet muddy or slushy weather, or in the snow, your horse will never have speed cracks, scratches or grease heel.

**For Hoofs**—It will keep the hoofs healthy, soft and in perfect form.

**For Old and Chronic Sores, Etc.**—Veterinary Pixine heals collar and saddle galls, hobbles, chafes, abscesses, inflammatory swellings, sores and all skin disease. In cases of emergency it is invaluable.

This penetrating, stimulating, soothing absorbing, antiseptic healing ointment heals from beneath the surface by disinfecting the parts, subduing inflammation and stimulating healthy granulation, not by drying and scabbing.  
2 oz., 25c; 8 oz., 50c, 5-lb pkg., \$4.00.  
At all druggists and dealers or sent prepaid.

## CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.  
IT PENETRATES AND DRIES IN quickly and DOES NOT GUM AND FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth--ALL DRYNESS AND BRITTLENESS quickly disappears.

QUARTER CRACKS AND SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

It PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG--A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES.

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:--Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2 1/2-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

JAS. B. CAMPBELL & CO. Manufacturers, 412 W. Madison St., CHICAGO, ILL.

### QUINN'S OINTMENT FOR HORSES

stands at the head of all veterinary remedies. Such troubles as Spavins, Curbs, Windpuffs, Splints, Bunches have no terrors for a horse if the master keeps and applies Quinn's Ointment. All well known horsemen speak of it in the highest terms:

Miller & Shiley of Franklin, Pa., owners of St. Bel, brother of late Bo. Boy, write, "We have used Quinn's Ointment with great success and believe it fulfills all claimed for it. We cheerfully recommend it to our friends." For Curbs, Splints, Spavins or Bunches it has no equal.

Price \$1.00 per package. Sold by all druggists, or sent by mail.

THE GET-RICH-QUICK CONCERNS, Arnold & Co., Ryan & Co., et als, et als, have, as the darkey expresses it, "done gone busted," and there is a concerted wail going up from the duped stockholders that would make the celebrated wallers of Jerusalem look like broken down selling platers in a group of champion stake horses. Arnold & Co., having the biggest clientage, naturally come in for the most "cussing," but all the others have quite a respectable following so far as numbers are concerned, and a very large proportion are people who never visit a race track and would not know a race from a draft horse. The story told by Arnold & Co. in their advertisement was a lure that was especially devised to catch the people who do not understand either racing or common sense business matters. It caught the same class that bit so ravenously at the celebrated Miller scheme which collapsed so suddenly in New York a few years ago. Arnold & Co. had money, there is no doubt of that. They own several strings of race horses, a big stock farm and are bookmakers besides. They offered to pay two per cent a week on all sums of \$50 and over intrusted to them, and actually did it, but of course every sensible person knows that this was not paid from earnings or winnings but from the original principal, and it was only a question of time when they would be compelled to close up their bucket shops. It has caused quite a flurry among thousands of poor dupes who have lost their hard earned savings, and they have probably learned a lesson that will prevent them being duped in the future, but as Barnum once truthfully remarked, "There is a sucker born every minute," and other schemes of the same kind will catch the future crops of those who desire to make a fortune out of a little money in a short time without muscle or brain.

SAM GAMBLE left this week for Pleasanton to be ready to receive Stam B. 2:11¼, when that handsome and royally bred stallion arrives at the horse centre to-day.

THE COLORADO CIRCUIT which hangs up \$75,000 in purses for five weeks racing at the tracks at Trinidad, Pueblo, Colorado Springs and Denver, opening at the first named point June 1st, and closing July 4th at Denver, presents its advertisement in this issue, giving the list of stakes and purses for the harness horses at each meeting. Colorado has always furnished good racing and a good circuit for the harness horse owners, and this year will probably eclipse all former efforts as the purses are larger and more numerous. Those who race on the Grand Circuit find that it is very convenient to stop off at Colorado on the way over and win a few purses, at the same time giving their horses a little education in actual

racers. May 15th is the date set for closing entries for the Colorado circuit, which gives the owners an opportunity to find out something about their horses before they pay out entrance money on them. A careful perusal of the half page advertisement which will be found in another part of this journal will repay horse owners and trainers.

## Sound Condition of the Breeding Interests.

The recent sales have brought to the surface the fact that the light harness horse interests are again approaching the boom order, and the question very naturally arises, will they again suffer such a relapse as was experienced from 1894 to 1898. The condition that brought about inflated prices in the first instance are not likely to recur again. Everyone then thought that about all that was required was a standard bred horse. At that time the rules governing the standard were so broad gauged that a horse that could trot a mile in 2:30 was able to make all of his brothers and sisters standard also. In other words, tin-cup records were responsible for half the troubles that came about. The country became flooded with a lot of stuff that was hardly fit to plow corn, to say nothing of posing as trotters or pacers. Another of the evils which aided in bringing about disaster was high stallion fees. There never was a time when any man was justified in paying \$10,000 for a broodmare, and \$500 to \$1000 for a service fee. If business of any kind loses one cent a day it will not be able to continue, and, on the other hand, if it makes the same amount, it can exist.

There is not much danger at the present time of over-doing the thing. Men have learned their lessons, and only the best will do now; then, too, it is probably safe to say that ten men will buy a good horse now for pleasure only, where there was one of this kind ten years ago. The automobile and bicycle have also

## Ruritania and Dainty Daffo will be Bred.

In a letter to the *American Horse Breeder*, Thos. W. Lawson says:

"So much has been printed about my purchase of the beautiful champions in singles and pairs at the last National Show, Ruritania and Dainty Daffo, that is misleading, will you not kindly say I did not buy these exquisite mares for show purposes or road driving, but solely for breeding? Much as I regret the splitting up of such a great pair, they will in April be turned into the pasture at Dreamworld, and thereafter be found only in our band of matrons.

"Is it not a significant straw pointing to the scarcity of good material when one is compelled to withdraw such finished products for broodmare purposes? I am so in need of broodmares that I keep my people going constantly from Boston to California and Maine to Tennessee, through the private breeding farms and all of the public sales, and yet, while I stood ready to pay any reasonable price for anything that would measure to our standard at the sale just closed in New York, there were but four we cared to bid on, and those we bought.

"I really think the *Breeder* can do no better service for breeders generally than to keep constantly dingling into their ears the fact that the country is fairly pining for first class horses, American trotting-bred, and that the pining cannot be satisfied at any price; that is, there is a market at very profitable prices for all the good trotting horses that can be raised, but be sure in your dinging to bear down on the fact that it is good trotting horses that are in demand, for the more one studies the problem the more one becomes impressed with the fact that it is the good trotting horse that is scarce,—the beautiful individual, the physically perfect, well-bred, intelligently trained and broken trotting horse."

Stam B. 2:11 1-4

had much to do in bringing about a condition that makes more people enjoy out-of-door exercise. The bicycle came and it was a fad to ride, but those who were able soon came to see that animated power was the best, and that the horse was the one thing that would serve their purpose. Just now the automobile is having an inning, and in five years from to-day a majority of the wealthy people will be seen riding or driving the noblest of all animals, the horse. The automobile will serve to help work out the problem of keeping up the demand for the trotters and pacers, and it is quite probable that there is little chance for a time to come again when a good horse will not bring a good price.—*Horse World*.

The death of Peter Robinson, the well known California horse trainer, is reported to have occurred at St. Louis, on the 28th of last month. Mr. Robinson was for many years connected with Senator Stanford's Vina Farm, and is the man who discovered Azote was a trotter. He brought out Dr. Leek 2:09½ and Dolador 2:20, besides several others. Mr. Robinson was highly respected by all who knew him.

Chestnut Belle, foaled 1884, by Red Wilkes, dam Mary, by Governor Sprague, is one of the famous brood mares. She has six trotters in 2:24 or better, including three in 2:12 or better. Her roll of honor is Mobel 2:10½, Dartmore 2:11½, Chestnut King 2:12, Slip-away 2:17½, Lady McGregor 2:24 and Chesko 2:12½.

The Cleveland Driving Park Company is the first association to arrange a program of five races a day. In order to do away so far as possible with the laying up of heats, the association has decided to give nothing but two in three heat races at their Grand Circuit meeting this year, and also to increase the number of races from twenty to twenty-five, thus giving five races per day. The secretary has announced the schedule of stakes and purses. The stakes are eight in number of \$2000 each. Those for trotters are 2:11, 2:14, 2:19 and 2:23 stakes, and for pacers 2:06, 2:11, 2:15 and 2:23 stakes. The class events will be: Trotting, 2:06, 2:08, 2:10, 2:12, 2:13, 2:15, 2:17, 2:21 and 2:25; pacing races, 2:04, 2:05, 2:08, 2:10, 2:12, 2:14, 2:18 and 2:21.

Franklin P. Roberge, a veterinary surgeon of New York, is suing the estate of Robert Bonner for \$100,000. Roberge claims that he attended Bonner's horses for twenty-three years without payment, the horseman having promised to give him \$100,000 or leave him that amount in his will.

James Sullivan, who was up from Hanford the other day, where he has charge of the fair grounds and is training a number of horses, reports great interest in the horse business there and predicts another very successful fair and race meeting this year.

The Haywards Horse Show, which is set for March 7th, is the talk of the country and there will be no doubt an exhibition, no doubt

## Sires of Extreme Speed.

A very great little book has been gotten up for instruction on my readers by Mr. C. L. Griffith, of Pleasanton, Cal., of that grand young stallion Bonnie Direct 2:05, from which the following is taken.

In these days of fast horses, the breeder who hopes to obtain the owner of a winning horse must carefully consider the stallions at his disposal from which he can select to look for the necessary speed. There is no question that to-day to be able to go over the mountains and race on the big circuit with any certainty of placing a number of winnings to a horse's credit, a try to go miles in 2:10 or better is essential.

Many useful lessons can be learned from the list of 2:10 sires. We give below a list of all sires who have produced four or more sons or daughters who have trotted or paced miles in 2:10 or better. We have taken only those producing four or more for the sake of brevity, and not to detract from any stallion that which he has justly earned—and have made an average of speed for each stallion. We have of necessity left out, for the above reason, some sires that have produced champions, for instance Joe Patchen, the sire of Dan Patch 1:59½; Crown Prince, sire of Prince Alert 2:00, or for a trotting example, Patronage, sire of Alx 2:03½, all three producing one 2:10 performer. C. F. Clay is another example producing three with a better average than any in the following summary:

NAME OF SIRE	2:10 PERFORMERS.	AVERAGE SPEED
Alcantara	6 from 2:05½ to 2:10	2:0753
Alecyone	4 " 2:08 to 2:10	2:0931
Allerton	5 " 2:08½ to 2:09½	2:0800
Allamont	5 " 2:03½ to 2:09½	2:0825
Ashland Wilkes	5 " 2:00½ to 2:08½	2:0660
Axel	5 " 2:08 to 2:09½	2:0875
Baron Wilkes	9 " 2:03½ to 2:10	2:0816
Bourbon Wilkes	6 " 2:05½ to 2:10	2:0835
Brown Hal	8 " 1:59½ to 2:10	2:0836
Charles Derby	4 " 2:06 to 2:09½	2:0775
Chimes	5 " 2:03½ to 2:08½	2:0565
Darwinight	4 " 2:03½ to 2:09½	2:0750
Direct	6 " 2:03½ to 2:10	2:0633
Director	4 " 2:05½ to 2:08½	2:0612
Gambetta Wilkes	7 " 2:05 to 2:09½	2:0735
Guy Wilkes	4 " 2:07½ to 2:10	2:0843
Hal Dillard	4 " 2:04½ to 2:08½	2:0637
McKinney	7 " 2:04 to 2:10	2:0778
Marmbrino King	8 " 2:04½ to 2:09	2:0734
Onward	9 " 2:06½ to 2:10	2:0827
Pilot Medium	5 " 2:07½ to 2:09½	2:0945
Shadeland Onward	4 " 2:04 to 2:08½	2:0781
Sphinx	4 " 2:06½ to 2:08½	2:0731
Steinway	4 " 2:05½ to 2:10	2:0787
Wilton	6 " 2:05 to 2:10	2:0866

Brown Hal heads the list with the wonderful average for 8 performers of 2:0206—all pacers—including the world's champion Star Pointer 1:59½. The next on the list is Director with 4—1 trotter and 3 pacers with an average of 2:0612—followed by his son Direct 2:05½ sire of 6—1 trotter and 5 pacers with an average of 2:0633—his list includes the world's champion two year old, Directly 2:07½, who afterwards reduced his record to 2:03½—two who successively lowered the world's record for green pacers—first the four year old Bonnie Direct 2:05½, followed two years later by the six year old Direct Hal 2:04½, crowning all by producing two sons, Direct Hal 2:04½, and Prince Direct 2:07, who paced a mile to pole in 2:05½.

It does not seem that a breeder could go far wrong in selecting one of this great Director family for a worthy mate for his mare. In Bonnie Direct 2:05½ the breeders of California certainly have a good chance to breed with every expectation of raising a youngster in every way worthy of following his ancestors East to the grand circuit and winning from the pick of the whole United States. In spite of the hardest kind of a campaign when but four years old, and absolutely green, Bonnie Direct raced against seasoned campaigners with records of 2:06 and better before he had started half a dozen times. He is today a horse absolutely sound, without blemish—with legs that look as if they had never seen a track, good size, standing 16 hands and altogether as grand a looking horse as any state can boast of. His paces, speed, perfect disposition and race horse qualities are known to the racing public. His oldest colts are not yet twelve months. Mr. Griffith, Bonnie Direct's owner, has but two, but they are well worth quite a journey to see, one is a pacer and the other is a trotter, and both possessing phenomenal speed considering that they have been driven but 20 times. They are now being turned out each day but will be started up again by the middle of February.

Referring again to the 2:10 list we find that the sons of George Wilkes have produced 98 with records from 2:01½ to 2:10. George Wilkes himself was the sire of the dams of 10 with records of 2:06 to 2:10, and his sons are the sires of the dams of 51 with records from 2:02 to 2:10. In Bonnie Direct we have his dam Bon Bon 2:10, also the dam of Bonilene 2:14½ by Simmons 2:28, a 2:10 performer, a son of George Wilkes; Bonnie Direct's second dam, Bonnie Wilkes 2:29, a producing mare, also a daughter of George Wilkes.

A lot of McMurray carts just received. You need a cart now to work your colts in this winter. Get at the Kenney Manufacturing Company, 531 Main Street and take a look at these carts and other first-class vehicles they have for sale.

## Australian Fritz is Matched.

In the BREEDER AND SPORTSMAN of January 24th, this year, was an item in regard to a challenge having been issued by the owners of the Australian pacer Ribbonwood, son of the California bred stallion Wildwood, in which they offered to match Ribbonwood against any trotter or pacer in Australasia, the champion Fritz preferred. Ribbonwood is a five year old and took a record last year of 2:15½. The New Zealand Referee of the 21st ultimo contained the following:

It will be remembered that a few weeks back the owner of Ribbonwood issued a challenge to make a match with any horse in Australasia. Trotting enthusiasts throughout New Zealand will be pleased to hear that Fritz's owner has accepted the challenge and there is every probability of the contest coming off at the New Zealand Metropolitan Trotting Club's Easter meeting. Needless to say the interest in such a race will be enormous. Fritz can justly claim to be the present day champion of Australasia, for his record of 2:13, made four years ago at Christchurch, has never been beaten, and though the gelding is getting on in years, competent judges consider him just as good to-day as ever in his life. Ribbonwood's best time, 2:15 4-5, though considerably slower than the Australian crack's, was made under unfavorable conditions, and it is confidently expected that he will be able to reduce that greatly when called on to do so. He is a young horse, and one the best of which has not yet been seen. In accepting the challenge, Mr. Buckland stated his preference to have the match decided by mile heats, two out of three, or three out of five. The stake has been fixed at 500 sovereigns a side, to be bound by an early deposit. This sum the New Zealand Metropolitan Trotting Club will probably supplement to the extent of 100 sovereigns, thereby making the match the most valuable of its kind ever decided in this colony. Seeing what a great draw the contest is sure to prove, it has been suggested that if the existing Australasian record is broken, the club might make a further addition to the stake, for the better the time recorded the more injurious will it be to the contestants' future racing prospects.

## The Barondales in Iowa.

The colts and fillies sired by Tom James' stallion Barondale before he was brought to California are showing lots of speed and are rated very high by their owners, several of whom are anxious for Mr. James to bring him back there. The glorious climate of California suits Mr. James so well however, that he intends remaining here and Barondale will be kept at San Jose.

Mr. Cash Merrill, of Des Moines, Iowa, who owns the pacing filly Jamie M. by Barondale, started her in a race at Davenport last summer although she had no work to speak of prior to the race. In the first heat she was close up in 2:13½, the next heat well inside the flag in 2:13 and the third heat very close up in 2:13. Her driver thought she needed work and at the end of the race gave her another mile in 2:16, last half in 1:05 and then gave her a cooling out mile in 2:20, last quarter in 32 seconds. Mr. Merrill says she will be raced this year and that no horse can beat her that cannot 2:10 three times.

Mr. S. S. Rinehart, of Knoxville, Iowa, also owns some of Barondale's produce. He is the possessor of Lady Dale that took a three year old record of 2:21½ in 1902. She worked a mile in 1:18½ during the latter part of July, last half in 1:08, last quarter in 32½ seconds. She wears 4½ ounces in front and 3½ behind, yet she learned to come to the score so fast at the trot, that sometimes she would not shift to the pace until the word was given. She never made a break until she struck a half mile track. Mr. Rinehart believes she will get a four year old record of 2:12 this season.

Mr. William Householder, of Chareton, Iowa, owns a three year old by Barondale that shows great speed and will be trained this year.

The trotter Baron May by Barondale, that took a four year old record last year of 2:20½ is described by a horseman who saw him race at Columbus Junction, Iowa, as an impressive and courageous trotter, compactly built and one of the lasting kind.

As Barondale's seasons were limited the number of his get are few, but they are uniformly fast and good gaited.

The price of wild horses from the Oregon range, rounded up, cut out and bunched on the trail, varies for shipment or trailing to other sections, from \$20 to \$27.50 per head. The latter price buys a No. 1 band of these horses—if such a term can be applied to this class. Sellers appear to be well satisfied with these figures, and buyers are making some money handling the animals.

Sober up on Jackson's Napa Soda.

## Rich Stakes for Harness Horses.

The purses and stakes to be offered on the Grand Circuit this year will easily aggregate a-half million dollars. One of the first associations in the field with a list of big stakes is the New York Trotting Association, which announces five stakes for its August meeting at Brighton Beach, that have a total value of \$45,000, the largest amount ever offered for harness horses in the same number of events. Secretary C. A. McCully sent out the first announcement of these stakes. The richest prize is the Bonner Memorial, for 2:12 trotters. This has a guaranteed value of \$20,000, double the amount given last year. The Brighton, for 2:10 pacers, is also increased to twice its amount in 1902 and is worth \$10,000. Three other purses for 2:20 trotters, 2:20 pacers and 2:25 class open to four year old trotters, are fixed at \$5000 each. Entries for these five contests will close on March 7th. Some thirteen other classes will be arranged later, bringing the total premium list to at least \$70,000.

The directors of the New England Breeders Association have voted to give the following six early closing purses at the Readville Grand Circuit meeting: The Massachusetts, 2:12 class, trotting, purse \$15,000; The Blue Hill, 2:30 class, trotting, purse \$5000; three year olds, trotting, 2:25 class, purse \$3000; 2:16 class, trotting, purse \$3000; The Norfolk, 2:24 class, pacing, purse \$5000, and The Neponset, 2:10 class, pacing, purse \$5000. Conditions are that National Trotting Association rules govern, except that in all three in five races horses not standing for money at the conclusion of the third heat will be ruled out. Entries close Wednesday, March 11th. The change in the conditions whereby all horses that are in the money at the close of the third heat can start again instead of permitting only the heat winners to start will doubtless be well received by owners and trainers generally. The former rule at Readville often resulted in but two horses starting for the fourth heat, while the change will insure four horses as starters in this heat if there are that many undistanced at the end of the third heat.

Mr. A. H. Moore, secretary of Narragansett Park at Providence, has arranged the following stakes: The Park Brew, for pacers eligible to the 2:10 class, purse \$10,000; The Roger Williams, for trotters eligible to the 2:14 class, purse \$10,000; 2:18 and 2:25 classes for trotters, each for a purse of \$2500, and 2:14 and 2:20 classes, for pacers, each for a purse of \$2500.

Cleveland Driving Park Company will give eight early closing events, four for trotters and four for pacers. These events will all be best two in three, and the purses will be \$2000 each. The meeting is to be held from July 27th to 31st inclusive and the program will provide for five races per day. Entries to the early closing events will close Monday, March 16th. The program will appear in the advertising columns of the BREEDER AND SPORTSMAN on February 28th. The trotting classes provided for in the early closing stakes are the 2:23, 2:19, 2:14 and 2:11 classes. The pacing races will be for the 2:23, 2:15, 2:11 and 2:06 classes. Five races per day, all on the 2 in 3 plan, will make a fine program of racing, and one that will keep the interest up through the day.

## Something Should Be Done.

Says the Newark, N. J., Sunday Call: About a year ago a member of the Road Horse Association, in an address at the annual meeting, directed the attention of the members to the fact that the remains of the three great mares, Lucy, Goldsmith Maid and Lady Thorn, were interred near the judges' stand on the inside of the track at Fashion Stud Farm, near Trenton. He said that in time the farm would be sold and the track cut up into building lots, and the bones of these three great mares would be scattered to the four quarters of the land. He urged that some action be taken to secure all that was left of the three great trotters and give the remains honorable sepulture. What was predicted then has come to pass in a measure. The track has been sold and is to be cut up into factory sites. It is not too late for the association to act, and we believe that a request of the new owner of the farm that the bones of these animals be given the association for reinterment where they will not be disturbed in the future and a suitable monument placed over them, would be granted. These mares made history in their day, and their names were household words. We are not sentimental in this matter, but we believe it only proper, and just, and right that

"Even these bones from insult to protect  
Some frail memorial be erected nigh."

Spirit of the West pointedly says: "Amateur reinsmen are getting to be so proficient that they can manufacture just as good an excuse as a professional for finishing last in a race."

### The Great Broodmare Lemonade.

Lemonade, the dam of C. A. Durfee's fast stallion Petigru 2:10½ is thus written about by the editor of the *Chicago Horse Review*:

The supremacy of Lemonade as a prolific producer of extreme trotting speed is unqualified. This is all the more remarkable in view of the fact that her career as a matron was comparatively short. She was foaled in 1879 and was not retired from the turf until 1888, and Petigru, foaled in 1895 was, we believe, the last of her produce. She died before her time and should have produced several more foals, in the ordinary course of nature. Lemonade was a bay mare, foaled, as said, in 1879. Her sire, Kentucky Prince, Jr., also died young and, beside her, got but one other performer, the once-sensational J. Q. 2:17½, whose remarkable races against Arab were one of the star features of the Grand Circuit of 1887. Kentucky Prince, Jr., was by Kentucky Prince, dam Patchenie, by Mambrino Patchen. Lemonade's dam was Susie Melbourne, who, although by the strictly thoroughbred horse Melbourne, Jr., produced, besides Lemonade, the trotter Satisfaction 2:22½, and Count of Paris, a producing sire. Susie Melbourne's dam was Kate, by Alhoit. Kate is another great broodmare, having also produced Talavera 2:30, the sire of McVera 2:10½, and numerous others. Her sire, Alhoit, was a son of Alexander's Abdallah, at which point enters the only strain of Hambletonian blood in Lemonade's pedigree. Back of the Alhoit mare was one by Brignoli 2:29½, son of Mambrino Chief, followed by one by Pilot, Jr., and one by Ole Bull, son of "old" Pacing Pilot. It will be seen that Lemonade was anything but a short or flashy-bred mare. The blood-combination which produced her was striking, the trotting strains being principally those which have proved strongest in the female line, while there is a persistent recurrence of thoroughbred crosses, first through Melbourne, Jr., again through Alhoit, whose dam was by imp. Hooton, and again through Brignoli, whose dam was by thoroughbred Woodford, the Mambrino Patchen cross also bringing another strong infusion.

Lemonade we may term a striking instance of the value of development in breeding animals. She was not a mare of extreme speed, though faster than her record indicates, but her gameness was pronounced, and Douglas Thomas, who trained her, thought she would have made a great two-miler. Her last campaign was made in 1887, when she took her record and started in eight races, among them one of six heats, which she won. She was then carrying Lady Wilton 2:11½, who was foaled the next spring. As is well known, Lady Wilton, since her retirement from the turf, has produced the very fast mare Lady Thisbe 2:11½, who trotted second to Major Delmar in the \$15,000 Massachusetts race last August. The blood of Lemonade is evidently destined to breed on and her family will undoubtedly become still more famous. It is an unfortunate fact that her fastest daughter, Bessie Wilton 2:09½, is already dead, without having ever produced a foal.

### Klatawah 2:05 1-2 to be Raced Again.

Klatawah, the young stallion by Steinway out of Katie G. by Electioneer, that was bred at Oakwood Park Stock Farm and still holds the world's three year old pacing record of 2:05½, was sold at the Old Glory sale in New York last November and was secured by Messrs. A. G. Danforth & Son of Washington, Illinois, for the low price of \$1400. A correspondent of the *Chicago Horse Review*, who recently visited the Danforth Farm, says of this horse:

"The campaign of Klatawah as a three year old in 1898 has had no parallel in harness racing, and no colt of that age, before or since, was ever so thoroughly tried for speed, stamina and gameness as was this son of Steinway. He started that season eight times—four of which were against aged horses—and won seven times and was second once. Klatawah has grown into a very handsome horse of 16 hands and weighs about 1200 pounds. I never saw a finer tempered stallion or a nicer one to ride behind on the road. To see him jogging a 2:40 gait on the road you would never believe he could do anything but trot. He goes pure gaited, without weight, and it is the intention of his owners to give him a trotting record this season. Contrary to the general opinion, Klatawah never broke down, and while his legs show the wear contingent to his hard usage as a colt, they are sound, and I would not be surprised to see him trot close to 2:20 at least."

All animals get phosphatic matter enough to make bone of when oats and mixed hay are fed liberally. Bran aids more in furnishing protein than bone material. In fact, too much of it furnishes an excess of phosphatic matter for the kidneys to eliminate and serious disease may follow in consequence.

### The "Long Felt Want."

Since man first took a liking  
To the trotting horse's speed  
They've been rigging up contrivances  
To help along the steed.  
The old high wheels were banished  
By the glib pneumatic tire  
And all the "punky" legs have vanished  
With the scientific "fire."  
They've invented forty thousand bits  
To keep his head in place,  
And forty thousand more to hold  
The critter in a race.  
They've got the stickiest lot of boots  
That fit from tail to ear,  
They tie his legs together  
With the best of hobble gear.  
They've got medicines to cure a cough  
Or help him when he's faint  
They bring him around when he's "off"  
And brace him when he "a.int."  
They've got "curealls" so progressive  
That they help a horse's gait  
And liniments that cure a curb  
Or spavin while you wait.  
But the chap that gets the glory  
With a big financial bonus,  
Must invent a sure-cure liniment  
For soreness in the owners.

—W. L. Duntley.

### The Trotter and Heavy Draft Compared.

At first glance a comparison of the sale of the best French coach stallions this country has ever seen with an average high class trotting bred stallion is hardly fair to the breeding interests of the latter, but in this case the conditions governing the sale were so nearly alike it affords an excellent opportunity and only brings out the stronger and more forcibly how much superior the American light harness horse is over the imported animals for the fancy heavy harness classes, where the foreign breeds are supposed to make their best showing.

During last week's special auction sale, held in the Dexter Park Amphitheatre at the Union Stock Yards, the French coach stallion Indre, a champion of both continents, who was brought to this country some years ago by the late Mark Dunham, the most successful and largest importer in this line in America, and extensively advertised as the highest type of his class in the world, was sold for \$1500. What his opportunities were before coming to this country I cannot say, but I do know the Dunham Farm spared neither time, labor nor money to advertise and boom him up to the time he was sold to Mr. Harkness, and transferred to the Walnut Hall farm at Donerail, Ky., where his chances in the stud were equally as great. It is a question if any coach horse has ever had or ever will have as many high class mares of all kinds, and I have yet to hear of his get being very prominent in any section, fair or showing. He was the star feature of the sale, extensively advertised and shown to advantage in every way by John Splan, who worked as only he can work to make the best possible sale when the horse entered the ring. I have seen Indre in the show ring several times when he carried off the blue ribbons, but never saw him look so good or show to as great advantage as in the sale ring last week.

In the same ring, at the same time, and before almost the same buyers Rensselaer Wilkes 2:11½, a typical American bred stallion that has never had more than ordinary advantages, brought \$1150, and was bought by John S. Bratton, of St. Louis, one of the best known owners and judges of high acting coaches and a prominent figure in show horse circles, who afterwards sold him at something over \$1500 to M. A. Tichenor, of this city, who missed being present when the horse was sold at the ring. Mr. Tichenor has bought, educated and sold more prize winners in the show ring than any other man in the country, and is considered the highest authority on matters of this kind.—Palmer L. Clark in *Chicago Inter-Ocean*.

### Feed Broodmares Liberally.

Feed the broodmares liberally that are carrying foals. They should be kept in good condition, but not "hog fat." Mares that are not blanketed and whose hair stands on end often look to be in better condition than they actually are. Place the hand upon their ribs and hips and it will be found that there is but very little meat upon their bones. Such mares need a more liberal ration of grain and better quality of hay than they have been getting, or their foals will be starved before they are dropped, and afterwards, too. Mares that are very thin in flesh will not yield so large a quantity of milk as would the same mares if in good condition. Foals that begin life under such conditions can never make so valuable animals as they would have made under more favorable conditions. It is poor economy to keep broodmares thin in flesh.—Am. Horse Breeder.

Like all good things, Jackson's Napa Soda has a dozen counterfeits.

### The Charter Oak and Ohio Eligibles.

In view of the change in class of the two \$10,000 purses for trotters, the Charter Oak and the Ohio, it may be of interest to present a list of trotters that will be eligible to them and that are likely to be raced next season. They are Dulce Cor 2:08½ by Baron Wilkes, Dolly Bidwell 2:08½ by Inglewood, Eleata 2:08½ by Dexter Prince, Baron de Shea 2:08½ by Oakland Baron, Maxine 2:08½ by Jackdaw, A. J. D. 2:09½ by Anderson Wilkes, Alice Carr 2:09½ by Gamette, Dan T. 2:09½ by Crawford, Monte Carlo 2:09½ by Mendocino, Wauban 2:09½ by Pilot Medium, Idolita 2:09½ by Mendocino, Walnut Hall 2:09½ by Conductor, Wentworth 2:09½ by Superior, Wilque 2:09½ by Queechy, Beldia 2:09½ by Jack Dawson, Hesperous 2:09½ by Simmons, The Roman 2:09½ by McKinney, Nut Bearer 2:09½ by Nut Breaker, Decision 2:10½ by Allerton, William Tell 2:11½ by Almont Brunswick, Antezella 2:10½ by Antee, Red Princess, 2:12½ by Aristides, Peter Sterling 2:11½ by Baronmore, Prince Selma 2:10½ by Bow Bells, Willie Glenn 2:11½ by Boyer, The King 2:11½ by Clay King, Dorothy Redmond 2:10½ by Director, Directum Spier 2:11½ by Directum, Mary P. Leyburn 2:11½ by Expedition, Hawthorn 2:11½ by Jay Bird, Invader 2:11½ by Jay Bird, Country Jay 2:10½ by Jay Hawker, El Milagro 2:11½ by McKinney, Metellas 2:11 by Mambrino King, Mobel 2:10½ by Moko, Gail Hamilton 2:11½ by Oakland Baron, Dr. Spellman 2:11½ by Prodigal, Re-elected 2:11½ by Relection, Silver Sign 2:10½ by Silverthorne, Arch W. 2:11½ by Tom Shea. There are, of course, some others with slower records which will be named in one or both of the two big purses, but from among those mentioned, a field would be assured that would furnish a great contest.

### The Racing Colors Question.

For some time past the similarity of colors used by racing men has exercised the minds of those in authority. Lately the Australian Jockey Club appointed a sub-committee to inquire into the matter and to report. This committee has sent in its report, which has been adopted by the general committee. For the future fifteen colors only will be permitted to be used. These are white, black, brown, dark blue, pale blue, green, gray, tartan, maroon, red, pink, orange, yellow, purple and lilac. Samples of these colors may be seen at the office of the Australian Jockey Club and the nomenclature of these colors must be adopted in all jackets and caps. It is further ruled that all caps must be of one color, and that all stars, hoops, sashes, braces, diamonds and arm-bands shall be at least four inches wide. In the past facings have played a prominent part in adorning the racing livery of well known stables. These are now to be abolished, as are cuffs, collars, pipings, seams, and braids differing in color from the body of the jacket. Vertically-halved jackets are also to be consigned to the limbo of the past, so far as regards racing under the jurisdiction of the Australian Jockey Club. Registered owners of colors already on the list are at liberty to retain them, so long as they do not conflict with the new regulations, except as in the name of the shade of the color. In all cases, however, the nomenclature of the fifteen colors specified must be adopted. The changes authorized are radical ones, and though at first there may be some discontent, it will not be long before the benefit will be realized.—New Zealand Referee.

### Big Enough to Stand Alone.

Terre Haute's withdrawal from the Grand Trotting Circuit at the meeting of the Board of Stewards at Boston caused much surprise. For years the most sensational performances in the Grand Circuit have been given on the Terre Haute track, it being there that most of the great horses made their records. President W. P. Ijams said regarding the withdrawal:

"We had no representatives at the Boston meeting because we did not intend to have one there. We sent a letter instead, withdrawing from membership. We are in the wrong place on the map, and we have had enough of the Grand Circuit. We are tired of getting the tail-end of the meetings and the bad weather right along. We have lost money enough, and made up our mind it was time to stop. We tried to get an earlier date and were refused, so we decided to get out altogether."

"We will not belong to any circuit. We are big enough to stand alone. We will be independent, like Lexington, and will fix our own dates ourselves, and we will get the horses. We can afford to stand alone on the merits of our track. We are sorry, but we have had enough of it."

The Oregon and Washington circuits will probably catch the entries of quite a number of California trainers unless an early announcement of a California circuit makes them change their present plan.

## JOTTINGS.

ALL KINDS OF SPEED would have been displayed at Pleasanton last Saturday had not old Jupiter Pluvius taken it into his head to claim the day for his own, and right well did he make his claim good, as such a downpour of rain has seldom been seen in that section as began at 10 A. M. and lasted until after dark. There were quite a number of visitors at the horse centre, but they either kept close to the stove at the Rose Hotel or sought shelter in the trainers quarters at the track. About five o'clock P. M., after the rain had fallen incessantly for over six hours, during a temporary lull in the storm, I walked around the first turn of the track on my way back to town with Mr. Martin Carter of the Nutwood Stock Farm and there was hardly mud enough to color the soles of our boots. The Pleasanton track has no equal in the world as a winter track and there has never yet been a rain heavy enough to keep the trainers off it for two days after the rain has stopped.

Of course there was no chance to inspect the horses or anything else in a storm where the wind was blowing fifty miles an hour while the rain fell in torrents, so I had to content myself with an occasional peep through a stall door at a few that were situated on the windward sides of the rows.

One of the first items of news that I learned on reaching Pleasanton was that Edward Mills, who recently brought Searchlight 2:03½ back to California along with the very handsome trotting stallion Lecco 2:09½, has formed a partnership with Henry C. Sanders. Mr. Sanders is a brother to the well known California trainer, Millard Sanders, whose success with the Santa Rosa Stock Farm horses has placed him in the very front of American harness horse horse trainers. Henry has been for many years a resident of Cleveland, Ohio, and came to California this winter for the first time. Like many others he fell in love with the climate and has concluded that it is a good place to remain. He and Mr. Mills had a few horse talks with the result that they have formed a partnership. Mr. Mills will look after the business of the two stallions and Mr. Sanders, who is an accomplished trainer, will handle the track horses. The new firm has already purchased three very promising horses. A trotter, two years old, by Klatawah 2:05½, and a pacer three years old by Searchlight 2:03½, they secured from Mr. Lou Crellin. The three year old paced a mile in 2:33, last quarter in 35 seconds, last year, while the two year old, which is a trotter, is a great prospect. Messrs. Mills and Sanders went to Oakwood Park the other day and paid something like \$2000 for the three year old pacer by Owyhee 2:11 out of Bertha, the dam of Don Derby 2:06, Diablo 2:09½, Elf 2:12½, Ed Lafferty 2:16½ and Jay Eff Bee, that took a yearling record of 2:26½. Bertha never foaled a better boned, stronger built or better looking colt than this unnamed three year old and I believe he is her only one by Owyhee. Ben Chaboya worked him a mile at the ranch last year in 2:19 as a two year old, and tells me that he thinks Messrs. Mills and Sanders have secured the best colt ever bred on the Oakwood Park Farm, which is high praise from one who should know. In addition to these three youngsters the new firm will handle five head, all McKinneys, recently purchased by Mr. Gray, of Santa Rosa, from the Santa Rosa Stock Farm.

Mr. Mills has either owned or managed several of the greatest pacers in the world. He purchased Star Pointer 1:59½ and afterwards sold him to Mr. Murphy who in turn sold him to his present owner. He also managed the great favorite Joe Patchen 2:01½ and campaigned him. Mr. Sanders has been in the sulky for many years and is considered a high class man in gaiting and conditioning horses for a supreme effort. He has marked quite a number of California bred ones, among others Sidmont 2:10½, Derby Princess 2:08½, Derby Lass 2:14 and others. He has close business relations with a number of buyers at Cleveland and now has orders for several high class trotters and pacers that will do for matinee racing on the Grand Circuit.

Millard Sanders' quarters, wherein are snugly stabled fourteen head from the Santa Rosa Stock Farm, are the best arranged stalls on the track. Millard has had a roof window placed in each stall so that a horse can be taken care of after a workout without having all the doors open to provide light enough to see. All drafts of cold air have been shut off by papering the upper half of the walls, and every stall is as comfortable as a hotel room. Anzella 2:06½ looks larger in every way since I saw her last, which was on May 3d, the day the string left Pleasanton last year for the west. Anzella has wintered well, and looks and

feels as if she could repeat her past triumphs and defeat the very best that the east can produce.

Dolly Dillon 2:07 is barefooted and has not had a shoe on since she came home last fall. She was not right last year, as is well known, suffering from corns and soreness. Millard lifted up her feet and they looked to be free from any ailment whatever, with a perfect frog and a wall that looks hard and tough as the hoof of a range horse. She has not been put to work yet, but is in fine shape to begin on. Mr. Sanders confidently believes she will be better than ever this year and able to hold her own in all the classes to which she is eligible.

Sir Albert S. looks better than I ever saw him, except his front legs, and Millard says they will not keep him from pacing in two minutes this year. One of his tendons is a little thick, but there is no fever or soreness in it and it has not caused him to take a lame step for months. Sir Albert S. is a powerfully muscled horse, with about the best middle piece one ever saw on a horse. "He will pace in two minutes this year, sure," said Mr. Sanders as he closed the stall door.

Among the good green ones is Robizola, the mare by Robin owned by Dr. Clark of Santa Rosa. Mr. Sanders has her leased for this year and says she is certainly one of the most promising green ones he ever sat behind. She started once or twice last season and I saw her a bang up second in 2:19 at Vallejo in a heat won by Petigru. She is a sweet gaited mare and ought to be one of the good ones of the year as she is sound and game and a nice trotter. She trotted a quarter in 32 seconds one day this week at Pleasanton. Lou Dillon, whose public trial of 2:08½ last year at Lexington made all the horsemen present open their eyes, is in perfect shape now for this season of the year. Sanders tells me she wore 5½ ounces in front and 3½ behind when she made that fast mile and wore no toe weights or anything else to balance her as she is one of the perfectly gaited trotters.

Owing to the storm I did not see any of the others of this great stable of trotters, but the Santa Rosa Stock Farm has enough speed right there to add many laurels to its already great reputation. Mr. Sanders says it is the best lot of green horses he has ever handled.

Ben Chaboya, who for years was the trainer at Oakwood Park Stock Farm, and gave so many of its greatest horses their first lessons, is now located at Pleasanton, training on the farm being now a thing of the past. Being fully acquainted with a good thing when he sees it, Ben purchased eight good looking horses at the farm, removed to Pleasanton and is getting them ready to sell at private sale. Five are by Charles Derby and three by James Madison. They are all trotters and have size and good looks. Some fast race horses and roadsters will come from this bunch to a certainty. Of the Derbys one is out of Flash, the dam of Javelin 2:08½, another is out of Empress, the dam of King Cadenza 2:15; another is from the Elector mare Ally Sloper and the other from a mare by Corrector, son of Dictator. The three Madisons are also well bred. A three year old gelding is out of a mare by Steinway, second dam Lunado, dam of Sylvanway 2:10½ by Electioneer; a three year old filly is out of a mare by Chas. Derby, and the other is an own sister to Confianza, that took a three year old record of 2:21½ and worked a trial in 2:14 last season. Several of these three year olds are well staked and it is Mr. Chaboya's purpose to carefully train them, get them to going good and showing speed and then sell them at prices that will pay him a fair profit, but not be unreasonable.

Farmer Bunch has a string of eight from the Meek Farm at Hayward's. They are all by Welcome except one and that is a three year old called Charley Steele that is a full brother to Janice 2:08½ and a trotter from Trotville. Among the Welcomes is a brown pacer out of a sister to Cricket 2:10, a filly out of a sister to Eric 2:17 and a full brother to Ilolo 2:16½. The four year old filly by Welcome out of Cricket has been named Crispy. She paces and will be in the circle of fast ones before the end of the season. Cricket will be sent to Searchlight 2:03½ this season. A full sister to Janice was bred to Nutwood Wilkes last year and is due to foal soon.

The horses in the Griffith string are all being prepared for the Blue Ribbon sale at Cleveland in May, with the exception of Bonnie Direct 2:05½, which is in the stud. He has developed into a massive stallion of the Direct type. He stands within a small fraction of sixteen hands and weighs just about 1200 pounds, and still he is referred to by turf writers as little Bonnie Direct. I don't know where a grander looking stallion can be found, and to my mind he is the best bred son of Direct living. Mr. Griffith has two foals by him, one a trotter, the other a pacer, and they are very

handsome. They are of his first crop and are not yet twelve months old. Mr. W. H. Lumsden of Santa Rosa has two more. One is out of the trotting mare Myrtle 2:13½ and is a pacer, the other is out of the pacing mare Roblet 2:12 and is a trotter. How do you account for it?

I did not get a chance to look at the Nutwood Stock Farm's string, but Mr. Carter told me there were fourteen head in charge of William Cecil, and that several of them would be heard from in the 2:15 list before the end of the season. Mr. Carter sent the filly Excella by Mendocino out of Expressive 2:12½, that he bought at the Palo Alto sale of two year olds last month, up to Pleasanton and will work her a little for speed this year. If she shows well she will be given a record before sending her to the matron paddock at Nutwood Farm.

James Thompson is very busy with his string of trotters and one pacer that he bought at Palo Alto Farm last fall. He showed up a big brown two year old by Nazote on the track one day last week and Millard Sanders pulled his watch on him as he went up the back stretch. When Thompson put the colt away in the stall Millard made an offer of \$1500 for him. Thompson said his price was \$1700 and Millard retorted "your price is mine" and paid him the money. Thompson has been sorry for it ever since as he says the big brown fellow is worth three times the money. He is out of Lulu Wilkes by Geo. Wilkes and she is the dam of Advertiser 2:15½ add two more in the list. Mr. Thompson has a pacing two year old by Monbells out of the dam of Eleata 2:08½ that is the only pacer foaled at Palo Alto in 1901. This is the one he has matched against a two year old filly by Direct out of Sophia by Robert McGregor, owned by Mr. C. L. Griffith. The race is a half mile dash and will come off next month. Last Wednesday Bert Webster drove this filly a half mile in 1:09½ at the pace, and the boys at the track say that Thompson wasn't worried over the performances, and still thinks he'll win. His Monbells filly must be a crackerjack and I know Mr. Griffith's filly is, and a perfect picture besides.

Monroe Salisbury, with Ben Walker to assist him, is preparing a string of big horses that will be heard from over east this year. Monte Carlo looks large and strong as a cart horse. He is brushed through the stretch once in a while and has beaten 32 seconds a little on two or three occasions. What horse will beat him in the 2:10 class is a question that all the trainers ask and none seem able to answer. The big seventeen-hand trotter, Clay S. 2:13½, has improved so much in appearance since he went to Pleasanton that one would hardly know him. For the first time since I first saw him, in 1896, he looks to me as if he is getting enough to eat. He is fully two shades darker in color than he was a year ago, his coat is smooth and slick and he looks and moves like a strong, healthy horse. Don't be at all surprised if Clay S. lowers his record this season after his three years retirement.

A new disease has appeared among the trainers and rival horsemen of California. It is known as "lint-on-the-lungs" and comes from an over indulgence in that bad habit known as "chewing the rag." It appears to be especially violent during the stallion season, and breaks out often during work-out days at the tracks. A Pleasanton man has compounded a serum which he thinks will cure the disease. He makes it as follows: Fluid extract of pedigree ten parts, tincture of actual race records one part, chloride of producing ancestors three parts. Mix well in hot air and inject hypodermically into either side of the patient's jaw. If patient does not recover in two minutes the case is hopeless.

Pleasanton track is about the best place I know of for one who admires the light harness horse to enjoy a day's outing when the weather is clear, and even when the rain comes down one can visit around among the trainers and hear a great deal of gossip, but when a storm breaks over the country like the one which visited this part of California last Saturday it is of horse news a little difficult to obtain, and inspection of the horses out of the question.

The next time I go I will make it a point to call on the boys I missed this time on account of the weather.

THE JOTTER.

## Answers to Correspondents.

R. T. L., Petaluma—Please publish a good recipe for killing lice on cattle and horses?

Answer—About as good as anything is the following: Four ounces of sulphur, one ounce of creolin, and four ounces oil of tar well mixed with half a gallon of cotton seed or olive oil. Rub into the hair two or three times at intervals of three or four days.

California favorite hot weather drink—Jackson's Napa Soda.

## Notes and News.

The two-in-three plan will have a fair trial this year.

Connie 2:15½ by Ketchum has joined the matinee brigade at Cleveland.

Cresceus 2:02½ will be in the stud again at Toledo this year. His fee is \$300.

Adbell's death is the more deplored since the young colts and fillies by him are beginning to show up.

A fifteen hand stallion over three years old is wanted by a party that will pay around \$300 for him. See ad.

A. L. Kerker and Fred Dietz of New York are in California looking for good trotting and pacing prospects.

The Haywards Horse Show, which is set for March 7th, is the talk of the country and there will be a fine exhibition no doubt.

Louis Dario, of Byron, Contra Costa county, advertises a five year old Norman stallion for sale that weighs 1900 pounds.

Whisper 2:08½, chestnut pacing mare by Alcandre, foaled a colt on January 28th by the chestnut champion Cresceus 2:02½.

Fayette county, Kentucky, holds the record. No less than nineteen horses bred within its limits have taken records of 2:10 or better.

A handsome young stallion by Tago 32975 out of a Mambrino Wilkes mare is offered for sale. Tago is a son of San Diego. See advertisement.

There is considerable speed over in Butte and Anaconda, Montana. Forty-one trotters and pacers that are capable of beating 2:20 are owned in those two towns.

The large, handsome mare Ventura and a handsome stallion, both gentle and good roadsters, are offered for sale by an advertiser. Consult our advertising columns.

Dan Patch was bred to one mare as a two year old, about twenty as a three year old, eighty as a four year old and last year served over forty mares before beginning his racing season.

Ed Benyon will not train John A. McKerron 2:05½ all the season, but will ship him home to Cleveland in the spring. Later, when he is started against time, Benyon will perhaps drive him.

Monroe Salisbury purchased a green pacer recently that stepped from the half home in 1:03 last Wednesday, coming the last quarter in 31½ seconds. He did it so easily that he seemed to be jogging.

Lawrence Streuve, of Watsonville recently purchased a yearling colt by Alton B. (own brother to Chehalis 2:04½) out of a mare by Strathway, from Henry Helman. The price paid was \$160.

The two year old Wanda II., own sister to The Roman 2:09½, is showing more speed than her noted brother did at her age and is considered a great prospect for a 2:10 trotter. She is not for sale.

Many of those who attended the Midwinter sale at New York, where Idolita 2:09½, son of Mendocino, brought the top price, \$11,100, considered him the finest looking stallion ever led into a salesring.

Athamax 36927, a young stallion whose breeding is first class, is for sale. He is by Athadon out of Lustine, the dam of two in the list. Athadon is by a son of Onward and Lustine is by that great horse. Consult our advertising columns.

Some of the Pleasanton trainers looked blue when the big storm came on and stopped the work for a few days but when it cleared off and they found themselves riding so much faster than before on account of the let up they were all smiles.

Rhythmic 2:08 is said to be looking very fine in his stud form. The famous blind stallion is exercised in harness every day, and steps along with as much confidence as he would were his eyes of the best. He is one of the best mannered stallions living.

The two year old filly by Direct out of Sophia by Robert McGregor, owned by C. L. Griffith, stepped a quarter in 32 and a half in 1:09½ at Pleasanton last Wednesday. She goes so smoothly in her work that the boys are all very sweet on her.

Some interest will center about Crescent Route when Hudson begins his preparation at the Lexington track. He is by Cresceus 2:02½, and is one of the few of the get of that stallion that will be campaigned the coming season. One other trotter by Cresceus will be trained at the Lexington track—Cresceus Bird (4). This colt was not at himself last year, and in consequence accomplished little. He was reckoned a high class two year old, having trotted quarters in 35 seconds.

Fred H. Chase & Co. will sell thirty head of high class road and express horses from Rancho del Valle, Pleasanton, some evening during the second week in March. There are two fast ones by Direct in the consignment that are great prospects.

A New York paper says the filly Pleasant Thought by Prodigal, dam Extasy, for which Matt Dwyer paid \$4600 last November, has been sent to Kentucky, where she will be trained and handled by the veteran Charles Marvin. Mr. Dwyer bought her for General Brayton Ives, owner of Nora McKinney and other good ones.

The brother to Coney 2:02 in Wm. Cecil's string at Pleasanton, is showing very fast and will surely be a bread winner. Also the brother to McKerron is showing as fast as Cecil will let him and the knowing ones begin to think Billy has something up his sleeve that will be a surprise when it comes to a show down. He says he is good enough to open a jack pot with now.

Chas. A. Durfee advertises three McKinney stallions for sale in this issue. There is a two year old, a three year old and a four year old, and all are ready to train or the two elder can be placed in the stud. They are all well and fashionably bred and will be sold right. The four year old has a race record of 2:18 made as a three year old and is a great prospect for 2:12 this year. Write Mr. Durfee about them. His address is San Jose.

The death of Peter Robinson, the well-known California horse trainer, is reported to have occurred at St. Louis on the 28th of last month. Mr. Robinson was for many years connected with Senator Stanford's Vina Farm, and is the man who discovered Azote was a trotter. He brought out Dr. Leek 2:09½ and Dolador 2:20, besides several others. Mr. Robinson was highly respected by all who knew him.

The two year old pacer by Geo. A. Davis' stallion Rey Direct 2:10 out of Mabel (the dam of Directly 2:03½) by Naubuc, which trainer Parker is working at Pleasanton, is one of the sweetest going sidewheelers in California. Mr. Parker has eight or ten in his string by Rey Direct and there isn't an ordinary one in the bunch. Anyone of them would attract attention in a crowd of good ones.

J. C. Bray has purchased the four year old black filly Miss Ora Wilkes by Ora Wilkes out of Deborah by Sable Wilkes, also a four year old bay filly by Sidmore out of a mare by Alcona Clay, which he will ship to Montana along with his other recent purchase, the stallion Geo. W. Archer by Allerton. The mares were purchased for Montana parties and will be bred to Geo. W. Archer this year.

At the meeting of the stewards of the Grand Circuit John E. Thayer offered a resolution that no horse not having a standard record be allowed to wear hopples. Six tracks voted in favor and four opposed, as follows: Detroit, Buffalo, Providence and Columbus. Syracuse not voting. Those opposing thought the rule would affect the entries for their slow stakes. The opposition was so strong that the subject was dropped for another year.

Ben Chaboya has a three year old sister to Confianza 2:21½ in his string at Pleasanton that is a very fine looking and a good trotting prospect. She is entered in both the Occident and Stanford Stakes for this year. Confianza will be remembered as the filly bred at Oakwood Park Stock Farm, by James Madison out of a mare by Steinway. She was purchased by Edwin Gaylord, of Denver, and last year took her record as a three year old and worked a mile in 2:14. The filly that Chaboya is training is fully as good a prospect.

The indications are that the season of 1903 will be the most brilliant the harness turf has ever enjoyed. In 1902 the associations holding trotting and pacing meetings did the best business ever recorded, and from all that has taken place so far this year prospects are that even the magnificent successes of 1902 are to be eclipsed in 1903. Already several good circuits have been formed, and most of them will offer larger purses than they did last season. It is probable that there are more horses in training for the coming campaign or pointed for it than have been intended for or actually in the trainers' hands for a decade, and what is more it is more than likely that the average speed is higher than it has ever been.

The combination sale of harness horses held by William G. Layng, of the Occidental Horse Exchange, in this city, last Tuesday, brought out quite a large attendance and good prices were realized. Six head consigned by Thos. Roman, of Dayton, Washington, sold for an aggregate of \$680, the highest price one being a bay gelding by Alexis 2:18 out of Darwina by Meredith, which brought \$160. Among the horses consigned by other owners was the black-stallion Black Wilkes by Oro Wilkes out of an Alcona mare. He brought \$310. A Director stallion, A. A. Moore, Register No. 23,872, was purchased by J. C. Bray, of Montana, for \$260. This horse is worth more money, as he is well bred, being out of a daughter of Antevolo; second dam by Admiral and third dam by Capt. Webster. It is said he has sired some good looking colts, but as he has been kept in this city for years and used on the road his opportunities in the stud have been very poor. A number of express and work horses were sold that attracted lively bidding and brought very good figures, and the sale was a successful one. Mr. Layng has recently made many improvements in his salesring and it is one of the most convenient to be found anywhere. The seating capacity is at least 1000 and the tan bark ring is an excellent place to show horses.

Diablo's first, second, third and fourth dams are all great broodmares. The dam of his sire, Chas. Derby, has produced five in 2:30; the dam of his grandsire, Steinway, produced four in 2:30, and one of them is Soprano, the only mare except Beautiful Bells to produce ten standard performers. In his pedigree within four generations are the names of the following great broodmares: Katy G., Abbess, Green Mountain Maid, Alma Mater, Dolly Spanker, Bertha, Barcana, Blandina and the Burch mare. It is no wonder Diablo produces speed.

Some of the races dowered by the Czar of Russia are not open to the entry of foreign horses at all, but they are comparatively few. In France foreign horses are barred in all trotting races but three during the year, these three being the great international stakes worth around \$10,000 each. There was so much trouble in France over American trotters being raced there as native-bred and out of their regular classes that the step was taken of barring all horses from all but these three races that had not been legally registered in France as yearlings.

About as bold an exhibition of brazen effrontery as is on record is being perpetrated in South Dakota by an individual who gives his name as Ed Rosemore. He is traveling through that part of the country and advertising by means of posters and handbills the services of the trotting stallion Lockheart 2:08½, his terms being \$10 to insure living colt, \$7 to insure mare with foal and \$5 for single service. As Lockheart has been the property of G. W. Sherwood, of Sheldon, Ia., for several years, and is now at that place, the effrontery of the impostor is without a parallel.

Search Me is the name which La Siesta Stock Farm has selected for the three year old by Searchlight 2:03½ out of Wanda 2:14½, dam of The Roman 2:09½. Mr. Burke first selected the name Moonlight for the colt, but found it was taken. Search Me has never taken a mixed gaited step since Mr. Burke borrowed that set of hopples and took them to the ranch, but is trotting squarely and doing all that is asked of him. So the hopples have been returned without being used, and Mr. B.'s vow never to own a pair of the Indiana pajamas is intact.

Alta Vela 2:11½ will be taken to Pleasanton on March 1st and will make the season there instead of at San Francisco as was first intended. He will be in charge of Al McDonald, who will also train three or four pacers for his owner, Mr. F. Gomet. At \$30 the season, Alta Vela will doubtless receive a good patronage this year. He is a son of the great Electioneer and but three of that great stallion's get have faster records, viz: Arion 2:07½, Sunol 2:08½ and Palo Alto 2:08½. His dam was by the great race horse Piedmont. Alta Vela was the best gaited trotter seen on the California circuit last year.

At a meeting of the Board of Directors of the Kentucky Breeders Association, in Lexington, Ky., recently, Secretary Shanklin was instructed to let contracts for the building of three new stables on the association grounds during the month of January, which will give stall room for 500 horses and which will make 1000 stalls available during the trotting meeting. Three hundred of these are in the stable of S. T. Harbison & Co., 100 on the farm of Senator Bailey and 50 at the Orchard Park farm of J. D. Creighton, which the association has leased during the October meeting, so in all 1000 horses can easily be accommodated.

Comet Rush is the name of a well bred and good looking stallion owned by Mr. F. Cadman, of Elmira, Solano county, Cal., who will stand the horse for public service at that place this year. Comet Rush is by Corbett Rose (son of Guy Wilkes and Rosedale by Sultan) and his dam is the great broodmare Mamie Comet 2:23½ (dam of McCleay 2:22½ and Comet Wilkes 2:21) by Nutwood, second dam the producing mare Black Betty by Sportsman, son of David Hill Jr.; third dam a daughter of St. Clair 16675. Comet Rush has size, good looks and speed and is a young stallion that should receive a fair patronage from the breeders of Solano county.

In discussing his plans for John A. McKerron 2:05½, with a correspondent of the Kentucky Stock Farm, Mr. H. K. Devereux, of Cleveland, recently said: "The chief ambition of my fondness for the light harness sport, is to own the champion trotting horse of the world. Now I know that I will never, if I live to become one hundred years old, own another horse as fast as McKerron, consequently I feel that the time has come during his career when I must make the crucial effort to bring out every drop of speed there is in him. I do not say positively that he can beat Cresceus' record, but I do say there is no horse living who stands a better chance of turning that trick than McKerron. I am positive that he can cut down his own record considerably and perhaps before the year 1903 is over the horse world may see the championship brought to Cleveland. With this in view, I am having McKerron trained especially for work against the watch. Who will drive him in his trials? That has not been definitely decided, but it will probably be Ed Benyon. It needs some one who knows the horse thoroughly. Now there is no one who knows McKerron better than does 'Doc' Tanner, but 'Doc' carries a good bit of weight and when the world's trotting record is the target for the horse's effort, every pound counts and consequently I feel that a lighter man must be chosen to hold the reins. Benyon has the right weight and by June he will become perfectly familiar with every whim of Johnny."

Three sons of Prince Airlie 28045, son of Guy Wilkes, are offered for sale by Mr. P. A. McEvoy, of Menlo Park. Their description and breeding will be found in our advertising columns. Prince Airlie was out of Chantilly, a great broodmare by Nutwood.

## Romantic History of Poindexter.

No horse in the world has a more romantic history than Poindexter 2:09, the son of Abbotsford, recently sired by Thomas W. Lawson for exportation to Austria. In the spring of 1898 an old darky told Dr. W. E. Dickerson of a promising trotting colt near Stamping Ground, Ky., owned by a young man by the name of J. L. Poindexter.

At the time Dickerson was buying promising young trotting material, but he wanted geldings, and paid no attention to the negro. The negro told him of the merits of the youngster. A few weeks later he again visited that section of the country, and once more ran across the old darky, who again reminded him of the colt. Dickerson finally drove down and looked at the youngster and was much impressed with the speed he showed to the hatter, but the price asked for him, \$870, was a little above his limit, especially as he wanted only geldings. When Dickerson got home he commenced to think of the speed that green colt showed, and as the time wore he could not get the colt at Stamping Ground off his mind. Summer came and passed, autumn and winter followed and spring came again, still Dickerson could not forget the brilliant lot of speed shown by the Poindexter colt.

One day he made up his mind to go to Stamping Ground and see the colt again and buy him. Upon arrival in the neighborhood he was told first that the colt had been sold, but he was determined to find Poindexter, ascertain who bought him, hunt the parties up, and still secure the speedy youngster. He found Poindexter, and learned that the colt had not been sold, but was in a livery stable at Frankfort, where he was held for a debt of \$60, his young owner while on a lark at the capital one night putting the colt up as security for this small sum of money, which he had lost over the card table. Poindexter told Dickerson, under the financial embarrassment he was then laboring, if he wanted the colt for \$250 he could have him, and Dickerson wasted no time in buying the youngster. Eight weeks later he drove him a mile over the old Nicholasville Fair Grounds track in 2:22½, and then shipped him to Lexington.

The first time he ever set him down a fast mile here he went in 2:14½. Dickerson was fitting him to race at the 1899 meeting of the Kentucky Trotting Horse Breeders Association, when he received a telegram from Mexico that his partner and half owner of the colt, Tom Embury, of the Union Stock Yards, Cincinnati, had died suddenly of yellow fever. Of course, all the partnership horses had to be sold to settle the Embury estate, and they were all entered the next winter in a sale here. Dickerson had named the colt Poindexter, and Thomas W. Lawson bought him for \$6250. For the Boston millionaire Poindexter got a record of 2:09 in 1901, and was just nosed out a third heat in 2:08½. He was taken sick soon after Lawson bought him, and was thrown out of training nearly the whole season of 1900. Dickerson says that Poindexter is not only the greatest stallion ever exported to Austria, but had he been handled from his early colt days he would now be a candidate for championship honors. Jimmie Gatecomb, Scott Hudson's late partner, told Dickerson when Poindexter was being campaigned by Lawson in 1901, he saw the horse trot a half in 1:00½, a 2:01 clip. Poindexter is one of nature's true trotters, taking his brilliant record with no toe weights of any description, and wearing an eight-ounce shoe. Horsemen will watch with much interest his performance in Austria this season, as it is the general opinion he will make the most brilliant campaign in 1903 of any American trotter yet exported to that country.—*Spirit of the West*.

## From President American Trotting Association.

Warren Park Farm, home of the sensational performer and Sire, Axtell 3, 2:12  
Spohn Medical Co. TERRE HAUTE, IND., Oct. 21 1901  
Gettlemen: For seven years I have used your specific for cutaneous diseases to cure Disemper also as a preventive both with my horses and the team and at the farm, with colts and mares. I never found anything that worked so well as Spohn's Disemper and Cough Cure. In fact it helped me out of the most serious trouble. No stock farm or water cauld not be without it.  
Very truly,  
W. P. HAMM

"I make it a point to attend at least one Grand Circuit meeting each season," writes Bascomb, "in order to get a line on the latest wrinkles of the profession. When I return I am generally loaded with new style boots, bits, governors, demicks, gating devices, weights, pads, etc. I derive a vast amount of satisfaction from such a trip, and usually absorb enough style to keep me all 'swelled up' the remainder of the season."—*Western Horseman*.

Secretary Charles Downing, of the Indiana State Agricultural Society, has been authorized to negotiate a race between Dan Patch 1:59, Prince Alert 2:00 (Dan R. 2:04). The state board will offer a large purse for the three, the race to come off during the fair.

## Monterey 2:09 1-4.

Breeders who want size and style as well as speed and soundness should remember that that fast and game race horse Monterey 2:09½ will be at San Lorenzo and Milpitas this year and that his service fee is but \$50. Monterey has a record of thirteen winning races, in which he met some of the best trotters of America, besides a number of races in which he took second and third money to such horses as Cresceus 2:02½ and Charley Herr 2:07, beating such distinguished trotters as Bingen, Dare Devil, Oakland Baron and others.

Monterey is a son of the great producer of extreme speed Sidney, that has sired 18 in the 2:15 list, and 99 in 2:30, while his dam is a great broodmare with two of her produce with race records of 2:09½ and 2:16 respectively.

Every breeder now recognizes that stallions with size, style, speed and action are the ones from which the future race and show winners will be bred and Monterey has all these qualities. He is one of the best individuals among the stallions standing for service in California; his colts are attracting attention from horsemen all over the State. As Monterey has had but limited service in the stud, his colts that are old enough to train are very few. Mr. Williams tells us he knows of but four that have been worked for speed. Of these one at Los Angeles worked a mile in 2:30½ last year as a two year old. Another sold for \$2000 and went east. S. Comisto of Eureka, Humboldt county, bred one that is now three years old and is owned by Mr. Mullyady of that county. This colt has worked a mile in 2:24. There is a four year old owned in Seattle that can trot a mile in 2:20 or better.

There is no doubt that Monterey will sire speed and extreme speed at that, and he is a horse to breed to with an assurance that his colts will sell at a profit on the investment.

## A Maine Horse Story.

One of the shrewdest and most successful of our Maine breeder horsemen has Charles B. Wellington of Albion been regarded. Mr. Wellington has made a competency in the horse business and has seen many a fast horse of his own breeding go from his stable, has bred and raced and purchased, and has sold for the road and the track, and occasionally has gotten together a good stepping pair. Some years ago he heard of a mare up in Aroostock county, now known as the garden of Maine, and the friend who wrote him stated she was fast and that she was able to beat anything that Wellington had ever owned. Well, up to the north went Mr. Wellington, and in due time he found the mare and the man who owned her, and after a brief inspection asked the owner to hitch her up as he would like to see her move a little. It was in the winter, and in an old-fashioned Maine winter it is not much like driving on a boulevard to take a sleigh ride where the drifts get deep enough to lose a horse, but there were places where she could step and did show fast. Mr. Wellington wanted to know of the French-Canadian who owned her if he had any idea of her speed.

"How fast did she ever go?" asked Mr. Wellington. "I do know; he go fas," was the reply. "Yes; but how fast?" was the interrogatory. "I do know, he go fas. I touch him wit' wip, he go fast. I touch him 'gin he go faster; bum by he go so d— fas' I git shame ask him go any mo'. Do know how fas' he go."

Mr. Wellington was satisfied and bought the mare, named her Never Mind and raced her, afterwards selling her for a good price, and taken to the court of Daniel Lambert she became a successful broodmare, and her name may be found in the great broodmare table with several of her produce in the 2:30 list. Never Mind was given as by Young Moscow, and I think that is the breeding still attached to the name.

A little incident occurred when Mr. Wellington first started the mare in a race, when the horses were to be named at the post. As Mr. Wellington jogged by some one in the stand called out (it was one of the judges): "What is the name of your horse?" "Never Mind," was the reply, but "never mind" was the manner in which the judge heard it. The question was again asked, and answered in the same manner as before. Finally one said: "Mr. Wellington, we have to know the name of your horse before you can start in the race." I will not vouch for the authenticity of the reply, but I have heard that it was couched in somewhat vigorous language after this: "Why, you blinkety blank, blinkety blank fool, haven't I been telling you for an hour her name is N-E-V-E-R-M-I-N-D," and the matter was then made clear.—*G. Milton Hatch in Trotter and Pacer*.

Jackson's Napa Soda untangles the feet.

## Adaptability in Alternating Gaits.

The sale of General Agent 2:24½ trotting, 2:10½ pacing, at New York last week, calls to mind a conversation I had regarding him with his former trainer, Joe Gahagan, of Toledo, O. Joe gave the General his early education, and as he showed an inclination to pace, trained him at that gait and started him in three races in 1898, winning two of them. About this time Joe discovered that the 2:20 pacing classes to which his horse was now eligible were a little warm, so he tried the experiment of teaching him to trot. As a pacer he wore ten-ounce shoes and was clean gaited and steady, but sometimes jogged on a trot. Two ounces of weight added to his front shoes and a three-ounce toe weight made him a pure gaited trotter, and in his first overture at that way of going he was second three times around 2:25. He finished the season as a trotter, but the following year found him again doing the double-gaited act. He began the season as a pacer and did fairly well, but Joe likes to ride behind a trotter, so he shifted him again and won five straight races. In 1900 he was out as a trotter for four or five weeks, but late in the fall was put to pacing and won several races. In 1901 he paced in all his races. Double gaited horses are not an oddity, but the adaptability shown for so sudden and successful an alteration of gaits in actual races is rather remarkable, especially without resort to straps.—*Marque in Horse Review*.

## A Russian Ringer.

About six weeks ago A. M. Kerby, an attorney of Detroit, and J. Cunningham, a Michigan trainer, sailed for Europe, at the request and expense of the Russian government, to ascertain if a gray stallion that an Austrian has been trotting there as an Orloff was the Pilot Medium stallion William C. K. that trotted to a record of 2:18½ in this country in 1899. The two Americans reached Moscow about the holiday season and promptly identified the ringer as William C. K. The man guilty of the crime of ringing the horse will be severely dealt with and the Russian government will be the gainer in the end, as the horse will become the property of that government and will undoubtedly be the means of improving the trotting stock of that country. His dam, Cora Russell, was sired by Lord Russell, a full brother of Maud S. 2:08½, and his grandam, Cora Belle 2:29½, was by Joe Gavr, whose sire was Messenger Duroc, and whose dam, Fanny Mapes (dam of Jerome Eddy 2:16½), was by Alexander's Abdallah.

Some misunderstanding has arisen as to the reason of the refusal of the entry of Gold Heels in the rich handicaps at New York next summer. His brilliant performances of last year in these events marked him as a formidable competitor for 1903, and when it was announced that his entry in the three great spring handicaps had been refused, much disappointment was manifested by turfmen and race followers the country over. No blame can be justly placed upon the racing officials in rejecting his entry. Rule 55, under which the rejection was made, provides for the registration of all partnership interests in any horse, and the relative proportion of such interest, also the terms of sale, lease or arrangement, such documents to be signed by all persons having an interest in the animal and filed at the Registry office. Gold Heels is owned by a corporation. As every stockholder therein is interested in the horse, their names and addresses should have been recorded at the Registry Office or with the Clerk of the Course where the entry was made in order to comply with this rule. As this was not done the officials were obliged to reject the entry. While the action taken may seem severe, it is, nevertheless, in the interest of clean sport and will be approved by all fairminded turfmen.

## Worth Remembering.

There are many remedies and hoof growers on the market. It's easy to grow a foot, but when it comes to growing the right kind of wall and foot, one that will stand the hard work of pavements and tracks, all trainers know that "they are up against the real thing," and that 99 per cent of the so-called "hoof remedies" are worthless when put to the practical test. The number of horsemen who have been obliged to retire otherwise promising horses in the middle of the racing season, due to sore feet and general weak feet, because of the use of some new and untried remedy, resulting in large loss of time and money, ought to lead to a careful consideration of this matter. Claims are easily made; actual tests are better. Campbell's Horse Foot Remedy has been tested by actual use on almost every ailment of the foot for a period of over 20 years and has never failed to do all which has been claimed for it. It cures soreness, and grows the right kind of a wall and foot. Winter is the time to use it; money refunded if it does not prove satisfactory.

Senator Horace White secured the bargain of the New York sale in Miss Whitney 2:07½ at \$1600. Prince of Orange 2:07½ brought \$8200, and yet the mare beat him at Memphis in a race to wagon in 2:10½ and 2:11½.

Orosius has proved himself quite a shifty selling plater since he changed hands. He has won both of his last starts for his new trainer.

## THOROUGHBRED DEPARTMENT.

A New Orleans man has invented what he calls a "track singeing machine" which was tried successfully on the New Orleans track last week. This invention is small enough to be operated by hand, but a much larger one will be constructed at once to be drawn by mules. Crude petroleum is used in the drying process. The same intense heat which is being used to propel monster ships on the seas and to pull long freight trains will be used to dry up the wet spots and to simply eat up the mud. The body of the machine is built something like a harrow, but instead of teeth to tear up the surface there are jets to burn it. A network of pipes run criss-cross on the frame and are fed with oil from a tank at the rear end. These pipes are perforated and arranged with jets just like those used in a furnace which burns oil. The identical kind of heat which changes the water in a boiler into steam evaporates the moisture on the track surface. Several wet spots on the track which have been dangerous for the past week were operated upon this morning with distinct success. The heat generated is intense and penetrating and the roar from the burners sounded so ominous that the Sunday spectators held safely aloof.

Mr. P. J. Dwyer has not only refused the flattering offer of \$50,000 for his great horse Handspring, but has even declined to price him or part with him for any consideration and has placed him permanently in the Melbourne Stud. The offer is said to have come through trainer Matt Allen, who now has the horses from the Keene stable in England. It is presumed that the horse is desired by English parties to revive the dying blood in that country of the immortal Glencoe and Handspring is the living representative of that line of blood, tracing three times in his first four generations to the sire of the wonderful Pocahontas.

Not gradually, but by leaps and bounds, has racing advanced to the proud and prosperous position which it now occupies. Nor, if we may read the future by the light of the past, has it attained the zenith of its greatness and prosperity. On all hands its future inspires an optimism which is contagious. Nowhere can be found a man who is so much of a pessimist as to say that it will not continue its march onward and upward; not along the avenue of financial success alone, but on that great roadway that leads straight to the affections of the people. Public confidence is on the flood and so long as that confidence is continued, there can be no such word as failure. The good old days, so-called, that we used to hear so much about only a few short years ago, are overshadowed by the glory of the present and the prospect of the future. The sun of turf glory shines undimmed. It is high in the racing heavens. The eyes of all racing men are turned towards it and by its light they see, not dimly, as in a glass, but plainly and clearly as in the light of day, a new racing era. There is no manner of doubt as to what the present position of the turf or the hopes of its future is to be ascribed. It is to the wise conduct and administration of the sport of The Jockey Club, which not only has accomplished wonders in the East, but has given a stimulus to racing throughout the country and has been of incalculable benefit to the breeding industry, in which millions of dollars are invested. Probably no department of the turf has experienced more prosperity than has the breeding department, which, with an ever-increasing demand and rising prices, has reaped a harvest such as it never knew before. Nor is there any department which is more worthy of encouragement. Our breeders, be it said to their credit, while ever seeking the best market, always have been loyal and true in their devotion to the turf. The love of the horse, if not born in them, grows with them. With ever-increasing interest they watch the growth of the produce of their farms and follow the performances of this produce on the race-tracks of the country. Here and there we may find a breeder so sordid as to care nothing about the future of the colts and fillies that have been reared in his paddocks, but he is the exception and not the rule. The typical American breeder—whether he be to the manor born in Kentucky or Tennessee, or whether a leader in the commercial world who supports a stud farm purely out of love for the thoroughbred—is worthy of the best traditions of the American turf and loyal to its best interests in the present.

While The Jockey Club has been conservative it ever has been progressive. Slowly, steadily, step by step, the sport has gone forward under its aegis, and at every step forward made in actual racing a step forward has been made in every department of the turf. It is to the government of actual racing that the breeding interests owe their present satisfactory

condition and it is to the government of actual racing that the men composing The Jockey Club have given liberally of their time, their talents and their means. Every turfman in the East recognizes this, and the same thing may be said of the turfmen of the country. Under the rule of The Jockey Club, a new confidence in the sport was begotten; a thousand and one improvements were made and the public flocked to the race tracks in numbers such as never had been known before. When the old Ives Pool law was abrogated, now nearly ten years ago, turfmen thought that they saw the beginning of the finish of the sport in this State and looked fearfully toward the future. It seemed as if the whole racing fabric must crumble, and fall like a house of cards. Then it was that the men composing The Jockey Club, with Mr. August Belmont at their head, laid their hands to the helm with a will, and in the face of seemingly insurmountable obstacles steered the turf-ship into safe harbor.

The passage of the Percy-Gray law was looked upon as an experiment at best. It was feared that with the abolition of the old style of bookmaking the public could not be induced to attend the race tracks in numbers sufficient to support a meeting that would be anything like what they had known or that it would be anything like first-class. The season of 1895 was a dark one for the racing associations, and to them it must have seemed indeed as if it were better that racing had been abolished altogether. Out of this season of travail, however, was born a degree of public confidence which has grown and increased steadily year by year until now the sport commands an unparalleled measure of public support. With increased confidence came an increased and ever-growing attendance, which made the season of 1902 the most prosperous as well as the most popular in the history of the racing associations of New York.—*Daily America*.

If the reports sent up from New Orleans concerning the heavy losses of the bookmakers were true they would be bankrupt long ago. Tales of enormous winnings by the plungers who are at the Louisiana track are being published from time to time. Not one-tenth of the money claimed to have been taken out of the ring of late has actually been lost. Any time an owner wishes to pull off a coup his money is bet away from the track. It takes a very small sum to force the price of a horse down at New Orleans, and the play is seldom made at the track.

The result of the Burns Handicap of 1903 was a duplication of last year's race, when the rich stake was taken by a rank outsider, with the public favorite in second place. The condition of the track and the severe rain fall were the cause of the poor showing made by many of the contestants in the race. Nine teen horses were sent to the post, at which time the Morris entry of Cunard and Durazzo ruled favorite at threees. After a short delay Starter Holtman caught his field in line and the most important event of the season was on. The Fretter, Cunard and Horton showed momentarily in front but the running was quickly taken up by Yellowtail, who passed the grandstand a length in the lead with Eonic and Elliott heads apart in second place with the field strung out behind them. Yellowtail maintained his lead until the three-quarters pole where he stopped to nothing, and Cunard commenced to forge his way to the front. The Morris horse was here interfered with and obliged to pull up and go around two horses, which probably cost him the race, as Horton came through with a great burst of speed and getting clear sailing won quite handily by an open length with Cunard second, on which Claude was lapped for third place. Claude ran a remarkably good game race and was a prominent contender throughout and had he not lost a plate in the stretch run might have been closer up. At that Horton was probably the best at the weights and in the going that prevailed. Horton is a genuine California product, having been bred by the late B. C. Holly at his Floden ranch and is by El Rayo from Fusillade's Last, both of which animals, as well as Oswald Bianchi, the trainer and owner of Horton, were old stand bys at the Bay District track years ago.

As the season advances and the two year olds are getting better educated to the racing game, they are running to much better advantage than heretofore, and the entries from Green B. Morris' stable are not such good things as they were in the earlier races of the season. Boxwood and Planet in their last races came dangerously near to defeat although considered one to two shots in the betting.

Kenilworth again proved himself a good and game race horse on Tuesday when he shouldered 130 lbs, and ran seven furlongs in 1:28 defeating a field of first class sprinters with consummate ease. Shaw rode a perfect race on the brown horse allowing Beau Ormonde to set the pace until the stretch was reached

when he let Kenilworth down and won by a neck, galloping. Ethylene and Princess Titania ran disappointing races. Had Kenilworth received the same kind of a ride from Burns in his previous essay when he carried 135 lbs. and was defeated by Slave and Byron Rose he would doubtless have won on that occasion. As it was Burns made the running head and head with the light weighted three year old and the fast early pace was the cause of his defeat.

Slave the imp. Ayrshire colt which Mr. Morris bought last summer for a large amount, finally graduated from the maiden class last week at Emeryville. Mr. Morris was quite disappointed at the fact that he did not get a long price in the betting ring about him. He was more successful, however, in his next start when he backed his horse heavily at six and seven to one to beat Kenilworth and Byron Rose, a feat which he accomplished in race horse fashion.

The transfer of the scene of racing from Oakland to Ingleside was probably responsible for the bad card offered to race goers on Saturday last, this was unfortunate as an unusually large crowd was in attendance to see the Burns handicap run off.

Yellowtail was much fancied by his stable connections and also had quite a following from the general public in the Burns handicap, just why this was so it is hard to understand as he has never shown any inclination to go the distance in good company.

John A. Drake, the Chicago millionaire, who has been very successful in racing, is registered at the Palace Hotel. Mr. Drake and his racing partners own Wyeth, winner of the American Derby last spring, and also Savable, the last Futurity winner, as well as other good horses. Mr. Drake is one of the heaviest bettors in the country.

Among the foals which have been dropped at J. B. Haggins' Rancho del Paso are two colts from which great things will be expected. Both are by Watercross and the dam of one is Pearl V., daughter of Salvator and Firenze, while the other is from Fleurette, a full sister to the great Firenze.

It looks very much as if Jockey Buchanan was down and out for good. When the stewards at New Orleans restricted his mounts to the Hildreth horses he had a chance to redeem himself, but he failed to avail himself of the opportunity. Now when Hildreth openly accuses him of pulling Telamon the privileges of the track have been denied him, which amounts to a final dismissal from the turf.

Willie Waldo does not seem to be riding to the best advantage for G. B. Morris, his showing with Gold Van on Monday cost him the race, while on Tuesday it looked as if he certainly should have been second with Gravina had he not taken the overland route.

Hermencia seems to have regained his Chicago form of last summer and will be hard to beat from now on.

Pittsburg Phil, as Geo. H. Smith of New York is commonly known, made his arrival here on Wednesday last and will make a short stay during the racing season. It is not believed that he will do much betting as he expressed himself very strongly about the impossibility of beating California racing when he was here five years ago.

## EFFECTUAL

The most effectual remedy in use for the cure of ailments of horses and cattle is

## GOMBAULT'S CAUSTIC BALSAM

Used as a Blister or Lotion.

This preferred remedy is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

## ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

### The Fish Bill.

The bill introduced and passed by both houses of the Legislature, and signed by the Governor for signature, embodies some valuable changes from the old law and also retains the most valuable features of the previous statute. That this bill will be signed is almost a foregone conclusion. It has the endorsement of 90% of the law makers, the friendly regard of the Governor and is looked upon as a good bill by every one interested, excepting that these fishermen and a powerful lobby in their interests. The provisions intended to curb the reckless destruction of marine life by these Oceanians is worth millions of dollars directly and indirectly to our common wealth. In the same category the rapacity of other commercial fishing interests has been curtailed.

The season on striped bass is open all the year, and the weight limit has been placed again at three pounds. This is a good move for the protection of this valuable and game fish, either or all of the months of February, March and April, the principal spawning months of the bass, could have been closed without detriment to any interest, sporting or commercial. The close seasons for black bass, lobsters, crawfish and shrimps are unchanged.

There is a close season of two months, a wise provision, placed on crabs. A size limit has been fixed for crabs, lobsters, crawfish and abalones. The taking at any time of female crabs, female lobsters and sturgeon is prohibited. The taking and destroying of young fish is also prohibited.

All fines imposed for violation of the law will be paid into the "Fish Commission fund." This will expedite the settlement of prosecution expenses.

The season on trout is the same with the exception of a close season on steelhead, above tide water, from February 1st to April 1st and from September 10th till October 16th. Steelhead may be taken in tide water, with lawful net, unsecured, and by hook and line, at any time except between February 1st and April 1st and September 30th and October 16th.

Section 624, relating to salmon fishing, was not changed. Section 635 prohibits the placing of substances in the waters of the State deleterious to fish life. There is a distinction made so that suit for violation of this section can be brought by the State officials or the Fish Commission, as is necessary. The amount of fine and imprisonment for violation of the law is placed at a minimum, leaving free scope for adequate or cumulative penalties to be imposed upon persistent violators.

The full text of the new law and changes are as follows:

Section 628. Every person who, between the first day of January and the first day of July of each year, buys, sells, takes, catches, or has in his possession any black bass; or, who, between the first day of April and the fifteenth day of August of each year, buys, sells, takes, catches, or has in his possession any lobster or crawfish; or who, between the first day of May and the first day of September of each year, buys, sells, takes, catches, kills, or has in his possession any shrimp; or who, between the first day of September and the first day of November of each year, buys, sells, takes, catches, kills, or has in his possession any crab; or who, at any time buys, sells, takes, catches, kills, or has in his possession any striped bass of less than three pounds in weight, or any lobster or crawfish of less than nine and one-half inches in length, measured from one extremity to the other, exclusive of legs, claws or feelers; or any sturgeon, or any egg-bearing female lobster, or any female crab, or any crab which shall measure less than six inches across the back, or any abalone shells, or abalones, the shell of which shall measure less than fifteen inches around the outer edge of the shell; or who, by seine or other means, catches the young fish of any species, and does not immediately return the same to the water alive; or who buys, sells, or offers for sale, or has in his possession, any such fish, whether fresh or dried; or who catches, takes, kills, or carries away any fish from any pond or reservoir belonging to, or controlled by, the board of fish commissioners, or any person or corporation, without the consent of the owners thereof, which pond or reservoir has been stocked with fish; or who, except with hook and line, takes, catches, or kills any black bass, whatsoever, or any kind of fish, from any river or stream upon which the State or the United States fish hatchery is maintained, is guilty of a misdemeanor, and punishable by a fine not less than twenty dollars nor more than five hundred dollars, or by imprisonment in the county jail not less than two nor more than one hundred and fifty days, or by both such fine and imprisonment. All fines collected for any violation of any of the provisions of this section must be paid into the State Treasury to the credit of the "Fish Commission fund." Nothing in this section prohibits the United States Fish Commission and the Fish Commission of this State from taking at all times such fish as they deem necessary for the purpose of artificial hatching. It is no defense in a prosecution for a violation of any of the provisions of this section that the fish were caught or taken outside, or within, this State.

Section 629. Any person or persons, corporation or corporations, owning, in whole or in part, or leasing, operating, or having in charge any mill race, irrigating ditch, or canal taking or receiving its waters from any river, creek, stream, or lake in which fish have been placed, or may exist, shall put, or caused to be put, and maintain, over the inlet of said ditch, race, or mill race, a screen of such construction and mesh strength, and quality as shall prevent any fish from entering such ditch, canal, or mill race,

when required to do so by the state board of fish commissioners, and any person or corporation violating any of the provisions of this section, or who shall neglect or refuse to put up or maintain such screen, shall be guilty of a misdemeanor, and, upon conviction thereof, shall be punished by a fine of not less than twenty dollars or imprisoned in the county jail of the county in which the conviction shall be had not less than ten days, or by both such fine and imprisonment; and all fines imposed and collected for violation of any of the provisions of this section shall be paid into the State Treasury to the credit of the "Fish Commission fund;" provided, that the continuance from day to day of the neglect or refusal, after notification in writing by the Fish Commissioners, shall constitute a separate offense.

Section 632. Every person who, between the first day of November in any year and the first day of April of the year following, buys, sells, takes, catches, kills, or has in his possession, any variety of trout, except steelhead trout (*Salmo gairdneri*); or who, between the first day of February and the first day of April; or between the tenth day of September and the sixteenth day of October of each year, buys, sells, takes, catches, or has in his possession, any steelhead trout (*Salmo gairdneri*); or who, between the first day of November and the first day of April of the year following, takes, kills or catches any steelhead trout above tide water; or who, at any time, buys, sells, or offers for sale, any trout of less than one-half pound weight, or takes or catches any trout except with hook and line, is guilty of a misdemeanor; provided, however, that steelhead trout (*Salmo gairdneri*) may be taken in tide water between the first day of April and the tenth day of September of each year, and between the sixteenth day of October and the first day of February of the following year, with lawful nets; and a lawful net is a net that when placed in the water is unsecured and free to drift with the current or tide, and the meshes of which are, when drawn closely together and measured inside the knot, not less than seven and one-half inches in length. Every person found guilty of any violation of any of the provisions of this section must be fined in a sum of not less than twenty dollars or be imprisoned in the county jail in the county not less than ten days, or be punished by both such fine and imprisonment, and all fines collected for any violation of any of the provisions of this section must be paid into the State Treasury to the credit of the "Fish Commission fund." Nothing in this section prohibits the United States Fish Commission and the Fish Commission of this State from taking at all times such trout as they deem necessary for the purpose of propagation.

Section 635. Every person who places or causes to be placed in any of the waters of this State, dynamite, gunpowder, or other explosive compound, for the purpose of killing or taking fish; or who takes, procures, kills, or destroys any fish of any kind by means of explosives; or who places or allows to pass, or who places where it can pass into any of the waters of this State, any lime, gas, tar, cocculus indicus, slag, sawdust, shavings, slabs, edgings, mill or factory refuse, or any substance deleterious to fish, is guilty of a misdemeanor, and is punished by a fine of not less than two hundred and fifty dollars, or by imprisonment in the county jail in the county in which the conviction is had, not less than one hundred and twenty-five days, or by both such fine and imprisonment; and all fines imposed and collected for any violation of any of the provisions of this section shall be paid into the State Treasury to the credit of the "Fish Commission fund."

Section 637. It shall be the duty of the State Board of Fish Commissioners to examine, from time to time, all dams and artificial obstructions in all rivers and streams in this State naturally frequented by salmon, shad, and other migratory fish; and if, in their opinion, there is not free passage for fish over or around any dam or artificial obstruction, to notify the owners or occupants thereof to provide the same, within a specified time, with a durable and efficient fishway, of such form and capacity, and in such location as shall be determined by the Fish Commissioners, or persons authorized by them, and said fishway must be completed by the owners or occupants of such dam or artificial obstruction to the satisfaction of said Commissioners, within the time specified; and it shall be incumbent upon the owners or occupants of all dams or artificial obstructions, where the State Board of Fish Commissioners require such fishways to be provided, to keep the same in repair and open and free from obstructions to the passage of fish at all times; and no person shall willfully destroy, injure, or obstruct any such fishway, or at any time take or catch any salmon, shad, or other migratory fish or trout, except by hook and line within three hundred feet of any fishway required by the State Board of Fish Commissioners to be provided and kept open, or at any time take or catch any fish in any manner within fifty feet of such fishway; and every person violating any of the provisions of this act is guilty of a misdemeanor, and every person found guilty of a violation of any of the provisions of this act must be fined in a sum not less than one hundred dollars, or imprisoned in the county jail of the county in which the conviction shall be had not less than fifty days, or by both such fine and imprisonment; and all fines imposed and collected for any violations of the provisions of this act shall be paid into the State Treasury to the credit of the "Fish Commission fund."

Section 6. All acts or parts of acts in conflict with this act are hereby repealed.

Section 7. This act takes effect immediately.

### Salt Water Fishing at New Zealand.

During a visit to Akaroa, New Zealand, I accepted an invitation to join two friends in a day's deep sea fishing, narrated a Christchurch angler to several brother sportsmen. Our vessel was a cutter-rigged, half-decked craft of about three tons, with plenty of beam, and fitted with a centre-board.

In ordinary weather one man could work her, as the head sheets led conveniently aft, but in this land of high hills and squalls very careful handling is necessary; and two, or even three, strong experienced men occasionally find their hands full in boats of this size.

After a lull, perhaps, in which your boat almost loses way, a sudden puff will whistle down some ravine, and before she can be luffed up, or sheets or halliards let go, her lee gunwale will be under. However, on the occasion in question we left our moorings off the jetty at half-past four A. M., with scarcely enough wind to move us; and despite occasional cat-paws, it was principally the ebb-tide which took us the first six miles of our journey.

Early birds were we, and we had our reward, for on opening Green point we had a clear view past wooded spur and headland, past lovely bays innumerable, out through the lofty heads to where, soon after five, the sun mounted over the eastern sea ridge.

Sun rises have been described *ad nauseum*, so let us get on over the heaving oily swell as fast as the north-west flaws will take us; but the memories of lovely lights and shadows, of keen, exhilarating freshness of air, the smell of the sea weed laden reefs, now rapidly showing their fangs, and of their aromatic bush scents, will long linger round that morning.

Soon after sunrise the airs from the land died away, and a light but steady southeasterly sea breeze set in. Down went the centre-board, sheets were flattened, and we made the half dozen boards necessary to reach our ground.

The spot chosen was some three miles outside the South Head, and we dropped our "mud-hook" in about seventeen fathoms on a sandy bank. Our idea was to fish on the last of the ebb, and first half of the flood. However, from half past seven until nine (when the tide turned) no bites did we get except from dog-fish, whose presence was in itself fairly conclusive evidence of the absence of anything else.

Our tackle for hapuka (more commonly called groper) consisted of stout hand lines of nearly twenty fathoms length, heavily weighted, and armed with single hooks weighing six or eight ounces. These hooks are specially made—generally by the local blacksmiths—having a peculiar curve and barb, adapted to the sidelong rush of this preying fish.

Bait consisted of mussels, cray fish, or a small rock-cod, lashed on the hook as your hapuka is not particular if hungry. Lucky was it that all three of us were well seasoned to the "briny," as the motion of a small boat, anchored in a seaway, is to say the least, peculiar, and many who in vocal enthusiasm demand a "life on the ocean wave" would have found ten minutes in that boat ample.

No calmer morning could have been chosen—the sea to an observer off the South Head would appear like glass to the horizon—but even the sluggish lift of the groundswell, is violent to an anchored craft.

With the first of the flood at nine came a bite from our real quarry, and all disagreeables were forgotten instantly.

B.'s line, with one turn around a thole-pin, had its sinker just clear of the bottom, when a sudden pull took out several additional yards. Groper rushed at the bait like tigers, but when the first effort is expended seldom fight much. It must, however, be remembered, before branding the fish as a coward, that the drag of about twenty fathom of wet heavy line, hook and sinker, etc., has to be borne by him wherever he rushes. It would be a vastly different matter hooking him in, say, six feet of water. I have heard of men sitting carelessly on the gunwale, having been pulled overboard by groper, but do not vouch for this, though I think it likely enough.

B.'s first fish is hauled in more by strength than science, and eventually proves a forty-six pounder. S. hauls up a lirr, and then another, each about four feet long.

After half an hour without bites we are once more cheered by the rush of the helines, and I manage to land, or rather "boat," a seventy-five pound hapuka, but not without help from my mates.

It is the largest we got that day, though ninety and one-hundred pounds are not uncommon fish.

S. and B. (not B. and S.) are soon simultaneously tugging and straining on opposite sides of the boat, and each kills a fish of sixty or seventy pounds. Then another ling and two more hapuka follow in fairly quick succession, after which no notice is taken of our lines, bait we never so wisely.

Gaffing groper is unnecessary, so strong is the tackle and horny the membranes of the fish that all hands may join in the tug, and once-booked, they never escape.

Like many New Zealand sea fish (except frost fish and flounders or sole) they are hard and tasteless, though the head and shoulders with oyster sauce are fairly palatable.

Their size and easy capture rendered them a valuable food supply to the natives in times when the latter were not quite so lazy as at present.

They dried them in strips in the sun—dipping each strip once per diem in the sea—during which process it was more advisable to pass to windward than to leeward of the delicacy.

During our lunch (under the lee of a tarpaulin spread over the lowered gaff) a steady exodus of one line causes S. to investigate, and he hauls up a ten-pound conger, which needs to be fairly cut open before the huge hook is released.

Both my companions are old Peninsula "shellbacks,"

and lying here midst the very scenes they tell many a yarn of the days of old.

The loss of Captain Hawtrey's Coquette, and the memorable pull of the six Wright brothers in a whaleboat from Akaroa to Peraki and back as a search party; the wreck of the ketch Crest, when three survivors lingered in a cave for nearly two days before they succumbed; and many another tale of disaster and loss, but also of bravery and unselfish help, associated with these scenes, pass the time.

Out here one realizes, even in the calmest weather, the awful and relentless power of the open sea. What must it be like when, instead of lapping lazily on its kelp fringed reef, it is soaring sixty feet up those giant cliffs?

About two we "up kellick" and let her drift a mile nearer shore, with the flood and last of the easterly breeze. Our new station proved more advantageous, and eight more hapuka, averaging sixty-five pounds, rewarded our exertions. By four o'clock we were all tired and cramped and longing for shore and a "tub." It is tiring work to an amateur, fishing on a heaving ground swell—with heavy tackle and big fish—then the mingled odors—glare of the sunlight, screaming of the gulls—all go to show that even with good sport life is not "all beer and skittles." Still, it was a thoroughly enjoyable day. Soon after four we got under way for Akaroa, and after a drifting match to the heads took to the oars. "We should have brought the whaleboat," says B., and she certainly would have been much lighter. A few friendly puffs give us a rest again, and before seven we are at our moorings, from which several trips of the dingy are necessary to land ourselves and our eight hundred weight odd of fish.

#### Victoria Kennel Club.

At a meeting of the Victoria City Kennel Club, held February 7th, the following new members were elected: Mrs. W. F. Hall, Miss Norma Hall, Miss Skinner, Mrs. A. G. Davies, Mrs. H. E. Davies, Mrs. T. P. McConnell, Mrs. C. A. Goodwin, Mr. W. Atkins, Mr. A. Daniels, Mr. E. E. Leeson, Mr. G. J. Dunn, Mr. G. J. Dunn, Mr. G. Gillespie, Mr. J. B. Green, Mr. T. Dicks.

The club also appointed committees to complete arrangements for their big show in April. Dr. Wesley Mills, of Montreal, has been secured to judge all classes. The secretary, T. P. McConnell, will arrange a large list of prizes and premiums for competition.

It was agreed by the members present to give a tombola prize every night at the show. Under this arrangement Secretary McConnell will give an English Setter puppy and President Creighton will give a Cocker Spaniel puppy. It was further agreed to give cash prizes of \$3 and \$2 in limit and novice classes, besides diplomas, silver cups and premiums of various kinds for other awards. Mr. T. Turner will proceed on a special canvassing trip to Vancouver, New Westminster and Nanaimo to work up entries from those cities; the club will pay \$1 per dog to handlers from outside cities.

We saw Champion Woodcote Wonder at Woodlawn Kennels one day this week. "Ben" is in wonderful fettle and playful as a kitten. Since his advent on the Coast he has sired a number of prize winners and is undoubtedly the best Bull Terrier stud on the Coast. For keeping in style and condition he is indeed a wonder. His potency has been signally proven by big litters of strong puppies. His smallest litter, so far here, has been one of six puppies out of American Belle—her first whelping to Wonder was ten puppies. Newmarket Queen whelped nine pups to him twice, Nancy whelped nine and seven respectively in two litters. Jos. T. Cooney sent his bitch Richmond Lassie down from Humboldt county; a litter of seven was the result of the visit.

The medals for the Oakland show are handsomely designed and neat. The medal for best in the show, won by Wande Kennels' Mayse, is of solid gold, dead finished, having a remarkably well carved head of Ch. Woodcote Wonder on one side in high relief, with the words Oakland Kennel Club circling the edge, the reverse side is smooth and polished, so that it may be engraved properly. The other medals, in silver and bronze, are fac similes of the one awarded Mr. Harley's bitch.

In answer to several communications anent the article last week defining the rights of farmers, fruit-growers, etc., in protecting crops or fruit from the destructive visits of wild animals—deer, wild ducks, quail, etc., and the killing of the same during the close season, we will add: That, should it become necessary for a person to use firearms, or other weapons, and kill wild game, in the protection of property, during close season or in such number as would exceed the legal limit, or killing animals protected usually by statute by reason of sex or age, there is a chance for one to come legitimately within the pale of the law should a disposition of the dead game bird, animal or skin be afterwards so made as to make a charge of illegal possession tenable. Let the dead birds or killed deer remain where they have fallen, bury them, turn the bogs or dogs in to feed—or in fact dispose of the killed game in any sanitary or protective manner such as would be done in the case of a defunct domestic animal. This course will estop any legal proceedings for violation of the game law. Any disposition of game killed under the conditions mentioned such as is practiced by sportsmen in open season is clearly a violation of the game laws. Let the game go to waste or use it for fertilizing, where it falls, to be on the safe side.

Fish and game affairs have been looked after in Sacramento by many sportsmen and others interested. Chief Deputy Fish Commissioner Vogelsang has had a number of "roastings" in the columns of various journals for his active campaign at the capitol. If these were fair samples, just imagine what would have happened had not "Dustproof Harry" been bottled up.

#### Tiger Hunting in Burmah.

The habitat of the tiger is not confined entirely to the jungles of India. Stripes can be found by the sportsman in Corea and Manchuria, in China and the Thibetan recesses of the Himalayas. In Java, Sumatra and Borneo the royal beast can be found in numbers sufficient to give much sport to the hunter. Recent tradition hath it that some very large and ferocious specimens of the genus *Tigris regalis* are to be found in the wild and unexplored jungles of the island of New Guinea. The interior of Java is said to be the home of an extra sized tiger also. The following story taken from the *Asian* is typical of an Indian tiger hunt had in an unexpected quarter:

My two shikaris were very anxious for me to make a short expedition a little north of our former route, where they were both to some extent acquainted with the country, one of them being a native of those parts, although he had not been back there for some years, while the other, Moun Hpe, had, during the time I was laid up, gone off there for a week, having nothing else to do, in order to make inquiries concerning the prospects of sport. As I was now quite recovered and had no need to return to the river for a couple of weeks more, I thought I might employ the time profitably by taking their advice. On reaching the village through which the trade route passed, I found my shikari (hunter) and baggage, the former very anxious to be off on the next march, for, as he said, we must hurry up, if we wanted to do any good on the ground. I had made, however, a long march that day, and was not feeling fit enough to make a double one, so I had reluctantly to decide to halt there the night.

Towards evening Moun Hpe came in with the news that a Shans caravan had just arrived, and the Shans had told him that one march to the northwest, during the halt of the previous night, they had lost two bullocks, taken off by tigers. I was rather sceptical about it myself, as tigers are very rare in this part of the country, but in order to satisfy Moun Hpe, I sent for the headman of the caravan and questioned him. After our interview I was somewhat more convinced, for the man seemed quite positive about it, and even offered to return, if I wished, and show me the place. I decided then to accept his offer, for I was far keener on getting a tiger than another time or even a bison, which were what we were going after previously, so the following morning by daybreak we left the village, myself, the two shikaris and the Shan, whom I had taken at his word.

We had a longish march over very broken country, but the road was fairly good, and after two short halts arrived at the "sakan" or halting place, where the bullocks were said to have been killed. After some search we certainly found the carcass of one, a large portion of it eaten, and, from the tracks around, there was no doubt it was the work of a tiger. We could not tell, however, whether there was more than one or not, and no trace could be found in a somewhat hasty search—for time was precious—of the second bullock. I at once sent back Moun Hpe to the village to bring out as many beaters as he could possibly collect, and congratulated myself that I had already arranged with the Thugyi to have them waiting in case they were wanted, for otherwise I should not have got any. It was now nearly eleven, and I hoped that by one or two the beaters would have arrived and we could beat for tigers that evening. The place where the carcass was found was on the side of a long and rather heavily wooded nullah, running parallel to the road. A stream was at the bottom of this nullah and it appeared to me a very likely place for the tiger to lie up in the heat of the day, provided he was still in the neighborhood.

We prospected this nullah (ravine), both up and down, keeping well up on the hillside, and after deliberation with my second shikari we determined to beat the nullah upstream, and then set about erecting a machan (a seat or platform in the upper part of a tree) at the further end, from which a good view of the bed and sides of the nullah were obtainable. This took us some considerable time, and on our return to the "sakan," we found Moun Hpe had returned with some twenty beaters only, but he said that more were coming and would arrive shortly. Nothing could be done then, at present, so I set to work to eat some food which had also been brought out from the village for me, and which I was badly in want of, having had nothing since early morning, and still feeling a little off color from the effects of my late fever. About three, several more coolies had arrived, making some thirty-five in all—none too many for the nullah to be beaten. After giving explicit instructions to Moun Hpe I sent him with all the coolies, except five, well down the nullah, and these five I myself placed as stops (men stationed, generally in trees, for the purpose of preventing the quarry from running away from the line of the sportsman's post. A noise, such as the breaking of a small stick, etc., being usually sufficient to turn such a wary animal as a tiger back toward the desired point when it is trying to circumvent the beaters by quartering away from the pursuit).

I had to make most of the arrangements myself, as Burman villagers are not so used to beating for game as Indian ones are, and the country being new to him, Moun Hpe was not of much assistance. At last, however, all was in train, and telling Moun Hpe to give me half an hour to reach my machan before commencing to beat, I started to take up my position. I cannot say I was very sanguine of the result for I had beaten for tiger once or twice before in Burmah and had had no luck, indeed, I had generally found beating for any sort of game in this country not so effective as stalking—I refer to big game, of course.

At last the beat commenced, and I could hear the distant cries and shouts of the coolies. For some time they appeared to make no progress, but to remain stationary. Once the cries ceased altogether, and I was afraid the whole thing was going to be a failure, and I was beginning to anathematize the coolies, the headman and the shikari, when the cries again

sounded, and the beat now approached. About half the distance had been completed and I could see several of the coolies on the more open portions of the nullah's sides, when a tremendous outburst of shouts and cries notified to me that game of some sort was on foot. However, as the sight of a hare or a barking deer will always cause as much excitement amongst a lot of Burmans, when beating, as a leopard or even a tiger does, I still felt far from certain that Master Stripes was really at home.

The most difficult portion of the nullah yet remained to be done, for the undergrowth was thicker at my end. My second shikari was with me in the machan, and all at once he said, "Yah-byi," "Yah-byi" (coming, coming). I looked towards where he pointed, but could see nothing. Just then, however, a stop that was about 150 yards to my left front began to shout and scream, until I thought the tiger, if there was one, must have got hold of him, but I saw him a moment later gesticulating wildly and pointing in my direction. I was now beginning to get a little excited myself, for my shikari assured me there was a tiger in the beat. Suddenly as I was watching a clump of grass straight to my front, as I had fancied I saw a movement in it, my doubts were removed once and for all, for a fine tiger emerged cautiously from the grass and with backward glances right and left slowly advanced towards me. He was too far off, however, and another still larger clump of grass intervened, which he entered.

A few minutes elapsed, during which the beaters' cries sounded nearer and nearer, when my shikari quickly touched my arm and pointed to the grass. I then saw movement in it, and could see the progress of the animal through it, although he himself was invisible. I made ready for a shot, however, but on reaching the edge he stopped and after a moment's delay I saw him slowly come out and slouch round the further edge. I had just time for a shot and fired at him. He gave a tremendous roar and turned over, rising again at once and making off diagonally across my front. This gave me an elegant chance, which I took advantage of and let him have the left barrel in the shoulder, which disabled him, and after a few struggles he lay quite still. Each of my shots was heralded by a terrific outburst of shouts from the beaters, for, in spite of all instructions, you cannot prevent Burmans from yelling like demons when they see game or hear a shot. The beat was not completed yet, however, and I would not allow my shikari to descend as he was anxious to do. About 150 yards of thickish jungle remained now to be beaten, when the same stop, who had viewed the first tiger, gave a second shout and incontinently bolted up the nullah's side. I saw a flash of yellow not ten yards behind him and fired at once on the off-chance of hitting the tiger, which was making for the coolie. It turned him, at any rate, for the stop was safe in a tree and no sign of the tiger near him. However, the beaters were coming on well now and I made sure of getting another shot, and sure enough I did, for a moment later I spied the beast making up the side of the nullah to my left. He stood for one second only and I gave him my right barrel again at only forty yards or rather less, but to my disgust thought I had missed, for he bounded off and disappeared in a small clump of jungle.

Some of the beaters were now close to me, so I directed them to stop, and descending, took Moun Hpe, who had also arrived to examine the spot where I had last seen the tiger. We found a good blood trail, so I had hit him, and just then the coolie shouted from his tree top that he could see him. He said he was dead, but refused to budge from his point of vantage and show us the place. At last Moun Hpe also mounted the tree and called to me that the tiger was lying dead. He quickly came down, and accompanied by me, ascended the hillside some thirty yards, and there was the tigress—for such it was—quite dead. My first shot had grazed her head, I found, and no doubt turned her, while the second had passed through her lungs.

As I was examining the dead tigress, I heard a sudden shout from behind, and a roar accompanied by cries from several of the beaters. Thinking there must be still another tiger I ran back, but met the headman, who told me that the first tiger was not dead, but had mauled some one. I ran quickly to where I had last seen the beast and found he had certainly moved off. There was such a row going on that I could not obtain any intelligence, but at last ascertained that the tiger had revived and had mauled a beater and made off into the grass. This was bad news, but I called off all the coolies and with my two shikaris proceeded cautiously to examine the nearest jungle. About twenty yards beyond I saw something move. Then there was a low growl, and I saw the tiger watching me and looking very vicious. I had to move slightly to the left to get a shot, and then fired again straight at his chest. He must have been within an ace of springing at me, for he reared straight up and then fell over, dead enough this time.

We went back to find the wounded coolie and discovered it was a false alarm. The tiger had dashed towards a beater, but had passed him without touching him. I was very pleased to hear this, for had there been any mishap, I should never have induced the villagers to beat again; it is, indeed, often hard to persuade them to beat for dangerous game at any time. We now proceeded to the tiger and got him slung on a pole, the tigress having previously been similarly disposed of, and in a long procession returned to the village. Every man, woman and child came out to meet us, as well as a large number of caravan bullock men who were halted there. All were loud in their expressions of delight and wonder at seeing the two tigers, and declared that no other thakin (sahib) had previously ever fired even at a tiger in that district. I was very pleased myself, for tigers are rare in Burmah and to get two was indeed luck.

Mr. Harrison offers a crack Greyhound for sale in our classified "ads." The dog is sixteen months old and well bred and should make, under proper training, a record on the coursing sward.

## Kennel Suggestions.

## SHOWING DOGS.

Continuing THE KENNELMAN'S timely and interesting story from last week he writes: An Irish Terrier, Airedale or wire haired Fox Terrier's coat must be taken in hand some weeks before the event, unless the coat is always kept in trim by daily going over with thumb and comb. This is a duty that few kennelmen will, however, see to, and coats are generally left to run until needed. Much, of course, depends upon the natural coat. If it is one of those softish, thin coats, that goes to length with little undercoat, it is only possible to exhibit the dog two or three times a year in clean cut form. If it is a Terrier with what is termed a good natural coat, a comb and a little thumbing on the skull and about the flaps, below the eyes and around the ears, will be all that is necessary, and the body and legs are gone over with the terriercomb every day or two. These sort are, unhappily, very scarce, for most rough Terriers run to hair. In taking a Terrier in the rough, the general plan, modified according to the experience one has of the possibilities of the individual coat, is to remove all hair down to the soft pile that generally is found under the outer coat (some dogs do not have this), from the shoulder point to the tip of tail, from two weeks to a month before the same is done to the head, neck and shoulders, for on the latter part the hair grows quickest and if the time is well gauged the dog will then show a good, hard, new coat on the body, enough for the judge's fingers to go through, and the neck and shoulders will be just nicely clothed with short hair, thus leaving the dog's natural contour clean and distinct.

As a rule this treatment should be commenced at least six weeks or two months before the show and some slow Terriers require three months' probation. Never put oil or any such unguent on the coat to hasten its growth, or you will soften its texture and this also tends to make it grow unevenly. Allow it to grow naturally. When washing day comes, some smart men dust in a powder to stiffen the coat, or rather to dry it quickly, as the excuse goes, but this of course, must be brushed out before the dog goes in the ring, or there will be trouble. All this applies in pretty nearly the same degree to Scotch Terriers which as a rule are not put down as they ought to be, either having too much coat or not enough, in fact very much too little care is assumed in seeing that dogs are put down in proper show condition at our American shows, yet if the truth were realized, so much depends upon condition and correct coat.

Before touching upon the preparation of other breeds I will revert to the bait question. It is, like most good things, very likely to be abused. A chunk of liver in one man's hand may tire a dog to nothing and disgust him with the whole business, and the owner losing his temper (these are the men who usually do), yanks the dog up out of the resemblance to his true form. There is an art in the use of these baits, and it does not come with the opening of the ring gate or the loss of a piece by a friendly bystander. Presumed, as a foundation of action, that all dogs have their predilections in the way of tid-bits, in the expectation of which they will assume all sorts of eager and catchy attitudes. Some, in fact most dogs with healthy internals, dote on liver, and some others who never get it at home may be equally eager for a bit of plain raw meat, but liver is considered more fetching. Toy dogs may prefer chocolates or a malted milk tablet, or a cookie may excite them to much eagerness. But, whatever it is, it must be sparingly used and above all things the dog must be allowed to eat some of it, if only a thumb nail full. In this is constituted the art of showing. We see some fellows with a chunk of liver start up the pantomime of pertension directly they get into the ring, and keep it up until they or the class get the gate. The dog becomes tired of disappointments and sulks. A small piece is as good as a pound, but a handful of "peas" of it is better than either. There are kept in the pocket and taken out bit by bit, held enticingly an instant, then fed to the dog. This keeps him on the tiptoe all the time especially if he has a bit of appetite edge on, as all dogs should have that go in the ring, for no dog is gay with a full stomach after he gets his second elch.

In the case of a Terrier that is gone a bit in shoulder, it's a good dodge to train him at home to this expectant upward glance at your side pocket, for it keeps his elbows in and tightens up his shoulders, and if there is any chance to straighten him up, this does it. Of course, you don't show Bulldogs that way. Watch the judge; when he has his back turned rest your dog and stop the pantomime. It is, of course, better that this schooling should be gone through at home, so that with these tid-bits the Terrier may be trained to hold himself just as you want him to stand. Moreover, when thus engaged, he is not eternally seeking a fight with some other dog in the ring. Anything that will stop this scrapping in the ring should be welcomed. No Terrier is improved by it; it does not prove real gameness, and in many instances exposes weaknesses of form that otherwise would not be noticed. Moreover, the judge can form no idea of the relative merits of a lot of Terriers whose owners seem intent upon getting the best of each other through their dogs' hides, and if the A. K. C. can do anything to stop this nuisance by fine or disqualification of the offenders, let it be done.

Reverting to the use of bait, as indicated its use requires some head piece and a knowledge of the game. As a certain writer remarked finished ringcraft has more often decided a near thing than the dog themselves. Very occasionally, in the case of one who has been badly trained and is very violent on the lead, it is advisable to take some of the gas out of him; still, this is exceptional, and I have known only an owner spoil the chances of a Toy in the ring by rough trotting it about the whole of the morning, terrorizing other people for their opinion and calling them fools if they spoke the truth. If the animal has

been properly broken at home, he goes through the performance secundum artem, otherwise his chances are jeopardised, certainly diminished.

At the critical moment when, with the award hanging in the balance, the judge pulls out his book, if one is squatting on his haunches and the other standing like a statue with eyes intently glued on his owner's face or the motion of his hand, that judge would be less than human who did not give it to the dog who was literally asking for the money.

I should like to say another word about the use of baits in showing dogs off in the ring. As a rule handlers and others use plain boiled liver, very seldom is it fried, the most appetizing form in which the common every day liver can be fed. But there is a better liver than all—chicken liver. As usually handled, the hunk of liver is an unsightly, uncleanly morsel that the fastidious person will usually wrap up and so lose half its "keenness." Not so with chicken liver. Put this liver in a moderate oven and bake it hard. It is then like a piece of flint, will not soil your clothing or hands, and is always good, it will last a season—a year. When it gets the "edge off" scrape it with a knife and it is as good as new again. In temporary use a drop or two of anise or tincture of valerian makes it keener in its odor to some dogs.

All show dogs should have their teeth carefully examined before show time and as far as possible all marks of canker or tartar should be removed. Nothing upsets some judges' opinion so instantly as a poor mouth and many of them become so through neglect of mere ordinary precautions. The tarter scale can be easily moved with pumice or a knife. Loose teeth, or those in the case of a young dog, not growing as they should do, must be attended to and removed if at all uncomfortable for the dog will never get into show bloom if he has an irritating mouth. See that his grinders are sound. Very often a dog will unaccountably slobber a good deal and refuse his feed just at a critical time. Look into his mouth and don't think it's indigestion. It may be a sliver of wood or bone that has run between the gum and the tooth, or a tooth may be broken. Therefore, as I say, it is best to examine mouths every day and in all cases once a week.

As a general foundation of action it is best in preparing a dog for show to examine him inside and out, and find out his appetite. Starting in from a winter's confinement it is very probable that he is soft and more or less sluggish. Therefore a physicing is indicated. Some pin their faith to castor oil, others to Epsom salts, then again a tablespoonful of syrup of buckthorn is favored, either will do what is requisite. It is not wise after this purging to slap food into the dog as one would coal into a furnace on a cold day. The dogs' internals are more or less upset and a little soup and soft soaked biscuit will be more pleasing, and will serve to keep the bowels open.

If the dog is fat this purging and the moderate diet following will reduce him, and if you continue to feed him hungry, that is feed just enough to make him lick up his dish eagerly, and exercise him according to his breed, he will soon round into shape. Gluttons for food if given all they will eat will generally grow thin on the parts you want most clothed with flesh, will run to belly and bloat, and you wonder why that razor back bone sticks up. The food is not assimilated and you must shut off the supplies and feed sparingly for a while.

Provided you can give enough exercise in the active breeds, a little raw meat will do good two or three times a week, or even more. It does not fatten and is the best food to keep up the system and put "ginger" into the show dog. A bad doer may be made to eat only with continued attention. He must be "kidded" to and kept going with tidbits, in which meat forms the basis; a little crumbled liver will give almost anything a fetching taste so that the dog will eat. When a dog will not eat willingly, eggs broken on the tongue will keep his strength up, but dogs in that condition are scarcely candidates for show, though on the circuit it is sometimes absolutely necessary to keep a dog going in that way. Take the dog's upper jaw in one hand, folding the lips between fingers and teeth, crack the egg on the lower incisors and deftly empty the contents down the dog's gullet. This requires some little practice but is an easy method of keeping a dog going. For dainty feeders, also Toys, sliced bullock's throtle boiled with rice and currants is often acceptable. In all of this, of course, circumstances must be judged by the owner or kennelman, and action taken accordingly. What will suit one dog will not do for another.

If a dog is in a weight class and there is doubt about his getting above the limit, feed raw meat the last day or two and before you start for the show give him oil. Then make sure you weigh in directly you reach the show, so that, should your dog go beyond the weight before judging, you are safe.

The well known Cocker Spaniel Ch. Omo, died from an abscess in the throat. He was owned by Mr. Bloodgood, proprietor of the Mepal Kennels, and he was by Ch. Black Duke ex Ch. Baby Ruth; black in color; whelped November 30, 1894; weighed 22 pounds and stood 11 inches high at the shoulder. A winner himself he was also sire of many prize winners.

We have frequent inquiries for foster mothers. It would pay some of our readers to place an "ad" in the classified column when in position to furnish the service of a bitch that can take care of a puppy or two. We can place some Boston puppies about the last week of this month.

Mr. Frank Leppo of Santa Rosa, recently lost a valuable Cocker Spaniel by poison.

The Westminster Kennel Club's twenty-seventh annual bench show opened on Wednesday in Madison Square Garden, New York, 1650 dogs were benched. St. Bernards, Newfoundlands and Toys started the judging.

## Notes on Up to Date Camping.

In "Camp Fires in the Wilderness," the author, Mr. E. W. Burt, has written a book which will be of inestimable value to the young sportsman, and which the veteran hunter cannot read without acquiring some information which will be of use to him on his hunting trips.

The book contains 164 pages and thirty-seven half-tone engravings, many of them full page, showing camp scenes, and beautiful bits of scenery in the wilds.

The first chapters of the book are devoted to "What to Take for Camping," and include lists of the necessary clothing, bedding, camp equipage, medicine, fishing tackle, cooking utensils, food, etc., and they are much more than mere lists, for they contain much valuable information in the art of being comfortable in the forests. Then follows a chapter on "Camp Locations," one on "Camp Receipts" and an extra list of supplies which are handy to have in camp.

Following these introductory chapters the author takes us to the "Headwaters of the Androscoggin River," entertains us with "Three Weeks in a Maine Log Cabin," tells us how a party "Saw the Megantic Preserve," "A 300-Mile Canoe Trip Through Maine and New Brunswick" acquaints the reader with a charming country for the lover of Mother Nature. "Explorations on the Great Lakes" is still another interesting chapter. "It is Worth While" is a chapter descriptive of a quiet and secluded spot hidden away among the spruce and northern pines of Maine. "One of those beautiful green gardens of Eden" the author calls it. A chapter describing "Some of the Wild Animals of Maine" and one on "How to build a Log Cabin" close a most interesting and valuable addition to the sportsman's library.

In closing the dedication of his book, the author writes: "To one who never did an unkind act, who loves woods and all the joys that Nature gives, I dedicate this book."

The book is handsomely gotten up, with an attractive cover, and is such a one as a book lover delights in adding to his library. Published by the National Sportsmen's Press, Boston, Mass.

## Kennel Registry.

## SALES.

Woodlawn Kennels sold to J. R. Rodgers (Spokane) the Bulldog puppy Woodlawn Trippo by Ch. Ivel Rustic-Dixie, Feb. 7, 1903.

John W. Considine (Seattle) sold to Jos. E. Terry (Sacramento) the English Setter bitch Iona S. (Ch. Lady's Count Gladstone-Jessie Rodfield) Jan. —, 1903.

## VISITS.

N. H. Hickman's Fox Terrier bitch Inaqua (Warren Safeguard-Warren Supply) to same owner's Norfolk Trueman (Ch. Norfolk Veracity-Norfolk Jewell) Feb. 7, 8, 1903.

J. C. Barrett's (San Jose) Irish Terrier bitch Tyrone Lass (William H. Wayman-Endcliffe Kitty) to Woodlawn Kennels' Endcliffe Paddler (Milton Wrinkles-Marion Nora) Feb. 10, 11, 1903.

J. G. Morgan's (Seattle) Bull Terrier bitch Pansy ( ) to Woodlawn Kennels' Ch Woodcote Wonder (Dulverton-Fan) Jan. 29, 30, 1903.

## Coming Events.

## Rod.

Feb. 28—Saturday Contest No. 1. Classification series. Stow lake, 2:30 p. m.

March 15—San Francisco Striped Bass Club Casting Tournament, Golden Gate Park

April 1—Sunday Contest No. 1. Classification series. Stow lake, 10 a. m.

April 1—Nov. 1—Trout season open.

Nov. 15—Sept. 10—Season open for taking salmon above tide water.

April 1—Feb. 1—Open season for taking steelhead in tidewater

## Gun

Feb. 22—Golden Gate Gun Club. Blue rock shoot. Ingleside.

July 1—Feb. 15—Dove season open.

July 15—Nov. 1—Deer season open.

Sept. 1—Feb. 15—Open season for mountain quail, grouse and sage hen.

Oct. 15—Feb. 15—Open season for quail, ducks, etc.

Oct. 15—Jan. 15—Open season on quail in Marin county.

## Bench Shows.

Feb. 10, 11, 12, 13—Westminster Kennel Club. 27th annual show. Madison Square Garden, New York. James Mortimer, Superintendent.

Feb. 18, 19, 20—New Jersey Kennel Association. Second annual show. Orange, N. J. C. G. Hopton, Secretary.

Feb. 19, 20, 21—Colorado Kennel Club. Denver, Col. W. H. Kerr, 1451 Arapahoe street.

Feb. 23, 24, 25, 26—New England Kennel Club. 19th annual show Boston, Mass. Wm. B. Emery, Secretary.

March 4, 5, 6, 7—Duquesne Kennel Club. Pittsburg, Pa. F. S. Stedman, Secretary. Lewis Building, Pittsburg.

March 10, 11, 12, 13—Rochester Kennel Club. Rochester, N. Y. W. J. Gram, Secretary, 701 Lake avenue.

March 11, 12, 13, 14—Coshocton Kennel Club. Coshocton, Ohio. F. V. Mizer, Secretary.

March 17, 18, 19, 20—Twin City Kennel Club. Uhrichsville, Ohio. C. S. Walker, Secretary.

March 35, 36, 37, 38—Chicago Kennel Club. Annual show. Mrs. John H. Naylor Secretary.

March 30, 31—St. Louis Collie Club. 5th annual show. St. Louis, Mo. John A. Long, Secretary.

March 31, April 1, 2, 3—Buffalo Kennel Club. Inaugural show. Buffalo, N. Y. Edw. P. Sharp, Secretary.

April 1, 2, 3, 4—Victoria City Kennel Club. 2d annual show, Victoria, B. C. T. P. McConnell, Secretary.

April 1, 2, 3, 4—Southwestern Kennel Club. Inaugural show New Orleans, La. John Dewhurst, Superintendent.

## Something for Nothing

The Polk Miller Drug Co., of Richmond, Va., are manufacturers of Sergeant's Dog Remedies, the most popular line of preparations, intended for dogs, on the market today, having received the highest endorsements of the leading dog men and kennel owners in this country and Canada. Read their advertisements appearing in the columns of our journal each issue. The firm referred to will mail you absolutely free, a copy of their celebrated book on Dogs if you will forward 3 cents to cover postage. If your dog is sick, write them, enclosing stamp, and describe the symptoms as accurately as you can. They will cheerfully furnish the best information on the subject without charge. F. W. Braun & Co., of Los Angeles, California, have recently been made distributing agents for Sergeant's Dog Remedies on the Pacific Coast.

## Relative Influence of Sire and Dam.

A reader asks whether in cross breeding sheep for market lambs he should use for best results the Shropshire sire on Merino ewes or Merino sires on Shropshire ewes and whether the results would be identical in either case.

The question opens up a subject of great importance and one difficult to answer. Does the male parent influence the offspring in one way and the mother in another way? What is the law of relative influence of sire and dam? I can conceive of no question more important to the breeder. If he can reach correct conclusions as to Nature's supposedly unvarying law, it will greatly help all breeders to understand it, whether breeders of market stuff or of pure bred animals, for in a sense every mating is a crossing of two types.

I have given some years of thought to this question and evidenced that point to certain conclusions. Hundreds of practical breeders must have thought along this line and must have evidence to produce. I will venture my opinion and hope that it may start a profitable discussion. The principles of embryology the beginning of a new life, what the male contributes and what the female furnishes toward making up this new life, are not well understood. Scientists assert that each sex contributes almost equally to the formation and subsequent characteristic of the new life.

On the other hand the old Greeks taught that all life came from the male; that the female merely developed it, gave it protection, nourishment and what may be called parental education. They did not deny that the mother influenced greatly the offspring but considered that this influence was of the nature that the fertile field would afford to the seed planted therein. This is an easy theory but unfortunately where there is much to support it in common experience there is also very much to prove its incompleteness. Yet it seems true that the first result of a mating of two diverse types would tend to establish the theory of the Greeks. The union, for instance, of a Shropshire ram and a Merino ewe results in a lamb more like the Shropshire than the Merino. Save the ewe lambs of this cross, however, and breed them again to any ram not a pure bred Shropshire and the influence, latent perhaps, of the Merino dam is at once apparent. It is much more apt to appear in the second generation than in the first. Yet if pure bred Shropshires are mated to cross bred Shropshire ewes the result is a clear intensification of the Shropshire blood and in another generation of such mating the Merino has apparently almost disappeared, yet by mating these cross breeds with each other it will in many instances appear again in considerable vigor and completeness.

I believe that it is safe to accept the Greek theory with a reservation that it does not cover all the facts. The sire does give form and the dam nourishes. Thus the union of the Merino ewe and Shropshire ram makes a small Shropshire. It cannot be a large Shropshire because it is not well enough nourished either before or after birth. On the other hand, the union of the Shropshire ewe and the Merino ram gives a large Merino, for the mother is abundantly able to nourish well her offspring and does so, yet while either her blood or her nurture or both considerably influence form or fleece the progeny is more a Merino than a Shropshire. In the other case it was more a Shropshire than a Merino.

It seems a safe law in cross breeding to seek a large, generous mother, able to give abundant nurture to her offspring and to select a sire the most perfect in form and character that can be found, be-

lieving that his progeny will resemble him most, but in size and some other characteristics will most resemble their mother. Therefore in sheep breeding I would prefer to cross the Shropshire ram with the Rambouillet or the Dorset rather than with the small Merino ewe. I would expect better results from the second cross than from the first not only because there would be less Merino blood in the ewe but principally because the cross bred ewe would herself be better able to nourish her offspring.—*Joseph E. Wing in Breeder's Gazette.*

## Don'ts for Sheep Men.

Peter Jansen, the well known Nebraska sheep feeder, in a recent address to sheepmen said: Will you permit me to give you a few "don'ts" which are based mostly on personal experience and which you can take for what they are worth? Don't ship your sheep until they are well finished and don't keep them after they are ready for market. Don't go by your home market thinking that you will make more by shipping to a distant one; nine times out of ten you won't. Don't consign them to a commission firm which does not make a specialty of handling sheep and has no sheep salesman. I know of an instance where a couple of doubles of lambs were consigned to a first class cattle and hog firm and the hog salesman was assigned the duty of selling them. Of course he was not posted. He asked one of the veterans of the trade \$4.25 per hundred for them, and when the latter seemed to hesitate he quickly added that of course he would take off something. The old buyer said, 'No, but I will give you \$4.75. I can't afford to risk the reputation of this market for the sake of buying your two carloads at 50c below the current price.' Don't cuss your commission firm if they do not always get the top; take the average of their sales and you will find that nearly always they get the true value for your stuff. And last but not least, don't think that because you have fed 300 or 3000 head successfully and profitably that you can do the same with 30,000, because you can't.

## Building Up a Flock.

The common sheep is capable of much improvement by the use of well selected pure bred rams of some desirable breed. The half bred progeny of such a cross sometimes may appear to be equal in every respect to the pure bred stock and is unquestionably so for all purposes except breeding. A few repeated crosses in this line will build up a flock to all appearance equal to the pure bred original stock. Of course there is great advantage to the shepherd who may procure as good blood as may exist but which is not of course held to be of equal value to the pure stock breeder. This applies to all well established breeds. The scale of points of the pure breeds is very exacting and a majority of lambs of the pure breeds do not fully come up to it. Hence there are grades of prices as of quality—the highest for exacting buyers, a second rate for the one who thinks pedigree is everything and who takes a second class animal thinking that the blood will cover up some of the faults. The third class is the bargain hunter who takes the poorest stock at the lowest prices and boasts of the blood, but has no backing of quality to support it. Breeders can always sell cheap, inferior stock at from \$5 to \$12 more easily than he can at eight times as much.

The best heifer calves are none too good, and the dairy farmer can, as a rule, raise better cows than he can buy in the markets. If cows are in milk from September on, during the four succeeding months, it offers good opportunity to raise fall and winter calves that will be able to care for themselves nicely by the time the pastures are ready for them in the spring.

## Dairy Notes.

A well-fed cow in her prime should milk for ten months of the year, and yield over 5,000 pounds of milk.

Inferior butter frequently results from keeping the cream from one milking too long while saving it to add more cream for the next churning.

In washing dairy utensils the idea is to get all of the milk off or out. One of the best plans of doing this is to wash first with water not more than tepid, warm into which a little soda has been dissolved; then wash with scalding hot water, rinse and dry.

When the butter does not come readily look first at the temperature. A higher or lower use may reverse the trouble. If the temperature is right, next see if the cream is not too thick. If it is, thin with water of the churning temperature. But if the cream is not viscous, but simply lacks fluidity, the addition of skim milk may answer.

The reason for not disturbing milk after it has been strained and set away for the cream to rise is that the cooling of the milk causes currents in the fluid, the end of which is to deposit the fats in the surface. When these are disturbed in any way these currents are broken and the particles of fat go floating aimlessly about and some others never reach the top.

The digestive power of animals differs. To allow a certain quantity of food to each cow, treating every cow in the herd alike, is almost certain to result in an insufficient quantity for some and an overfeeding for others. If they are fed most economically and to the best advantage the individual characteristics should be considered and each animal be fed according to her requirements.

Indications are that the sale of hand separators will increase largely and the business of gathering cream will consequently expand. There are two particular reasons for this. First, there is no food for young stock that will take the place of milk at the same cost, and stock raisers have a strong belief that to feed the skim milk with the "animal heat" in it (particularly to calves) is the proper thing.—*Dairy and Creamery.*

## Meat Extract From the Dairy.

A process patented in Germany as recently as March last, the invention of Dr. Otto Eberhard of Ludwigslust bids fair to become a far-reaching factor in dairy economics, as it utilizes what at present are practically valueless residuums of the dairy for the production of a "milk meat extract," chemical analysis of which differs very little from that of the best American meat extracts and which in taste, appearance and consistency as well as in its ready assimilation through the digestive organs is almost identical with the most expensive meat extracts now on the market, while the low cost of production makes it possible to place it on sale at a price that will bring it fully within the reach of those to whom the use of meat extracts has been up to now an unattainable luxury.

The production of a lamb with mutton form and characteristics is an important feature in the feeding business. The quality of the animal to be fed counts as strongly in the feeding of lambs as in the feeding of cattle or hogs. The higher the mutton possessed in both sire and dam the better the lamb will be as a mutton subject. In other words the strictly mutton breeds of sheep are superior to the grades and crosses of indiscriminate breeding. These full bloods, however, are not always available. They have a two-fold purpose, that of breeding stock first and mutton production second. It is therefore out of the question for all producers of mutton lambs to confine their business to the strictly high class mutton sheep.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

## Cattle Feeding.

A carload of two year old high grade steers fed by the Missouri Agricultural Experiment Station, at the university, averaging 1466 pounds, sold in Chicago recently at \$6.85, which was more than \$1 above the top of the market for that day, and is the record price for cattle in any market this year. These cattle were purchased for the fancy New York trade. The leading live stock paper of Chicago referred to this sale as follows: "Standing up like the Eiffel tower above other sales to-day was one of a load of fifteen prize Hereford steers averaging 1466 pounds which sold at \$6.85. It was an exceptional load of cattle and the best seen here since the fat stock show. They were fed by the experiment station at Columbia, Mo., under the supervision of Dean H. J. Waters. The load attracted considerable attention for being so far superior to anything else on the market."

These steers were purchased in the vicinity of Columbia at a cost of \$4.10, for the feeding experiments conducted at the station, in which the feeding value of cotton seed meal, linseed meal and bran in combination with corn, was compared with corn alone on blue grass pasture. They have been on full feed since July 1st.

These cattle were also used by the students in the stock judging exercises required of the students in the agricultural college, and were used to impress upon these young men the importance of handling only high grade stock. Four of the best steers in the original bunch purchased by the station were taken out last spring to go with a load of show cattle that won at the International fat stock show at Chicago last fall. These steers were considered by all authorities to be the best and carrying the finest finish of any animals that have been on the market since the fat stock show, and were considered by some to have been capable of winning in that contest.

The station now has eighty high grade calves with which it is comparing the influence of age upon the cost of beef. One third of these calves will be marketed next fall as yearlings, another third bunch will be carried until they are three years old, a careful record being kept of all the food consumed during the progress of the experiment. The United States government is co operating with the station in conducting this experiment and has a special officer located there to collect data and report the results to the government.

"How long should a cow go dry?" is an important question often asked. It is not possible to definitely answer it till one is thoroughly familiar with the purpose for which the cow is being kept. Most dairy-men invariably assert that no cow can be made profitable that does not milk up to within four or six weeks of calving time. This being a generally conceded fact, it must be acknowledged that the cow is being kept only for the number of milk pounds she can produce in a year, without giving much consideration to the value of her offspring. The cow that is a persistent milker and does not dry off, is invariably the dam of a weak, puny calf. No cow can produce a steady flow of milk the year round and at calving time drop a strong, healthy calf. Therefore, if a cow is being kept only for dairy purposes, four to six weeks is quite sufficient relaxation. But in case the cow is being kept for the milk she can produce and due consideration given to the value of her calf, two months or ten weeks is none too much rest.

Dairy cows require some bulky food with their grain; but care must be taken not to go to either extreme. If too bulky the animal must eat too much in order to secure sufficient nourishment. If not bulky enough the animal will consume more nutritive material than it can digest in order to produce the proper sense of fullness. This deranges the stomach and causes waste.

### Urged to Use Coloring Matter.

The following official circular, headed "Important Notice to Butter Producers," has been issued by the State Dairy Bureau of California:

Office of the State Dairy Bureau, 114 California street, San Francisco, January 24, 1903: The new oleomargarine law enacted by Congress, which went into effect on July 1, 1902, imposes a tax of 10 cents a pound on all oleomargarine in which artificial coloring matter has been used to produce in it the yellow shade of butter. On oleomargarine in which no such dyes are used the tax is only one-fourth of a cent a pound. The 10-cent tax practically prohibits the manufacture of artificially colored oleomargarine and has driven the makers to producing a class of goods on which they need pay only the one-fourth of a cent a pound tax.

Such oleomargarine is entirely white or else has a shade slightly resembling the yellow in butter, caused by using certain fats that impart this color or by treating the otherwise colorless fats in a manner that will impart a slight shade to their product resembling natural butter. The oleomargarine producers are trying every effort to produce a yellow product that will not be subject to the 10-cent tax, but so far their efforts, while successful in securing the desired color, produces a very poor quality of oleomargarine. Therefore they are compelled to confine their business to a low-colored article.

During the past month, agents for Eastern oleomargarine producers have taken out licenses to sell this uncolored (as they call it) oleomargarine in California, being the first serious effort that has been made for some years to dispose of the product here. Samples of this class of goods that have been examined by the State Dairy Bureau, while very low in color, are no more so than much of the butter that appears on the market, the standard for color having been reduced to almost whiteness among a great deal of the trade.

Consequently there is great danger of the dealers in uncolored oleomargarine substituting their product for such pale colored butter of our dairies and creameries. The only source of protection under the circumstances for the producers of butter is for each and everyone to color their product to a shade of yellow that the oleomargarine makers cannot imitate without paying 10 cents a pound tax. Butter producers of California are therefore urged to color their butter higher. This is already being done in the East, and if California producers wish to protect themselves from the schemes of the oleomargarine producers they must color just as high as it is possible to get the trade to stand it. A little explanation to the trade as to the reason for so doing will readily have the effect to remove their objections, since the consumer does not want oleomargarine, at least at butter prices.

STATE DAIRY BUREAU,

J. M. Thomas, Agent and Secretary.

On the feed market are a considerable number of very inferior feeds, which consist of oat hulls, rice hulls, coffee hulls, etc., which cannot form a profitable purchase at any price. In buying feeds to supplement his home-grown supply, the dairyman's aim should be to secure digestible and palatable protein on the most reasonable terms and in the most economical forms. Fully half of the different and distinct brands of feed analyzed at the New Jersey Experiment Station do not meet his requirements in this respect.—Prof. L. D. Vanhues.

If the heifer is to be developed into a profitable dairy cow it is important to extend her first milking period as long as possible in order to promote and fix the milking habit.

If they don't give you Jack-pa Soda.

Cleon of Yolo.

### Saving Feed.

Whenever we hear a man talking about what fine stock he has and how little said stock eats we begin to get suspicious. There may be men who have developed and maintain fine herds or flocks with very light feeding, but we have thus far failed to discover them. One of our friends used to be anxious to tell how little feed it took for him to winter a brood sow. He was a beginner then, and he was going to have a whole herd that would winter on roots and fresh air. He isn't talking about cheap wintering any more, but feeding mill feed and corn. He had some experience that knocked the cheap wintering, nor feeding foolishness completely out of him. He realizes now that those who have such good looking

Sweet cream raising can only be attained by keeping the milk sweet as long as possible.

Make the butter first-class and put it on the market in such a manner to show to the best advantage.

More butter can be gotten out of the cream if the cream is well and uniformly ripened before churning.

Showing the amount of fat actually in the milk does not indicate how much butter can be got out of it.

One of the mistakes too often made on the farm with the cows is in allowing them to run down in condition

Red Durham Heifer owned by W. B. Gibson.

stock on extremely light rations are likely to underestimate some things. The man who is looking for good stock in order to save hauling out feed is going to be disappointed. The way good stock saves feed is not in eating less, but in making good use of what it eats, which is generally more than is allowed to common critters.—National Stockman.

Two thousand million eggs are the figures furnished by the census men for the year 1902 in the United States. At an average of fifteen cents a dozen they are worth \$250,000,000. To this must be added the hatching eggs, or better, the hatched birds that are sold as spring or other poultry. Last year this amounted to \$220,000,000. Thus the annual egg and poultry market crop amounts to \$570,000,000. This showing enhances the importance of the chicken and makes the poultry yard a strong competitor of the stock yard.

during the latter part of winter. The supply of feed getting low is usually the cause, the farmer hoping that by stinting the cows somewhat he may be able to get through without purchasing food. In doing this not only is the conditions of the cows lowered, but the quality of the milk also. In a majority of cases it would prove better economy to purchase a little feed and keep the cows thrifty. Then when grass has made sufficient growth to afford a full feed, the cows would be in a condition to make the most of it.

To preserve butter, the curd, butter-milk, etc., must be carefully washed out. This can best be done in the churn while the butter is in granular form.

Cotton seed meal fed to excess will injure the flavor of the butter just as too much linseed meal will injure the grain and flavor.

Washington, D. C., advises are that the Department of Animal Industry has succeeded in stamping out the foot and mouth disease which threatened the New England States, and which was a great menace to export trade. The quarantine has not been lifted, however, as a few sporadic cases may appear. The owners of the cattle in Massachusetts have been reimbursed slightly in excess of \$50,000. The other inspectors from the bureau who are working in the other New England States, have not submitted their reports, but the disease being introduced at the port of Boston the cattle of Massachusetts were more generally affected.

## Trotting Horses

in being shipped about from place to place on a circuit, subject to all kinds of weather and consequent changes in temperature are very likely to fall sick, chills, colic, colds, pneumonia, etc., may take them at any time.

Avoid trouble in time by having a supply of

## Tuttle's Elixir

ever ready to hand. It is invaluable in such cases and for hurts, bruises, splints, sprains, &c. The best body and leg wash known.

Used and Endorsed by Adams Express Company.

Tuttle's Family Elixir cures rheumatism, sprains, bruises, etc. Kills pain instantly. Our 100 page book "Veterinary Experience" FREE.

Tuttle's Elixir Co., 437 O'Farrell St., San Francisco, Cal. Beware of so-called Elixirs—none genuine but Tuttle's. Avoid all blisters; they offer only temporary relief if any.

## YOUNG STALLION FOR SALE.

A HANDSOME YOUNG STALLION BY A Thurston (by Tago 32975) dam Belle Emmet by Mambrino Wilkes 6083. A remarkably promising young horse, and will be sold at a reasonable figure. Apply or address

H. P. H. HAGGETT, Lower Lake, Cal.

## WANTED TO BUY.

A STALLION OVER THREE YEARS OLD, about 15 hands high. Must be sound and well bred. Price about \$300. Address

F. W. KELLEY, BREEDER AND SPORTSMAN, 36 Geary St., San Francisco.

## SHOEMAKER'S BOOK ON POULTRY

and family almanac for 1903. Over 200 large pages of best book paper, with fine colored plates true to life. Tells how to raise chickens profitably, their care, diseases and remedies. Diagrams with full descriptions of Poultry houses. All about INCUBATORS, BROODERS, Thoroughbred FOWLS, with lowest prices. You cannot afford to be without it. Only 15 cts. C. C. SHOEMAKER, Box 597 Freeport, Ill., U. S. A.

## NORMAN STALLION FOR SALE.

BLACK, 5 YEARS OLD; WEIGHS 1900 LBS.; 18 hands high; sired by Imp. Regal, 1950 lbs.; dam by Imp. Renut, 2000 lbs. A handsome, high class horse in every respect. Address

LOUIS DARIO, Byron, Contra Costa Co., Cal.

## Standard Stallion For Sale.

ATHAMAX 36927. One of the best bred young Stallions in California. He is 16 hands and will weigh when matured 1250 lbs. He is by Athadon (sire of Sue 2124), Listerine 2134, Dakon D. 2164, Donnastrine 2254, by Matadon 3332, Dakon D. 3411. His dam is Lustrine (dam of Listerine 2134, Donnastrine 2254) by the great Onward 1411. Absolutely sound, a grand individual, and in condition to train for a low mark this year. Only reason for selling is that owner has not time to devote to him.

Also, a handsome three-year-old filly by Altamont out of Datura C (registered). For further information address BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco.

## FOR SALE.

## Six Good Jacks

at reasonable prices, to close an estate.

Address

W. R. MADDEN, Dixon, Cal.

## Veterinary Pixine

After Blistering, Veterinary Pixine is the very  
best application that could be indicated. It ab-  
sorbs all inflammatory exudate and hastens the  
reparatory process. Will heal the most severe  
cases without scar, and will prevent loss of hair.  
As a Preventive—If a light application of  
Veterinary Pixine is used before speeding,  
driving in wet, muddy or slushy weather, or in  
the snow, your horse will never have speed  
cracks, scratches or grease heel.  
For Hoofs—It will keep the hoofs healthy, soft  
and in perfect form.

For Old and Chronic Sores, Etc.—Veterinary  
Pixine heals collar and saddle galls, hobbles,  
chafes, abscesses, inflammatory swellings, sores  
and all skin disease. In cases of emergency it  
is invaluable.  
This penetrating, stimulating, soothing ab-  
sorbing, antiseptic healing ointment heals from  
beneath the surface by disinfecting the parts,  
subduing inflammation and stimulating healthy  
granulation, not by drying and scabbing.  
2 oz., 25c; 8 oz., 50c, 5-lb pkg., \$4.00.  
At all druggists and dealers or sent prepaid.

**STAM B. 2:11 1-4**

(TROTTER.)

REG. NO. 23444.

3-YEAR-OLD RECORD, 2:15 1-2  
(Timed second in 2:12¼)  
4-YEAR-OLD RECORD, 2:11 1-4  
(Timed second in 2:08½, 2:09)  
2-YEAR-OLD TRIAL, - 2:26

STAM B., by that show horse king, Stamboul 2:07½, father of 47 from 2:10¼ to 2:30; 34 sons and daughters produced from 2:07½ to 2:27. Stamboul is the only trotting bred stallion that ever sold twice for over \$40,000, and sired a daughter for whose son, Wiggins (two-year-old 2:19½), \$40,000 was offered. Stamboul's dam is the granddam of Oakland Baron 2:09¼, for which \$50,000 was lately refused, showing that men with money and brains appreciate this blood. STAM B.'s first dam, Belle Medium 2:30 (dam of S from 2:11¼ to 2:30) by Happy Medium sire of Nancy Hanks 2:04. No son of Hambletonian to ever produced such speed and she sold for \$40,000.

Second dam Argenta, dam of one in 2:30, by Almont Lightning, sire of dams of Zombro (five years old 2:11) and King Princeps 2:15, by Almont 33.

Third dam Mary Adams by Mambrino Patchen, sire of dams of Guy Wilkes 2:15½, Baron Wilkes 2:16, Patchen Wilkes 2:20. Fourth dam Mambrino Belle by Mambrino Chief, sire of Lady Thorn and dam of Director and Onward. Fifth dam by Mason Whip, a thoroughbred. No stallion now doing public service ever represented such champions of the turf, show ring and top notchers at private and public sales. He is a handsome horse (a typical Morgan in form), and tried race horse, and game, topsey road horse.

STAM B. is a bay, two white hind ankles, 15 hands 2¼ inches high, weight 1090 lbs., of good stamina and muscular development.

Will Make the Season of 1903 at Pleasanton, Cal.

**SEARCHLIGHT 2:03¼**

THE FASTEST STALLION BY THE RECORDS EVER  
OFFERED FOR SERVICE ON THE PACIFIC COAST.

He still holds the World's Records for 4-year-old (2:04½) and for 5 year-old (2:03¼).

SEARCHLIGHT is one of the fastest and gamest horses that ever raced on the Grand Circuit. He is a horse of rare individuality and is one of the most perfect specimens of horseflesh ever foaled. He has repeatedly beaten one minute to the half-mile pole in his work and has pulled the heavy cart in which he now takes his exercise a half in 58 seconds with a dozen watches held on him. Few stallions that ever stood for service in California have such royal blood lines. Darknight, the sire of SEARCHLIGHT, was like the great McKinney, a son of Alcione, and is a sire of extreme speed, having four 2:10 performers to his credit. The dam of SEARCHLIGHT is one of the great brood mares, having four with standard records and his grandam and great grandam are both in the great brood mare list. His oldest colts, now two years old, show that he imparts these qualities to his get, and he is certain to be a producer of early and extreme speed as well as size and good looks.

**Terms for the Season, \$75.**

**LECCO 2:09¾** The Blood that produced Dan Patch 1:59½

LECCO 2:09¾ is a very handsome black stallion, a square trotter and as game a racehorse as ever looked through a bridle. He is by Bonnie Boy, one of the best producing sons of Patchen Wilkes, sire of the great Joe Patchen 2:01¼, that in turn is the sire of the unbeaten Dan Patch 1:59½. The dam of LECCO is a great brood mare by Homer, and his second dam is a producing mare by Rochester and his third dam is a producing mare by Clark Chief. For four generations in the pedigree of LECCO there is not a sire or dam but is a producer of standard speed.

LECCO made a campaign through the Grand Circuit in 1899 that shows his wonderful speed and gameness. He met the best horses out that year and in seven starts won four first moneys, two seconds and was but once unplaced. His action is perfect and he cannot help siring a family of high class, handsome, fast and game trotters.

**\$50 for the Season.**

The above horses will stand at the PLEASANTON RACE TRACK, and all mares not proving with foal may be returned free next year, or in case the horse is not in forma the service fee will be returned. It is the intention of the owner however, to keep both SEARCHLIGHT and LECCO in this State for the next four or five years. Due care taken to prevent accidents or escapes, but no responsibility assumed should any occur. Good pasturage provided at \$4 per month, and all bills payable before mare is removed from my possession.

For further particulars and tabulated pedigrees address

**EDW. MILLS, Rose Hotel, Pleasanton, Cal.**

**NUSHAGAK**

Reg. No. 25939

Black Horse 15-2½ hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15¼, Sabina 2:15½, Sabledale (at 2 years) 2:18½, Buffington (at 2 years) 2:20¼ and 36 others in 2:30 list. Dam, Fidelia (trial 2:35 at 2 years), dam of Fidelite 2:28½, dam of Mary Celeste (at 2 years) 2:17¼ by Director, sire of Directum 2:05¼, Direct 2:05¼, Nathan Straus 2:05¼, Direction 2:08¼, etc. Second dam by Reavis' Blackbird 2:32, sire of Mamie Griffin 2:12, Vic H 2:12¼, etc. Third dam by Lancet, son of McCracken's Blackhawk 2:27.

NUSHAGAK'S sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro Wilkes 2:11 was one of the gamest colts that ever raced down the Grand Circuit. The Wilkes and Director blood is a successful cross as it has produced John A. McKerron 2:05¼, Nathan Straus 2:05¼, Ozanam 2:08, Dollade Wilkes 2:10¼, Oro Wilkes 2:11, Evangeline 2:11½, Mary Celeste (at 2 years) 2:17½, etc. Fidelia, NUSHAGAK'S dam, is in the great broodmare list and she would have been a very fast trotter if given an opportunity, as with very little training she trotted a mile in 2:35 as a two-year-old. Mr Corbett purchased her from Mr Goldsmith for a broodmare, consequently her training was discontinued. The get of Reavis' Blackbird, the sire of NUSHAGAK'S second dam, were noted for their remarkable gameness and vigorous constitution. His two noted daughters, Mamie Griffin 2:12 and Vic H 2:12¼, were exceedingly game. NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17½, Majella B. (2) 2:29 (trial at 4 years 2:13½), and The Boquet (trial at 3 years) 2:21. His other colts that have been handled some are: Brown filly, 4 years old in 1902, showed trial of 2:20¼ with three and one-half months' work; big g, 3 years old in 1903, with three months' handling showed mile in 2:35½, last quarter in 35½ seconds. His son Aristo (at 3 years) 2:17½ took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stable. Before taking sick we felt confident that Aristo would trot a mile close to 2:10 in his three-year-old form; the way he raced after being sick made us feel satisfied that we had made no mistake in our estimate of him. His third heat in 2:17½ was equal to 2:13½ or 2:14 over the Woodland, Santa Rosa or Stockton tracks.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

**Limited to 40 outside mares, at \$50 the Season,**

with usual return privilege if mare proves not with foal. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed should any occur. First-class pasturage for mares, \$3 per month; no barbed wire. Address

**WALNUT GROVE STOCK FARM,**

**Walnut Grove, Cal.**

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morshead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED.

# NUTWOOD WILKES.

He is the only Stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12½ respectively. Who Is It, ex-champion three-year-old gelding of the world, reduced his record to 2:10¼. John A. McKerron 2:05¼ (2:12¼ as a three-year-old) is the fastest trotter of all the famous tribe of George Wilke.

NUTWOOD WILKES will make the Season of 1903 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st

## BAYSWATER WILKES 2:25¼

Sire of KELLY BRIGGS 2:10¼

WILL MAKE THE SEASON OF 1903 AT

WINTERS, YOLO CO., CAL. FEE \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. The only two year and three year olds of his get to start last year were race winners. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of last year's winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices. Excellent pasturage for mares \$2.50 per month.

For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

## Iran Alto 2:12¼

Sire of Dr. Frasse 2:12¼  
Thomas R. 2:15  
Vendome 2:18¼  
Dr. Frasse's Sister, 2:25¼

By PALO ALTO 2:08¼ (world's stallion record to high-wheel sulky), sire of IRAN ALTO 2:12¼, Pasante (4) 2:13, Palita 2:16, Rio Alto 2:16¼, Palatine 2:18, and 11 others in 2:30 list. Dam ELAINE 2:20 (world's 3 and 4 year old records in 1877 and 1878), dam of Norlaine, yearling record 2:31¼, and of 3 in 2:30 list, and the dams of 6 in 2:30 list. Second dam GREEN MOUNTAIN MAID, dam of Electioneer 125 (one of the world's greatest sires), 9 in 2:30 list; sons produced over 300 standard performers.

IRAN ALTO 2:12¼ is not only royally bred, but has proven himself a racehorse and a sire of speed. He is a splendid individual and has all the most desirable qualifications for a great stallion. Breed to him and you will get the kind of colts you are looking for.

Will Make the Season, 1903, at his home

THE VENDOME STOCK FARM, SAN JOSE.

Fee \$50. Usual return privilege. Good pasturage and mares well cared for. For Tabulated Pedigree address

JAMES W. REA, San Jose, Cal.

## Alta Vela 22449 RECORD 2:11¼

SON OF THE GREAT ELECTIONEER 125

(Sire of Arion (4) 2:07¼, Sunol 2:08¼, Palo Alto 2:08¼, Alta Vela 2:11¼, and 9 more in the 2:15 list, etc.). Dam LORITA 2:18¼ by Piedmont 904; second dam Lady Lowell (dam of Ladywell 2:16¼, Lorita 2:18¼, and dams of 6 in 2:30 list) by St. Clair; third dam Laura, dam of the sire of Occident 2:16¼.

Will Make the Season, 1903---Fee \$30 At "CASSIDY'S," 20th and Lobos Avenues, near Golden Gate Park, San Francisco. Limited to 40 mares, as he will be trained and raced again this year.

ALTA VELA is the Best Son of Electioneer on this Coast. Best of care taken, but no responsibility assumed for accidents or escapes. Usual return privileges. Bills payable at time of service and must be settled before removal of mare. Address

HANS FRELLSON,  
20th and Lobos Aves., San Francisco.

## BY MACK

By McKINNEY 2:11 1-4  
Dam BY BY by NUTWOOD.

McKinney 2:11¼ (sire of Coney 2:03, You Bet 2:07, Charlie Mac 2:07¼, Jennie Mc 2:09, The Roman 2:09¼, Hazel Kinney 2:09¼, Dr. Book 2:10, 22 in 2:15 list and 30 in 2:30 list); dam By By (own sister to Lookheart 2:08¼ and dam of Marengo King 2:29¼) by Nutwood 600 (champion of all sires); granddam Rapidan (dam of Lookheart 2:08¼, Rapid 2:22¼, Capt. Mac 2:29); great granddam Madam Headley, dam of Export Prince 2:13¼.

BY MACK is one of the Best Bred Sons of the Great McKinney.

Terms: \$25 for the Season. Pasturage \$3 per month. No barbed wire fences. Usual Return Privileges.

## BAKER &amp; HAMILTON

Sacramento San Francisco Los Angeles

## FOR SALE.

Three Standard-Bred Trotting Stallions  
WILKES STOCK.

One Seal Brown, 16 hands, foaled May 2, 1898; first dam Fearless by Falls 4781 (record 2:33); second dam Jean Perault by Signal 3327.

One Golden Bay, 16 1/2 hands, foaled March 5, 1898; first dam Signal by Del Sur 1008 (record 2:34); dam of Guy Sino 2:39 1/2; second dam Lady Signal by Signal 3327.

One Brown, white points, 16 1/2 hands, foaled April, 1898; full brother to the bay.

These colts are all sired by Prince Airlee 28045, son of Guy Wilkes 2807 (record 2:15 1/4), and bred by Wm Corbitt, San Mateo, Cal. They are pure galloped and show wonderful speed for the little work they have done.

For further particulars apply to

P. H. McEVROY, Menlo Park, Cal.

## FOR SALE.

3 CLYDESDALE STALLIONS

POLLOCK, 12 years old, and CLYDEBOY, 7 years old; both choice breeders. Also PRINCE S, 3 years old May 28th. All prize winners, with best of action, color and breeding. Can be seen at the Petaluma Race Track at any time. For further particulars address T. A. NUFER, P. O. Box 63, Petaluma, Cal.

## FOR SALE OR LEASE.

I WILL SELL OR LEASE FOR TWO YEARS my two-year-old colt EDWARD B by Stam B 2:11 1/4, first dam by Dexter Prince, second dam by Elect, third dam thoroughbred. He stands 15 3/4, is square on his feet without a blemish and is a bay in color. His carriage is naturally high, stylish; of good conformation with plenty of bone, sinew and muscle. He is a trotter from the word "go," and will make someone a racehorse. For particulars address

D. S. MATTHEWS, Ryde, Cal.

A. S. OLNEY & SON, Proprietors

## THE BEST WAGON IN THE WORLD

Entirely Different and away ahead of any other wagon ever made. It is easier to pull and faster than a sulky. Thoroughly practical, handsome and durable.

WEIGHT 48 to 65 Lbs.

## THE BENJAMIN RACING WAGON

## ITS GOOD POINTS.

entirely new. It is absolutely noiseless and positively prevents the axle from swinging. Our Axles are the strongest that can be made and are in a continuous piece. Wheels. We make our own wood and wire wheels complete. Our Ball Bearings are the best made and are water and dust proof. The Shafts are handsome and strong and can be instantly removed. They are steel plated top and bottom, free from bolts in any part of them, and so attached to the wagon they cannot rattle, as they have no springs, catches or traps to get out of order. The cross pieces are steel plated and trussed, making them very light and stiff. The Whiffletree is held by our own device and cannot rattle and when desired can be quickly removed. We manufacture truss poles and neck yokes. Our Truss Poles are very attractive and are free from braces to bend and rattle. Should any accident happen it can not snap off like an ordinary pole. The neck yoke presents a handsome appearance, is light and strong, and like the pole cannot snap off. The pole passes through the neck yoke, which holds it securely and carries it several inches higher than an ordinary kind. Tubing is not used on our wagons, as it is unreliable. Send for prices and catalogue.

Sole Agent for the Pacific Coast.

# "SAVE-THE-HORSE"

— TRADE MARK —

## SPAVIN CURE.

No man in Northern New Jersey, or horseman in New York City and Long Island, can doubt this man's statement.—(Reproduced from New York Herald).

Newark, N. J., Jan 27, 1903

I used one bottle of "Save the Horse" and completely removed a thoroughbred horse was not lame, but it was a bad eyesore. No blemish or sign of the growth remains.

GEORGE STENGEL.

FROM A WELL-KNOWN TRAINER.

Terrace Farm, Titusville Pa.

J. C. McKINNEY, Proprietor.

I used "Save the Horse" all the past season. First, on a bad splint close up to knee; horse very lame after fast work, could see decided improvement after a few days' use, and in a week's time lameness all disappeared. Used with equal success on a bowed tendon. At present am treating a horse that bowed a tendon three years ago; was a bad case, was fired and blistered, but still went lame. Have used a bottle and am still using "Save the Horse". The enlargement has gone down almost one-half, horse going sound, and I firmly believe will race again. A friend of mine had a horse that bowed a tendon last spring; by the use of your remedy kept him racing all fall; gave him a record better than 2:05. Tendon is straight and sound as ever was. Think it the greatest remedy on earth for a bad leg of any description.

L. D. SHAFER, Trainer.

FROM A PROMINENT STOCK FARM OWNER.

Shrub Oak, N. Y.

This is to certify that I have used "Save the Horse" for splints and wind puffs with great success. In fact, it is a great remedy.

C. W. CARPENTER

Sunnyside Farm.

TROY CHEMICAL COMPANY, TROY, NEW YORK.

D. F. NEWELL, Pacific Coast Agent, 519 MISSION STREET, SAN FRANCISCO.

## Books for Stallion Owners.

## 1. HOOVER'S STALLION SERVICE RECORD.

The most complete book for recording stallion service ever placed before breeders. Not a pocket edition. No more disputing of sires. No more mixing of dams where this book is used. There is space for entering 100 mares, giving their full breeding description, dates of service, dates of foaling, with a page for tabulating pedigree of stallion in use, etc., etc., with index complete; size 10x7 1/2. Each book is handsomely and substantially bound. Can be used for any kind of pedigreed stock.....\$2.00

## 2. THE STANDARD STALLION SERVICE BOOK.

The neatest Service Book published, containing space for entering 100 mares, giving space for full description, pedigree, dates of services and refusals, date of foaling, etc., with index complete, neatly bound in leatherette, suitable for pocket use. Can be used for any kind of pedigreed stock.....\$1.00

## 3. BREEDER'S NOTE AND CERTIFICATE BOOK

AND STALLION SERVICE BOOK COMBINED.

This book contains 75 blank certificates to be given to owners of mares, certifying that said mare has been bred to a certain stallion. Also 75 notes suitable for owner of mare giving to owner of stallion on account of stallion service fee. This book is well bound, and makes a book like No. 2, after certificates and notes have been removed. Can be used for any kind of pedigreed stock.....\$1.00

Sent by mail prepaid on receipt of price.

# GIBBS' CELEBRATED PROCESS OF RAPID TAXIDERMY

In Practical Use Over Twenty-Five Years.

Used Everywhere in America. Hundreds of Testimonials. Try and Be Convinced.

Start a Class. Money in It. Be Your Own Taxidermist.

Naturalists, Collectors, Gunners, Anglers, Outers, Boys, Girls, and all others interested in nature  
and anxious to preserve the specimens taken in wood and field, have all felt the need of a simple  
method of preservation, which is free from intricacies and inexpensive.

There is a method of rapid taxidermy now in extensive use, which meets the requirements of all  
amateurs who wish a practical and inexpensive method of preserving the trophies of the outing and  
collecting trip. This is not the old system of so-called stuffing, so expensive, laborious and disap-  
pointing, but is a rapid system, which anyone can learn at once and which is guaranteed to give  
satisfaction.

By this process you may preserve the beautiful plumage of the grouse and woodcock, or the pike's  
or buck's head, or the showy feathers of the tanager. Boys, girls and all others can do good work and  
may make money, as mounted heads and birds find a ready sale, and besides you may teach your  
friends and decorate the school-room, office and dining-room with native birds and other attractions.  
If you are in doubt, then get your friends to go in with you and start a class, for when several work  
together there is an advantage and the expense is next to nothing.

On the receipt of \$1, cash or stamps, I will send full printed instructions for mounting birds,  
heads, mammals, etc., and all materials for mounting and preserving specimens—including prepared  
compound, together with full directions for dressing skins with the hair on for rugs and robes, so that  
you will not be to the expense of one cent.

Remember, I Guarantee Satisfaction or Money Refunded.

HOPPLES are again up for discussion as the programs of the summer meetings are being arranged, and the fact is becoming more evident every day that the straps will have to go sooner or later, and it need not surprise anyone if a rule barring them in all Grand Circuit races is adopted by the Board of Stewards within the next two years. The New York Trotting Association, which gives one of the greatest meetings of the year, will permit no horses without records to start in hoppers at its meeting, and others will follow in its wake. The fact is recognized that there are many high class hopped horses that are drawing cards whenever they appear in a race, and the association will not aid in making these horses valueless by barring them from its purses. The green horse that wears the straps, however, will be kept out and by this means will gradually disappear from the tracks. As associations like the one at New York give successful meetings on this plan, others will follow the rule which will eventually be adopted by all the members of the Grand Circuit, and from that entering wedge will finally come a rule abolishing hoppers entirely from all races on "the big ring." The smaller circuits will probably not reach the hopple barring period for several years to come, but as the value of the strapped equine is made less, he will gradually become extinct from all tracks. The hopple has caused much bitter discussion and there were many breeders who demanded its prohibition in races and asked the National and American Associations to make a rule to that effect. Had such a rule been adopted many valuable horses would have had their earning capacity destroyed, which would have been unjust to owners. This plan of the New York Association will gradually bring about the same result, however, without loss to anyone, and when the time comes, as it surely will, that no hoppers will be seen on the tracks, it will be another proof that racing reforms can be reached without violent upheavals or destruction of horse values.

ST. CARLO, winner of the Great American Handicap at Brooklyn and one of the most successful sires of winners in California, will be in the stud at Menlo Stock Farm again this year at a fee of \$100. St. Carlo won about \$30,000 as a two-year-old and being by St. Blaise, a son of Hermit, out of Carina by Kingfisher, is one of the best bred stallions in America. Read in his advertisement the names of some of his produce that have won stake races.

THE GRAND ARMY will hold its annual encampment in California this year during the month of August. It is estimated by those best informed that no less than sixty-five thousand eastern people will take advantage of the excursion rates offered by the railroads and will come out to get a look at our State and see for themselves if it comes up to the advertisements. Many of these people will be looking for land on which to make homes and the different counties will be vying with each other in the amount of advertising matter distributed on the trains and in the city, in which their many advantages will be set forth. There will doubtless be excursions from this city to various interior points and the easterners will be invited to remain and become Californians. The BREEDER AND SPORTSMAN begs to suggest that this will be the opportunity above all others to hold county fairs and make them something worth while. If at Santa Rosa, Napa, Vallejo, Woodland, Stockton, San Jose and other points fairs could be held at which high class exhibits of the county's resources were made, and excursions at low rates run during the days they were held, there is no doubt but a very large proportion of the eastern people could be induced to visit them. The opportunity will exist this year to make the fairs more successful than ever and their benefits further reaching. Advantage should be taken by every agricultural district of this opportunity.

ANY HORSE that can start at Detroit this year in the M. & M., which is for \$10,000, and win it, then go to Brighton Beach and capture the Bonner Memorial, \$20,000, follow it up by winning The Massachusetts \$15,000 at Readville, go to Hartford and get first money in The Charter Oak \$10,000 purse and wind up at Cincinnati by finishing in front in three heats of \$10,000 Ohio, will have paid entrance fees amounting to \$5500 and have \$32,000 net to his credit. If some plan could be devised by which a few big stakes for aged trotters could be given and the entrance fee be not over one or two per cent, then would the breeding and training of the American trotter take a boom such as it never had before. In a running event like the Brooklyn Handicap, which has a value of \$10,000, it only costs \$200 to start, and the winner earns \$8000, the second horse \$1500 and the third horse \$200. If some enterprising person could devise a plan whereby a trotting stake could be gotten up in which first money would be \$8000, and the entire entrance and starting fee \$200, the list of entries would be as long as his arm.

THE SEASIDE MEETING at Brighton Beach race track, Brooklyn, New York, will be a hummer this year. \$20,000 is the amount hung up by the New York Trotting Association in the Bonner Memorial, which is for 2:12 class trotters. The amount of money will make it one of the great races of the year and the horse winning first money will earn a small fortune. The New York Association has made trotters of the 2:12 class more valuable by the offering of this one purse, but it has not stopped there. The Hiram Woodruff purse has a valuation of \$5000 and is for trotters of the 2:20 class, the John H. Shults has a like value and is for four year old trotters eligible to the 2:25 class, the Metropolitan is a purse of \$5000 for 2:20 class pacers and The Brighton is \$10,000 for 2:10 class pacers. This is a grand lot of purses and will attract the highest class horses in training in America. Entries close on Saturday, March 7th, with Secretary McCully, whose address is 2:15 Montague street, Brooklyn, New York. For conditions of these purses, see advertisement in this issue.

IF IT DOES NOT RAIN there will be a big show of horses at Haywards on Saturday, March 7th and a big crowd of people to see them paraded. This spring horse show idea is a good one, and one that every locality where horse breeding is followed to any extent should emulate. There are no prizes offered nor ribbons given, but every person who owns a horse is invited to show him in the parade. It gives stallion owners the opportunity to present their horses before the public, and as a very large number of horse breeders will be at Haywards on this occasion they will be able to see and judge for themselves as to the qualifications of these horses. If you have not sent Secretary Geo. A. Oakes your entries for the Haywards horse show you should do so at once. Those having horses for sale, are especially invited to have them in the parade.

THE COLORADO DERBY will be run on the opening day of the Denver meeting this year, which begins on June 20th. The purse is \$800 and is for foals of 1900. Write Secretary Wahlgreen for particulars of this and other running events.

## Foot of the Horse.

In the trial of Frank B. Roberge against the Bonner Estate before Judge Greenbaum of the Supreme Court, the cross-examiner puzzled some of the witnesses, practical horseshoers, by asking them to tell how many bones there are in the foot of a horse. These shoers evidently had not closely examined the machinery inside of the horny box. They had been content with external knowledge of the foot. Prof. Dollar in his valuable book on shoeing classes the foot as beginning at the fetlock joint. He describes, therefore, six bones—the lower end of the great metacarpus, the suffraginis bone, the two sesamoid bones, the coronet bone, the pedal bone, and the navicular bone. The metacarpus, or cannon bone, begins at the knee and continues down to the fetlock joint. The articular surface is in contact with that of the suffraginis, both in front and below, while behind and below the joint is completed by the anterior surfaces of the sesamoid bones. The two sesamoids are small, rounded, pyramidal bones lying at the back of the lower portion of the great metacarpus. The coronet bone lies below the suffraginis, but above the pedal and navicular bones. It resembles a cube and presents six surfaces. The pedal is the lowest bone of the foot and is entirely surrounded by the hoof and by soft tissues. The navicular is a short, transversely elongated bone placed between the wings of the pedal bone, and articulating with the posterior edge of its upper surface. The art of shoeing is to give perfect articulation to all of these bones. An unbalanced foot cramps action and reduces the speed rate. The late Robert Bonner had devoted years to the study of this problem and his knowledge of the subject was greater than that of any man living or dead.—*Turf, Field and Farm.*

Thomas W. Lawson stands in a sort of paternal relation to his 128 Dreamworld Farm employes. A short time ago a deputation waited on him, and asked him to start a bank for them, so that they might properly care for their savings. A bank was out of the question; but he agreed to conduct an investment fund for them. He was surprised when they offered him, as their first contribution, several thousand dollars, and he surprised them by the terms he outlined. Employes are at liberty to deposit and draw upon their deposits at any time, on a 4 per cent interest basis. If they allow their money to remain for two years, they are given five per cent, and if they allow it to remain on deposit for three years they are given six per cent interest, not only for the third year, but for each year thereafter. It is admitted that these are pretty liberal terms, but Mr. Lawson says that so far as he is concerned it is not philanthropy, but business. He figures that any improvement in the condition of his employes is reflected on his own affairs, and that his interest in their welfare will be repaid many times with a reciprocal interest in all that relates to the farm.

Almont Rex, a three year old stud colt owned by J. B. Nightingale, Green Valley Farm, Cordelia, Solano county, is without doubt one of the handsomest young horses ever seen in that county. He stands 16 hands high and weighs over 1100 pounds. He is a mahogany bay in color, has fine style and action and is one of the most promising young stallions in the State. His sire is the handsome horse Prince Almont 2:13½ and his dam Dolly Baldwin by Whalebone son of Inca, second dam Lucy by Washington and fourth dam Rachel by St. Clair. The book of Almont Rex is about full for this season, as horse owners in that locality have booked quite a number of their best mares to him.

In a recent issue of the *Sporting and Dramatic Review*, published at Auckland, is a photo-engraving of the bay gelding Taihoa, winner of the New Zealand Great Northern Handicap, returning to the judges' stand after the race. The picture is an odd one to an American. Taihoa is ridden by a jockey that looks to weigh 150 pounds and wears a set of hoppers. Several California trainers who have looked at the picture have expressed the opinion that they would rather ride a wild broncho than a hopped trotter, even though the prize offered the winner was a big one.

Do you want a book of 160 pages containing portraits of champion trotters and pacers, show horses and cattle, sheep and hogs? If so read the advertisement of the International Stock Food Company that appears in this issue of the BREEDER AND SPORTSMAN and send answers to the questions asked therein. The book is well worth sending for and only will cost you two cents and a little time spent in writing a letter. Mention this paper when you write.

Norval 2:14½ led all the sons of Election in the season of 1902 as a sire of standard pace, having added eleven to his list.

## JOTTINGS.

**PLEASANTON TRAINING TRACK** has a new owner. The mile oval on which horses can be trained in the wettest of wet winters is now the property of Thomas Ronan of Dayton, Washington, the man who bred Anzella 2:00½. Mr. Ronan purchased the property last week from the Pleasanton Training Track Association, in which corporation Mr. H. F. Anderson, a wealthy Englishman of Santa Cruz county, was the chief stockholder. Mr. Ronan brought a carload of horses to Pleasanton from his Antrim Farm in Washington a few months ago, some of which he sold at auction in this city last week. The others he placed in the hands of Mr. George A. Kelly, former owner of Anzella, at Pleasanton, and while watching them being worked became so interested in the famous track as a training ground that he concluded to own it. He negotiated with the law firm of Harris & Donahue, who have been attending to Mr. Anderson's interests at Pleasanton for some time, and after a few interviews paid them \$40,000 and was handed a deed to the property. Mr. Ronan has placed the track in the hands of Mr. George A. Kelly, who will manage it for him. There are just 100 acres in the tract, which is probably worth the price paid for it without the improvements. The track is a regulation mile, and is beyond all question the best winter track in America. There are 200 box stalls which rent for \$2 per month each for at least five months in the year. The thirty acres comprising the infield find ready rental at from \$15 to \$20 per acre per annum for sugar beets or other crops. Properly managed the property will pay good interest on the purchase price. Harness-horse owners should congratulate themselves that the track has become the property of a friend of the industry like Mr. Ronan, and that it will be managed by such an active, energetic and practical man as Mr. Kelly. I understand that it is Mr. Ronan's intention to send Mr. Kelly quite a number of horses each year from his Washington farm to be handled for speed at Pleasanton and sold as they are developed. I hope he may find several more Anzellas among them.

Since Charley Durfee sold McKinney 2:11½ for \$25,000 the mail carrier that brings his letters has heavier loads to carry. From Maine to Texas owners of standard-bred stallions have been writing, requesting him to take their horses. The letters average something like this: "If you will take my horse and handle him as you did McKinney, there is not a particle of doubt but he will have more in the 2:15 list at the same age and be a much greater sire than your horse." Mr. Durfee says he is almost persuaded to believe that he has been the whole show himself, and that the 22 trotters and pacers in 2:15, given as sired by McKinney, should be credited to C. A. Durfee. One of the many letters received by Mr. Durfee since it was printed that he had sold McKinney for \$25,000 contained a request for a loan of \$300. The writer, after stating his grievances, said that while Mr. D. might not be repaid the amount here on earth, that there was no doubt but the loan would be paid with interest in heaven. Durfee replied to this appeal by letter and told the applicant that if he would send him his note, with the signature of the Lord as endorser, the money would be forthcoming.

Tom Smith, the veteran Vallejo horseman, was in town last week. He tells me his son Joe is handling quite a number of horses at the Vallejo track. Among them is the mare Dollican by Mambrino Chief Jr. that Smith senior campaigned on the California circuit several years ago and gave a record of 2:15½ in 1897. Dollican is now thirteen years old and if her feet can be put in shape will trot three heats better than her record. Mr. Smith tells me a San Francisco specialist on diseases of the horse's foot is at work on Dollican and is sure he can make them sound and well before the training season is fairly begun. The mare Trilby that Joe campaigned last year with poor luck is looking well and should make a better showing this season. Among others in Joe's string is a handsome black McKinney colt, own brother to Tom Smith 2:16½. This colt is a three year old and a very promising youngster. The Vallejo track is in good shape and all the horses stalled there are doing well.

A San Francisco daily, printed a dispatch from Sacramento the other day to the effect that Governor Pardee may cut off some appropriations for district fairs when he comes to sign the General Appropriation bill this year. The law gives the Governor the right to cut out of this bill such items as he does not like, and the fair directors remember with considerable feeling the action of Jim Budd in wiping

out the entire list of district appropriations when he occupied the chair of state at Sacramento. The dispatch referred to stated that Governor Pardee has been investigating and has discovered that of the \$88,000 paid out to aid the district fairs last year but \$43,000 were paid for premiums, and the inference is that the balance of \$45,000 "went for expense money and in making purses for races." The law creating agriculture districts in California especially provides that none of the money appropriated for their support shall be used for racing, and not one cent of an appropriation can be legally drawn until an itemized account of the receipts and expenditures of the fair has been submitted to the State Board of Examiners. If Governor Pardee finds that in the past such itemized reports have not been made, or that the money has been used for other than legitimate purposes he would probably be justified in withholding his signature from any further appropriations to the district that has not expended the money for the uses intended, provided the same board of directors is still in charge of said association's affairs. A new board should not, however, be made to suffer for the sins of omission and commission of its predecessor, neither should the districts that have held good fairs and complied with the law be punished for the shortcomings of others. The district fairs have accomplished and are accomplishing much good for the State. Wherever a good board of directors has been in charge the people have received full value for their money. It is true that horse racing is in nearly every instance an accompaniment of a district fair, but it is the amusement end of the exhibition, pays for itself and draws the people. Without it there would not be half the attendance and it helps to make any fair successful. The Legislature and the Governor should unite and make the restrictions against spending appropriations for racing more binding and effective if they desire, but they should not discredit the district fair nor stop the appropriations made for it. The State Board of Examiners is provided for the purpose of seeing that the money appropriated for the various State institutions is properly expended and that the taxpayers get value received for their money. The district fairs have the endorsement of the people and should be maintained and kept up. They have done much to improve the breeds of cattle, horses and all other farm animals, and the exhibits of farm and mechanical products has helped to build up many of the States leading industries.

One of the peculiar things in connection with the administration of public affairs in California is the promptness with which the idea of curtailing district appropriations is advanced by the advocates of retrenchment in State expenditures. I will venture to prove, if given the time and the opportunity to look up the facts, that there is no appropriation made by the Legislature that is more honestly expended or comes as near accomplishing the result contemplated than the money voted for district fairs. It amounts all told to about \$75,000 per annum, divided among forty or more districts. Several of these districts hold no fairs, and the money stays in the State treasury. Many districts give exhibitions that are worth all they cost and do great good, and I will admit there are a few that are a travesty. These last referred to should not be permitted to draw their appropriation, and the State Board of Examiners should see that they do not. But the majority are all right, and should not only be continued but be still further encouraged. If economy and retrenchment are necessary there are hundreds of thousands that can be saved to the State by lopping off some of the useless commissions with their high-salaried secretaries and attorneys, that were created (im)purely and simply to give a lot of political hangers-on a chance to get a living at the public's expense. There are dozens of bills every session appropriating money to buy land for State purposes at two or three times its market value. There is a bill now before the Legislature which, if it passes, will set aside \$60,000 to buy 500 acres of hilly land covered with rocks and brush that is not assessed at one-third that price, and can be purchased (if the State will not take it) for half of \$60,000. It is on such schemes as these that economy can well be practiced, and the district fair appropriation permitted to stand. Governor Pardee will be endorsed by the taxpayers and voters of the State if he will permit the district appropriations to remain as they have been, and then see that the State Board of Examiners refuses to O. K. a single item in the reports of the associations that is not a perfectly legitimate charge against the fund. In this manner due economy can be practiced, and no honestly managed district be made to suffer for the delinquencies of those that are not so conducted.

Bills have been introduced in the Legislature again this winter appropriating money to pay the debts of

the State Agricultural Society. The total amount necessary to get the association out of debt now is about \$60,000. It is to be hoped that the Legislators can see their way clear to vote this money and place the Society even with its creditors. If this can be done and the association given a new start it should be able with the present annual appropriation to give a fair each year that will pay a profit. There is a pretty general opinion among the people that to do this the association will have to return to one week of racing instead of two, and cut out bookmaking and the giving of free purses to runners.

The Grand Circuit has been all arranged and dates fixed, the North Pacific Coast circuit ditto, and the associations that make up the main California circuit should "get busy." Is there anything but laziness or a lack of interest to prevent representatives from the seven or eight districts that comprise the main circuit of California district fairs getting together and arranging dates as they do elsewhere? If so what is the cause of all the lethargy that is displayed here every year? I understand Santa Rosa wants to be in line again this season. They say the people there who went off on the Street Fair idea have about arrived at the conclusion that the street fair business does not pay for the time and money expended in getting them up. It is true that they have drawn pretty fair crowds, but if the admission was 50 cents as charged to the old fair and race meetings there would not be a corporal's guard in attendance. The county fair is a time honored institution and has more drawing power and accomplishes more benefit to the community than all the street fairs ever invented. To tell the truth the street fair would be a failure, financially and otherwise, were it not for the long rows of fake shows that line the Midways at these expositions. While the public fully realizes that these shows are the greatest possible frauds, there is a unanimous desire to take them all in and the dimes paid to see them make the success of the fairs. But the merchants and business men of the towns where they have been held begin to realize that they nor the community are benefitted by the street fair and do not propose to contribute large amounts to them in the future.

The increased value which all breeds of horses now have, the wonderful interest that has been aroused all over the State in the breeding of cattle and other farm animals of the best breeds, will materially assist in making the district fairs of 1903 successful in every way if they are properly advertised and managed. The speed programs, which should be principally for harness races must be looked to for the amusement part of the program, and to make them successful purses should be announced early. Every district in the State should have its race program out by the first week in March and if a good strong united effort is made a first class circuit of fairs and race meetings can be held. If they all put off their announcements until the last minute, however, the interest will lag and as a consequence the attendance will be materially lessened.

The champion Cresceus 2:02½ added another record to his already long list when he started at the Ottawa, Ontario, ice meeting last week. He made the mile in 2:15 flat which is nearly three seconds faster than any other horse ever trotted on the frappe. The Ottawa track is a mile oval and of course the turns are not thrown up but are quite flat. I saw a letter from Geo. H. Ketcham, owner of the champion to Geo. H. Fox of Clements, the other day. He wrote:

"It would do you good to see my outfit as we are well prepared for Arctic weather, and when I am rigged out for driving I do not dare to let Cresceus see me, as he might take a kick at me. I worked him out on the ice to-day (Feb. 9th) for the first time, and he shows all his old time speed, but the track is very heavy on account of the snow. He goes on Thursday and I expect a big crowd to see him. The track is a regulation mile, built right out on the river and they have also built grand stands, judges stands, cooling out sheds and betting rings, and all are heated and lighted in a very comfortable manner. The grounds are enclosed with a regulation fence and were it not for the snow you would think it was a country fair ground in summer. It was quite amusing to me to-day to see the carpenters building the fence. One man would knock a hole in the ice with a crow-bar and another would come along and stick a post in the hole, pour some water around it and let it freeze. It was about the easiest fence building I ever saw."

I have concluded to keep Silver Bow in Toledo as I was always very much impressed with him and more than ever since I have become familiar with his high qualities. I shall make a special effort to boom him and I believe I will succeed."

Respectfully,

GEO. H. KETCHAM.

We have been having such exceptionally cold weather in California this winter that the "oldest inhabitant" has been vowing it is the coldest ever experienced here since the days of '49, but when one reads of pouring water into post holes and having it freeze so as to hold fence posts firmly, one is apt to think that this California cold snap is akin to the balmy spring that the poets sing about.

## A Great Speed Producer.

There is but one son of George Wilkes (founder of the great Wilkes family) in California, and by that test of extreme speed, the 2:15 list, he is one of the best producing sons of that wonderful sire. This is Hambletonian Wilkes 1679, a handsome, sound and vigorous horse, now in his twenty-third year. Ten years ago his daughter, Phoebe Wilkes 2:08½, was one of the sensations of the Eastern tracks, meeting nearly every trotter in the free-for-all list that year and defeating the most of them in some of the hardest fought races ever seen on the trotting turf.

Last year, in California, Robert I. 2:10, a pacing son of Hambletonian Wilkes, was the biggest money winner of the lateral-gaited division, winning eight races and getting second money three times out of a total of eleven starts, earning for the Green Meadow Stock Farm the sum of \$2775.

This farm has in Hambletonian Wilkes a horse that is not only a grand individual, large, good color, well boned and fine style, but an elegantly bred one as well, and a speed producer of high class, as he is the sire of nine in the 2:15 list, seven of these having records better than 2:12.

In selecting a stallion breeders should consider the probability of getting foals that will have size and style as well as speed, and Hambletonian Wilkes gets this sort of horses.

His breeding shows a combination of the Hambletonian-American Star families, his sire, George Wilkes, being a son of the old hero of Chester, and his dam, Mag Locke, being by American Star 14, while his grandam was by Hambletonian 10.

Hambletonian Wilkes is noted as a producer of large, well-formed horses, and as he is a very vigorous and healthy stallion he is good for several years of service yet in the stud. He has a number of mares already booked to him, and Mr. R. I. Moorhead, proprietor of the Green Meadow Farm, would like to sell the stallion with these engagements. This is a good opportunity to secure a well-bred, producing stallion at a low figure. The prospect is that Hambletonian Wilkes will earn quite a large sum in the stud this year, as breeders realize that he is the only son of George Wilkes in California.

## Secretary Steiner in Poor Health.

The following from *Spirit of the West* is a piece of news that will be read with regret by horse breeder generally:

Secretary J. H. Steiner, of the American Trotting Association, is in very poor health, although but very little has been said in the press regarding the matter. In fact, his condition is such that he may never again be able to carry on the work of his office, and by those best posted in the premises it is thought that at the meeting of the American Association this spring his successor will be named. As long ago as last summer his health began to fail him and he was not able to keep up the detail work of his office as he had always done heretofore, and later in the year he took a trip in search of health, but without avail. Even then he did not give up, but soon found that it was imperative that he must lay aside all business and his friends prevailed upon him to cease his labors. He entered a sanitarium in Indiana, but his improvement has not been such as had been expected. It appears that his trouble is of a nervous order. It is the brain that will not stand such taxation as his work would require, and for this reason it will be some time, if ever, before he could resume the duties of his office. Such being the case the selection of a successor is only a matter of time. From the birth of the American Trotting Association Mr. Steiner has been at the helm, and during these long years has conducted his office on business principles, both with credit to the organization and himself individually. Many will regret to learn that his condition is such that he is forced to lay down his official duties and retire from office, and would rejoice to learn of his full recovery to health.

## Artificial Conditions.

The value of a good foot can not be over estimated. Under nature's conditions the tendency to diseased feet is small. Natural condition are, for the most part, entirely displaced by the inventions demanded by the uses to which horses are put. Floors are substituted for earth. Pavements take the place of dirt roads. Shoes raise the frogs from the ground. Dry, hard and brittle feet; withered frogs and contracted feet, followed by corns, quarter cracks, and general soreness are the result. Thrush, scratches, cracked heels, due to filthy mud, exposure in the slush of winter, are common occurrences. Campbell's Horse Foot Remedy is essentially a hoof grower. It supplies nourishment, and feeds the foot. It is an antiseptic and germ killer, removing soreness and fever. All the ailments mentioned above as due to these artificial conditions can be cured and prevented by its use.

John Wilson, the heaviest stock holder in the Vallejo race track and fair grounds, died recently. He was one of the pioneer citizens of Solano county and a highly esteemed citizen of that community.

Jackson's Napa Soda untangles the feet.

## Bidding-In at Sales.

[Frederick Watson in Am. Horse Breeder.]

There was a little talk last December about by-bidding and bidding-in at sales, and a few rather straight remarks were made on the subject that showed that the public were not so easily hoodwinked as some of those "wise-agent owners" who follow that practice believe. It is a comparatively easy thing to have an ordinary \$250 horse bid in without any large number of people knowing anything about it, and only those who live in the immediate vicinity of the intending seller, and notice that the animal "comes back home" after the sale, know that it was bought in, but with a fast record horse, or some well known performer, it is entirely different. When a 2:10 trotter is shipped to the sales, is run up to a price that looks big enough to be its real value, and a couple of days afterwards is found right back in the same stall that he or she occupied before the little trip to the auction ring, it is pretty safe betting that the animal has not experienced a change of ownership.

When an owner consigns "all his racing and road horses" for absolute and complete dispersal, and the same man buys two out of the three, and at the very next sale these two are again consigned by the original owner, it is fairly good evidence that they were not sold the first time, yet this owner actually tries to make himself believe that the people who patronize the sale ring do not remember such circumstances from one sale season to another. When a man "concludes to consign his entire stable to the sale," and the following week four or five of the stars of the lot are to be found in the stable of the trainer, whom it is known is under a yearly (or longer) contract with the consigner of the stock, there is not much guessing about the facts of the case the stock was bought in.

Now it is no uncommon thing for buyers and odders at sales to blame the whole thing on to the sales manager, but in this they are wrong, and when I make that statement I do it because I know that there are ways and means of buying in, that no sale managers in the world can prevent "at the time." Supposing Mr. Smith consigns a horse to a sale and makes up his mind that that horse must bring \$1000 or it won't be sold. He goes to his friend Mr. Jones, hands him \$1000 in bills and says: "If my horse does not bring \$1000 you buy him and here is the money to pay for him," the horse is knocked down to Mr. Jones' bid of \$900, he steps up to the cashier, pays over the \$900, gets the order for the horse, and turns him over to Mr. Smith, the actual owner.

How could any sale manager prevent such a case of buying in at a sale? Supposing Mr. Jones is well known and his check is perfectly "good" at the sale ring cashier's box, what is to prevent him giving his check for the amount and taking Mr. Smith's check in exchange "on the quiet," or perhaps Mr. Jones stands so well "in the box" that when his name comes in as a buyer, no request is made either for a check or deposit, his name is O.K. and he will settle later. After a while Mr. Smith steps up and the little matter is arranged. How is any sale manager going to stop any such systems of buying in "at the time"? The auctioneer cannot under ordinary circumstances question any man's bid, for it is pretty difficult to be sure that there is cause to question the bid, and the sale manager does not "know positively that the sale is a fake one, although he might suspect it at the time, and subsequent circumstances prove that his suspicions were correct. After the horse has been sold, and the people who came to bid on him have gone or have passed him by as having been acted on, it would be of very little use to have the horse brought in the ring again and put up for sale if the first sale was shown to be a fake one, although it would serve some owners right if this was done, and the horse was actually sold that time for a tenth part of what he was bid in for the first time.

There is just one way in which these owners, who are in the habit of buying in, can be stopped in their unbusinesslike transactions, and that is "to refuse their entries to the sales altogether." By taking this action the sale managers will save themselves the trouble of the public taking it for them, for that is just what they are commencing to do by refusing to bid freely on any stock consigned by a man who is known as a bidder-in. It has become a common remark that such and such a consignor will protect his stock, and the result is the bidders stop when the figures get anywhere beyond bargain prices. Of course in the end the consignors suffer, because they do not get any prices for their stock, but at the same time they hurt the sale of other consignors' stock.

In all my recollections a bid-in horse, of any first-class or even moderate grade, never afterwards sold at auction for as much money as was bid on him at the first sale, and allowing that the price was run up a bit, the genuine high bid at the first sale would have been the best money that was ever offered for

him in a sale ring. One noted stallion of his day was offered so often at auction that at last no sale firm could be found that would catalogue him at all, and his last reported sale price was less hundreds than thousands had been bid on him on his first appearance in the sale ring.

A case in point within the last four years, and all within fifty miles of this city: a pacing mare with a record of 2:15 and a fraction was put in a sale in this city and was bid-in at something over \$2000. Shortly afterwards she was in another sale, and entered, too, by her original owner, who was "absolutely disposing of all his horses," and she was again bought in, this time at \$600, and in less than a year was again in a sale, still consigned by the same man, and was this time really sold for less than \$400. What buyer with a memory would bid freely on any stock consigned by that man?

Within the "past year" a gentleman of this city requested me to pick him out a road horse that would suit him out of the sales. In one consignment there was a mare that was just about what he wanted, kind, clever, a trotter with better than 2:20 speed, but decidedly outclassed for racing purposes, and as nearly sound as any horse usually is that has been raced to its limit. After a pretty thorough examination of the mare I telephoned to the would-be buyer to come up to the sale, telling him about what time the mare would be sold. He came, and, acting on my advice, bid a little over \$500 on her, which was actually more than she was worth, excepting in such a case as his, where \$100 of the price was calculated as offset by the fact that the mare's disposition was exactly suitable to that of her would-be owner. He did not get the mare because she was bought in, and is still owned by the man who consigned her. My buyer has no further use for auction sales, and any time I am looking over a catalogue to pick out anything for a customer I should naturally pass over that consignor's stock as too likely to be protected.

It is only natural to suppose that where there is one such case there must be others, and for their own protection, sale managers should refuse the entries of such individuals. Their consignments may be desirable from one point of view, but they do more harm than good, and if their "buying-in tactics" are continued they will, eventually, very seriously effect the sale business generally. No matter how genuine a seller's announcement is that his stock is there for absolute sale, if it happens to be of the very high grade, a horse that should sell for \$4000 or \$5000, there is inclined to be a taint of the reputation of another similarly high priced horse, that was bid in at a previous sale, hanging about it and some possible bidders might stay away from the sale altogether, rather than take a chance of having their time and expense money fooled away by going to bid on a "star" that is being protected by the owner and that is subsequently bid in.

In such a case the genuine seller who lets the public make the price would suffer for the errors of the man who kills the principle of auction sales by bidding in. Let the latter's entries be refused altogether, let him be virtually "outlawed" from the sale ring, deny him the privileges of the sale ring; just as a man who handles ringers is denied the privileges of the race track. If other sale firms want his entries let them have them. In course of time they, too, will decide that it is best for their own interests to refuse them.

## Kendall's Spavin Cure Used Ten Years With Satisfactory Results.

Charleston, S. C., Sept. 8, 1902

Dr. B. J. Kendall Co., Enosburg Falls, N. Y.  
Gentlemen:—Would you please be so kind as to send me one of your horse doctor books on the treatment of horses? I had one, but it got misplaced and would like very much to have another one, as I am all the time using it. Have used your Kendall's Spavin Cure with man and beast and have always found it satisfactory in both cases, and will always highly recommend it to all my friends.

Yours respectfully, BEN JACKENS, Myers, S. C.

## Caustic Balm Cures Sweeney.

Norwalk, Cal., Sept. 20, 1901.

The Lawrence-Williams Co., Cleveland, O.  
Please send me descriptive circular. Used Gombault's Caustic Balm on a sweeney on fore shoulder of horse, that was so bad that a man's hand laid on it did not near fill it up even, and can't tell the horse ever had a sweeney now. Will the liniment cure a sweeney of several years' standing in an old horse?  
(Yes L-W Co.) FRANK M. WARNER.

## Ten Years Experience.

Mr. A. R. Jones, Veterinary Surgeon at Lamont, Iowa, writes January 18th as follows: "I desire to inform you that I have been using Quinn's Ointment for the last ten years with the greatest success. For removing curbs, splints, spavins, and other blemishes, am more than pleased with its work." This is the general verdict of the leading horsemen everywhere. For curbs, splints, spavins, windpuffs and all enlargements try Quinn's Ointment. Price one dollar per bottle. Satisfaction guaranteed or money refunded. Address W. B. Eddy & Co., Whitehall, N. Y. If you cannot obtain it from your druggist.

839 Market St., San Francisco, Nov. 7, 1902.

W. F. Young, Springfield, Mass.  
Dear Sir:—My black colt is all right. Used liniment on the lump on her knee was gone in less than two weeks. Nothing better that I know of to remove hard lumps was as hard as a bone. Yours truly, W. F. Y.

## Environment the Cause of the Mental and Physical Change of Type in the Trotting Horse.

BY E. J. GILBERT.

SAN BERNARDINO, Cal., Feb. 15, 1903.

The trotting horse of to-day is rounded into a reasonably perfect form of mental and physical development. The nervous energy, the will to do or die, the staying power to repeat heat after heat within one or two seconds, are the results of intelligent environment made by men of wisdom and tact. The great majority of harness horses that have records from 1:59½ to 2:30 trace in the main to two great progenitors: one known as Imp. Messenger, brought to America in 1798 and died in 1808; the other the famous Justin Morgan contemporaneous. Messenger was the favorite of New York, where he was owned, and Justin Morgan the pride of the Vermonters. There seemed to be but little supremacy in the families until their sons and daughters were taken to other States.

The Kentuckians as a rule bought the descendants of Imp. Messenger, while Ohio, Michigan, Illinois and other Northern States were favorable to the Justin Morgan family. The first four generations of Imp. Messenger had large, coarse heads, were long legged, in fact, very plain lookers, but they had great speed and endurance, while the first and every generation descending from Justin Morgan were beautiful animals in form, disposition and action, but undersized for pioneer service.

The story of the environment of the sons and daughters of each family can only be referred to. The best descendants of Imp. Messenger were Hambletonian 10 and Mambrino Chief. They found hospitable homes in New York and Kentucky, where cheaper animals performed the burdens for them, while many of the best sons and daughters of the Morgan family were used to clear away the forests of New England homes and break the prairies of the Western States. In this the environment of the sons and daughters of Justin Morgan was not so favorable to the cultivation of extreme trotting speed as was that of the descendants of Imp. Messenger.

Environment may properly be termed the mother of evolution. Evolution is not however a synonym of perfection in nature, however true to our taste it may come. When environment is not adapted to the laws of nature governing the changes we desire, then will evolution be slow in causing the modification in type, with the chances greatly tending toward unsoundness of both mental and physical structure; on the other hand when environment is in harmony with nature, sexual selection which is a synonymous term for heredity, slowly but surely fixes a type having the requisite mental and physical characteristics.

No man of record did so much toward working the environment of the American trotter in harmony with the natural laws needed to develop the trotting instinct, as did Leland Stanford. It was he who built the nursery track for unweaned colts; it was he who bought the best blood obtainable all over the world; it was he who hired the best talent in the land to rear, break, and race his colts, and it was he who at one time furnished the world's records for yearlings, two year old, three year old, four year old, and mature horses. It was Leland Stanford who first bred the line gaited trotter thus giving us a family of trotting and road horses which we term Electioneer gaited, by this term we mean a close ingaited animal not inclined to pace. Electioneer though twelve years old when selected by Mr. Stanford was not the sire of a 2:30 trotter, but during the remainder of his days he climbed to the highest point of fame by siring 160 animals with records from 2:07½ to 2:30 only two of which were pacers; the balance are beautiful gaited trotters. This is a record that no other family of horses can approach.

Flora Temple and Dexter each had what was supposed incomparable speed, but Alix and Cresceus came along as the demand for more speed was made, and like the twine binder and palace car, they supplanted the cradle and stage coach. There is but little doubt but the horses and machinery of each decade are in harmony with the ability of those who are to use them, as we to a great degree shape our own environment. Profit or the expectation thereof develops in man his full genius. The high prices paid for speed have been the incentive to many eminent men and women to engage in breeding the American trotter. Those who have succeeded the best have demanded that absolute soundness shall prevail in the mental and physical structures of both sire and dam, and those who have made the greatest success tell us that if you would raise a great horse of any kind, you must first secure a mother of undoubted merit.

So successful have the breeders of the American trotting horse been in raising fast and elegant road that Russia, Germany, France, England and America are buying large numbers of our horses for pleasure and profit.

Up to about 1880, there were but few horses that had a record of 2:30 that had not cost their owner or owners one thousand dollars to train them to this record. Now many, in fact, nearly every horse having a record of 2:30 gets it for about one hundred and fifty dollars. This clearly proves that the environment of our colts and young horses has brought about great natural speed, and the writer thinks the two minute mark in twenty years from now will be as common as the 2:05 is at present, as the development of fast horses is no longer in the hands exclusively of the race track jockey; they are trained by men and women of brains and often great repute as financiers, statesmen and society people.

The horse bred and broken in humane hands affords the most perfect servitude to man, being a daily example of patience and forgiveness which all mankind should emulate. Many of the great men of ancient, mediaeval and modern times have held the animal next to their own kindred in admiration and love. The warriors from the Roman gladiator period down to the gallant charge of Roosevelt at San Juan Hill have delighted in recounting his deeds of service, and with these thoughts let each of us try to improve the environment of this noble animal until his natural forces shall have so evolved that fear shall have been eradicated from his nature, at which time his companionship with man will be cemented into admiration akin to love.

### George Bain Out-Talked.

One of the last horses sold at the recent mid-winter sale at Madison Square Garden was a 16 hand bay gelding called Lord Chesterfield, consigned by Col. Purcell, of Virginia. Col. Purcell caused a great deal of merriement at the horse show last November, by entering entirely green, long-tail horses in short tail classes. He had a mare, a filly and a gelding and had them in every class in which he could get them. Neither of them could go high enough to step over a corn cob and they looked very funny in competition with the dashing high actors in the same ring. The Colonel enjoyed the fun as much as the spectators. He is quite a character, and when it was known that he was going to sell a horse, the crowd surged towards the auction box, well knowing that he would have something to say. He stood beside George Bain when the horse was led in and before George has a chance to open up, the Colonel began his talk.

"There is a young strong horse," he began, "with plenty bone and muscle and size. There's no telling how fast he can go. He is green. But wasn't the Prince of Orange green last year? Nobody knew how fast he could go this time last year, did they? Well, nobody knows how fast this horse can go till he's tried. He might go faster than the Prince of Orange or any other green one that was ever turned loose. I had him in the horse show. He is a driver, a saddler, a jumper and anything you want to turn him to. He drives as peaceably as any one could desire, he can jump over a stake and rider fence with his eyes shut and goodness only knows how fast that horse can trot if he ever has a chance."

He went along with quite a speech and when he had finished, the silver-tongued Kentucky orator was completely nonplussed. All he could do was to lean over and gasp, "How much?"

Lord Chesterfield brought \$215, going to A. C. Payne, of Troy, and the Colonel's speech had a lot to do with the good price.—*Exchange.*

### Answers to Correspondents.

C. A. A., College City—There is a thoroughbred horse named Beau Monde. He is a chestnut, eight years old by Imp. De Beauvoir, dam Thundercloud by Thunderstorm, second dam Ballet by Planet, third dam Balloon by Imp. Yorkshire, fourth dam Heraldry by Herald, fifth dam Margaret Wood by Imp. Priam. Beau Monde ran in California last year. He is blind in one eye.

Jos. Depoister—We can find no mare of that name and breeding registered in the A. T. R.

Battlesign, the bay gelding with a mark of 2:13½, who was purchased at the last Fasig-Tipton sale by Dr. A. D. Krahmer, has been turned over to trainer Isaac Fleming, who will prepare him for the 1903 circuit. Dr. Krahmer has great faith in the horse, which took the first heat in the ten thousand dollar M. and M. Stake at Detroit in 1900, covering the ground in very fast time against a noted field. It was impossible to start him in the second heat, owing to a bad cut, and since that time he has not been raced. He is now perfectly sound, and Dr. Krahmer was offered a handsome advance for the gelding by David Lamar five minutes after the sale, but refused the offer.

### The Futurity---That's It.

The value of a trotter depends almost entirely on one or two things—the amount of money he has a chance to win, or the amount of gratification he gives his owner as a plaything. It can be very readily seen that as a business proposition sentiment is almost entirely outweighed, and consequently the value of a trotter is largely influenced by his earning capacity. Every year for the past ten years breeders have learned a lesson that has been taught them through colt stakes and futurities, and to-day the expression is more frequently heard that a colt is well engaged than that he is well bred; in fact, it has become of greater importance that he should be well entered than anything else. This fact is exemplified when once the colt begins to show some indication of speed, and the more he develops this desirable quality the greater his value, that is, if he is extensively entered.

Some months ago there was sold at public auction a two-year-old filly that was possessed of a greater flight of speed than any of her age. She was well bred, well mannered, and gave every indication of becoming a high-class race mare. When offered at public auction she brought \$2000 and was bought for matinee purposes. Why should she not have tempted others to bid on her as a business proposition? The answer is easy. She had no engagement, and her earning capacity was nothing in the form then presented. Until she had reached the age of maturity it would not have been good judgment to have engaged her in all-aged events, and consequently as an active racing machine she had comparatively little value. Had she been extensively entered in the various stakes for colt trotters, and thus given a chance to earn for her owner a small fortune, she would unquestionably have brought many times the price she realized. Here was speed galore, but it was wasted; it could not be utilized; and the legitimate value that should have been attached to it was lost owing to the breeder's failure to nominate the mares in futurities. There are today in America at least half a dozen colt stakes coming under the head of futurities, with an aggregate value to the winner of over \$45,000. The cost of entering in these stakes is comparatively small, when the gross value is considered, and as the entries close at a time when all foals are on an equality, each has an equal chance.

At the birth of a foal, whose dam has been extensively entered in futurities, there is attached to him an added value, and that value increases as he develops, in proportion to his improvement, in speed and general appearance. Without his engagements, he has little value other than sentimental, for his prospects as a money winner are exceedingly slight. The best example of this prospective value that attaches to a horse as a racing machine can be realized when the thoroughbred is taken into consideration. Eliminate the possibilities of winning money from a thoroughbred and the most royally bred and superb looking yearling in the world would not bring over a hundred dollars. Yet so great are the possibilities by reason of the innumerable stakes to which a thoroughbred is eligible it is not an uncommon thing for yearlings to bring \$10,000, and one has sold for \$50,000.

The most important statement that is made about a colt when he is sold is that regarding his engagements. The colt that has been entered in the futurities, matron stakes and various other colt stakes, will bring fully twice as much at public auction as the one with no engagements, and if possessed with anything bordering on sensational speed, the difference in values in favor of the fast colt is quadrupled. Breeders have learned that next to feeding their colts the most essential thing is engaging them, for buyers have long since considered it an established fact that a colt not worth entering is not worth buying.—*Kentucky Stock Farm.*

The breeding farm that produces horses that win first prizes in the show ring and sell for from \$1000 to \$3500 per pair as soon as they are educated for the road, is breeding on the right lines. This is the record of the Baywood Stud, San Mateo, and in offering the services of its premier stallion Green's Rufus to the breeders of California, an opportunity is afforded the owners of handsome trotting bred mares to mate them with a horse that will produce from them the highest type of carriage and park horse. The fee of Green's Rufus will be \$75 this year, and reduction will be made for two or more mares sent by one person.

The Hartford Futurity for foals of this year will be opened at once, to close March 16, and will be increased in value from \$10,000 to \$15,000. There will be a division for three year old pacers and the conditions will be so arranged that the victorious colt in the main stake can win more money than in any other trotting stake in the world.

## Notes and News.

Will Welch has a full brother to Dr. Hammond 2:14½ in his string at Pleasanton.

Barney Simpson has a string of five horses at Pleasanton. He is stabled at the McDowell place.

Bet Madison 2:15½, owned by Mrs. Severance of Arrow Head Stock Farm, has been sent to Zombro 2:11 this year.

The pacing horse Sandow 2:19 by Dictatus is offered for sale. He is a good roadster, fast and gentle. See advertisement.

By way of a novelty, there is some talk of racing trotters under the saddle at the Empire City track during the coming season.

J. R. and R. B. Smith, well known horsemen of Petaluma, have formed a partnership and will conduct a horse market at that town.

The Horse Review Futurities to be trotted this year will be held at Oakley Park, Cincinnati, during the meeting which opens September 10th.

The great broodmare Nell, the only mare that has three in the 2:10 list and who is now twenty-five years old, is expected to produce to Axworthy (3) 2:15½.

Walter Allison, of Portland, Oregon, has purchased for \$1000 the pacing team Atlas 2:15½ and Alta Dell 2:16. This is said to be the best matched and fastest team in Oregon.

Robert I. 2:10 is at Los Angeles, sound and in fine fettle. There seems to be a general opinion among horsemen that this son of Hambletonian Wilkes will pace in 2:05 this year.

The bill permitting the free importation of full blooded live stock for breeding purposes or for sale will probably pass the United States Senate. Such a bill should have been passed years ago.

Lord Kitchener 2:29½ by Zombro 2:11 was shown with his sire at the Oregon State Fair last year. There was a large field of stallions in their class, and Zombro took first prize and Lord Kitchener second.

The Year Book, Volume 18, will be out about March 15th. It will contain all the races of 1902, and the usual tables of new performers, list of sires with their get, etc. Orders for the same can be sent to this office.

Many of the best posted horse breeders in California are looking to P. J. Williams' stallion Monterey 2:09½ to be one of the future sires of extreme speed. "With any ordinary opportunity he will sire 2:04 speed to a certainty," said a horseman the other day.

A member of the Knockers Club says that it is not the peculiar soil of which Pleasanton track is made that causes it to dry out so quickly after a heavy rain, but the "hot air" that is blown over it so constantly by the trainers and stallion owners.

The newly elected directors of the Golden Gate Park Driving Association has elected the following officers: President, Edward Algetinger; first vice-president, Dr. I. B. Dalziel; second vice-president, A. F. Jacobs; treasurer, E. Stewart, and secretary, F. W. Thompson.

J. M. Engle of Santa Cruz has purchased the following horses from C. H. Moore of Indiana, Pa., and intends racing them on the Pacific Coast this year: Happy Jack 2:16½ by Capitalist, King Willis 2:16½ (pacing) by Bright Bell, and Charles Lee by Limonero 2:15½.

There is a foal at Shulthrust Farm, Port Chester, New York, bred to be a fast one. The youngster arrived February 7th and is the first foal of the year at that farm. He is by Directly 2:03½ and his dam is Bertha Derby, full sister to Diablo 2:09½ and Don Derby 2:06.

Quite a number of the mares at Palo Alto Stock Farm will be bred to Nutwood Wilkes this year. While this breeding farm is to be entirely closed out the mares will be bred the same as usual this spring, and for the sales this summer and fall will therefore be more valuable.

H. L. Stout, the well known New York Speedway driver, has lost by death his crack pacer, Teddy Look 2:20½, who figured prominently in last fall's matinee events. The horse was bitten by a rabid dog, and despite prompt treatment the animal died after several days' suffering.

J. B. Haggin has quite a large collection of trotting broodmares at his farm near Lexington. Most of the mares, including a sister to Adbell 2:23 and Alaska, dam of Wilask 2:11½, Lady Geraldine 2:11½ and Alkalone 2:14½, are with foal by Dan Cupid 2:09½. Alaska is twenty-two years old.

E. D. Morgan, a New York banker, will start a breeding stud in Kentucky similar to the Walnut Hill Farm of L. V. Harkness, where only trotters are to be bred. He will purchase a stallion to go at the head of his stud and has inspected Rhythmic, the great blind trotter, Charley Herr, Jay McGregor and the promising horse, The Bondsman.

A filly by Demonio, (own brother to Diablo 2:09½ and Don Derby 2:06) out of a mare by Nutwood Wilkes, that was worked some as a three year old by Sam Hoy last year showed a mile in 2:21 at the pace and will be trained again this year. On her breeding she should be a fast one.

March 7th is the date set for the Haywards Horse Show. It does not cost anything to exhibit a horse there and no prizes are offered, but it furnishes horse owners an opportunity to show their animals and to let a large number of people see the goods they have on hand, whether for sale or for breeding.

William Hogoboom, formerly of Marysville, Cal., but now of Walla Walla, Wash., recently purchased the Electioneer stallion Caution, that is the leading sire of the northwest country. Mr. Hogoboom has secured a high class horse and in his hands Caution will increase his reputation as a sire of fast trotters.

The Pleasanton Times said in a recent issue: "It is not generally known that Caesar Young, the well known running horseman, seriously contemplated the purchase of the Pleasanton track and running it in opposition to Ingleside and Emeryville. The deal, however, did not go through and the track was saved to the harness horsemen."

No business was transacted by the Directors of the State Agricultural society at the meeting in Sacramento last Saturday. No quorum being present an adjournment was taken until Saturday March 14th, when the selection of a Secretary to fill the vacancy caused by the death of Geo. W. Jackson will occupy the attention of the Board.

S. H. Hoy has twenty-one head of trotters and pacers in his stables at Winters, and is working them over his own track, which is a mile in circuit and a good safe track to work horses over. Mr. Hoy has a number of youngsters by his horse Bayswater Wilkes and they are as promising a lot by one stallion as can be found on any track in California.

The Assembly Committee on Ways and Means has returned a favorable report on Assembly bill 321, by Assemblyman Johnson, appropriating \$6,133.75 to pay the claim of the California State Agricultural Society. This claim is for the loss sustained by reason of closing the gates on the last day of the State Fair of 1901, on which day the funeral of President McKinley was held.

"I suppose I am asked on an average about twenty times a day what I think about the chances of Dan Patch to beat the world's record," remarked M. E. McHenry in New York the other day. "In my mind—to my knowledge, in fact—he has already beaten it, although he has not received the credit of it; but everybody knows he has gone that fast. He will go that fast and faster this year, and that is all there is to it."

Charles Marvin will, for the second time since he has been training horses, be employed by a United States Senator. Mr. Marvin, years ago, trained and drove the horses of Senator Leland Stanford and developed many fast ones. He will prepare a number of horses of his own for the February sales, and then take up the training stable of Senator Bailey, of Texas, probably taking the string down the Grand Circuit the coming season.

E. E. Smathers of New York has a pair of two year old 1903 Futurity candidates which Kentucky horsemen are talking about. One is a bay colt by Arion 2:07½, dam Red Tape by Prodigal 2:16, and the other is the bay colt by Pilot Sphinx 2:20½, dam by Pilot Medium. The former has gone a quarter with very little handling in 35 seconds, and the latter went a mile as a yearling last fall in 2:29½. The Arion colt is said to bear a marked resemblance to his famous sire.

Another of the great family founded by Fleetwing, dam of Stamboul 2:07½ sold for a good price recently. This was Mackay Wilkes, a trotting stallion by Red Wilkes out of Lady Mackay, dam of Oakland Baron 2:09½, she the daughter of Fleetwing. Mackay Wilkes was purchased by Mr. Alfred Vanderbilt recently for \$5000. He is said to be a stallion of the coach horse type and has trotted a trial of 2:19. It is likely that he will join the short tail brigade as he will make a prize winner.

Horace Wilson, for many years Secretary of the Kentucky Trotting Horse Breeders Association, and afterwards filling the same position for the Empire City Trotting Track, has just accepted the position of Secretary of the Charter Oak Park, Hartford, and Oakley Park, Cincinnati, both owned by Messrs. Welsh and Jones. Mr. Wilson is very popular with horsemen and with his employers will make a triumvirate that will draw big entry lists to the races and big crowds to the meetings.

Idolita 2:09½, for whom J. J. Scannell paid \$11,100 at the Fasig-Tipton sale, was shipped direct to his new owner's farm near Fishkill Landing, which is within one hour's ride of New York on the main line of the New York Central. Mr. Scannell has named his farm The Abbot Farm in honor of his champion gelding, The Abbot 2:03½. The Abbot Farm contains about 200 acres and is located in one of the most beautiful spots overlooking the historic Hudson. Trainer John Kelly is in charge and in addition to the aristocratic pair, The Abbot 2:03½ and Idolita 2:09½, he also has the handsome stallion Highland Baron 2:30, a National Horse Show winner, and the mare Nell Gwynne 2:10½. Mr. Kelly will permit Idolita to serve a very few approved mares, and at the same time will prepare him for a Grand Circuit campaign.

Arner, an own brother to Diablo 2:09½ and Don Derby 2:06, will make the season of 1903 at San Lorenzo this year. Arner is a brown stallion, and one of the best boned, stoutest horses ever produced by the great broodmare Bertha. He is very fast, and Barney Simpson, who will put him in training about the first of June, expects to give him a mark of 2:12 or better before the year is out as Arner worked a mile for him in 2:17 last fall with hardly any training.

Geo. T. Beckers, of University, Cal., owner of Zombro 2:11, has seven nice large paddocks for mares sent to that great son of McKinney and intends building several more. Mr. Beckers says he finds these paddocks quite handy for mares that are due to foal and those with foals at foot. Stallion owners who look after the mares sent them and return them in good order find that owners are appreciative and that the extra attention given the mares pays.

A very handsome mare by Secretary out of Pacheco, the dam of Anna Belle 2:27, owned by Mr. J. I. Sparrow of this city lost a foal by Falrose a few days ago. The colt which was a big black fellow, came dead a month before his time. Mr. Sparrow had bred the mare to McKinney and I Direct previous years but she had failed to get with foal, and he set high value on this Falrose colt. The mare will be again bred to Falrose this year, and it is hoped Mr. Sparrow will have better luck with her.

During a combination sale at Denver, Col., on February 3, when a number of local horses of the ordinary class were offered and sold, the fast trotting stallion Silversign 2:10½, by Silverthorn 2:15, was also offered in the same manner and attracted a number of prominent Colorado owners and campaigners to the sale. Judge E. A. Colburn, who has, since employing Tim Murnane as chief trainer, been on the lookout to add a number of desirable horses to his stable, proved the successful bidder in that lively bout; \$3800 was the price he paid.

The New York Trotting Association announces the following early closing purses for its Grand Circuit meeting in August: Bonner Memorial, \$20,000, 2:12 class, trotting; Hiram Woodruff, \$5000, 2:20 class, trotting; John H. Shults, \$5000, four year olds, 2:25 class, trotting; Metropolitan, \$5000, 2:20 class, pacing; Brighton, \$10,000, 2:10 class, pacing. Full conditions are given in the advertisement. In all events a horse must win a heat in three or go to the stable. Entries close March 7th. C. A. McCully is the secretary and should be addressed at 215 Montague street, Brooklyn, N. Y.

F. G. Schmidt, who purchased the crack trotter A. J. D. 2:09½, at the recent New York sale, has turned the animal over to the care of Bob Davis, who has about the best collection of campaigners any trainer can show, among them being the trotters Chain Shot 2:06½, King Chimes 2:10½, Edgewood 2:11, Miss Fearing 2:19½, Dark Secret 2:21, and the pacers Coney 2:02, Berdina 2:10, Tommy Wilton 2:12½, John W. Patterson 2:19½, Darling 2:22½, and Mercury Wilkes 2:14½. All will winter in the south and return to the Empire City track for fast work early in the season.

Among the horses to be sold by Fred H. Chase & Co. in the consignment from Rancho del Valle, of which Mr. Geo. A. Davis, of Pleasanton, is superintendent, is a black gelding called Lee Direct. He is by Direct 2:05½ out of Moscovine by Sidney, second dam by Belmont 64, the sire of Nutwood. This gelding is a square trotter and has shown a trial in 2:20 and eighths in 15½ seconds. A big sum was offered and refused for this gelding when a colt and he is today one of the best prospects in the State. The sale will be held in March and the date will be announced later. But for the fact that Mr. Davis is now quite ill and confined to his bed, the date and other particulars of the sale would have been ready this week.

Geers followed his time-honored custom on New Year's day, and dished out to Direct Hal and to her crack pacers and trotters quartered in his care at Memphis the famous "Geers' New Year Horse Menu," consisting of boiled greens, carrots and vegetables of like growth. For years Geers has followed this custom; not that he gives his horses this diet once a year only, but on New Year's day he has always attended to the serving of the food himself. "Carrots are the best horse liver regulator in the world," says Geers. "I always start the new year by serving them with what they may think is a banquet, for they seem to love dearly the ground vegetables, and I know that they will start at least with a clean record inside."

That pacing event between the two year old pacers owned by C. L. Griffith and S. Christenson, which is to come off over the Pleasanton track some day next month, is exciting lots of talk. In the "Jottings" department of the BREEDER AND SPORTSMAN last week Mr. Christenson's colt, which is being trained by James Thompson, was given us by Monbells. This was an error. The Monbells colt is a trotter. The pacer is by Altivo 2:18 (own brother to Palo Alto 2:08½) and is out of Adbuta by Advertiser, second dam Bell's Beauty, daughter of Electricity and Beautiful Bells. Perhaps it is the blood of old Midnight (dam of Electricity and Jay Eye See) that causes this two year old to pace, but whatever it is, he is a hummer. Last Saturday, although the day was windy, Thompson drove this colt a half in 1:09½, and the boys at the track are saying that the half mile dash when he meets Mr. Griffith's Direct filly will be in 1:06 or close to it, and the bets so far made are at even money.

Three sons of Prince Airle 28045, son of Guy Wilkes, are offered for sale by Mr. P. A. McEvoy, of Menlo Park. Their description and breeding will be found in our advertising columns. Prince Airle was by Chantilly, a great broodmare by Nutwood.

## Proportion Table.

When the table was put out first quite a howl went up from certain quarters, because of what was pronounced the fearful absurdity of giving McKinney 2:11 rank above some other sires named, and it was denounced as a juggling with figures, and irrelevant, and misleading, and hurtful, and other like terrible things. But as harness horse interests have survived and the work of breeding speed goes steadily forward, and particularly as the demonstrations of the previous table have become quite close at least, to crystallized public sentiment in the present, this renewal and bringing up to date of the figures and records may not be such a red-flag as it formerly proved. Dead sires, still making credits, have been kept in, though marked with a star, and the age given all the same as if yet in the stud. So far, as a rule, it does not seem that the matter of new ones added to the standard rank materially affects the proportion, in the instance of truly great extreme speed sires.

As a pointer for the future, attention is called to a few quite young sires not yet eligible to the table that are coming on with a high per cent of 2:15 speed, as for instance, Highwood 2:21, with seventeen in standard rank and a per cent of nearly 30 in the faster class, Oakland Baron 2:09, with six performers, and a per cent of 66.6, Moko the same per cent on three, Wiggins, 40 per cent on five, McEwen 2:18, with 33.3 on eighteen, Charles Derby with 26 per cent on twenty-three, Directum with 23 per cent on thirteen, Star Pointer 1:59, with 33.3 per cent on nine, etc. Our observations and reflections are left to the intelligent student to go through and master the facts of this table, with the full belief that the

more any one delves into and works this mine, the richer he will find it. The table follows:

Rank	NAME OF HORSE.	Age	No. in 2:15	No. in 2:10	Proportion in 2:15
1	McKinney 2:11	15	48	18	73.7
2	Baron Wilkes 2:18	20	105	20	92.2
3	Mambrino King *	30	65	14	82.1
4	Guy Wilkes 2:15	23	75	15	80.0
5	Prodigal 2:16	16	40	8	80.0
6	Bow Bells 2:19	15	31	6	80.6
7	Allandorf 2:19	20	31	6	80.6
8	Chimes 2:30	18	73	14	81.9
9	Shadeland Onward 2:18	19	37	7	81.9
10	Patron 2:14	20	43	8	81.9
11	Wilkes Boy 2:24	22	72	13	81.8
12	Robert McGregor 2:17	31	94	16	85.1
13	Brown Hal (p) 2:12	23	48	8	85.7
14	Anderson Wilkes 2:22	18	38	6	86.8
15	Stranger	22	38	6	86.8
16	Simmons 2:28	22	110	17	84.5

57	Nuthurst (p) 2:12	16	31	1	96.8
58	Nutwood 2:18	32	168	5	97.0

\* Dead.

## Used the Whip on Direct Hal's Son.

It has recently been stated that when Ed. Geers got the two year old colt by Direct Hal 2:04, out of Lady of The Manor 2:04, the youngster could not show a lick of speed at either the trot or the pace, in fact he had no harness gait whatever. Geers, so the story goes, fussed with him a while without making any improvement in the youngster, and finally took him out on the track and gave him a good thrashing. After going through the stretch a couple of times as fast as he could run, in a vain endeavor to get away from the whip, the colt, according to the story, struck a pace and from that time on he is said to have been a genuine pacer, and is now one of the most promising youngsters Geers has ever handled. There have been other instances where this kind of treatment has proven to be just the thing to show a youngster that he could go fast at the trot or pace, and there have been instances where the same kind of treatment has just about spoiled a horse for racing purposes. One of the most prominent trainers administered a good thrashing to a trotter last spring, and although he was an M. & M. prospect and had beaten 2:15, that licking lingered in his memory so vividly, that he was started in just two races, took no record and was finally sent to the sale ring. He was bought by a man who knew all about the circumstances, and he is in hopes to convince the horse that he was not concerned in the strenuous treatment he got last spring, believing that if he can, he will be able to earn some money with him this year. The whip can be used with excellent results under certain circumstances, but there are times when its use will simply cause its victim to forget all he has learned in the way of racing.—*Horse World*.

## Prairie Dell Farm

Spohn Medical Co., TOPEKA, KAN., Nov. 29, 1901.  
Gentlemen: Please send me two more bottles of Spohn's Cure, for which I enclose \$1. I consider it the best remedy for all distemper and throat trouble I have ever used.  
Yours respectfully,  
R. I. LEE.

## Bond's First Consul.

Horsemen who are familiar with the pedigrees of the founders of the noted trotting families know that the sire of Henry Clay, founder of the Clay trotting family, was Andrew Jackson, and that Andrew Jackson was by Young Bashaw. They also know that Young Bashaw was got by imp. Grand Bashaw, a thoroughbred Arabian, and his dam was Pearl by Bond's First Consul, his next dam being Fancy by imp. Messenger.

It is probable that but very few if any of the present generation have ever read a description of Bond's First Consul. We are indebted to W. S. Bailey of East Hardwick, Vt., for a copy of the Washington Advertiser published in 1807, that contains an advertisement of this horse from which we extract the following:

Consul is of fine figure, beautiful bright bay with a small blaze in his face and his hind ankles white; full 15 hands high. It is expected that the stock from Consul and well bred mares will not be surpassed by the stock from any horse (scarcely) in America, for the turf, carriage or saddle; or even from Consul and good looking mares which have none of the running blood; their colts cannot be other than elegant in a carriage or under a saddle.

He was foaled in Philadelphia county, June, 1798, got by the noted running horse Flag of Truce, his dam by the imported horse Slender, his grandam from the imported mare Dianna. Dianna was got by Old English Eclipse. Slender was got by King Herod, who produced more runners than any other horse in England, as may be seen by the Racing Calendar, therefore it may in truth be said on the dam side of First Consul, the two great grandsires were the best horses England ever produced.

Flag of Truce was bred by Colonel Good of Virginia and was esteemed the best turf horse in his day, and was the sire to Colonel Taylor's famous running horse Leviathan. First Consul has won either twenty or twenty-two purses from 100 pounds and 100 guineas, and never started against a horse he did not outrun until the fall he was eight years old. The spring following he won three purses and distanced the field the first day at New Market on Long Island.

JOSHUA B. BOND.

Philadelphia, March, 1807.

It would seem from the above that First Consul was an elegant or at least a handsome horse, and bay in color. Grand Bashaw was also a very handsome horse in conformation and his color black. Young Bashaw, however, according to the best authority, was some what coarse and his color was gray.

He evidently bore a much closer resemblance to his Messenger ancestor than to either his sire, Grand Bashaw, or the sire of his dam, Bond's First Consul. His inclination to stick to the trotting gait unquestionably came from his second dam, Fancy, a daughter of imp. Messenger.—*Am. Horse Breeder*.

## Milk Worms in Colts.

This no doubt is a continual worry of many breeders concerning their colts, hence I think it proper to mention a few words concerning worms in general. I have had various experiences with many remedies to expel worms and bots from horses, and milk worms from colts. Many of these remedies did expel the worms, but there was always a sign of weakness following the expulsion, with loss of appetite. Hence I thought of trying some remedy that contained the expelling power, and at the time time would be strengthening. I finally turned to the Manhattan Stock Food, Red Ball Brand. I fed the food to all my colts, mares and horses last year, and will state that my expectations were more than realized. It not only freed them of these parasites, but it also improved their appetite and put them in the pink of condition as well. I, for one, would have no other. It took me a long time to give these patent nostrums a trial, but am now convinced that there are some good ones among them, and the Manhattan Food is one of them.  
JOHN S. GILMAN

## Registration of Thoroughbreds.

It is well to remind breeders once more that all registrations must now be made direct to the office of the Jockey Club—the Windsor Arcade, New York City. The head of the registration department is James E. Wheeler, to whom all communications on this subject must be addressed. The registration rules, which have been adopted by all other jockey clubs in good standing, require all horses foaled in the United States or Canada to be registered with the New York Jockey Club, which now owns the Stud Book, before November 1st of the year in which they are foaled. Unintentional failure to do so may be corrected up to December 31st, on payment of a fine of \$10, and after that date on payment of a fine of \$50. The cost of registration is \$2, including certificate.

Owners are also reminded that a name must be claimed for all horses prior to March 1st of their two year old career. Omission to do so entails a fine of \$50, which must be paid and a name claimed two clear days before the horse can start. A horse once named, its name cannot be changed. When claiming a name for a horse it is well to send a list of at least half a dozen, for no duplication of names is permitted. Only horses of five uncontaminated crosses of thoroughbred blood, or which traces authentically on both sides to animals recorded in the first six volumes of the Stud Book, are eligible for registration. No horse can start until registered and named.

Sober up on Jackson's Napa Soda.

## THOROUGHbred DEPARTMENT.

In view of the near approach of the meeting of the Western Jockey Club in Chicago a question having an important bearing upon the future of racing in the West is being freely discussed among the more thoughtful of the horsemen assembled here from all parts of the country.

It is the proposal to establish a night school for jockeys and apprentice boys at every race track where recognized meetings are held under the jurisdiction of the Western Jockey Club. The idea is to have the project taken up officially by the Western Jockey Club, so that its maintenance and government could be efficiently and practically enforced, making the attendance of the boys compulsory and the establishment of the schools incumbent upon the track managers.

Horse racing is now on the flood tide of popular favor and financial prosperity, and it is not too much that the community should expect from those who are reaping a rich harvest from the sport some adequate return in the shape of turf reform. As everybody knows, the ranks of the jockeys are being largely recruited from a class of boys who are without homes or friends who take a lasting interest in their moral and material well-being.

The bane of the sport is to be found in the low moral standard prevailing among these boys. Uneducated, uncared for and neglected, they knock about the stables in the lowest company, practically friendless and wholly uncultivated, until they attain a measure of success.

Then comes a change, and a violent one. The boy who a few months before considered himself lucky to be possessed of sufficient income to provide him with the bare necessities of life suddenly finds himself earning from \$10 to \$25, or even \$50 a day, and in nine cases out of ten he does not know what to do with his money. It is no wonder he should enter upon a career of the wildest extravagance and dissipation, the cost of which will soon pass beyond the limits of his newly acquired income.

His character is yet wholly unformed, and he is almost sure to fall into the hands of ill advisers, so that he drops into evil ways while yet really a child of tender years. Before he is old enough or intelligent enough to discriminate between the right and wrong some turf pirate will tempt him into a dishonest job, and then he is on the high road to a life of criminality that can end in only one way. Should he escape the vigilance of the racing stewards the moral taint is there all the same, and between dissipation and dishonesty he sooner or later comes to grief.

He becomes too heavy to ride, turns tout or stable boy, and finally assumes the role of mentor and leads other youngsters into the road that he himself has traveled. There is no gainsaying the fact that too many crooks are graduated from the ranks of what were at one time promising jockeys, and all because uneducated, ill-trained boys, without any idea of the value and legitimate uses of money, are under the existing system suddenly supplied with more money than they know how to use intelligently.

Racing cannot be too strongly fortified with substantial friends among the better and more influential classes, and the way to win and hold such friends is to evince a disposition to leave no stone unturned to elevate the sport in the social and moral scale and to make it absolutely free from the taint of dishonesty.

Immense power for good or evil is always bound to be locked up in the small brain of the boy that weighs from 80 to 100 pounds, and it is of the greatest importance that the youngster should have his mental and moral faculties developed in adequate proportion to his physical development.

Fines are inflicted on jockeys not for the purpose of income for The Jockey Club, but for the corrective influence they exercise, and should a portion of the money collected in this way be expended in the education of the little fellows the fines would be vastly more effective and far-reaching in their effects than they are now. President Bush of the Crescent City Jockey Club is reported to be strongly in sympathy with the proposed reform.—*New Orleans correspondent Daily America.*

The Palace Hotel Handicap was decided last Saturday at Ingleside, and a field of nine horses went to the post. The Morris stable, consisting of Gold Van and Cunard, was favorite at post time, although Nones was held at about the same odds as the Morris entry. Yellow Tail was thought to have a chance at the weights and rewarded his backers by setting the pace immediately from the start, and holding his advantage throughout passed the finish a half length before Gold Van, on which Cunard was lapped, with the rest

of the field beaten off. In the run through the stretch, however, Yellow Tail had bolted from the rails to the centre of the track, interfering with both Cunard and Gold Van, and was subsequently disqualified for foul and placed third, thus giving first and second money to G. B. Morris. Watercure was unfortunate at the start, nearly being left, but made up a world of ground and would have been a strong contender with an even break. Argregor was a disappointment, showing none of the speed which he was supposed to have developed in his work; he also received rather a listless ride at the hands of Clem Jenkins, who had the mount on him. Nones also did not run up to expectations, while Claude was outfooted from the start.

The race run by Gold Van in the Palace Hotel handicap was a remarkably good one and the performance shows him to be possessed both of speed and class. He must certainly be regarded as a dangerous factor in the Derby to be run next week should he go to the post in that event.

Two of the Derby candidates, Durazzo and Krishna were asked to go a mile on Monday and their performance on that occasion would apparently not warrant any extensive backing of either of them in the classic event to be decided next week.

Double Six shows great improvement under the training of Bob Smith, and runs much more gamely than she has ever done before.

Rose of May finally succeeded in landing a purse for her owner, after having been backed on several occasions. This mare has now rounded to and will be hard to beat in her own class from now on.

Jockey Clem Jenkins, who has ridden in England as well as on the Eastern tracks in this country, has failed to live up to his reputation as a first class rider since he has been riding on the Pacific Coast this winter. He is very slow in getting away from the post and many of his finishes lack the necessary vigor.

The Ingleside mile record, which has stood for many years, was shattered on Monday last when Kenilworth stepped the distance in 1:39½ with 111 lbs. in the saddle.

Owner McCafferty no doubt has discovered that Quiz II. was not such a cheap horse as he thought when he bought him out of a selling race at Oakland. Every purse won by McCafferty since that occasion has been lost through the running up of the winner by J. M. Crane, the former owner of Quiz.

Jockey C. Kelly had the honor of riding the winners in both the Burns Handicap and the Palace Hotel Stake.

Jockey Winnie O'Connor arrived Tuesday at Cherbourg, France. Word came to a friend of his in this country that he had arrived safe, but by no means sound. O'Connor, in fact, was a very sick young man all the way over, and reached his new field of labor practically in a state of collapse. Although he is a vigorous proposition and full of life physically, posing now and then within the past several years as a boxer, a bicycle rider and an actor, in addition to his work in the saddle, O'Connor proved to be a distinct failure when it came to sailing. "He was a bad sailor," said Mr. Featherstone, his late employer. "O'Connor couldn't even take a little fishing trip without becoming sick, as was proved on several occasions when he went out with me. The jockey will probably recover by the time he reaches Paris and forget the rough midwinter journey across the Atlantic before many days have passed.

Through a misunderstanding between father and son, Esherin, John F. Schorr's fast filly, winner of the California Oaks, was declared out of all her important Western stake engagements and the senior Schorr is wishing he had not acted so hastily. Esherin belongs to Schorr, Jr., having been one of the horses turned over by father to son at Chicago last summer. The easy manner in which she won the California Oaks caused Schorr, Jr., to write his father that he thought he enjoyed a mortgage on first money in the Tennessee, Kentucky and Latonia Oaks, and that if any long odds were offered against Esherin to place a few dollars on the filly. This letter brought to the senior man's mind that he had caused the filly to be withdrawn from her engagements just recently. Therefore she will be ineligible to start. Schorr did not regard his son's horse as having a chance, and wishing to save all his forfeit money possible, declared Esherin out of all Western stakes. She is entered in the Englewood Stakes at Washington Park.

There was a bad mix up in the fifth race on Tuesday when Canderos and El Karn collided near the half mile pole, throwing Jockeys Bozeman and Waterbury, who miraculously escaped serious injury. Canderos

was first to fall, breaking one of his legs. Striking him full force El Karn apparently broke his neck, for the horse never moved after falling on the track. Canderos was afterwards destroyed.

Johnny Daly has shown great improvement in his riding during the current racing season and has now developed into one of the best lightweights now in the saddle.

The ring was clearly out of line when it layed tens about the chances of Galanthus in the last race on Tuesday. This horse was beaten a head in his last previous essay and was clearly the best horse in the race and would undoubtedly have won with a good rider in the saddle. In the face of this and notwithstanding the change of jockeys plenty of ten to one was obtainable from the bookmakers.

Jockey Hoar, who formerly rode here, is in serious trouble at New Orleans and may find himself in exactly the same boat with Buchanan. He is accused of getting purposely left at the post with Becky Rice, the heavily backed favorite in the New St. Charles Hotel Stakes for two year olds. A number of persons who were intently watching the youngsters while they were at the post, believe that Hoar, who, it may be said, has for some time been regarded with suspicion by the stewards of the Crescent City Jockey Club, was left by design. Among others who evidently think this is Starter Fitzgerald, who, on meeting Mr. Scoggan after the race, advised him not to put Hoar up on his filly again. That in itself was significant, but it was not all. Mr. Fitzgerald went before the stewards and told them that Hoar did not try to get away.

Henry Shields will leave the early part of March for Europe, where he will ride for the same stable that he has been with for the past two years. This jockey is like Tip Leigh. He is a bright and manly young man and is not only a good jockey, but can train a stable of thoroughbreds as well.

Henry Spencer, who will ride for the Baron Harkagi in Austria next year, engaged passage on the steamer Lucania, which sails on the 21st.

"I am lighter than I have been at this season in two years," said Spencer. "Without any hardship I could ride at 108 pounds right now, and I feel that I could even scale at less than that weight.

"When I sail for Austria I will make my second trip abroad for the purpose of riding horses. When I first went to England I didn't have the very best material to work with. Mr. Keene's horses were not in the best of shape, and I wasn't feeling particularly well myself. I look forward to pleasant times in Austria. They tell me the Baron has a string of high class horses and that I will be given every opportunity available to distinguish myself. No, I am not to take my bride over with me. I haven't got a bride—don't expect to have any, and I will sail alone—all alone—on the Lucania."

A lot of McMurray carts just received. You need one right now to work your colts in this winter. Call at the Kenney Manufacturing Company, 531 Valencia street and take a look at these carts and other first-class vehicles they have for sale.

Like all good things, Jackson's Napa Soda has a dozen counterfeits.

## Combault's Caustic Balsam

The Great French  
Veterinary Remedy.

A Safe, Speedy and Positive cure  
for ailments of

**HORSES and CATTLE.**

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

## ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

### A Born Fisherman.

Too tired to work.  
Too tired to walk.  
Too tired to read.  
Too tired to talk.  
Too tired to eat.  
Too tired to fish.  
Too tired to write.  
Too tired to think.  
Too tired to ride.  
Too tired to row.  
Too tired to stay.  
Too tired to go.  
Too tired to wait.  
Too tired to wish:  
But never too tired  
To set an fish.

### Trout Fishing Reminiscences.

Every fisherman has heard his well-meaning but non-fishing friends exclaim: "Oh, I haven't the patience to fish!" as though that was all that went to make up a fisherman. Usually you smile or murmur vaguely that everything comes to him who waits, but now and then somebody will come over the well-worn phrase, on whom you can pour out your vials of wrath in telling him that he also lacks skill, energy, brains, and the gift. Patience, with them means a rod, a body of water, and hours of time, and frequent repetitions of the dose. "Patience, indeed! Why, some of the most successful fishers," says 'Bob' McFarland, "I have ever been with have made the air quite blue around them with the fervency of their remarks when flies were missed, leaders breaking, rods a-smashing! Yes sir! I have seen a fouled reel cause an ardent fisherman to show what patience was in his make-up."

"I am afraid we are misunderstood and the noble art of angling not appreciated. One time an elderly minister of great scholarly attainments was preaching the baccalaureate sermon at the commencement of a young ladies' seminary in Austin, Texas. His subject led him to speak of the art, and he called it "the peaceful and unexciting pursuit of angling." What think you of that? You who have had the black bass jumping, 'crazy for the fly.'

The fisherman knows hopes, fears, longings and triumphs that come not to ordinary mortals, and they are as dear and as slow to be relinquished as the dreams of an opium eater. But how different in the effect on body and mind—the difference of life and death. Fishing never kept a man down. Look for proof at the number of noted men who have been fond of fishing, and when a great man fishes at all he fishes to perfection. Take 'Parson' Jackson, Mr. James Watt, 'Jim' Pariser, J. B. Kenniff, Al Cumming, Captain Battu and a host of anglers I could mention.

Boys are fishermen ex-officio, but they do not take to it seriously. When they grow up it is only a small percentage that go fishing in earnest. Of all my boy friends I believe that I am the only one who cares to fish, and I often think of the very first fish I ever caught and wonder if there was any foreshadowing of my fate in the circumstance.

There were five boys whose ages ranged from five to seven, and we very carefully set our fishing poles at the root of a big cottonwood tree on one bank of the Brasos and went away to play. When we returned we found that a big horned catfish—everything in Texas, you know, has horns—had been caught and that he had thrashed around among the different lines until they were wound into one. We landed the big fish, as long as any of our arms, nor stood upon the order of landing. A man came by and a season of breathless suspense ensued while he was tracing the cat. When the lines were untangled the fish was found to be on my line, and I ran home with it in my arms. I am the only one of that hopeful group who casts a line in the water to-day.

May be circumstance has most to do with making a man a fisher, even as the taste of mutton makes a sheep-killing dog out of a 'fyst.' But not all. There may have been many a man who from want of chance has lived and died without knowing his capabilities as a fisher, or what life held for him. 'Some mute, inglorious Milton' whose lot forbade.

I think all fishermen are proud of their proficiency in the craft, and look down somewhat on those who do fish as well as they. They may not brag about it, after the manner of men, but in their inmost souls they respect not the frantic efforts of a superior in most things in his endeavor to whip out a line-length of his rod. I have been with grey-haired men who had made a success of life and to whom I must have deferred in all things else, for whom I had a kind of contempt, of which I was ashamed, when fishing with them, for the unskillful way in which they handled themselves in their futile endeavors to extract fish from the water. It probably never occurred to such a man that there was any special reason why he should be expected to fish well.

Once fished with a medical gentleman who had never fished that there was any particular sleight in the

art of angling. We were just established in a camp in the woods at the forks of an ideal trout stream. The north fork came down with that clear amber color which water gets by flowing through spruce woods and the south fork slightly discolored by the mud it drained from a bog. This mud is deposited in twelve or fifteen miles, and the whole stream becomes again as clear as crystal. There was a gentleman in the party, an insurance broker, who was paired with me for the south fork. His rod and accoutrements looked suspiciously new, but it was not until he respectfully asked me to put a worm on the hook that I knew he was new to the business. We started up the south fork, a stream about twenty feet broad, and I let him go ahead—the most pronounced act of self-denial that the trout fisher knows. He did not care to lead the way, and telling him the proper distance to keep behind me, I had the glory of casting in the stream the first line that had been cast, may be in months.

About the first time we separated my companion stepped on a smooth stone and fell down on his back in the ice cold water. He tried to make a few remarks on the mishap and the contractions of his throat were awful. I advised him that we had better take a drink and that he should then set his teeth together and not try to explain how it happened for fifteen minutes or so, and his remarks would be more connected. This is the only way to hide all signs of the effect a sudden ducking has on a man.

Having saved my manners and secured the place ahead, we gradually worked our way up the stream, casting a fly in the lively places and taking a trout too frequently, for my count would soon be reached, there being several other fishermen out.

At a bend in the stream, where some big boulders marked a geological change in the face of the country, when standing on a large rock, I had a rise from a big trout and tried for some minutes to get him to change his mind about rejecting the fly, but to no purpose. My friend overtook me and clambered over the boulders near me. Just then his feet slipped, and he sat down very violently on a big stone and a crash followed. Now, most regulated families and camps have a small supply of some stimulant on hand in case of accident, but it is an unwritten law in our camp that no one was to carry a bottle with him after the manner of that small supply in a pocket flask vulgarly called a "booze-pot," and also that it is to be used in moderation. Anyone so far forgetting himself as to celebrate the first fingerling of the stream, or for other seemingly good reasons, had the pleasure as well as the privilege of contributing the sum of five dollars and upwards, which was to be applied to the reduction of the sum total of the expense fund.

This being his first trip was excusable for not knowing this rule. His "booze-pot" was an elaborate leather-bound flask, the property of the captain of the expedition, to whom it had been presented by someone he thought a lot of. He prized it very highly. Therefore, when any fellow angler put it in his hip pocket and sat down very hard it gave way, and great was the catastrophe.

Continuing up the stream, saving the adults and casting back the infants into the water to grow bigger, we worked our way up the stream. The overhanging boughs made casting difficult, and my friend's remarks when his line became entangled in a tree for the twentieth time were very edifying.

About a mile or so up I found that I had upwards of thirty-five trout in the basket all that I intended to catch. The uninitiated might argue that trout being being plenty, they could be caught and put back as they were so plentiful. I am not that kind of a fisherman. There has to be a chance of acquiring to make pleasure for me in the complex sport of fishing. I dreamed of the delights of catching a tarpon until someone told me the fish was no better than carrion when caught. Since then I have not hankered after such sport, but I must say I do enjoy striped bass fishing.

We sat down on a flat rock in the middle of the stream and he looked at the fish. He had not been able to secure one, little or big. We sat there talking and becoming acquainted. He gave me the first idea of his powers of raconteur, for as such he is unsurpassed. It was his graphic description later of my enthusiastic remarks in landing a big fish that leads me to retaliate in a slight degree. There we sat, I with my rod in my hand, with the line and leader gathered in an orderly manner. He sat with the water washing around his feet, with his back down stream. His rod was on his shoulder and the line trailing down stream. The bait was a fat angleworm, which the strength of the current kept on top of the water. He was telling a rollicking Irish story when a good-sized trout took the bait and gave the rod a wrench. He immediately jumped up and very coolly and without playing the fish led it in and remarked: "That was easy!"

Since then, when, after toiling with rod and line for hours, and there seems to be nothing in the waters under the earth, a fish takes the lure in the twinkling of an eye and is taken in turn, I lose sight of all the labor of the hours which brought me nothing and think how easy it is to catch fish."

The College City Gun Club will open the club trap season with a shoot on the club grounds on Sunday March 1st.

The striped bass record with rod and reel is held by Mr. William Post, who landed a 70-pound fish at Graves Point, Newport, R. I., July 5, 1873.

### AT THE TRAPS.

Indications for a lively season at the local trap grounds are promising. The first shoot of the season is to take place at Ingleside to-morrow. The following card is presented for an open-to-all blue rock shoot under the auspices of the Golden Gate Gun Club:

Event No. 1, 10 targets, entrance 75 cents, 3 moneys, high guns. Event No. 2, 10 targets, entrance \$1, 3 moneys, class shooting. Event No. 3, 15 targets, entrance 75 cents, 3 moneys, high guns. Event No. 4, 15 targets, entrance \$1, 3 moneys, class shooting. Event No. 5, 20 targets, entrance \$1, 3 moneys, high guns. Event No. 6, 20 targets, entrance \$1.50, 3 moneys, class shooting. Event No. 7, 20 targets, entrance \$2, 4 moneys, class shooting. Event No. 8, 3 man team race; teams to be drawn from a hat, 20 targets, entrance \$1, 3 moneys, high teams to win. Event No. 9, 100 bird contest for the Phil J. Bekeart trophy, entrance \$5, including targets. Event No. 10, merchandise shoot, 20 targets, entrance \$1, class shooting. Ties to be shot off, miss and out.

In several of the events, the Sergeant system will prevail; the grounds have recently been fitted for shooting events under this system.

The Bekeart trophy is now held by M. J. Iverson, who won the cup last year from A. J. Webb.

Gold bars will be awarded to each shooter for each string of 25 straight. Silver bars will be given each shooter for each score of 15 straight breaks.

The club will hold six monthly shoots this season. To reach Ingleside by street car it is necessary to go via the Guerrero street line.

The Millwood Gun Club will hold club shoots at the club grounds, Manzanita Station, Marin county on the last Sunday of each month during the coming season.

A set of traps for shooting under the Sergeant system have been erected, new electric trap pulls have been put in and the entire grounds given an overhauling.

The announced official handicaps for the California Wing Club members for the opening shoot at Ingleside on March 1st are the following:

C. C. Nauman 31 yards, M. O. Feudner 31, C. A. Haight 31, W. J. Golcher 30, H. C. Golcher 30, E. Donohoe 30, J. H. Justins 30, P. J. Walsh 30, E. A. Fay 30, G. H. T. Jackson 30, Dr. A. T. Derby 30, N. H. Neustadter 30, J. J. Sweeney 29, P. B. Bekeart 29, G. W. Gibson 29, H. F. Wagner 29, F. J. Stone 29, A. M. Shields 29, A. M. Baker 29, C. H. Shaw 29, Dr. S. E. Knowles 28, Dr. E. G. McConnell 28, F. C. Tallant 28, J. V. Coleman 28, F. W. Webster 28, A. Roos 27, A. Hamilton 27, L. D. Owens 27, H. Kullman 26, Dr. George Birdsall 26, W. L. Gerstel 26.

The foregoing handicap is subject to changes as follows: A shooter making a clean score will be put back one yard at the following club shoot, a shooter losing one bird will shoot at the same yard mark at the next shoot. Shooters losing two birds in any club match will be advanced one yard at the next shoot. The maximum club handicap is thirty-four yards, the minimum, twenty-six yards.

The club's opening shoot will take place as usual, on the first Sunday in March. \$150 will be distributed among the high guns.

For Monday at the live bird grounds an open to all shoot is programmed.

### Save the Birds.

The owl, possibly more than any other species of bird not considered game, is the target of the man and boy with a gun. We have often pleaded the cause of the owl as well as other birds in an effort to save useful birds from wanton destruction. The following communication from a San Jacinto orchardist is of a practical nature and we hope may have its scope in aiding the good work:

"It is a concerned fact that the gopher is one of the most persistent and troublesome pests that the citrus fruit grower has to battle against. The ingenuity of man has been taxed to provide means for its extermination as evidenced by the great variety of gopher traps seen on sale, and we seldom hear of the natural enemies of the pest among our native animals or birds. To bring this matter to the attention of your readers is my excuse for the following remarks. Early last spring I discovered that a pair of monkey-faced owls had pre-empted a section of my dove cote, built in the upper part of our barn, for a nest. Our first impulse on making the discovery was to destroy the intruders, to ensure the safety of our doves, but the principle of treating the accused as innocent until proven guilty saved the owls from molestation, and gained for us friends for which we have many times since been truly thankful. The nest was so situated that it was easy of inspection and daily visits were made to it during the weeks of hatching and until the young were grown. The amount of animal life that was carried in to those youngsters was a constant wonder to us. The bill of fare provided by the parent owls consisted of kangaroo rats and mice, ground squirrels, half grown jack rabbits, gophers by the dozen. From first to last not a creature with a feather was brought in, not a dove disturbed. They soon regarded the owls as proper residents of the cote and each came and went without regard to the movements of the other. The owls did not leave us after their family was raised, but have made their home in our eucalyptus trees all summer, and each night their plaintive, musical Who! Who! tells us that our guards are awake and that the campaign against the army of pests is still progressing and its affect is distinctly manifest. Any man or thoughtless boy who kills one of these birds is a public enemy and to safeguard them our law makers should throw every possible protection about them, and if the publishing of these facts tend to bring about increased consideration for them I shall be satisfied.

## Bear Hunting in British Columbia.

The bears which we read of and the bears as we found them, during ten years' experience in one of the best game districts of North America, are two very different animals.

The Indians and the very earliest settlers of British Columbia used to hunt bear with smooth-bores taking a solid bullet, and were very often successful. They generally gave the grizzly and the cinnamon bear a wide berth, but the black bear was in those days not the excessively shy animal that he is now, and would often be found grazing or digging roots on open hill-sides all through the daytime. Now, there is no more difficult animal to hunt, not excepting the big-horn, than the black bear, unless baiting is resorted to, as he keeps to the thick timber except during early morning and just before dark. When they first come out of their dens, in April, sooner or later, according to season and location, bears are very hungry, and do a tremendous lot of traveling in search of food. The young grass which springs up as soon as the snow goes and roots form the staple diet, varied with insects, which they get from rotten logs and upturned stones; and, like their porcine relative, they will eat any kind of carrion greedily. The young pigs of the bush farmers are highly esteemed by black bears, and when the poor pig is squealing and struggling in the claws of his enemy then is the time to get a shot.

In the spring of 1890 my pigs were spending a few hours daily among the "skunk cabbage," which grew luxuriantly in the cedar swamp about two hundred yards from the house. When washing my hands for dinner one day I suddenly heard the most awful screaming, and just as I had realized that a bear was after the pigs, out of the bush they came running and completely out of breath. The bear had lost his prey, but had left five claw marks through the shoulders of one poor porker, which eventually died from the wounds.

Another time, while raising potatoes, the stillness of our beautiful valley was disturbed by the death knell of a neighbor's pig, and before I could get there with my rifle, five shots rang out and two Indians, who were clearing land near, had a fine black bear stretched out before them.

During August there are in places quantities of wild berries ripe, and these the black bears are very fond of; but at this time the skins are worth very little, on account of the fur being short and rubbed off in places. I have watched a bear feeding on these berries, standing up to reach the high up ones, and breaking down the bushes to get at the fruit. In the fall of the year, during October, before they den up for the winter, black bears often feed on a kind of brown fungus or mushroom, which acts as a purgative, and their droppings are changed in appearance.

Unlike black bears, grizzlies prefer living far away from the haunts of men and seldom venture near a settlement, although when they do so their great strength and ferocity render their raids all the more serious. In the spring of 1899, one old grizzly of great size killed over twenty head of cattle, little and big, belonging to the Douglas Lake Co., in the Nicola valley.

About ten years before these incidents occurred a young Indian was killed by a grizzly on the west side of the Okanagan lake. He had seen some magpies fly, and, going to see what they were after, he came on to a grizzly watching the carcass of a deer, on which he had been feeding. The Indian was brave, and had confidence in his double barreled gun loaded with ball and his long hunting knife. Both of these, however, failed, and the bear did not leave him until he had mauled him and bitten into his brain with his big jaws. His squaw (or klootchman, as they are called in British Columbia) saw it all from a tree near by, but was, of course, helpless, and she could only run back to the reserve, which was near, for help to carry away her dying husband.

When a black bear finds a carcass of a deer or other animal, he eats at it just like a pig would, and, when satisfied, retires to the thickets near, to return at nightfall for another meal. Not so the grizzly, however, which, when he is lucky enough to kill a deer or find a dead horse or cow, eats all he wants and then sets to work to cover it all up with grass and other rubbish, which he rakes off all the ground around with his powerful claws. He will then dig a hole somewhere near and lie in it to watch his prey, only leaving it to get a drink of water now and again. One of these brutes, which is now standing, life-size, in my hall, dug seven holes all around the dead horse before I found him there.

To get a shot at a bear by stalking in timbered country like British Columbia is a most difficult matter, as anyone who has not tried it will find. I have put in weeks in a good bear country with the best native guide that I could get, and in a thin pair of buckskin moccasins searched for them day after day at early dawn and sunset, and seen nothing but tracks. So careful were we about the wind and not to make a noise, that we constantly came on to deer and other game at short range, quite unconscious of our approach; and to carry out this style of hunting requires the greatest patience and perseverance on the part of the hunter. It is a fact, however, that four or five bears are shot by baiting them, and this is the only sure method of getting a shot where they have been hunted to any extent.

One evening in May, two years ago, I was sitting on the top of a high bank, at the foot of which, and about eighty yards away, were the remains of a horse. I chose the top of the hill because the smell of me would not reach a bear approaching the bait from below, as the wind would carry it over him. I had filled my

pipe in order to keep off the mosquitoes, which were very thick, and was going to light it very carefully, when I saw a black object glide into view among the trees and more straight towards the bait. He circled around it before going to it, and stood with his front feet on a log to look around. Steadying myself against the side of a fir tree, I put the white front-sight a little forward of the middle of the black and pulled off. At the shot, down went the bear all of a heap, but, recovering quickly, disappeared in the thick bush at the foot of the bank. Going down, I soon found lots of blood from the .400 nickel covered bullet and I followed the sign for twenty or thirty yards, when I heard a great rush a few yards away, but, owing to the dense growth, could not see the beast. After searching for about fifteen minutes more, I found the blood again, and there, within ten yards of the river, now bank high with snow water, was my bear on his back, stone dead. It was now nearly dark, and, after taking the "insides" out, and leaving my waistcoat on him to keep off coyotes, I made my way back to camp, about two miles off. It was nine P. M. when I got there, and my Indian guide and cook were in bed and I soon followed suit, well pleased with the evening's work.—*Shooting Times.*

## Westminster Kennel Club Show.

The entries for the show closed just twenty-one short of last year; a comparison of the entries by breeds is very interesting and is as follows:

Breeds.	1902	1903	Breeds.	1902	1903
Bloodhounds.....	23	17	Airedales.....	56	53
Mastiffs.....	9	8	Boston Terriers.....	215	177
St. Bernards.....	92	71	Whippets.....	6	11
Newfoundlands.....	1	3	Chow Chows.....	3	3
Great Danes.....	76	93	Bassets.....	5	11
Deerhounds.....	10	9	Beagles.....	137	87
Borzoi.....	37	47	Dachshunde.....	51	59

The awards in winners' classes were as follows:

Bloodhounds—Dogs and bitches—1 Dr. C. A. Lougest's Wandle Warrior, res F W Clark's Blanche Knox.

Mastiffs—Dogs and bitches—1 Dr. C. A. Lougest's Prince of Wales, res same owner's King Canute.

Deerhounds—Dogs and bitches—1 Beauveau Borle, Jr.'s The Laird, res Albion L. Page's Warwick.

Russian Wolfhounds—Dogs—1 Edward L. Kraus' Boyar, res Walter H. Conrad's Dvorak of Nepahwin. Bitches—1 Edward L. Kraus' Navrasala, res John H. Matthew's Madeline.

Greyhounds—Dogs—1 Mrs. Joseph B. Vandergrift's Leeds Elect, res F. B. Lewis' Landsdowne Royal. Bitches—1 Tilley Brothers' Hall Stream, res Mrs. Joseph B. Vandergrift's Ch. Leeds Music.

French Bulldogs—Dogs—1 Mrs. H. L. Cornell's Marabout, res Miss Mary Sharswood's Paulus II. Bitches—1 Mrs. Theodore Offerman's Maboue, res Aquehung Farm Kennels' Marquise.

Airedale Terriers—Dogs—1 Joseph A. Laurin's Colne Lucky Baldwin, res Matthew Morgan's Accrington Crack. Bitches—1 Savinhurst Kennels' Cloumel Majesty, res Columbus O'Donnell's Red Hackle.

Boston Terriers—Dogs—1 James T. Gilligan's Ch. Roxie, res Bayside Kennels' Bayside Chauncey. Bitches—1 Dr. J. Varnum Mott's Snowflake, res J. O. McMullen's McMullen's Bessie.

Beagles—Dogs—1 Round Plain Beagles' Reed's Dan, res Windholme Kennels' Ch. Windholme's Robino II. Bitches—1 Windholme Kennels' Ch. Windholme Bangle, res Rock Ridge Kennels' Rock Ridge Vixen.

Irish Terriers—Dogs—1. Rev. Father O'Gorman's Celtic Badger, res M. Bruckheimer's Masterpiece. Bitches—1 Meadow Kennels' Erminie, res G. Gordon Hamill's Hilltop Vixen.

Bull Dogs—Dogs—1 H. B. Billings' Chibiabos, res Richard Croker Jr.'s Rodney Stone. Bitches—1 W. C. Codman's Ch. Glenwood Queen, res W. S. Kilmer's Remlik Bovio II.

Irish Setters—Dogs—1 B. B. Lathbury's Ch. Rockwood, Jr., res P. A. Valentine's Longwood Link. Bitches—1 B. B. Lathbury's Goldreme, res P. A. Valentine's Sig's Girl.

Gordon Setters—Dogs and bitches—1 Clinton Hill Kennels' Echo Clinton, res Richard Shrimp's Ned S. Field Spaniels—Dogs—1 Swiss Mountain Kennels' Ch. Endcliffe Bishop, res Rowland P. Keasby's Saybrook Cornob. Bitches—1 Wealdstone Kennels' Ch. Wealdstone Madge, res same owners' Ch. Annoyance.

Cocker Spaniels, (Black)—Dogs—1 Brookside Kennels' Fritz III, res O. B. Gilman's Premio. Any other color dogs—1 W. T. Payne's Ch. Romya Rye, res Brookside Kennels' Ch. Chief II. Bitches, (Black)—1 Brookside Kennels' Winsome II, res Mepal Kennels' Ch. Mepal Opal. Bitches, (any other color)—1 W. T. Payne's Lorelei, res Swiss Mountain Kennels' Ch. Waverly Sweetheart.

Old English Sheepdogs—Dogs—1 Tilley Brothers' Merry Party, res Mrs. G. S. Thomas' Wilberforce. Bitches—1 Tilley Brothers' Bouncing Lass, res Howard Gould's Belle of New York.

Rough Collies—Dogs—1 Winnetka Collie Kennels' Winnetka Ballyarnet Eclipse, res J. D. James' Faugh-a-Ballagh. Bitches—1 Vancroft Kennels' Moreton Hebe, res Balmoral Kennels' Balmoral Duchess.

Welsh Terriers—Dogs and bitches—1 Selwonk Kennels' Selwonk Princess, res same owners' Selwonk Vagrant.

St. Bernards (rough)—Dogs—1 Walter Johnson's Ch. Sir Waldorf, res Rossmoyne Kennels' Shelby

Fernmore. Bitches—1 Louis Wolther's Columbia's Hope, res Thistle Kennels' Clotilda II.

St. Bernards (smooth)—Dogs and bitches—1 Newton Abbot Kennels' Newton Abbot Squire, res Miss Nellie Lougest's Ch. Princess Alice II.

Great Danes—Dogs—1 Montebello Kennels' Montebello Apollo, res John H. Arfman's Caesar. Bitches—1 Max Fisman's Taute Tiene, res Montebello Kennels' Montebello San-Lo.

Pointers—Dogs—1 Brookdale Pointer Kennels' Duke of York, res Harry P. Kirby's Mark's Rush. Bitches—1 R. E. Westlake's Westlake Surprise, res George S. Mott's Princess Alice.

English Setters—Dogs—1 G. C. Thomas Jr.'s Ch. Malwyd Sirdar, res same owner's Rumney Racket. Bitches—1 Joe Lewis' Mallywd Queen, res G. C. Thomas Jr.'s Mallywd Meg.

Fox Terriers (smooth)—Dogs—1 Norfolk Kennels' Norfolk Parader, res Sabine Kennels' Sabine Result. Bitches—1 Norfolk Kennels' Ch. Norfolk True Blue, res Sabine Kennels' Sabine Lavender.

Fox Terriers (wire)—Dogs—1 G. M. Carnochan's Cairnmuir Bull's Eyes, res Fraser and Lindsay's Matchmaker. Bitches—1 Charles W. Keyes' Hillcrest Facile, res Selwonk Kennels' Selwonk Fearless.

Pugs (fawn)—Dogs and bitches—1 Mrs. Winifred Harrison's Buller, res Eberhart Kennels' Tommy Tucker.

Pugs (black)—Dogs and bitches—1 Mrs. J. W. Henning's Black Fairy, res Miss Nina R. Selfridge's Ebony Duke.

Pomeranians—Dogs and bitches—1 Ashton Kennels' Ashton Merry Scamp, res Mrs. R. F. Mayhew's Fox Hills Dandy.

English Toy Spaniels (Black and tan)—Dogs and bitches—1 Mrs. F. Senn's Ch. Perseverance, res F. C. Boesger's Unique Topsy. Tri-colored dogs and bitches—1 Ashton Kennels' Ch. Darnell Kitty, res same owner's Baby Duke. Orange and white dogs and bitches—1 Mrs. E. T. Shreve's Cupid S., res Mrs. T. J. Hellyer's Consuelo.

Bull Terriers—Dogs—1 Frank F. Dole's Edgewood Crystal, res same owner's Edgewood Aldus. Bitches—1 F. H. Croker's Bloomsbury Marchioness, res F. F. Dole's Edgewood Abbie.

Poodles (curly)—Dogs—1 Red Brook Kennels' Ch. Rupert of Thrandeston, res same owner's Ace of Spades. Bitches—1 Red Brook Kennels' Ebony Maid, res same owner's Red Brook Maluna.

Scottish Terriers—Dogs—1 Craigdarroch Kennels' Ch. The Laird, res Mrs. G. S. Thomas' Endcliffe Garnet. Bitches—1 Craigdarroch Kennels' Ch. Silverdale Queen, res same owner's Ch. Heather Charm.

Black and Tan Terriers—Dogs and bitches—1 Geo. G. Mitchell's Parliament Dime, res Selwonk Kennels' Selwonk Imperial.

Yorkshire Terriers—Dogs and bitches—1 Mrs. G. S. Thomas' Ch. Endcliffe Merit, res Mrs. F. Senn's Dandy. Japanese Spaniels—Dogs and bitches—1 G. Gerhardt's Mikado, res William J. Burkart's Ping Pong.

The following were given first awards in breeds not having winners' classes:

English Foxhounds—Dogs, Mutchmor and Walter's Hector. Bitches, same owner's Beatrice.

Retrievers—Dogs and bitches, Frank F. Dole's Berkeley Bess.

Irish Water Spaniels—Dogs and bitches, W. T. Payne's Con the Shaughran.

Clumber Spaniels—Dogs, Tilley Bros.' Bonny Boy. Bitches, same owner's Maggie of Eaton Park.

Chow Chows—Dogs, Miss Marguerite Lewis' Chah. Bitches, same owner's Yarta.

Skye Terriers—Dogs, Mrs. Robert H. McCurd's Wolverly Wallie. Bitches, George Caverhill's Queen.

Newfoundlands—Mrs. F. W. Storm van Grave-sande's Black Boy.

American Foxhounds—Dogs, E. B. Chase's Bragdon. Bitches, E. B. Chase's Venus.

That Spratt's dog biscuits are used in every climate goes without saying. We might also add that they are used from pole to pole. This latter statement is suggested by the fact that Spratts have just filled an order for fifty tons of dog biscuit. The cakes will form a material factor in the supplies taken along by the most important Arctic expedition fitted out for years.

Mr. Fred Lowe of England recently judged English Pointers and Setters at Moscow. These two breeds are always very good at Russian shows. On the occasion of Mr. Lowe's judging a black and white Russian bred Pointer defeated a lot of 138 for the best specials, among the dogs benched were several imported from England. The reason that so many high class sporting dogs are to be seen at Russian shows is that Russian sportsmen who have large shoots exhibit their dogs almost without exception and take great interest in the clubs that are formed to look after the welfare of the special breeds that they keep.

The judges at Cruft's show last week were: The Duchess of Newcastle, for Fox Terriers (smooth and wire haired); Mr. S. Smale, for Pointers, Setters, Working and Welsh Spaniels; Mr. W. Evans, for Bloodhounds, Deerhounds and Borzois; Mr. Tonkinson, for Curly-coated Retrievers; Mr. F. Gresham, for Flat-coated Retrievers, Basset Hounds, Chow Chows, Dandie Dinmont Terriers and Welsh Terriers; Mr. J. A. Tatham, for Beagles, Greyhounds and Whippets; Mr. R. T. Martin, for Irish Wolfhounds; Mr. F. E. Schofield, for Sporting Spaniels; Mr. W. H. Ford, for Bulldogs; Mr. C. H. Wheeler, for Collies; Mr. J. O'Connell, for Mastiffs; Mr. G. Chapman, for Newfoundlands; Mr. T. T. Messenger, for St. Bernards; Captain E. S. Woodiwiss, for Dachshunds; Mr. E. T. Parker, for Dalmatians; Mr. R. V. O. Graves, for Poodles and Toy Spaniels; Mr. W. F. Clayton, for Old English Sheepdogs; Mr. T. Ramsay, for Irish Terriers; Mr. A. A. Jeans, for Bull Terriers and Toy Bull Terriers; Mr. A. McKerrrow, for Scottish Terriers; Mr. J. Prector, for Pugs; Mr. E. B. Joachim, for Schipperkes; Mr. C. H. Lane, for Skye, Bedlington and Clydesdale Terriers; Sir W. Ingram, for Pekinese and Japanese, and Mr. Theo. Marples for the remainder.

## Report of the Fish Commission.

The following excerpts from the seventeenth biennial report of the State Board of Fish Commissioners are interesting. The contention is made by the board that a close season on striped bass is unnecessary, this is not the belief of many of our anglers who claim that a would be beneficial should a close season prevail during the spawning season in March, April or May.

**STRIPED BASS**—From a commercial standpoint the striped bass stands next to the salmon as a food fish in this State. This fish was brought from the East, and planted in our waters, and has since continued to multiply. At the last session of the Legislature the provision of the law for its protection was amended so as to make the month of June of each year a "closed season" and to reduce the weight limit of the fish that could be taken from three pounds to one pound. After noting the practical workings of this law, this Board is of the opinion that there is no necessity for a closed season, and that the weight limit, in our opinion, should be restored to three pounds. Some of our principal reasons for these recommendations are that the amount of this kind of fish which has been taken during the past two years has been as great as ever, but the size of the fish taken has been smaller. When the weight limit was reduced to one pound, the fishermen reduced the size of the meshes of their nets, so as to enable them to catch such small fish, and it has encouraged the fishermen to use the "cincinoro," which is a net with meshes of about two inches. This kind of net is operated by four men in a salmon boat, and is used on a rising tide, close to the mud flats, where the school of bass go to feed. While two of the men pull the boat the other two men tend to the net. The net, which is like a seine, is laid out in a circle around the school of fish, and as much as a ton of fish has been taken with one haul.

Striped bass, like other large fish that come into our bays, run in large schools. If the weight is again changed to three pounds, these fishermen who use the "cincinoro" net would have to go out of business, as the most of their fish would weigh less than three pounds, and they would be unable to sell them. Since the law reduced the weight of the bass that may be caught, there have been thirty or forty boats using the "cincinoro." This excessive use of this net for catching small bass naturally decreases the supply, and destroys them when they are too young, and it is almost the unanimous wish of the legitimate bass fishermen that the weight should be again changed to three pounds.

Small bass in large quantities in a box will not keep over twenty-four hours, as they become soft and soon spoil, while the larger bass will remain in good condition for two or three days, and are a better food fish. During last April and May, bass were the cheapest fish sold on the Sacramento river, they being sold during April for but one cent and one and a half cents per pound, while the salmon was sold for five and six cents per pound. Considered from an economic standpoint, it appears almost a crime to permit of the destruction of thousands of pounds of these young fish, when they can add so much more to our general food supply if permitted to attain their average weight. They are commonly found in our markets weighing forty pounds each. That these small fish are not regarded with favor in our native waters can best be shown by referring to quotations of the New York markets, where the large fish throughout the year command twice the price per pound that obtains for the small fish. For these reasons we believe that the bass will be better protected by making three pounds the minimum weight for striped bass which may be caught or possessed.

**EASTERN BROOK TROUT**—From our our experience with small plants of Eastern Brook trout in some of the smaller mountain streams, in fact, too small for the Mykiss or Rainbow trout to flourish in, we have found that these fish have permanently established themselves. This has led us to renew our efforts toward propagating them for these waters. We have now in our Siason ponds about 1200 stock fish to be used as breeders, from which we hope to collect a sufficient number of eggs to give us 250,000 fry for distribution in 1903. In addition to this lot, we were fortunate in making arrangements with the United States Fish Commission whereby we will secure 200,000 Eastern Brook trout eggs in exchange for an equal number of Rainbow eggs. This number added to what we take from our pond fish, should give us about 300,000 fry for our next distribution. This fish is the most beautiful of the trout species and is, besides, very gamey. It attains a larger growth in our waters than it does in the waters of the Eastern States. It will fill a place in our work that will not interfere with any other department, spawning, as it does, in the late fall. All of the plateaus of the high Sierras have meadow streams, in some of which the water is sluggish and deep, none of them very large. No other variety of trout is found in them, nor do the Mykiss or Rainbow stay in them when planted. The peculiarity of the Eastern Brook trout is that they will remain and increase. There are probably several thousand miles of these small streams that can be stocked, which will not only add to the general food supply, but will furnish sport to the angler, the camper and the tourist. There are thousands of our people who go to the mountains for their vacations, many of whom are not expert anglers. The Eastern Brook trout takes either fly or bait, and does not require such a degree of skill to land him as does the Rainbow. In other words, the common fisherman will have, in the Eastern Brook trout, the most desirable game and fish food that he can take. We confidently look forward to splendid results in the next two years from the propagation of this species.

**BLACK BASS**—In distributing black bass during the past two years we have confined our efforts to stocking the large-mouth variety, and have drawn upon two lakes or reservoirs that were stocked with

these fish in 1896-97. Our experience has shown that the large-mouth bass is much more suitable to the waters of this State than is the small-mouth variety. The latter, which are found in the colder waters of Eastern States, will increase moderately well in the higher altitudes in this State, but not nearly so well in the lower altitudes where the water is warmer. There have been many new lakes or reservoirs, formed by the various irrigating systems and power plants, and these afford a splendid breeding-ground and habitat for the large mouth bass.

As distinguished from the small-mouth bass, they are found principally in the waters of the Southern States, and have increased in a remarkable ratio whenever planted in the reservoirs, lakes, or sloughs throughout the State, where the temperature of the water rises to a point that trout could not exist nor the small-mouth bass flourish therein.

Following the policy of the United States Fish Commission, which is not to plant black bass in waters adapted to trout, we have devoted our efforts in the past two years to stocking suitable waters of these lower elevations. The work has extended from Modoc and Siskiyou counties on the north to San Bernardino and Los Angeles counties on the south. We have placed one shipment in the Colorado River at The Needles, and made liberal assignments to the great interior valleys—the Sacramento and San Joaquin. Many of these lowland lakes and reservoirs abound in carp and catfish. These fish furnish an abundant food-supply for the bass, which soon gain the ascendancy in point of numbers. The Salt Spring Valley reservoir, in Calaveras county, six years ago contained nothing but carp and catfish. To-day it is fairly alive with black bass. The fish for distribution during the summer of 1901 were all taken from this reservoir.

Learning that the bass had increased in a small lake or reservoir known as the Daly pond, about seven miles from Folsom, in El Dorado county, we decided to operate from that point for the distribution during 1902, especially as it could be done more economically than from any other waters that had been stocked by this Commission. In June, 1897, there was placed in this small body of water 19 fish, averaging one pound in weight. During the past season two men in a boat have taken as high as 150 fish, ranging from five to twelve inches in length, in a single day, with hook and line. We planted no fish less than five inches in length and made plants varying from 50 to 100 of fish ranging from five to twelve inches.

In the past season we have planted 2,750 large fish. The value and importance of this plant can be better appreciated when we recall the fact that less than 1500 black bass were brought into this State from the East. We believe that within three years black bass, which is one of the most delicious of food fishes, will be found in every body of clear water throughout the Sacramento and San Joaquin valleys. Not only will they furnish sport, but also will supply food to thousands of our people who perhaps lack time and means to make expensive trips into the mountains for the purpose of taking trout; in other words, all such will have a new food-supply at their doors. The importance of this branch of our work is earnestly called to your attention. The increase of black bass means the decrease of carp and other fishes of less value, and the scope of this work could be greatly broadened with advantage to the whole State, did our means permit.

**CATFISH**—The supply of these fine flavored fish seems to be maintained, notwithstanding the demands are great. The sales in the San Francisco markets are considerable, but do not compare with those at Sacramento. This fish finds a ready sale throughout many of the neighboring States. It is shipped east to Kansas, south to Arizona and north to Oregon. The principal supply comes from the waters in the vicinity of Sacramento. It is not uncommon for five tons of catfish to be handled in a single day in the city of Sacramento, from which an idea can be gained of the importance of this fish to the general food supply. There are no restrictions governing the time of its capture. It has been claimed by some that catfish are a detriment to the other and more valuable fishes. This contention cannot be sustained. Striped bass and shad continue to increase in the same waters that are most frequented by catfish and carp.

**CARP**—The introduction of carp, which has often been criticized, has not been without great benefit to our State. It is an inferior food fish when compared with the great number of superior fish in our waters. Carp are found in all the markets, however, but are purchased principally by the Chinese. In the Eastern markets they frequently command a wholesale price of six to eight cents per pound and find a ready sale. The same fish are highly prized in the markets of Europe.

Their greatest value to this State lies in the fact that they furnish a food supply to the black bass, striped bass, and possibly the shad. In our judgment, it is owing to the abundance of food supply furnished by the carp, that other fish have become so abundant.

## League of American Sportsmen.

The League of American Sportsmen convened in the Commercial Club rooms, St. Louis, on February 11th, with delegates from all parts of the country in attendance. The league is incorporated in New York, and under the law must elect officers in that State. The executive committee met in New York last week and elected the following officers, Wednesday's convention simply confirming their action: President, G. O. Shields of New York; secretary, Arthur F. Rice of Passaic, N. J.; first vice-president, E. S. Thompson of New York; second vice-president, W. T. Hornaday of New York; third vice-president, Dr. S. S. Palmer of Washington; fourth vice-president, A. A. Anderson of New York; fifth vice-president, W. A. Richardson of Washington.

California favorite hot weather drink—Jackson's Napa Soda.

## Hunters See a Buck Shed His Antler.

To the south, particularly in the Los Banos region, duck shooting as well as quail hunting was nearly all that the shooter could wish during the closing two weeks of the season. A party of sportsmen composed of George H. T. Jackson, Irwin Thomas, Frank Lacoste and Henry Wagner of San Francisco, early last week enjoyed two days' splendid shooting in the vicinity of Los Banos. One day was devoted to duck shooting in the overflowed districts, where the ducks were found in immense flocks. Sprig, mallard, teal, widgeon and other ducks galore were feeding upon the fresh-sprouting vegetation and also upon myriads of fat crickets that were drowned out of the ground. The insects were seen crowded upon clouds of earth, each little pile being a miniature island of refuge for the chirpers. This occasion was taken advantage of with greedy avidity by the sprigs in particular. These birds, as well as their congeners, were in turn devoured (?) by the market hunters, who use trained steers, behind which they sneak up on a bunch of birds, close enough to enable them to get a flock shot with the four and six-bore double-barreled guns they use. One hunter was seen by the party to pick up thirty-seven ducks after a single shot. These hunters now have a covered wagon in which to carry off their game. This scheme makes it difficult for anyone to know just how much over the limit a market hunter has in his wagon.

The party devoted the second day to quail shooting, each one getting a good bag. Upon this occasion the shoot took place in some hills west of Los Banos, where an incident happened that is unparalleled in its rarity and is also of exceeding interest to sportsmen the world over. Mr. Thomas, while after the quail in a ravine, jumped a big buck, or, rather, his dog did. He was surprised to see that the running animal had but one antler. The buck struck out a lively pace, when, to the further astonishment of the hunter, after he had rounded some rocky brush growths he sped on his way to safety minus his single horn. Mr. Thomas surmised what was up, and a brief search was rewarded by his finding the horn dropped by the buck in his flight. The whole occurrence was also noted from a short distance away by his companions. This being now the season for bucks to shed their antlers, the animal had already got rid of one horn and the other was so soft in anchorage that his frantic bounding to get away loosened and dropped off the remaining horn. Such an adventure as the above has rarely come within the lucky observation of sportsmen, and is regarded as most interesting, for during this season bucks are the most cunning animals in existence in keeping out of sight, while they are, comparatively, disarmed.

## Kennel Registry.

### VISITS.

Nairod Kennels' (leased) red Cocker Spaniel bitch Plumeria Mignonne (Ch. Hampton Goldie-Ch. Plumeria Surprise) to Glenwood Kennels' Ch. Havoc (Ch. Black Duke-Woodland Jude), February 12, 1903.

Miss E. H. Thompson's (Pine Hill Kennels) red Cocker Spaniel bitch Buff Beauty (Black Knight-Flossie) to Plumeria Cocker Kennels' Ch. Hampton Goldie (Ch. Red Mack-Hampton Queen Reade), February 9, 11, 1903.

W. H. McFee's (agent, Los Angeles) Bull bitch Beachwood Queen (Curator-Queensboro Countess) to Ellegay Kennels' Endcliffe Forceps (Footpad-Lady Roseleaf), February 6, 7, 1903.

### WHELPs.

Nairod Kennels' red Cocker Spaniel bitch Glenwood Ruby (Ch. Colorado-Redwood Virgy) whelped February 8, 1903, six red puppies (2 dogs) to Ch. Hampton Goldie (Ch. Red Mack-Hampton Queen Reade).

Wm. Wallace's black Cocker Spaniel bitch Nairod Audrey (Hampton Flossie-Black Sue) whelped February 8, 1903, one red and four black puppies (3 dogs) to Nairod Kennels' Plumeria Beau II. (Ch. Hampton Goldie-Ch. Plumeria Surprise).

## Coming Events.

### Red.

Jan. 1-July 1—Close season for black bass.  
Feb. 28—Saturday Contest No. 1. Classification series. Stow lake, 2:30 p. m.  
March 1—Sunday Contest No. 1. Classification series. Stow lake, 10 a. m.  
March 15—San Francisco Striped Bass Club Casting Tournament. Golden Gate Park.  
April 1-Aug. 15—Close season for lobsters and crawfish.  
April 1-Nov. 1—Trout season open.  
April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steel-head in tidewater.  
May 1-Sept. 1—Close season for shrimp.  
Sept. 1-Nov. 1—Close season for crabs.  
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

### Gun.

Feb. 22—Golden Gate Gun Club. Blue rock shoot. Ingleside.  
July 1-Feb. 15—Dove season open.  
July 15-Nov. 1—Deer season open.  
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.  
Oct. 15-Feb. 15—Open season for quail, ducks, etc.  
Oct. 15-Jan. 15—Open season on quail in Marin county.

### Bench Shows.

Feb. 18, 19, 20—New Jersey Kennel Association. Second annual show. Orange, N. J. C. G. Hopton, Secretary.  
Feb. 19, 20, 21—Colorado Kennel Club. Denver, Col. W. H. Kerr, 1451 Arapahoe street.  
Feb. 23, 24, 25, 26—New England Kennel Club. 19th annual show Boston, Mass. Wm. B. Emery, Secretary.  
March 4, 5, 6, 7—Duquesne Kennel Club. Pittsburg, Pa. F. S. Stedman, Secretary. Lewis Building, Pittsburg.  
March 10, 11, 12, 13—Rochester Kennel Club. Rochester, N. Y. W. J. Gram, Secretary, 701 Lake avenue.  
March 11, 12, 13, 14—Coshocton Kennel Club. Coshocton, Ohio. F. V. Mizer, Secretary.  
March 17, 18, 19, 20—Twin City Kennel Club. Uhrichsville, Ohio. C. S. Walker, Secretary.  
March 25, 26, 27, 28—Chicago Kennel Club. Annual show. Mrs. John H. Naylor Secretary.  
March 31, April 1—St. Louis Collie Club. 5th annual show. St. Louis, Mo. John A. Long, Secretary.  
March 31, April 1, 2, 3—Buffalo Kennel Club. Inaugural show. Buffalo, N. Y. Edw. P. Sharp, Secretary.  
April 1, 2, 3, 4—Victoria City Kennel Club. 2d annual show, Victoria, B. C. T. P. McConnell, Secretary.

## THE FARM.

### How to Make Good Butter.

Miss Rose, the instructor in butter making in the Ontario Agricultural College, gives the following answers to inquiries in relation to her methods and practice in butter making, which are given in a recent issue of *Farming World*.

#### How much salt do you use?

Three-quarters of an ounce, when salting on the worker, but when salting in the churn and allowing the butter to stand three or four hours before working, one ounce to the pound is necessary. For packed butter, more salt is used.

#### At what temperature would you churn?

This is the most difficult question to answer, for so many conditions have to be considered, and it would be very unwise to state any definite temperature. Do not have the churn over half full, and it is better to only have it a third full; have the cream rich, that is, not much skim milk in it, then churn at the temperature which will have the butter come in half an hour.

What would you do if you had churned an hour and had no signs of butter?

If I had too much cream in the churn I would take out half and make two churnings. If this was not the trouble, I would draw off most of the cream, place the can in a tin of hot water and stir constantly until I had raised the temperature to the degree I thought necessary. Never on any account raise the temperature by adding hot water directly to the cream. It destroys the color and makes a weak, spongy bodied butter.

You say you work the butter but once. Would you always do that?

No; when the butter is very soft or very hard, I would give it but a slight working, then set it aside for a few hours to firm and again, before working it again.

I would always work butter for packing twice, also butter for exhibition purposes, unless, in the latter case, I had salted in the churn.

What portion of the cream should come out as buttermilk?

I see you want to find out how rich your cream should be. Well, if you put four gallons of cream in the churn you should have three gallons of buttermilk, provided no water has been added while churning. The cream in such a case would test about 23 per cent butter fat.

Why is it that your butter does not stick to your worker and butter print?

Had you been in when I was preparing them you would have seen me give them a scouring with a fibre brush, using a little hard water and some salt.

What is your reason for wetting the parchment paper before wrapping it on butter?

It can be more neatly folded, and does not stick when removed from the butter.

Does it injure the butter to have it stand for any length of time with the paper on it?

No, if you use good, clean paper and keep the butter in a cool, clean place.

Why are there sometimes little white specks in butter?

The cream has become too sour and has not been well stirred right to the bottom of the cream can. The curdy matter becomes so hard that it does not break up sufficiently fine to all pass off with the buttermilk and it sticks to the butter. Such butter is never of excellent flavor.

### Shooting Cattle for the Hides.

A dispatch from Salt Lake, dated February 15th, says: The heavy fall of snow during the past week and a continuance of zero weather throughout this section of the State has already cost the stock and sheep men of Northern Utah, Southern Idaho and Western Wyoming thousands of dollars in the loss of stock.

### 3 FEEDS FOR ONE CENT

"INTERNATIONAL STOCK FOOD" IS PREPARED FROM ROOTS, HERBS, SEEDS AND BARKS AND WON THE HIGHEST MEDAL AT PARIS EXPOSITION IN 1900 AS A HIGH-CLASS VEGETABLE, MEDICINAL PREPARATION TO BE FED TO STOCK IN SMALL AMOUNTS AS AN ADDITION TO THE REGULAR FEED. IT IS A GREAT AID IN GROWING OR FATTENING STOCK BECAUSE IT INCREASES THE APPETITE AND AID DIGESTION AND ASSIMILATION SO THAT EACH ANIMAL OBTAINS MORE NUTRITION FROM THE GRAIN EATEN. WE POSITIVELY GUARANTEE THAT ITS USE WILL MAKE YOU EXTRA MONEY OVER THE USUAL PLAN OF GROWING AND FATTENING STOCK. "INTERNATIONAL STOCK FOOD" CAN BE FED IN SAFETY TO HORSES, CATTLE, SHEEP, GOATS, HOGS, COLTS, CALVES, LAMBS OR PIGS. IT IS ABSOLUTELY HARMLESS—EVEN TAKEN INTO THE HUMAN SYSTEM. SALT IS A STOMACH TONIC AND WORM FOOD, AND IT IS PROVEN THAT THESE CONDIMENT PROMOTE HEALTH AND STRENGTH FOR PEOPLE AND IMPROVE THEIR DIGESTION. "INTERNATIONAL STOCK FOOD" CONTAINS PURE VEGETABLE MEDICINAL INGREDIENTS THAT ARE JUST AS SAFE AND AS NECESSARY AN ADDITION TO THE REGULAR FEED OF YOUR STOCK IF YOU DESIRE TO KEEP THEM IN THE BEST POSSIBLE CONDITION. "INTERNATIONAL STOCK FOOD" IS SOLD ON A "SPOT CASH GUARANTEE" BY FIFTY THOUSAND DEALERS THROUGHOUT THE WORLD. IF YOUR STOCK WILL BE PROMPTLY RESTORED IN ANY CASE OF FAILURE. IT WILL MAKE YOUR PIGS OR HOGS GROW AMAZINGLY AND HAS THE LARGEST SALE IN THE WORLD FOR CURING OR PREVENTING HOG DISEASE. BEWARE OF THE MANY CHEAP AND INFERIOR IMITATIONS! NO CHEMIST CAN SEPARATE ALL THE DIFFERENT POWDERED ROOTS, HERBS, BARKS AND SEEDS THAT WE USE. ANY ONE CLAIMING TO DO SO MUST BE AN IGNORANT OR FALSIFIER.

## ENGLISH STOCKMEN LIKE 3 FEEDS FOR ONE CENT

WESTON COYNEY HALL,  
Nr. Longton.

STAFFORDSHIRE, ENGLAND.

International Stock Food Co.,  
Minneapolis, Minn.

DEAR SIR:—I have pleasure in handing you remittance to cover your invoice for "International Stock Food." I have given it a thorough trial on my horses, both drivers and draft, and I find it justifies all you claim for it in every way. All my stock are in exceptional condition this year and this I attribute to the use of "International Stock Food." I tender you my sympathy for the loss you have sustained by the death of Online 2:04, a loss which will be felt by the whole of your district. I had great success in my experiment of crossing the French Coach Horse with the American Trotter, the result being a fine heavy harness horse. I am, sirs, Yours faithfully,

F. J. RIDGWAY.

We will Pay you \$1,000 CASH to Prove that our Testimonials are not Genuine.

## A \$3000.00 STOCK BOOK FREE

IT CONTAINS 183 LARGE ENGRAVINGS OF HORSES, CATTLE, SHEEP, POULTRY, ETC.

The cover of this book is a beautiful live stock picture printed in six brilliant colors. Book is 6 1/2 by 9 1/4. See engraving for greatly reduced design of cover. It cost us \$3000 to have our artists and engravers make these life engravings. This book contains a finely illustrated Veterinary Department that will save you hundreds of dollars. It describes common diseases, and tells how to treat them. It also gives description, history and illustrations of the different breeds of horses, cattle, sheep, goats, hogs and poultry. Will tell you that you ought to have this book in your library for reference.

**\$10.00 CASH, we will send you, IF BOOK IS NOT AS STATED.**  
This Book Mailed Free, Postage Prepaid, If You Write Us (letter or postal) and Answer These 2 Questions:  
1st.—Name This Paper. 2d.—How Much Stock Have You?

Write us today for book. Largest Stock Food Factory in the World. Capital Paid in, \$1,000,000. We Occupy 62,000 Feet of Floor Space.

International Stock Food Co., MINNEAPOLIS, MINN., U. S. A. We employ over 300 people and have hundreds of thousands of testimonials from Farmers and Stockmen.

TEST 3 FEEDS FOR ONE CENT ENTIRELY AT OUR RISK.

If the weather does not soon moderate sufficiently to permit the snow in the valleys and foothills to melt, men conversant with existing conditions in the affected territory say the losses will be enormous. Today the mercury hugged the zero mark, and the predictions are for continued cold.

Where it is possible sheep and stock men are hauling feed to their starving herds, but in most instances this cannot be done. Word was received in this city today that cattlemen in the Shoshone district, Idaho, being unable to feed their isolated herds, and, in order to prevent a total loss, have been compelled to shoot their stock, the carcasses being stripped of the hide, which will be preserved and sold for leather in the spring. To what extent this practice is being indulged in is not known.

### A Model Poultry Farm.

In the *California Cultivator* we notice something descriptive of a model poultry farm.

It is owned by Captain E. Pryce Mitchell, near Santa Barbara, Cal.

He had been a sea captain and had no experience in farming or poultry raising.

He has now been at it four years and his entire poultry ranch is four acres, beautifully located in the foothills, surrounded with live oak groves and with a fine view of the ocean.

On the four acres there are forty hen houses, built of surfaced lumber, painted a foliage green on the outside and white, washed inside. Cement floors, covered with sea sand are cleaned daily. The houses all face the south and are open to the sun all day.

Absolute cleanliness is scrupulously observed throughout the place. No odor is noticeable in any part of the coops.

The fowls are all standard-bred stock. There are 1000 layers and 500 capons. All eggs for hatching are from two year old matured stock. All eggs for market are from pullets and young hens.

There are two runs to each house and these are alternately plowed and sowed to wheat, so that the hens have plenty of green feed at all times.

Neatness and cleanliness mark every detail of the place, from incubators to poultry runs.

There are two gas engines, one for generating electricity for lighting the house, the other for grinding bone meal and other feed for stock.

The captain informed the writer that his profits from poultry last year were \$1500 over and above all expenses.

He has two faithful Indian boys who, under his management, do all the drudgery of the place.

Many a farmer who refuses to pay attention to poultry and small stock don't make as much money on 160 acres as Captain Mitchell with his four acres of poultry.

### Influence of the Height of Wheel on the Draft of Farm Wagons.

This is a subject regarding which there is considerable difference of opinion. The Missouri Experiment Station has put the matter to practical test in a series of trials made on macadam, gravel and dirt roads in all conditions, and on meadows, pastures, cultivated fields, stubble land, etc. With a net load of 2000 pounds in all cases, three sets of wheels were tested, as follows: 'Standard'—front wheels, 44 inches; rear wheels, 55 inches. Medium—front wheels, 36 inches; rear wheels, 40 inches. Low—front wheels, 24 inches; rear wheels, 28 inches.' The results obtained and conclusions reached were, in brief, as follows:

For the same load, wagons with wheels of standard height drew lighter than those with lower wheels. The difference in favor of the standard wheels was greater on road surfaces in bad condition than on good road surfaces. Low wheels cut deeper ruts than those of standard height. The vibration of the tongue is greater in wagons with low wheels. For most purposes wagons with low wheels are more convenient than those of standard height. Wagons with broad tires and wheels of standard height are cumbersome and require much room in turning. Diminishing the height of the wheel to from 30 to 36 inches in front and 40 to 44 inches in the rear did not increase the draft in as

great proportion as it increased the convenience of loading and unloading the ordinary farm weight. Diminishing the height of wheels below 30 inches front and 40 inches rear increased the draft in greater proportion than it gained in convenience. On good roads, increasing the length of rear axle, so that the front and rear wheels will run in different tracks to avoid cutting ruts, did not increase the draft. On sod, cultivated ground, and bad roads wagons with the rear axle longer than the front one drew heavier than one having both axles of the same length. Wagons with the rear axle longer than the front one require wider gateways and more careful drivers and are, on the whole, very inconvenient and not to be recommended for farm use. The best form of farm wagon is one with axles of equal length, broad tires, and wheels 30 to 36 inches high in front and 40 to 44 inches behind.

### Jersey Breeders Organize.

A meeting of the breeders of Jersey cattle in Northern California was held in Sacramento, February 7th, and it was decided to organize an association to be known as the California Jersey Breeders' Association, the object being the improvement of Jersey breed and the promotion of their more general distribution and use in the State.

Judge Peter J. Shields of Sacramento was elected President; Mrs. S. J. McFarland of Napa, Vice-President; N. A. Chisholm of Jacinto, Secretary and Treasurer; and George T. Trowbridge of Santa Rosa, T. B. Purvine of Petaluma, W. H. Saylor of San Francisco, C. V. Osborne of Florin, and W. D. Houx of Petaluma as an Executive Committee.

The association will, at the next State Fair, make the largest exhibit of Jersey cattle ever held in the State. They have been assured by the Southern California Jersey Breeders' Association that they would co-operate with them in this, and a general meeting of the Jersey cattle breeders of the State will be held in Sacramento prior to the fair.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

### Santa Clara Loses a Fine Herd.

By the death of D. S. Flannery, who for many years was a member of the State Board of Dairy Commissioners, Santa Clara County has lost one of the finest herds of dairy cattle in the State. The entire herd of 100 milch cows, including Durhams, Jerseys and Holsteins, has just been sold to Miner Walden and E. B. Brush of Modesto. Many of the cattle bore records for quantity and quality of milk that have not been broken in the State. The sale was made by the son, D. S. Flannery, who is administrator of his father's estate. The herd was shipped to Modesto last week. It is understood that the price paid was a fancy one, as the reputation of the herd had created a strong demand as soon as it was known that the herd was to be sold.

The smaller the butter globules can be made in bringing the butter, the nearer free they will be of buttermilk.

### FOR SALE.

**SANDOW 2:19**, a handsome light sorrel, 16 hands, weighs about 1150; eight years old; gentle and a high class gentleman's roadster. Apply to  
E. D. SACHS, 8 Battery Street.

### WANTED TO BUY.

A **STALLION OVER THREE YEARS OLD**, about 16 hands high. Must be sound and well bred. Price about \$300. Address  
F. W. KELLEY,  
BREEDER AND SPORTSMAN,  
36 Geary St., San Francisco.

### YOUNG STALLION FOR SALE.

A **HANDSOME YOUNG STALLION** BY Thornton (by Tago 3:25, dam Belle Emmet by Maturo Wilkes 6:83). A remarkably promising young horse, and will be sold at a reasonable figure. Apply or address  
H. P. H. HAGGETT,  
Lower Lake, Cal.

### FOR SALE.

**Three Standard-Bred Trotting Stallions**  
WILKES STOCK.

**One Seal Brown**, 16 hands, foaled May 2, 1898; first dam Fearless by Fallis 4:71 (record 2:23); second dam Jean Perault by Signal 3:27.  
**One Golden Bay**, 16 1/2 hands, foaled March 5, 1898; first dam Signal by Del Sur 1:08 (record 2:24); dam of Guy Sign 2:29 1/2; second dam Lady Signal by Signal 3:27.  
**One Brown**, white points, 16 1/2 hands, foaled April, 1898; full brother to the bay.  
These colts are all sired by Prince Aftree 3:04.5, son of Guy Wilkes 2:07 (record 2:15 1/4), and bred by Wm Corbitt, San Mateo Cal. They are pure galloped and show wonderful speed for the little work they have done.

For further particulars apply to

P. H. McEVoy, Menlo Park, Cal.

### Standard Stallion For Sale.

**ATHAMAX 36927**. One of the best bred young Stallions in California. He is 16 hands and will weigh when matured 1250 lbs. He is by Athadon (sire of Sue 2:12 1/4, Listerine 2:13 1/4, Dakon D 2:16 1/4, Donnatrine 2:30 1/4) by Matadon 3:32, son of Oward 1:11. His dam is Lustrine (dam of Listerine 2:13 1/4, Donnatrine 2:36 1/4) by the great Onward 1:11. Absolutely sound, a grand individual, and in condition to train for a low mark this year. Only reason for selling is that owner has not time to devote to him.  
For further information address BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco.

### Tales of the Turf

By William B. Fasig.

Trotting horsemen the world over knew the late W. B. Fasig and that he was in a class of his own as an instructive, interesting and humorous writer of trotting horse subjects. W. H. Gocher, secretary of the National Trotting Association, has put Mr. Fasig's writings in book form, adding much of interest thereto, and the book is now ready for delivery.

The table of contents includes the following:

**TROTTER TRACKS**—How to build and manage them, with plates showing how to lay out a half-mile track, a mile track and a kite-shaped track. This article is one that a race track official needs in his business.

**THE SECRETARY**—His trials and tribulations in the merry days of racing. On the other side of Jordan he may find rest; there is nothing for him here but advice.

**THE SANDPIPER**—How the Dutchman did not balance his bill for gravel while the little man in brown stood pat, and those who had the real sure thing—well, they lost, as usual.

**A STRANGE LAND**—How a shipwrecked Buckeye made a stir in another racing world. Utopian, unique and if you do not believe it, you can say it is untrue.

**McDOEL**—How the best green horse in Missouri broke into turf history. He won the Transylvanian. That is enough. If you were there you know why.

**STRANGER**—A lightning-going pacer of Northern Ohio, whose history has a pinch of romance hooked on to it.

**ANDY ANDI**—What the well known pair learned in France and England after the hotel clerk checked the sign language. They could not parlez vous.

**RIDE OF A LIFETIME**—How Flying Jib put a crimp in the boss trotter on the speed drive in Wade Park.

**PAT SHANK**—Someone said he was a col breaker, but he broke the wise when the thirteen combination and Eloise won at Detroit.

We will send this valuable book free as a premium to anyone sending two new subscriptions for the BREEDER AND SPORTSMAN at \$3 each, or will send the book alone, postpaid, on receipt of price, \$2. Address

BREEDER AND SPORTSMAN,  
36 Geary Street, San Francisco.

### A FIVE PER CENT SOLUTION

of this Compound will **KILL GERMS** of Distemper, Pink Eye, Epizootic, Catarrhal Fever and Influenza, under the microscope.

Given on the Horse's Tongue, it unites with the fluids of the alimentary canal, thrown into the Blood, passes through the Glands and expels the Germs of Disease. Absolutely safe and sure for Brood Mares, Baby Colts and all others. Do not depend on any other powder in this class of Diseases. Give it to Brood Mares in times of Distemper. Booklet, "Distemper, Causes, Cures and Prevention," free. Druggists and Turf Goods Houses sell Spohn's Cure. Fifty cents; \$5.00 per dozen.

### "SAVE-THE-HORSE" —TRADE MARK— SPAVIN CURE.

FROM A WELL-KNOWN TRAINER

J. C. HENNEY  
TERRACE FARM  
TITUSVILLE, PA.

Dec 22nd 1902

Troy Chemical Co.

Gento

Joy: 184

I used "Save-the-Horse" all the past season. First, on a bad splint close up to knee; horse very lame after fast work; could see decided improvement after a few days' use, and in a week's time lameness all disappeared. Used with equal success on a bowed tendon. At present am treating a horse that bowed a tendon three years ago; was a bad case; was fired and blistered but still went lame. Have used a bottle and am still using "Save-the-Horse." The enlargement has gone down almost one-half, horse going sound, and I firmly believe will race again. A friend of mine had a horse that bowed a tendon last spring; by the use of your remedy kept him racing all fall, gave him a record better than 2:05; tendon is straight and sound as ever was. Think it the greatest remedy on earth for a bad leg of any description.

Respectfully yours

L. D. Shafer

Farmis Trainer

Box 209

### A CHANCE TO GET GOOD ONES

At FRED H. CHASE & CO.'S Salesyard, 1732 Market Street, San Francisco, during the second week in March.

**THIRTY HEAD** of High Class Road and Business Horses, consigned by Geo. A. Davis, Rancho del Valle, Pleasanton, Cal.

These horses are from 5 to 8 years old and are by such stallions as Direct 2:05 1/2, Poscora Hayward, Ione Boy and others, and are out of well-bred mares. They are broke single and double, are gentle for anyone to drive, and are all solid colors.

There are three great prospects in this consignment—Lee Direct, black gelding by Direct 2:05 1/2, dam Monocline by Shiloh; has been a quarter in 15 1/2 seconds. Miss Direct, bay mare by Monroe Chief out of Mulget by Lucia Rowena, black mare by California Black Hawk out of mare by Poscora Hayward.

FRED H. CHASE & CO.,

1732 Market Street, San Francisco.

No man in Northern New Jersey, or horseman in New York City and Long Island, can doubt this man's statement.—(Reproduced from New York Herald).

Newark, N. J., Jan 27, 1903

I used one bottle of "Save-the-Horse" and completely removed a thoroughbred. Horse was not lame, but it was a bad eyesore. No blemish or sign of the growth remains.

GEORGE STENGEL.

FROM A PROMINENT STOCK FARM OWNER.

Shrub Oak, N. Y.

This is to certify that I have used "Save-the-Horse" for splints and wind puffs with great success. In fact, it is a great remedy.

C. W. CARPENTER

Sunnyside Farm.

Horse can be worked with either shin or ankle boots, as no harm can possibly come by either destruction of hair or scalding of the limb.

"Save-the-Horse" can be applied in all conditions and extremes of weather—hot or cold.

**POSITIVELY AND PERMANENTLY CURES** Bone and Bog Spavin, Ringbone, Curb, Thoroughpin, Splint, Capped Hock, Shoe Boli, Weak and Strained Tendons and all Lameness.

Contains no arsenic, corrosive sublimate or other forms of mercury, or any injurious ingredient.

Cures without scar, blemish or loss of hair.

\$5.00 PER BOTTLE.

Written guarantee with every bottle, constructed to convince and protect you fully. The need of second bottles is almost impossible except in rarest cases. Guarantee covers effectiveness of one bottle.

Copy of guarantee sent upon application.

\$5.00, all druggists and dealers, or sent prepaid.

TROY CHEMICAL COMPANY, TROY, NEW YORK.

D. E. NEWELL, Pacific Coast Agent, 519 MISSION STREET, SAN FRANCISCO.

### Inspection of Dairy Cattle.

A bill of interest to dairymen has been introduced in the Senate by Senator Flint and in the Assembly by Assemblyman Seadman. It is "An act to prevent the sale of dairy products from diseased animals and under unsanitary conditions; to provide for the inspection of dairy cattle, dairies and factories for the production of dairy products; to improve the quality of dairy products of the State, and to appropriate money therefor."

The bill provides that no person or persons, firms or corporations, shall sell, expose for sale, or offer for sale, or exchange, or deliver to any creamery, cheese factory, milk-condensing factory, or other buyer or consumer, any unclean, unhealthy, impure, stale or unwholesome milk or cream, or any butter, cheese, condensed milk, or other article of food produced from such milk or cream. Neither shall any person or persons, firms or corporations, sell, expose for sale, or offer for sale, any milk or cream which shall contain any foreign substance, drug, chemical compound, or coloring matter, unless each vessel or package containing such milk or cream shall have branded or printed thereon in a distinct and legible manner to be described by the State Dairy Bureau, a statement which will advise the purchaser or consumer as to the nature of any foreign substance so added. Neither shall any persons or persons, firms or corporations, sell, expose for sale, or offer for sale, or exchange or deliver to any creamery, cheese factory, or any other buyer or consumer, any milk, cream, butter, condensed milk or other article of food produced therefrom which shall have been drawn, or any portion thereof, from cows either fifteen days before or five days following parturition, or from cows suffering from any disease, contagious or otherwise, or from cows kept in crowded, unsanitary and filthy stables or enclosures, or from cows that are fed on stale, decomposed or unwholesome food or drinking water. Neither shall any person or persons, firms or corporations, deliver to any buyer, consumer, creamery, cheese factory, or milk condensing factory, any milk or cream in any vessel or receptacle unless the same shall be thoroughly washed and cleansed each time it shall have been used for such purpose, and in a manner that will thoroughly remove all particles and prevent any deposits of the former contents of such vessel or receptacle from remaining and decomposing.

The bill further provides that it shall be the duty of the State Dairy Bureau now created by law to carry out and enforce the provisions of this act, and it is authorized and directed under this act, out of the money appropriated as provided herein, to employ such agents and inspectors, who shall have had experience in the manufacture of dairy products and the handling of dairy cattle, as it may deem necessary, and to fix their compensation.

Any violator of the provisions of the act shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine not less than ten

dollars nor more than twenty-five dollars, or by imprisonment in the county jail for a period of not less than ten days or more than fifteen days. Any person or persons who shall hinder or prevent an agent or inspector of the State Dairy Bureau in the performance of his duty under this act, shall likewise be deemed guilty of a misdemeanor, and upon conviction shall be fined as already provided in this act.

For the enforcing and carrying out of the act there is appropriated out of any money in the State Treasury not otherwise appropriated, the sum of one thousand five hundred dollars (\$1500) for the remainder of the fifty-third fiscal year; ten thousand dollars (\$10,000) for the fifty-fourth fiscal year, and eight thousand dollars (\$8000) for the fifty-fifth fiscal year.

One great advantage in dairy farming over other lines of produce is that on the dairy farm the work is more evenly divided.

Strike!—if they don't give you Jackson's Napa Soda

Every feature connected with the **PALACE HOTEL** was designed and introduced for a double purpose—surrounding guests with comforts, conveniences and entertainment, and adding to the popularity and reputation of **California's Colossal Caravansary.**

In the center of the hotel is the famous court and off of this are the equally famous grill rooms. For your convenience telephone and telegraph offices, writing and reading rooms, barber shop, billiard parlor, carriage office, news stand and typewriter offices are directly off the court. Outside—the whole sale and shopping district, theaters, clubs, banks and railroad offices are a step from the entrance

### Grease Heel, Scratches,

**MUD FEVER, HOOF ROT, SPEED CRACKS**—Cases where ulcerations extend, with transverse cracks which open at every step and often bleed, no matter how complex, aggravated, deep seated or chronic, if treated according to directions, as given on circular with every box, positively cured with

### Veterinary Pixine

After Blistering. Veterinary Pixine is the very best application that could be indicated. It absorbs all inflammatory exudate and hastens the reparatory process. Will heal the most severe cases without scar, and will prevent loss of hair. **As a Preventive**—If a light application of Veterinary Pixine is used before speeding, driving in wet muddy or slushy weather, or in the snow, your horse will never have speed cracks, scratches or grease heel.

**For Hoofs**—It will keep the hoofs healthy, soft and in perfect form.

**For Old and Chronic Sores, Etc.**—Veterinary Pixine heals collar and saddle galls, hobbles, chafes, abscesses, inflammatory swellings, sores and all skin disease. In cases of emergency it is invaluable.

This penetrating, stimulating, soothing, absorbing, antiseptic healing ointment heals from beneath the surface by disinfecting the parts, subduing inflammation and stimulating healthy granulation, not by drying and scabbing.

2 oz., 25c; 8 oz., 50c, 5-lb pkg., \$4.00. At all druggists and dealers or sent prepaid. **TROY CHEMICAL CO., TROY, N. Y.** D. E. NEWELL, Pacific Coast Agent, 519 Mission Street, San Francisco.

## You Can Save Your Horse

from Spavin, Ringbone, Splints, Curbs and all forms of Lameness by a prompt and liberal application of that old reliable and well known remedy—

### Kendall's Spavin Cure

It has the unqualified endorsement of every man who has ever used it. Here is a sample of what thousands say for it.

WORTH \$200 TO THIS MAN.

Astoria, Ill., May 22nd, 1900.  
Dr. B. J. Kendall Co., Messrs:—Please send your Treatise on the Horse and his Diseases. Your liniment saved a horse for me that I expected to get \$200.00 for. It can't be beat and I will be very thankful for the book. Respy, C. A. CREBBS.

It is a most valuable liniment for family use—splendid for bruises, sprains, lame back, rheumatism, etc., etc. Sold by all druggists at \$1; six bottles for \$5. Our book, "A Treatise on the Horse," mailed free. Write at once and address

**DR. B. J. KENDALL CO., Enosburg Falls, Vt.**

**JAMES McDONNELL,**  
Supt. Menlo Stock Farm,  
Portola, San Mateo County, Cal.

## Books for Stallion Owners.

### 1. HOOVER'S STALLION SERVICE RECORD.

The most complete book for recording stallion service ever placed before breeders. Not a pocket edition. No more disputing of sires. No more mixing of dams where this book is used. There is space for entering 100 mares, giving their full breeding description, dates of service, dates of foaling, with a page for tabulating pedigree of stallion in use, etc., etc., with index complete; size 10x7½. Each book is handsomely and substantially bound. Can be used for any kind of pedigreed stock.....\$2.00

### 2. THE STANDARD STALLION SERVICE BOOK.

The neatest Service Book published, containing space for entering 100 mares, giving space for full description, pedigree, dates of services and refusals, date of foaling, etc., with index complete, neatly bound in leatherette, suitable for pocket use. Can be used for any kind of pedigreed stock.....\$1.00

### 3. BREEDER'S NOTE AND CERTIFICATE BOOK AND STALLION SERVICE BOOK COMBINED.

This book contains 75 blank certificates to be given to owners of mares, certifying that said mare has been bred to a certain stallion. Also 75 notes suitable for owner of mare giving to owner of stallion on account of stallion service fee. This book is well bound, and makes a book like No. 2, after certificates and notes have been removed. Can be used for any kind of pedigreed stock.....\$1.00

Sent by mail prepaid on receipt of price.

**BREEDER AND SPORTSMAN,**  
San Francisco, Cal.

## 3 Young McKinney Stallions

### FOR SALE.

All Out of Fashionably Bred Mares.

One 2 Years Old.  
One 3 Years Old.  
One 4 Years Old.

The two-year-old and three-year-old are both well staked and are trotters. The four-year-old has a three-year-old trotting record of 2:18, and is a great prospect for his class this year. All are in fine shape to train or be placed in the stud. For pedigrees, prices and full particulars address

C. A. DUFFEE, San Jose.

and 12 more in 2:30

Will Make the Season of 1903 at

**GREEN MEADOW FARM**

Brokaw Road, ¼ mile from Santa Clara.

Usual return privileges. Good pasturage at \$4 per month. Best of care taken of mares, but no liability for escapes or accidents. No wire fences. Address

TELEPHONE: Suburban 15.

**STAM B. 2:11 1-4**

(TROTTER.)

REG. NO. 23444.

3-YEAR-OLD RECORD, 2:15 1-2  
(Timed second in 2:12½)  
4-YEAR-OLD RECORD, 2:11 1-4  
(Timed second in 2:09½, 2:09)  
2-YEAR-OLD TRIAL, - - 2:26

STAM B, by that show horse king, Stamboul 2:07½, father of 47 from 2:10½ to 2:30; 34 sons and daughters produced from 2:07½ to 2:27. Stamboul is the only trotting bred stallion that ever sold twice for over \$40,000, and sired a daughter for whose son, Wiggins (two-year-old 2:19½), \$40,000 was offered. Stamboul's dam is the granddam of Oakland Baron 2:09½, for which \$50,000 was later refused, showing that men with money and brains appreciate this blood. STAM B's first dam, Belle Medium 2:30 (dam of 3 from 2:11½ to 2:30) by Happy Medium sire of Nancy Hanks 2:04. No son of Hambletonian 10 ever produced such speed and she sold for \$40,000.

Second dam Argenta, dam of one in 2:20, by Almont Lightning, sire of dams of Zombro (five years old 2:11) and King Princeps 2:15, by Almont 33.

Third dam Mary Adams by Mambrino Patchen, sire of dams of Guy Wilkes 2:15½, Baron Wilkes 2:18, Patchen Wilkes 2:28. Fourth dam Mambrino Belle by Mambrino Chief, sire of Lady Thorn and dam of Director and Onward. Fifth dam by Mason Whip, a thoroughbred. No stallion now doing public service ever represented such champions of the turf, show ring and top notchers at private and public sales. He is a handsome horse (a typical Morgan in form), and tried race horse, and game, topsey road horse.

STAM B is a bay, two white hind ankles, 15 hands 2¼ inches high, weight 1090 lbs., of good stamina and muscular development.

Will Make the Season of 1903 at Pleasanton, Cal.

**Terms \$40** SPOT CASH before mare is removed. I will try and take good care of mares and foals, but will not be responsible for accidents or escapes. (No agents on arrival of trains at depot.) For further particulars address

**SAMUEL GAMBLE, Pleasanton, Cal.**

## SEARCHLIGHT 2:03¼

THE FASTEST STALLION BY THE RECORDS EVER OFFERED FOR SERVICE ON THE PACIFIC COAST.

He still holds the World's Records for 4-year-old (2:04½) and for 5-year-old (2:03¼).

SEARCHLIGHT is one of the fastest and gamest horses that ever raced on the Grand Circuit. He is a horse of rare individuality and is one of the most perfect specimens of horseflesh ever foaled. He has repeatedly beaten one minute to the half-mile pole in his work and has pulled the heavy cart in which he now takes his exercise a half in 58 seconds with a dozen watches held on him.

Few stallions that ever stood for service in California have such royal blood lines. Darknight, the sire of SEARCHLIGHT, was like the great McKinney, a son of Aleyone, and is a sire of extreme speed, having four 2:10 performers to his credit. The dam of SEARCHLIGHT is one of the great brood mares, having four with standard records and his granddam and great granddam are both in the great brood mare list. His oldest colts, now two years old, show that he imparts these qualities to his get, and he is certain to be a producer of early and extreme speed as well as size and good looks.

**Terms for the Season, \$75.**

**LECCO 2:09¾** The Blood that produced Dan Patch 1:59½

LECCO 2:09¾ is a very handsome black stallion, a square trotter and as game a racehorse as ever looked through a bridle. He is by Bonnie Boy, one of the best producing sons of Patchen Wilkes, sire of the great Joe Patchen 2:01¼, that in turn is the sire of the unbeaten Dan Patch 1:59½. The dam of LECCO is a great brood mare by Homer, and his second dam is a producing mare by Rochester and his third dam is a producing mare by Clark Chief. For four generations in the pedigree of LECCO there is not a sire or dam but is a producer of standard speed.

LECCO made a campaign through the Grand Circuit in 1899 that shows his wonderful speed and gameness. He met the best horses out that year and in seven starts won four first moneys, two seconds and was but once unplaced. His action is perfect and he cannot help siring a family of high class, handsome, fast and game trotters.

**\$50 for the Season.**

The above horses will stand at the **PLEASANTON RACE TRACK**, and all mares not proving with foal may be returned free next year, or in case the horse is not in California the service fee will be returned. It is the intention of the owner however, to keep both SEARCHLIGHT and LECCO in this State for the next four or five years. Due care taken to prevent accidents or escapes, but no responsibility assumed should any occur. Good pasturage provided at \$4 per month, and all bills payable before mare is removed from my possession.

For further particulars and tabulated pedigrees address

**EDW. MILLS, Rose Hotel, Pleasanton, Cal.**

## NUSHAGAK

Reg. No. 25939

Black Horse 15-2½ hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15½, Sabina 2:15½, Sabledeale (at 2 years) 2:18½, Buffington (at 2 years) 2:20½, and 36 others in 2:30 list. Dam, Fidella (trial 2:35 at 2 years), dam of Fidette 2:28½, dam of Mary Celeste (at 2 years) 2:17½ by Director, sire of Directum 2:05½, Direct 2:05½, Nathan Straus 2:05½, Direction 2:08½, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H 2:12½, etc. Third dam by Lancelot, son of McCracken's Blackhawk 787.

NUSHAGAK'S sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro Wilkes 2:11 was one of the gamest colts that ever raced down the Grand Circuit. The Wilkes and Director blood is a successful cross as it has produced John A. McKerron 2:05½, Nathan Straus 2:05½, Ozanam 2:08, Dollade Wilkes 2:10½, Oro Wilkes 2:11, Evangeline 2:11½, Mary Celeste (at 2 years) 2:17½, etc. Fidella, NUSHAGAK'S dam, is in the great broodmare list and she would have been a very fast trotter if given an opportunity, as with very little training she trotted a mile in 2:35 as a two-year-old. Mr. Corbett purchased her from Mr. Goldsmith for a broodmare, consequently her training was discontinued. The get of Reavis' Blackbird, the sire of NUSHAGAK'S second dam, were noted for their remarkable gameness and vigorous constitutions. His two noted daughters, Mamie Griffin 2:12 and Vic H 2:12½, were exceedingly game. NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17½, Majella B. (2) 2:29 (trial at 4 years 2:13½), and The Boquet (trial at 3 years) 2:21. His other colts that have been handled some are: Brown filly, 4 years old in 1902, showed trial of 2:20½ with three and one-half months' work; blk g. 3 years old in 1902, with three months' handling showed mile in 2:35½, last quarter in 35½ seconds. His son Aristo (at 3 years) 2:17½ took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake. Before taking sick we felt confident that Aristo would trot a mile closer to 2:10 in his three-year-old form; the way he raced after being sick made us feel satisfied that we had made no mistake in our estimate of him. His third heat in 2:17½ was equal to 2:13½ or 2:14 over the Woodland, Santa Rosa or Stockton tracks.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

**Limited to 40 outside mares, at \$50 the Season,**

with usual return privilege if mare proves not with foal. Mares due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed should any occur. First-class pasturage for mares, \$3 per month; no barbed wire. Address

**WALNUT GROVE STOCK FARM,**

Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Also, very handsome Stallion. Both gentle and good roadsters. Address Mrs B E HARRIS, 2627 California Street, San Francisco.

## FOR SALE.

### 3 CLYDESDALE STALLIONS

POLLOCK, 12 years old, and CLYDEBOY, 7 years old; both choice breeders. Also PRINCE S, 3 years old May 25th. All prize winners, with best of action, color and breeding. Can be seen at the Petaluma Race Track at any time. For further particulars address T. A. NUFER, P. O. Box 63, Petaluma, Cal.

## High Class Roadsters For Sale.

**YELLOW JACKET 2:20 1-2**, pacing (only beaten a head in 2:12). The handsomest roadster in California. Chestnut with flaxen mane and tail, and a perfect horse. Fine driver, sound, kind and gentle; has been driven by a lady. Get his fellow and he will attract attention on the park roads or speedway.

**Double-gaited Grey Gelding**, excellent road horse, single or double; sound, fast and a great weight puller. Never trained, but paced a mile in 2:27, fast quarter in 34 seconds. A good prospect for the track, and a high class roadster anywhere. For prices and particulars address

A. B. RODMAN, Woodland, Cal.

THE BARON WILKES WON 25 PER CENT OF ALL THE MONEY ON THE GRAND CIRCUIT OF 1902.

## BARONDALE 2:11 1/4 Reg. No. 20,189.

IS A SON OF BARON WILKES 2:18.

His first dam, Nathalie, produced Barondale 2:11¼ and Grand Baron 2:12¼ and is by NUTWOOD the greatest of all sires.  
His second dam, Beatrice is the dam of Patron 2:14¼, Prodigal 2:16, Patronage and Pangloss, all great sires, and is by Cuyler.  
His third dam, Mary Mambrino is the dam of Elvira 2:18¼, the producing sire Dunraven, and dams of Ponce de Leon 2:13 and four others.  
BARONDALE has two new ones in the list this year and is now the sire of four in the list.  
Where Can You Beat This Breeding?

## Season of 1963 at SAN JOSE RACE TRACK.

Terms, \$50 for the season, with usual return privileges.

For further particulars address

TOM JAMES, 1120 Alameda Ave., San Jose, Cal.

## MONTEREY 2:09 1-4 Reg. No. 31706

Will Make the Season of 1963 at

SAN LORENZO SATURDAYS, SUNDAYS, MONDAYS, TUESDAYS. MILPITAS WEDNESDAYS, THURSDAYS and FRIDAYS.

Fee \$50 FOR THE SEASON. Good pasturage at \$3 per month. Best of care taken of mares, but no responsibility for accidents or escapes. Send for card containing pedigree and full particulars. Address P. J. WILLIAMS, San Lorenzo, Cal.

## BONNIE DIRECT 2:05 1-4

Winner of fastest 5-heat race paced in 1900. Winner of Chamber of Commerce Stake at Detroit; Blue Hill Stake at Readville, and three other great races. Biggest money winner of "New" Pacers of 1900, having \$7575 to his credit the first year out.

Sired by Direct 2:05½, sire of Directly 2:03½, Hal Direct 2:04¼, Prince Direct 2:07, Directum Kelly 2:08¼, etc.

Dam BON BON 2:36 (dam of Bonsilene 2:14¼), by Simmons 2:38, sire of Helen Simmons 2:11¼, New York Central 2:13, etc. Also sire of dams of xereno 2:07½, Tomboy 2:10½, Owyhee 2:11, etc.

Second Dam BONNIE WILKES 2:39 (dam of 3 in list) by George Wilkes 2:32.

Third Dam BETTY VILEY by Bob Johnson, thoroughbred son of Boston.

BONNIE DIRECT is a black stallion, 15¼ hands high, weighs 1200 lbs. Is a good individual, has best of feet and legs, and is absolutely sound in every way.

BONNIE DIRECT will serve a limited number of approved mares during season of 1963, at \$100 the season. Mares not proving to be in foal can be returned next season or service fee refunded, at the option of the owner of mare. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no responsibility should any occur. Pasturage for mares at reasonable rates. Address

## THE BEST WAGON IN THE WORLD

WEIGHT 48 to 65 Lbs.

Entirely Different and away ahead of any other wagon ever made. It is easier to pull and faster than a sulky. Thoroughly practical, handsome and durable.

## ITS GOOD POINTS.

entirely new. It is absolutely noiseless and positively prevents the axle from swinging. Our Axles are the strongest that can be made and are in a continuous piece. Wheels. We make our own wood and wire wheels complete. Our Ball Bearings are the best made and are water and dust proof. The Shafts are handsome and strong and can be instantly removed. They are steel plated top and bottom, free from bolts in any part of them, and so attached to the wagon they cannot rattle, as they have no springs, catches or traps to get out of order. The cross pieces are steel plated and trussed, making them very light and stiff. The Whiffletree is held by our own device and cannot rattle and when desired can be quickly removed. We manufacture truss poles and neck yokes. Our Truss Poles are very attractive and are free from braces to bend and rattle. Should any accident happen it can not snap off like an ordinary pole. The neck yoke presents a handsome appearance, is light and strong, and like the pole cannot snap off. The pole passes through the neck yoke, which holds it securely and carries it several inches higher than an ordinary kind. Tubing is not used on our wagons, as it is unreliable. Send for prices and catalogue.

The Body is made in one piece, rounded at the corners, having no joints to come apart or corners to open, thus making it the lightest, strongest and most beautiful in appearance. The Fifth Wheel is original and

## GIBBS' CELEBRATED PROCESS OF RAPID TAXIDERMY In Practical Use Over Twenty-Five Years.

Used Everywhere in America. Hundreds of Testimonials. Try and Be Convinced.  
Start a Class. Money in It. Be Your Own Taxidermist.

Naturalists, Collectors, Gunners, Anglers, Outers, Boys, Girls, and all others interested in nature  
and anxious to preserve the specimens taken in wood and field, have all felt the need of a simple  
method of preservation, which is free from intricacies and expensive.  
There is a method of rapid taxidermy now in extensive use, which meets the requirements of all  
amateurs who wish a practical and inexpensive method of preserving the trophies of the outing and  
collecting trip. This is not the old system of so-called stuffing, so expensive, laborious and disap-  
pointing, but is a rapid system, which anyone can learn at once and which is guaranteed to give  
satisfaction.  
By this process you may preserve the beautiful plumage of the grouse and woodcock, or the pike's  
or buck's head, or the showy feathers of the tanager. Boys, girls and all others can do good work and  
may make money, as mounted heads and birds find a ready sale, and besides you may teach your  
friends and decorate the school-room, office and dining-room with native birds and other attractions.  
If you are in doubt, then get your friends to go in with you and start a class, for when several work  
together there is an advantage and the expense is next to nothing.  
On the receipt of \$1.00 cash or stamps, I will send full printed instructions for mounting birds,  
heads, mammals, etc., and all materials for mounting and preserving specimens—including prepared  
compound, together with full directions for dressing skins with the hair on for rugs and robes, so that  
you will not be to the expense of one cent.

Remember, I Guarantee Satisfaction or Money Refunded.

### A WORD TO BREEDERS.

I believe the set of the above stallions will prove to be amongst the best in the world; that of Ponce de Leon, Dare Devil, and Dreamer (because of speed combined with beauty) for the track and road, or, if not fast enough for track, for carriage and show ring (because of beauty combined with action); that of Glorious Red Cloud, Glorious Bonnie and Glorious Lonnie (because of beauty combined with action) for carriage, trap and show ring.

After years of search I selected the above stallions, regardless of expense, because from all information obtainable I concluded they would produce the best of the most desirable class of horses, provided they were given every facility possible, regardless of expense. I have gathered a band of broodmares, each one filling the requirements of the very highest standard—breeding, health, freedom from inherited defect or blemish, beauty, stamina, and speed, and have housed them in the best possible way known to modern science for comfort, health and development—having expended on Dreamwold between a million and a half and two million dollars. Each animal at Dreamwold has the benefit of specially constructed broodmare, stallion, foaling and training stables, driving and training academy and hospital; all under separate roofs, with every protection against fire, including our own fire department of 35 trained members. All buildings are heated

with modern hot-water apparatus, which insures uniform heat in all kinds of weather. All stall floors are guttered, drained, and of modern sanitary construction. Each broodmare stall is 14x18, and the buildings are fitted with sleeping and living quarters for men, which insures constant attendance during the twenty-four hours.

The extent and quality of our stable accommodations will be appreciated when it is taken into consideration they cover 2,600 running feet, the buildings devoted to broodmares costing \$942 for each mare, and balance \$880 per horse.

Our animals have the benefit of a modern constructed half-mile track, consisting of an outer racing track, an inner soft track, and the center a nine-acre grass plot, all drained in twelve foot squares with drain-pipe.

Animals are cared for by a force of 15 men, including managers, trainers, veterinary and experts specially selected for their knowledge of animal health, feeding, training and conditioning. With these facilities and a determination to develop nothing but perfect get and to race nothing younger than five-year-olds, except in unusual cases, I believe we will in three years, in connection with a bunch of two and three-year-old Ponce de Leons we now own and the fifty and odd young Dare Devils in the hands of Messrs. Hamilton and others, make the names of our stallions, particularly Ponce de Leon and Dare Devil, famous

wherever a beautiful, speedy and perfect horse is desired, or known.

An idea may be had of the scarcity of good horses when I say I have for the past two years been endeavoring to get together a band of 125 broodmares to meet our standard, and have, so far, although willing to pay any reasonable price, only been able to purchase less than 50. In the past year we have only been able to find one, Expectation, the dam of Major Delmar, that would meet our requirements.

We have limited the service of Ponce de Leon and Dare Devil to 50 mares each, and as we have not sufficient of our own, we will book 20 to each, and would urge those who are desirous of nicking their mares with these stallions to do so this season, for when our own band has been filled, they will be withdrawn from public service.

As I am very desirous of giving our wonderfully beautiful and speedy Dreamer and Dreamwold Oxford Boy an opportunity to cover a few of the very best mares, and as we have but 3 to spare to Dreamer and 2 to Dreamwold Oxford Boy we will give their services free to 10 and 5 mares which we will approve. They must be very well bred, free from defects, beautiful individuals, with inherited speed. Bear in mind, if Dreamer's services were for sale, the price would be \$200, as he is, in our opinion, the best son of Oakland Baron, Dreamer's

three-year-old record in a six-heat race being 2:14, at the same time being the champion show ring horse, and the same with Dreamwold Oxford Boy, who is unbeaten in the show ring, winning first in his one, two and three-year-old forms and being the champion two-year-old trotter and Kentucky Futurity winner in 1901.

I would impress upon those desiring the services of our stallions that if they are after speed alone they may do as well, but I do not believe there is the equal of Ponce de Leon or Dare Devil when speed, beauty, and carriage-horse getting qualities are taken into consideration. The get of these stallions that are not good enough for the track make the best show-ring carriage horses, and the day is now here when an ideal carriage horse will bring more money on the average than even the best race horses. Breeders will pardon me when I say I speak by the card, having in my stables over thirty show horses, exclusive of combined show and racing horses, that have cost an average of over \$3000 apiece, and twelve show horses, exclusive of race horses, costing an average of \$5000 apiece, and that I have more than three times as many ribbon winners as have ever been in one stable including four champions (different years) of the National Show; Glorious Bluecher, 1898; Glorious Red Cloud, 1899; Glorious Lady Algy, 1900, and Glorious Flying Cloud, 1901.

### A POINTER FOR BREEDERS.

It is only a phenomenal green race horse that will sell for \$3000. I will buy as many perfect (as individuals and trained) green four or five year old carriage or trap trotting-bred horses as are offered me at \$3000 each.

MORE WILL BE HEARD FROM THE GET OF OTHER STALLIONS DURING THIS AND POSSIBLY NEXT YEAR THAN FROM THOSE OF PONCE DE LEON AND DARE DEVIL, BUT IN THE NEXT FIVE YEARS I BELIEVE PONCE DE LEON AND DARE DEVIL WILL "BE THE RAGE," BUT IT WILL THEN BE TOO LATE TO BREED TO THEM.

THOMAS W. LAWSON.

### CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES AND DRIES IN quickly and DOES NOT GUM AND FILL UP THE PORES like tar and oil. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLINESS quickly disappears.

ARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE FOR CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

IT PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH STRONG ELASTIC WALL and HEALTHY FROG—A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds due to its use.

It is a CERTAIN CURE FOR THRUSH and SCRATCHES.

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2½-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free. Don't fail to read "ad" giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

**WILL APPROPRIATIONS BE MADE FOR THE**  
District Fairs this year? is the uppermost question in the minds of those who make exhibits annually at these exhibitions. The General Appropriation Bill already reported to the Legislature contains the same appropriations for district fairs that were made two years ago, amounting to \$102,000 in the aggregate. The bill will undoubtedly pass both houses in this shape and the measure will be passed up to the Governor, who has the power to cut from it such items as he thinks are extravagant, unwise or unnecessary. It is the general impression that Governor Pardee will indorse the fair appropriations, provided the condition of the State's treasury, when the absolutely necessary appropriations are all counted up, will permit the expenditure to be made. It is the Governor's belief, however, that there are too many districts, and this belief has been held by his predecessors, but owing to the fact that a bill to lessen the number would be contested by the representatives of every county cut out by such a lessening, no action has ever been taken that would divide the State into fewer districts. A bill dividing the present district comprising Kings and Tulare into two separate districts passed both houses of the Legislature last week, and Governor Pardee promptly vetoed it, holding that there were too many districts already. There should be some effort made by those most interested in the district fairs to present their case to the Governor and furnish him with reasons why the appropriations should pass. None of the opposition to district fair appropriations has ever come from the taxpayers, but from a few persons who desired the money for other purposes. If Governor Pardee will affix his signature to the district fair appropriation bill and then see that the State Board of Examiners allows no claims against that fund unless they are strictly legitimate, he will have worked a reform in district fair matters that will meet with general indorsement.

**THE KENTUCKY FUTURITY**, that greatest of all stakes for three-year-old trotters, will close for foals of 1903 on March 16th. It will only cost \$5 on that date to nominate the mare and \$10 December 1st, when color and sex of foal must be given. Nothing more will be required until June 1st of the year of the race. This stake has been increased to \$22,000 and is the largest stake in existence for harness horses. Read the full conditions in our business columns.

**SANTA ROSA STOCK FARM'S HORSES** that are now in training at Santa Rosa in charge of Millard Sanders will be sold by the Fasig-Tipton Company at the annual big Blue Ribbon Sale at Cleveland in May, this year. It will be the banner consignment to the sale, and the horses will be offered on the first day. Anzella 2:06½, the greatest trotting and money winning mare of 1902; Dolly Dillon, 2:07 that held the same position on the Grand Circuit in 1901; Sir Albert S. 2:03½, the whirlwind pacer that Sanders says will pace in two minutes; Lou Dillon, the best green trotter on earth that showed two public trials last year in 2:08½ and 2:08½; Bonsilene 2:14½ by Stamboul 2:07½; Marengo King, a grandly formed stud by McKinney out of Bon Bon, dam of Bonnie Direct 2:05½ and Bonsilene 2:14½, and several others, fourteen head in all, will make up the Santa Rosa Stock Farm consignment to the Blue Ribbon sale. There are three fillies by McKinney and others by Sidney Dillon among the animals to be sold. The sale of these horses will be a loss to California in one way as they are all royally bred and would add much to horse values of the future if permitted to remain in this State when their racing days were over to be bred. But their performances over East, if they fall into capable hands, will be a great advertisement for California as a horse breeding State. There is not a horseman in California but will regret the dispersal of this great stable of horses, and everyone feels that in Millard Sanders' capable hands they would have achieved far greater honors than ever this year. The dispersal of the grand collection of broodmares and stallions at the famous Santa Rosa Stock Farm, which is soon to occur, will add another to the long list of California breeding ventures that have been dispersed on account of death, just as they had reached the point where they were fitted to begin the production of high class horses. The death of Mr. Henry Pierce was a public calamity, and while it would be very difficult to find a man to occupy his place among the breeders of standard horses, the dispersal of the stock of Santa Rosa Farm will enable other farms to secure some of the high class mares and stallions that have made it famous. Mr. William G. Layng of the Occidental Horse Exchange informs us that outside the consignment of fourteen head that will go to the Blue Ribbon sale at Cleveland, he will dispose of all the rest of the farm's horses at his salesyard in this city.

**ED A. TIPTON** manager of the Fasig-Tipton Co. arrived in California a few days ago, and has been enjoying our February weather which has been of the very best variety since he set foot in the Golden State. Mr. Tipton called at the office of the BREEDER AND SPORTSMAN Wednesday last accompanied by Mr. William Stuart Hunter, who is also connected with the famous sales firm. The latter will visit Rancho del Paso this week, while Mr. Tipton will be the guest of Col. J. C. Kirkpatrick at his Pleasanton bungalow for two or three days. Messrs. Tipton and Hunter stopped over a day or two at Los Angeles, and have thoroughly enjoyed every minute of their time since reaching California. Mr. Tipton says he is here on a purely pleasure trip; that he had a very busy year during 1902, having sold about two million dollars worth of horses and is simply resting up for a few weeks. The wonderful success of the Fasig-Tipton Company since Mr. Tipton became identified with the management is attributable in a great measure to his keen foresight and excellent business ability. Few men have as much knowledge of trotting horse pedigrees, blood lines and market values as he, and he is in close touch with the leading buyers and sellers all over the country. The sales at Madison Square Garden are attended by the foremost buyers of America and the business of selling horses by auction has grown to enormous proportions. It is one of the big enterprises of America's metropolis.

**AT READVILLE**, that famous track near Boston where so many great harness races have been trotted and paced, there will be a greater program than ever offered the harness brigade this year. Readville is on the Grand Circuit and its meeting begins August 24th and lasts five days. The early closing purses are advertised in this journal to-day and are six in number. The Blue Hill is for 2:30 trotters and the purse is \$5000. The Massachusetts, that great annual race for 2:12 class trotters has a value of \$15,000 this year, an increase of \$5000 over last season.

The 2:16 class trotters have \$3000 hung up to contest for, and the three year olds of the 2:24 class are given a \$2000 purse. This gives the colts a chance whose owners failed to enter them in some of the big stakes. For the pacing division there are two rich purses—\$5000 for the 2:24 class and \$3000 for the 2:10 class. National rules will govern these races, the only exception being that at the end of three heats all horses not standing for any part of the money must

go to the stable. Read over the terms of entry in these purses. They are very liberal and easy. Entries will close next Wednesday, March 3d. Don't allow the date to go by without mailing an entry or two if you intend racing over east this year.

**THE DEATH OF MR. A. G. GURNETT**, occurred in Oakland two weeks ago to-day after a short illness. Mr. Gurnett was for years President of the San Francisco Stock Exchange of this city and owned the Sulphur Spring Farm in Contra Costa county where he had more success in the breeding of trotters than falls to the lot of the majority of breeders, as he bred two trotters that held championship records. The first was the gray gelding Who Is It that in 1898 held the world's record of 2:12 for a three year old gelding, and the other was Zambra, the McKinney gelding that last year captured the world's five-mile record at Los Angeles, trotting the distance in 12:24. Mr. Gurnett bred several other horses that proved successful on the track. He was a director of the Pacific Coast Trotting Horse Breeders Association, being its First Vice-President at the time of his death, and was also a Director of The Golden Gate District Agricultural Association and actively engaged each year in the management of its meetings. Mr. Gurnett was a native of Canada and aged 60 years at the time of his death. He leaves a wife and one child to whom the bulk of his estate, valued at about \$50,000 was bequeathed.

**CLEVELAND DRIVING PARK** occupies a conspicuous place in our issue of to-day with its advertisement announcing the early closing purses for its July meeting. Entries are to close March 15th for eight purses of \$2000 each, and all races will be mile heats, best two in three. The trotting classes are the 2:23, 2:19, 2:14 and 2:11; the pacing purses are for the 2:23, 2:15, 2:11 and 2:08 classes. Cleveland is the best trotting horse city in America and its track is one of the best and fastest on the circuit.

## Was a Great Mile for Cresceus.

A gentleman who is attending the ice races at Ottawa, Canada, sends the *Trotter and Pacer* some observations upon the meeting which will be of interest. He writes: "There was plenty of racing here last week, with quite an ordinary lot of horses, but I never saw people so hungry for racing. There has been a big attendance every day. Tuesday it rained quite hard, in fact, so hard that the drivers asked to postpone, but the crowd of about a thousand stood out in the rain and raised a riot when the judges did postpone. Thursday was a big day, about four thousand paying at the gate and there must have been five hundred that climbed the fence. Cresceus went a slow mile, as the track was very bad, and Ketcham let him move the last quarter in 33 seconds. Saturday there was just as big a crowd as on Thursday, and Cresceus trotted the greatest exhibition I ever saw. Taking everything into consideration it was as good as his record of 2:02½. He went his mile out in the center of the track all the way, carried more iron, the weather was at zero, and Ketcham's hands were so cold that he could do nothing but guide him the last half. The mile was in 2:15 flat, and I know that he did not get a fraction at any point in the mile."

## District Fair Appropriations.

The following dispatch appeared in the San Francisco *Bulletin* of last Thursday evening:

**SACRAMENTO, Feb. 26.**—The fate of the district fairs appropriation hangs upon the condition of the State's exchequer when the imperatively necessary appropriations required by the several State institutions have been made. It has been rumored from time to time that Governor Pardee had decided to veto the appropriation, but it can be stated positively that if he ever had such an intention he has not announced it. What the Governor did do was to let the Ways and Means Committee know that he would not stand for a single cent of increase in the amounts allowed for the district fairs. He is said to have declared that he would exercise his power of veto rather than stand for such an increase.

The last appropriation made for district fairs amounted to \$102,000, and the records in the office of the Board of Examiners show that only between \$40,000 and \$45,000 were expended for premiums, whereas it was intended that the entire sum should go into premiums. While the balance was not used for racing purses, as has often been charged, it was expended in paying general expenses, thus allowing the application of practically all gate receipts to purses. In some counties the records show that not more than one-fifth of the allowance went for premiums.

The Governor is a believer in farmers' institutes, as he considers them better educators than the fairs. But he is willing to consider the district fair interests if it is possible for him to do.

The suit of Dr. Frank Roberge, veterinary surgeon, to recover \$100,000 from the estate of Robert Bonner, resulted in a verdict for the defendant.

## JOTTINGS.

**T**HE SAN JOSE TRACK is under new management and there is a chance that it will soon resume its former popularity with horsemen. The new lessee is Mr. J. W. Barstow, the well known veterinarian and horseman, owner of Nearest 2:22, that is a full brother to that great trotter John A. McKerron 2:05½ and that has a right years of age a four year old (A. J. C. 2:19½). Mr. Barstow is a worker and an enthusiastic horseman and will make every effort to make the San Jose track one of the leading training grounds in the country. He is having the stalls all renovated and fixed up, the grounds cleaned and will keep the track in as good shape as any in America. I understand it is Mr. Barstow's intention to offer the use of the track to a driving club that is to be formed by prominent San Jose professional and business men who enjoy matinee racing, and he is already in correspondence with many trainers and offering them inducements to bring their strings to the Garden City. Mr. Zibbel, who raced up north last year and brought his horses to San Jose a few months ago, but soon afterwards pulled up stakes and went to Fresno, will move back right away, and several trainers from Denver are talking of coming. Chas. Durfee, John Gordon, Tom James and others are there now, and it will not be long until the stalls will be pretty well filled up.

If there is a better training track in California than this one at San Jose, I have not seen it. The soil is just suited for training and racing harness horses. It does not need as much water as some and is a very fair winter track. No track on the Coast is more beautifully or more conveniently located. It is within the corporate limits of San Jose and the grounds comprise about one hundred acres. Many very largeshade trees beautify the grounds, and there is a large pavilion for fair exhibits, a good grand stand, a cement bicycle track for racing purposes, picnic grounds and cattle sheds; in short, everything necessary for fairs, pleasure grounds and racing. Mr. Barstow's lease is for eight years and covers the entire property.

Now that the San Jose track is in a practical man's hands there will be a chance for a first class harness race meeting there this year. In the old days San Jose always held one of the best meetings on the circuit and it can be done again and receive the endorsement and patronage of the people of Santa Clara county, something the old association has not had for years. Mr. Barstow will have the good will of every one, and deserves success in his new venture.

Nutwood Stock Farm's trainer, William Cecil, has been riding quite fast at Pleasanton recently and last week he put two remarkable quarters to the credit of the Nutwood Wilkes-McKinney cross, considering the time of the year. On Friday he drove the three year old colt Tidal Wave a quarter in 30½ seconds at the pace. This colt's picture is on the front page of the BREEDER AND SPORTSMAN this week and I think it will be pretty generally acknowledged that he is a beauty. Tidal Wave is owned by Mr. J. W. Gardner of this city, who bred Coney 2:02, McZeus 2:13 and Grace McK. 2:21½, all by McKinney out of Grace Kaiser. He raised a full sister to these fast ones that he called Miracle, and bred her to Nutwood Wilkes, Tidal Wave being the result. He is one of the best proportioned and best muscled three year olds in California. A rich dark chestnut with a blaze face and three legs white half way to hock or knee, he is one of the most beautiful colts I ever looked at. Mr. Gardner wanted him to trot, but he did not take kindly to the diagonal gait, so he was shifted to the pace and with but a little work began to show speed of the highest order. He stepped the last quarter of the Pleasanton track in 30½ seconds last Friday and did it handily. He looks and acts like a level headed, game, race horse and that is what he is in my opinion. Mr. Gardner has a prize in him, and will have to refuse many good offers if he keeps him.

Having demonstrated on Friday that the cross of Nutwood Wilkes on a McKinney mare was a good one, Cecil hooked up the four year old filly Miss Georgie 2:25 on Saturday and braced her a quarter to see how the cross of McKinney on a Nutwood Wilkes mare would show for speed at this time of the year. She did not permit the reverse cross to put it on her in the least as she paced the quarter in the same time 1:30 seconds. These two youngsters, one a colt, the other a filly, clearly demonstrate that Nutwood Wilkes and McKinney blood will nick and result in speed every time. There are a large number of McKinney mares in California and their owners should take note of the

fact that Nutwood Wilkes is still in business at the old stand.

Mamie R. or Miss McKerron as the stable boys call her, as she is a full sister to John A. McKerron 2:05½, is being worked by Cecil with the idea of giving her a record. She raised a colt last year and can take a low mark if raced before retiring to the broodmare ranks permanently, as she is sound as a new dollar and has great natural speed at the trot. She was given a couple of quarters last Monday after but six weeks' work and stepped them in 35 and 34½ seconds. The three year old pacer Record Searcher by Searchlight 2:03½ out of Zeta Carter, dam of T. C. 2:30, is showing speed, as a quarter in 35½ seconds Monday is evidence.

There was quite a row of visitors riding the rail at Pleasanton last Saturday, timers in hand, watching the trotters and pacers taking their regular work. It's about as much enjoyment to see the brushes as it is to attend a race meeting. Farmer Bunch worked a three year old brother to Iloilo 2:16½ a quarter at the trot in 37½ seconds and the mile just shaded 2:30. This colt is a handsomer horse than his brother and will make as fast a trotter. He has a bold, resolute way of going and as he is well muscled and full of grit he should trot well down in the 'teens this year.

Monroe Salisbury drove on the track with Corleot, the two year old by Mendocino 2:19½ out of Coralie by Boodle 2:21½ that he bought at the sale at Chase & Co's January 29th. After a jog of a mile and one or two short brushes Mr. Salisbury drove off the track with the remark: "I'd like to see the color of the trotter that will beat this fellow when he has matured." When he dismounted from the old styled wagon to which the colt was hitched he said to me: "That is the best colt of his age I ever had anything to do with. He is not only good gaited, but he knows how to trot and has the racing instinct and wants to beat the others." Corleot is a big good looking colt and should make a great stock horse as his breeding is so rich. His grandam is by Electioneer and is own sister to Anteeo, 2:16½, Antevolo 2:19½, etc. He has two crosses to Electioneer and some of the best thoroughbred blood ever used to cross with trotters. He could show a quarter in forty seconds very handily as a yearling and looks as if he would be able to make a showing in the rich stakes in which he is entered.

Fred Chadbourne, who is one of the best of the young trainers in California, and who has given the first lessons to many very promising horses that have been raced by older drivers, is associated with James Sutherland and has about a dozen horses that he is working. I saw him driving the good looking stallion Dialect by Diablo that belongs to S. H. Crane; the well known farmer and stock dealer of Turlock. Dialect is a trotter and has lots of speed. He has been suffering from quarter crack for the past year or two owing to the dry alkali soil in the lower country, but his feet look all right now and if they stay good he will march a mile better than 2:20. Mr. Chadbourne has the pacer Ben F. 2:22½ in his string also. This fellow is improving right along. He looks like a very good prospect in his class.

Among those whose strings are not large is S. K. Trefry, who can teach a horse good manners as well as anyone. He handled that little pocket edition of Direct 2:05½, known as Freddie C, but now called Prince Direct 2:07, and all know what a mannered little gentleman he was. Mr. Trefry is training four or five at present. He has a big gray horse in his string that they call Marin Jr. 2d, that is quite a trotter and would make one a very stylish road horse. This gray is by Rockaby, a son of Direct. He is owned by the silent man, Geo. Johnson of Livermore. Another in Mr. Trefry's care is a bay gelding by Diablo, owned by S. F. Martin of Oakland. His dam is by Cresco, son of Strathmore, and I believe that he is one of the kind that will be heard from if he is ever raced.

Dr. Boucher's string at Pleasanton is composed of three horses—Miss Logan 2:06½ and her two sons, Harry and Bert. Harry Logan has a record of 2:12½, but was not raced at all last year. He is working well now and should be able to win some money this year. Bert Logan is by the Onward horse, Colbert 2:07½, but is undersized. A better muscled youngster is seldom seen and he is all horse, but I think the foal Miss Logan is expected to drop next month by Barondale 2:11 will outclass both these sons in looks and speed. Miss Logan never looked better in general health, but that lame leg still bothers her some, although the Doctor is still trying new remedies on it.

The new firm of Mills & Sanders spent considerable time and not a little money in fixing up their stalls weeks before last, and now have as nicely appointed quarters as anybody. Searchlight's stall is particularly roomy

and tastefully decorated, and the great race horse seems to realize the fact. Some of the best bred and fastest mares in California will be bred to Searchlight this year and he will make a heavy season. Mr. Mills has his grand trotting stallion Lecco 2:09½ in superb condition, as the photo reproduction on the first page of to-day's BREEDER will attest. To me he is one of the best made and handsomest trotters that has been brought to California. He cannot help but do much for California if he has good mares sent to him, and I understand he has already had some very choice ones booked. He was a great race horse and has the breeding. His individuality speaks for itself. Henry Sanders is busy at work on several colts that are showing well, but he is not moving fast as yet.

Millard Sanders is highly pleased with the big brown two year old colt that he purchased for \$1700 from James Thompson & Co; three weeks ago and tells me he has in this son of Nazote and Lulu Wilkes a trotter of great promise. Mr. Sanders purchased this colt for Mr. James Gray, formerly a resident of Santa Rosa, but now of San Francisco. A snap shot of the youngster appears on the front page to-day and shows what a racy and breezy looking colt he is. Nazote his sire is an own brother to that once champion gelding Azote 2:04½, and is siring some grand looking horses with size and natural speed. The dam of this two year old Lulu Wilkes, has produced three with records, viz: Advertiser 2:15½, Alla 2:21½ and Welbeck 2:22½, and there will be another whenever Sanders gets ready to start this fellow.

Geo. A. Kelly who will have charge of the Pleasanton track under Mr. Roman's ownership, has a couple of two year old colts that he is taking good care of with the expectation that they will make some money for him in the stud when they are old enough. One he calls Bonnie McK. This is the dark bay colt bred at Santa Rosa Stock Farm that Mr. Kelly received in the trade when he sold Anzella 2:06½. He is by McKinney 2:11½ out of Bonsilene 2:14½ by Stamboul 2:07½, second dam Bon Bon, dam of Bonnie Direct 2:05½. There is a lot of speed and good looks in this pedigree and the colt has fallen heir to considerable of both. The other colt Birdman is a roan, and a handsome youngster. He is by Antrim, sire of Anzella 2:06½, dam Birdie by Jay Bird, second dam Lady Lyle by Geo. Wilkes, third dam Dame Tansey (dam of Prima Donna 2:09½) by Daniel Lambert. There is good blood and good looks here and the Jay Bird cross is one that is becoming more popular every day over east, and is very scarce here in California.

I received the following characteristic letter from Sam Gamble last Tuesday:

"I forgot to tell you Saturday that Miracle (full sister to Coney 2:02) by McKinney is booked to Stam B. 2:11½ this year. Also that Belle Medium 2:20, dam of Stam B., is to be bred to Mendocino, sire of Monte Carlo 2:09½ and Idolita 2:09½. If the result of this union is a male it should be a great benefit to the young breeders ten years hence. Quite a number that have young Stam B's are breeding back this season. I hear encouraging stories relating to his youngsters. (How could it be otherwise?) Palo Alto will breed some mares to 'his royalist.' Can't stop merit among the intelligent breeding community, and I well know that Monterey, Charles Derby, Diablo, Mendocino, Zombro, Hart Boswell, Neernut, Bonnie Direct, Rey Direct, Nutwood Wilkes, Sidney Dillon, Barondale, Searchlight, Lecco and other highly bred horses are upon this earth. What a grand lot of youngsters ought to be produced in the next half generation if this blood is united intelligently. Yours

SAMUEL GAMBLE."

Ben Walker is assisting Monroe Salisbury with his colts and is getting quite a number into shape for the trip across the mountains. The big pacer by Lottery Ticket that Fred Chadbourne got to going so fast that everybody was talking about the horse, is now in the Salisbury string and doing well. He worked a half around 1:03 the other day and quarters in 30 seconds seem like play for him. The two four year olds by Directum that are owned by Judge W. E. Greene of Oakland are looking in good condition. Millard Sanders told me the black one worked a mile for him last year in 2:20½ seconds and he considered him a great prospect, but that the bay colt, which is the much larger of the two, will, he thinks, be a faster horse. Both are trotters and good gaited.

J. W. Marshall, the Dixon farmer, who aspires to own within a few years the best band of broodmares in California, reached Pleasanton last Saturday with three high bred mares, which he intended booking to some of the stallions there. When asked what stallions he had picked out he said he had not decided, but he could not go amiss with the following five to select from: Trotters Lecco 2:09½ and Stam B. 2:11½; pacers, Searchlight 2:03½, Bonnie Direct 2:05½ and Rey Direct 2:10. These horses are all young in the stud and have yet to get their first standard performer. But they will all get a place in the Great Table and sire high class horses.

### The Pleasanton Track.

An article on the sale of the famous Pleasanton track, printed in the last issue of the *Pleasanton Times*, is as follows:

Last week we mentioned the purchase of the famous Pleasanton race track by Harris & Donahue. They did not keep this valuable property long, for on Saturday the announcement was made that it had again changed hands, this time to Mr. Thomas Ronan, a recent arrival from Dayton, Washington.

Mr. Ronan has lived in Washington for many years; where he has made many staunch friends and where he has accumulated a fortune in mercantile pursuits. Some years ago he went into the horse business on account of his love of horses, as well as to afford him that activity which his active business life formerly afforded him. There is an old saying, "Judge a man and his enterprise by his former success," and taking this as a basis the Pleasanton training track will now certainly forge ahead, for Mr. Ronan has a reputation among the people of the North for his business energy. Besides the track, he has also valuable farming property throughout Washington and Oregon, and is also the owner of some 200 head of well bred horses.

Mr. Ronan will have associated with him in the conduct of the track George A. Kelly, the well known horseman. Mr. Kelly came to Pleasanton a little more than two years ago from Dayton, Wash., with a small string of particularly good horses, among them being the now famous Anzella, that was purchased by the Santa Rosa Stock Farm for something like \$6000. Mr. Kelly immediately returned to Dayton and brought back a number of promising colts and while there his description of Pleasanton so impressed Mr. Ronan that he also gathered some good prospects together and came here, with the result that he has purchased the track, and after a trip to his old home to settle up his affairs there, will make Pleasanton his permanent future home.

Mr. Kelly will assist in the management of the track and as he has had considerable experience in that line will no doubt be successful, he having built the track at Dayton and managed it for several years. Mr. Kelly purchased a beautiful home on St. Mary street some time ago, where he resides with his family, and where Mr. Ronan is also making his home.

Pleasanton race track has been famous for many years as the best winter track in the State and probably in the United States. Built in 1876 by Joseph Nevis, with small accommodations of 18 stalls, it was run by the owner and builder and by parties to whom it was leased until 1883, when it was purchased by Monroe Salisbury for \$25,000. Evil days fell upon the famous "kingmaker" and the property fell into the hands of Ferdinand Reese, of San Francisco, from whom it was purchased a few years ago by Mr. H. F. Anderson, who formed the corporation known as the "Pleasanton Training Track Association," the capital stock consisting of 5000 shares. About a week ago it was announced that the track had come into the hands of Harris & Donahue, but now it develops that Harris & Donahue have had 4990 shares of the stock for more than a year past, and that a short time ago they purchased the remaining ten shares, thus gaining absolute ownership; however, they held it only about a week, when the sale was made to Mr. Ronan.

Since the days, nearly thirty years ago, when Joseph Nevis built the track, many improvements have been made, but to-day, as then, the same conditions of soil which have made the track famous exist, and every year champions are sent East to win fresh laurels for the State and Pleasanton's famous track.

To-day there are over 200 stalls on the grounds and as they are all full, with continual demand for more room, twenty more stalls will be put up immediately, and a prosperous future is predicted for Pleasanton track and its new owner and manager.

### Death of Z. E. Simmons.

The dispatches of February 22d announced the death of Zachariah E. Simmons at Lexington that day. His age was seventy-eight years. He purchased Geo. Wilkes from his breeder, Col. Felter, and was noted as a breeder of trotting horses. His horses are at present quartered at Ashland, Newberger and Jack Dawson being the only ones in training. When he lived in New York he was a sachem in Tammany Hall. With the Morrises, who own Morris Park, and W. C. France, deceased, he owned the controlling stock in the famous Louisiana Lottery. He leaves a large estate.

A new wrinkle in adjusting the hobbles on a horse is credited up to the owner and breeder of Bunker Hill, that raced so well in New Hampshire last fall. It is said that he had the straps on the inside next to the pole some few inches shorter than on the outside and that on making the turns on a half-mile track this little trick worked to perfection.

### A Big Bet on Occident Entries.

LOS ANGELES, CAL., February 21, 1903.

BREEDER AND SPORTSMAN:—H. W. Lawrence has bought the bay stud colt, by Hambletonian Wilkes, dam Anna Belle 2:27½, full brother to Robert I. 2:10, entered in Occident stake in 1904. George Ford has a colt in same stake by Neernut 2:12½, dam by McKinney. Mr. Ford and Mr. Lawrence made a bet, through me, of \$1000 that his Hambletonian Wilkes colt will beat Mr. George Ford's colt in said race, to be trotted in 1904. The provisions included that should either colt fail to start in said race bet is off, and that I pay over the deposit of \$200 now held by me. Mr. Ford claims name of McNut for his colt, and Mr. Lawrence claims name of Larry Dawn for his.

Mr. W. G. Durfee now owns Anna Belle, dam of Larry Dawn, Robert I. 2:10, La Belle 2:16 and Maud Murray trial 2:12 in Germany. Mr. Durfee recently bought Anna Belle and a weanling sister to Robert I. and Larry Dawn from Colonel Moorehead of Green Meadow Farm. Los Angeles parties bought Maggie N., chestnut mare, four years old, full sister to Robert I. Now all that is left of Anna Belle's produce at the Green Meadow Farm is a beautiful brown filly, full sister to Robert I. and Larry Dawn, and now that Anna Belle is in the great broodmare list, being the dam of the greatest two year old trotter ever raced in California La Belle 2:16 and Robert I. 2:10, one of the most consistent pacers ever seen on a California race track, it is even betting that she will be written up in broodmare history as one of the best matrons now owned or ever owned in California. She herself was a game race mare and by a beautiful game sire, (Dawn 2:18), a son of the great sire Nutwood 2:18¾ backed up by the blood of matrons that produced Palo Alto 2:08, a race horse that never had a peer. Mr. Lawrence should be congratulated as his young stallion is a valuable addition for breeders and owners of mares by such great horses as Neernut, McKinney, Zombro, and the many other great sires owned in and around Los Angeles. Very truly yours,

C. A. HARRISON.

### Kentucky's Futurity.

The Kentucky Trotting Horse Breeders Association announces in this issue the thirteenth renewal of the famous Kentucky Futurity. The conditions, which are given in full upon another page, show that \$22,000 is offered for the produce of mares nominated on or before Monday, March 16, 1903, and that but the small sum of \$5 (one forty-fifth of one per cent of the purse) is required with each nomination, while the additional sum of \$10 (payable December 1, 1903), or in all \$15 (about one-fourteenth of one per cent) will carry the entry until the year of the race. No more liberal conditions could be devised for such an amount as is offered.

The Kentucky Trotting Horse Breeders Association, the first to offer such a race, and the only one to annually renew the same for thirteen successive years, has already distributed to horsemen by this means the sum of \$191,930, and the renewals now on hand which have not yet been raced for swell this to the grand total of \$289,930.

Time and time again, it has been demonstrated that a youngster engaged in the Kentucky Futurity will and does sell for many times more than a youngster of the same breeding and equal individuality, which is not eligible to this race.

The amount of money offered (\$22,000) is larger than that for any harness race, the conditions and payments the most liberal, the immediately enhanced value of a youngster thus engaged is many fold, the advertisement of one's entire interests in winning any part of this "Classic" event are inestimable; the above having been time and again proven true, we ask can any owner or horseman afford not to be liberally represented in this race?

Nominations will close on Monday, March 16, 1903, with E. W. Shanklin, Secretary, Lexington, Ky.

### \$15,000 for Jay McGregor.

A Lexington dispatch says: W. L. Spears has been offered \$15,000 for the two year old trotting colt of 1900 Jay McGregor 2:25½, trial 2:09½, by Jay Hawker 2:14½, dam Notre Dame 2:23½ by Robert McGregor 2:17½. The tender came through the Louisville horseman, R. H. Shockency, who is acting for J. K. Newman, the street railway magnate of New Orleans and New York. Spears is given three days to consider the tender. This is the second big offer he has had for this horse in the last thirty days. W. W. Estill, the breeder, offered \$10,000 for him a month ago. It is thought the present deal will go through, and Shockency will campaign the M. and M. candidate in 1903. He is now in Scott Hudson's stable.

Sober up on Jackson's Napa Soda.

### A Reminiscence of Frank Walker's.

Starting Judge Frank Walker, who gives the word at almost all of the big track: and under whose eyes more noted horses have raced than under those of any other in the profession, was in a reminiscent mood the other day and told a story of his youthful days that has never been in print, which serves to show the interest taken in light harness racing a quarter of a century or so ago. As is well known, Frank is a native of Indianapolis and in his boyhood days he received many a trouncing for spending more of his time around the horses than he did at school.

One fall when a big race meeting was given at Indianapolis, all the famous horses of which Frank had been hearing the men talk were to be there, and he determined to see those races, no matter what happened. All the great stars of the old time were there; and they are names to conjure with to-day. Who that remembers them does not feel his blood run a trifle more briskly and his pulse beat with a strong throb! Hickok, Splan, Goldsmith, Doble, Turner, Green and all that crowd of old masters of the rein; what wonders of the turf men who never saw them have missed! How the nerves of the old-timer will tingle when he hears the magic names of Goldsmith Maid, Red Cloud, Judge Fullerton, Gloster, Rowdy Boy, Mattie Hunter, Lucy, Sleepy Tom, Sweetser, Lady Morrison and Nettie (sometimes called Big Foot Nettie, that "General" Turner had)! When that array of equine celebrities went to the track at Indianapolis, there was no more school for young Frank. A team of elephants could not have pulled him there with a log chain hitched to him.

Frank was rather unfortunate the first day or two of the meeting, for the reason that paternal coin was not forthcoming for race track purposes. But he saw the races, nevertheless, from the limb of a friendly tree which stood near the high board fence. Fortune smiled on him about the middle of the week, however, and he managed to get hold of the price of an admission ticket. It was on the day of the famous race between Goldsmith Maid, Judge Fullerton and Red Cloud. All Hoosierdom appeared to have turned out to see their great favorite, Red Cloud, defeat the famous mare. On every hand nothing was heard but Red Cloud. Then came a report that Red Cloud would not start. Pandemonium reigned for awhile. Everywhere the crowd was shouting, "Red Cloud, Red Cloud, or no race!"

There were fears of a mob and a rope was stretched along the outer edge of the track near the stands to keep the excited crowd back.

"In all my experience since that time I have never seen such an excited crowd on a trotting track," said Mr. Walker. "I thought everybody had gone crazy. Feeling ran so high that the drivers of the other horses were afraid to have Red Cloud start for fear they would be mobbed if they should beat him. Even the driver of Red Cloud did not want to start, but there was no getting out of it. They would have been mobbed if he wasn't started. When he was brought out on the track men, women and boys yelled themselves hoarse. The shouting continued while the horses were scoring for a start and all the time they were on their journey around the track. As they rounded into the stretch with Red Cloud in the lead, there was the most hysterical demonstration I have ever seen or heard of. A big woman who sat next to me holding a fat baby in her arms, arose to her feet and in her excitement began to wave the baby and shout:

"Come on, my Red Cloud! ha, ha, they can't beat him! Come on, my Red Cloud!" and a string of hysterical stuff of that kind. In her excitement she allowed the baby to fall. Fortunately a man next to her was sitting down and was not so excited. The baby alighted in his lap. After Red Cloud won the heat and the big woman had subsided somewhat, the man passed the baby back to her with the remark "Madam, your baby might have been killed."

"Oh, that's all right," she answered, "we can get plenty more babies; but we can't get any more Red Clouds."

"The first heat was as far as Red Cloud got. The Maid landed the race, much to the discomfiture of the crowd—the big woman with the baby especially."—*Horse Review*.

### Packing Feet.

Packing horses' feet is a treatment which, at most, affords only a temporary relief, and while it may occasionally be advisable, it always weakens the foot unless other remedies are used to counteract its bad effects and aid in perpetuating the temporary benefits derived from its use. Used alone its results are a relief, not a cure, and if continued frequently will cause serious injury. Campbell's Horse Foot Remedy will bring about all the good results ever obtained by such treatment with a part of the bad conditions. It removes soreness and inflammation, dries the frog and gives life to brittle soles and walls, by giving to the foot the nourishment which nature always supplies when not prevented by artificial conditions.

An Austrian nobleman races his string under the name of Mr. Horsefoot.

## The Training and Racing of Rythmic.

**GEO. J. DIETRICH, Secretary.**  
P. O. Box 68, CLEVELAND, OHIO.

## Notes and News.

The Livermore horse show takes place to-day. A fine show of draft and trotting stock is promised.

The first of the get of John A. McKerron 2:05½, a two year old, is taking his first lessons at Cleveland.

This year promises to surpass all others in progressive achievements by organized horsemen and road drivers.

The Oregon Stake for two year old trotters received 52 entries and will make an interesting race at the Oregon State Fair this year.

W. L. Snow is confident that, barring accidents, Fanny Dillard 2:05½ will displace Lady of the Manor 2:04½ as champion pacing mare.

The full sister of Oakland Baron 2:09½, Princess Mackay, recently foaled a colt by Cresceus 2:02½ at the Ketcham Farm, Toledo, Ohio.

The pacing mare, Pussy Willow 2:10½, by Cibolo, has been sold by Harry Simmons, of Richmond, Ind., to A. C. Fuge, of West Bend, Wis.

Nine-tenths of the cases prosecuted by the Society for the Prevention of Cruelty to Animals in the big cities are for working galled horses.

It matters not how beautiful the head and neck, how strong the back and how clean the limbs; if the hoof is not sound the horse is not a good one.

It is announced that Brighton Beach has secured the Kentucky Stock Farm purse, and it will be decided at the August Grand Circuit meeting.

The Horse Review Futurity will be raced at Oakley Park, Cincinnati, during the Grand Circuit meeting to be held there September 28 to October 2 next.

Alta Cora 2:13 by Altamont, the Oregon pacing mare, sister of Chehalis 2:04½ and Del Norte 2:08, who made her record last year, is to be shipped East and bred to Joe Patchen 2:01½.

Oakwood Park Stock Farm bred eight mares to Stam B. 2:11½ last year and will have eight foals by him this year. The farm will again send several high class mares to this stallion.

A horse may be what some people are pleased to call cranky. That is all right if his crankiness can be used to advantage. It is will power that goes a long way down the home stretch.

Breeders in the East recognize the fact that horses bring more at an auction sale than any other way of selling and that is the reason sales of this kind have grown so fast in public favor.

The pacer Anaconda, now owned by J. H. Bronzon, New Haven, Conn., is being jogged every day by Frank Ward and in the last two months has gained at least seventy-five pounds in weight.

Free Haney was in town this week on a short business trip. Mr. Haney now has charge of the Modesto track, which is one of the best appointed of the interior mile courses, and is working quite a number of trotters and pacers.

J. C. Pender, of Johnstown, Pa., paid \$3050 for the pacer Vasten 2:15½, trial 2:09½, by Margrave 2:15½, at the Blair-Baker sale, Indianapolis. Vasten was started seven times over western half-mile tracks last season and never lost a heat.

Pleasanton folks are talking of a big horse parade and race meeting to be held at the track there in the latter part of April or first of May, just prior to the time the horses are shipped East for the Grand Circuit. It would draw a big crowd.

Probably no harness race horse, trotter or pacer, that ever lived—certainly none in the last generation—ever won so much genuine admiration from the public for the demonstration of real and unsurpassed race horse characteristics as Joe Patchen 2:01½.

No breed of horses should be kept standing long in the stable without an "airing." Exercise is necessary for maintaining the soundness of the animal, which is easily impaired by protracted idleness. They should have a few miles' walk, at least, every day.

Entry blanks for the Seaside Meeting at Brighton Beach Race Track are to be had at this office. At this meeting the Bonner Memorial, \$20,000, for 2:12 class trotters, will be decided, also The Brighton, \$10,000, for 2:10 class pacers. See advertisement.

John Splan, the noted trotting-horse driver and salesman, has turned lecturer. A few days ago he received an offer from Professor W. J. Morehouse, president of the University of Illinois, asking him to deliver a lecture before the class in agriculture on the horse. Mr. Splan at once wired his acceptance. When asked what his subject would be, he said: "The horse, as he was, as he is and as he will be in the future."

Tom James has a change in the advertisement this week for his stallion Barondale. It makes interesting reading—and it is all facts. Barondale's breeding is worth studying and as Mr. James says: Where can you beat it?

The Haywards Horse Show will take place on March 7th, one week from to-day. From present appearances there will be a very fine display of horses and those who attend may be sure of a parade that will be worth going to see.

In the 2:15 list Diablo is represented by nine race winners, as follows: Sir Albert S. 2:03½, Clipper 2:06, Diodine 2:10½, Daedalion 2:11, Diawood 2:11, El Diablo 2:11, Tags 2:11½, Hijo del Diablo 2:11½ and Inferno 2:15. All made their records in races.

Horses by Baron Wilkes 2:18 are in popular demand. Baronade changed hands three times at the Fasig-Tipton sale. Mayor J. M. Johnson bid him off at \$1000, sold him shortly afterwards for \$2000, and the purchaser who paid \$2000 sold him for \$3000.

Mr. J. W. Brooks has given up all idea of holding a race meeting at Los Angeles this winter or spring. The effort to get the Los Angeles City Council to rescind its ordinance prohibiting betting on races was not successful. The Council stood 4 to 4 on the question.

Expressive 2:12½, the greatest three year old filly that ever raced through the Grand Circuit, and now one of the most valued broodmares at Palo Alto Stock Farm, is the proud mother of a very handsome bay filly by Nutwood Wilkes 2:16½ that arrived one day last week.

E. C. Truesdell writes from Centralia, Washington, that Native State by Star Sultan is in fine condition and well liked by the breeders in that country. Native State made a record of 2:16½ at San Jose in 1895 and reduced this record to 2:14½ last year on the North Pacific Circuit.

The directors of Empire City Park are planning a free-for-all pace for their Grand Circuit meeting next August. They have in view to bring together such noted stars as Audubon Boy 2:03½, Sir Albert S. 2:03½, Prince Alert 2:00, Anaconda 2:01½, Direct Hal 2:04½ and Dan R. 2:04½.

Eddie Connors by Letcher, Jay McGregor by Jay Hawker 2:14½, Patchen Maid by Patchen Wilkes, Kinney Lou by McKinney 2:11½ and Lou Dillon by Sidney Dillon, all beat 2:10 last fall, and these, with others to be heard from, should make the slow trotting stakes interesting contests this season.

The Lodi track has been sold to parties who will turn the grounds into orchard and vineyard property. The horsemen have all been notified to get out, and the stalls will be torn down. The Lodi track being on sandy soil has always been a good winter track and quite a number of horses have been trained there.

Montesol, a son of McKinney, was driven a mile over the Alameda track one day this week in 2:26 by his owner, P. Foley, who says he never saw this track in such good shape as it is right now. Montesol is a well bred stallion, being out of Igo by Antevolo; second dam by Nutwood. He is a full brother to Lady Granard 2:23.

C. T. Chapin, the well known horseman of Rochester, is now driving the pacers Connor 2:03½ and Daniel 2:04½, to pole on the road and to sleigh. They are said to be able to fairly burn the road. Mr. Chapin is using the same wagon to which Direct Hal and Prince Direct set the wagon record for pacers at 2:05½ at Memphis last fall.

F. M. Camp, of Homeville, O., owns a two year old stud colt by John A. McKerron 2:05½ dam Henrietta G. 2:19½ by Elyria 2:25½, that expert horsemen pronounce one of the handiest and best made colts of his age that they have ever seen. He is the same color as his sire, very large for his age, and of exceptionally good conformation.

Waldstein, 12597, record 2:22½, still holds the world's five mile trotting record for stallions. His record for this distance is 13:05½ and was made at the old Oakland track October 22d, 1892, in a race. The purse was \$1000 and the horses that contended against him were Sunrise by Abbottsford, Langford by Mansfield Medium and Little Witch by Director.

The small horse or pony is becoming more popular than ever. He is safer than an automobile and can be handled by anyone. At the Menlo Stock Farm the Hackney Pony stallion Sir Gibbie 2d is in service this year at a fee of \$30. He is from a family that has been long noted for beauty of conformation combined with high spirited action, and is proving a sire of great merit. See advertisement.

Two Clydesdale stallions consigned by T. A. Nufer will be sold by Fred H. Chase & Co. the same night he sells the horses from Rancho del Valle. These stallions are both prize winners and were sired by that off-time prize winner, imp. Pollack. One is called Clyde Boy and is a seven year old; the other, Prince S., is a three year old. Both are horses of fine style and action and of good size.

Mr. T. C. Cabney, who recently took that grandly bred three year old colt Greco by McKinney to Eureka, will have about ten horses in training over the Eureka track by the first of March. There are colts and fillies by Ira, Waldstein and Gossip in his string. Some fifty or sixty horses will be worked at Eureka this spring and an increased interest is being manifested in harness horse breeding and training.

Boodle 2:12½ was in town this week. The son of Stranger stopped off at the Occidental Horse Exchange last Tuesday on his way home to San Jose from Portland, Oregon, where he has been sojourning for the past year. Boodle will doubtless be in the stud near San Jose this year. He was looking first rate after his sea voyage.

Mr. T. W. Barstow, of San Jose, has secured a lease of the track and fair grounds at that place and will put everything in shape for the accommodation of harness horsemen, who are invited to bring their horses there to train. Mr. Barstow is a practical horseman and owner of that coming great sire Nearest 2:22, own brother to John A. McKerron 2:05½ and sire of Alone 2:09½. Stall rent will be reasonable at San Jose and every trainer in California knows the track is one of the best in the State. It should become very popular under Mr. Barstow's management.

The greatest consignment of standard bred trotters ever offered at auction at the Occidental Horse Exchange will arrive there during the middle of March. It is from the Oakwood Park Stock Farm and consists of sons and daughters of McKinney 2:11½, Direct 2:05½, Owyhee 2:11, Chas. Derby 2:20, Steinway 2:25½ and James Madison 2:17½, out of the great mares that have made that farm famous. These horses are heavily engaged in stakes, are thoroughly broken single and double, and their ages run from three to five. Catalogues will be issued at once and will be sent on application to Wm. G. Layng, 246 Third street.

Rysdyk's Hambletonian, the fountain head of trotting speed in America, was truly a remarkable horse. Foaled in 1849, at the time of his death, in 1876, he had been bred to 1843 mares, and the result was 1287 foals. His stud fees amounted to \$185,715, a rich profit on an investment of \$125. His fee advanced from \$25 as a three year old to \$500 when he was seventeen years old, at which figure it remained until the time of his death. In 1865 he was bred to 193 mares and produced 128 foals. He was the sire of Dexter, grand sire of Goldsmith Maid, Jay-Eye-See, Maud S., Sunol and Nancy Hanks, great-grand sire of The Abbot, and great-great-grand sire of Cresceus.

George Fox, owner of the Mokelumne Stock Farm at Clements, Cal., has decided to dispose of all his standard bred horses at auction, with the exception of one stallion and five broodmares. There are on this farm about fifty head of horses, including colts and fillies by such sires as Silver Bow 2:16 (now at Ketcham Farm, the home of Cresceus 2:02½), Daedalion 2:11 and the grandly bred young horse Silver Fox that is by Silver Bow out of Kitty Fox by Pancoast. The date of the sale has not yet been fixed, but it will be held at Fred H. Chase & Co.'s salesyard and due notice will be given and catalogues issued. Mr. Fox has some of the grandest looking young horses in California and as they nearly all carry the highly prized McGregor blood, which has produced the greatest trotter that ever lived, they should be in demand.

Counting chickens before they are hatched is nothing compared to the business enterprise of J. L. Young, of Brantford, Ont., who bought the pacing stallion Hal B. 2:04½ at the Fasig-Tipton sale recently. In partnership with a neighbor he owned the pacer Star Hal, and, just before he left home to attend the sale, he visited the neighbor and asked him if he would go halves and buy Hal B. The neighbor did not feel like investing, and so Mr. Young offered to sell him the other half of Star Hal. In the dickering which followed Mr. Young agreed to take a mare in part payment for his half of Star Hal, providing his neighbor would breed two mares to Hal B. at \$50 apiece. The neighbor was agreeable and the trade was made. Still with an eye to business, Mr. Young booked four other mares to Hal B. before starting for New York. He arrived there on Tuesday, the first day of the sale, and immediately hunted up the agent for an express company and made arrangements to ship Hal B. to his Canadian home. He did not get a chance to buy the horse until Thursday evening, when he got him for \$2900. He says he would have gone as high as \$4000 for the pacer.

Alameda track is not to be swamped by the United States Government's dredger after all. Not this year, at any rate. The work of the contractors that are dredging the tidal canal will not interfere with the track at all this season. Secretary Gott, of the Alameda Driving Club, assisted by other members, has lately had a levee thrown up at the lower turn of the track to keep the tide water back, and horses are being worked over the track every day. Jack Groom has four horses that he is getting ready to begin fast work on later, among them a full sister to Jeffe 2:16½ that is showing up well. C. W. Welby has Yukon 2:14½ looking better than he ever did before, also the mare Alice Lee by Tennysonian. Grant Lapham works a few every day over the track, although he does not stable them there. Elias Williams has three or four he is working at Alameda. Among them is the stallion Secretary, now owned by P. W. Bellingall. Mr. Bellingall drove Secretary a quarter in 34 seconds the other day and the son of Director has not been in the shape he now is for years. His produce are almost universally fast, although the majority are not owned by persons who will permit them to be trained. Mr. Bellingall is confident he could give Secretary a standard trotting record this year and probably mark him below 2:20. He was the fastest two year old Director ever sired and but for an injury to one of his ankles would have had a mark below 2:10.

Three sons of Prince Airlie 28045, son of Guy W. are offered for sale by Mr. P. A. McEvoy, of Park. Their description and breeding will be in our advertising columns. Prince Airlie was Chantilly, a great broodmare by Nutwood.

### Against the Dash System.

Add the time, of course, the animal will be the butt of the abuse and probably slanders of opposing stallions. The owner must combat this as best he can and he will probably find that he can do more by not allowing any other horses than his in any other way. It is perhaps the occasion to bind the opposition to him and to use these stallions as a seraglio. Nothing is gained at the game of vilifying the other stallions.

### Shorter Races for Futurity Events.

It would seem as though the three-heat race system, which A. J. Welch will apply at the Charter Oak and Ohio purses this year, would be an ideal system for the futurity events for two and three year olds. Two year olds in the big futurities must beat 2:20 by quite a margin in the futurity events, and 2:15 is not an unusual record for a trotter of that age to score. Three year olds must beat 2:12, and three heats below 2:12 with perhaps one or two more in better than 2:15 is likely to be the stunt demanded of a winner of one of the big three year old futurities. That a race of this kind is an extraordinary tax on an immature colt or filly cannot be doubted, and it is probably true that more than one great young racing prospect has been ruined while winning, or trying to win, a split-heat three-in-five race of this kind. It goes without saying that a race which would end with the third heat would be far less liable to injure the youngsters taking part in it, and with such a system in force it is extremely likely that in any of the big futurities more of the entries would make the final payment and start in the race. Some people have been known to assert that as long as a youngster could win a big futurity it made no difference whether he was ever able to race again or not, as that one race would make him a profitable investment for his owner. It should be remembered, however, that no matter how large the field that starts in a futurity, only one can win, and the second and third youngsters as well as the winner are very liable to be ruined by the tremendous efforts to get the large part of the big purse. Then, too, if by any method an owner could be certain that his colt could win one or more futurities without taking more than an ordinary chance of ending his racing career, would it not be well to insist, or at least favor the adoption of such a method? This being so, let the horsemen declare in favor of Mr. Welch's three heat racing plan for the futurity events.—*Horse World*.

### Birthplaces of 2:07 or Better Trotters.

There are 22 trotters with records of 2:07 or better, headed by Cresceus 2:02½, followed by The Abbot 2:03½, Alix 2:03½, and Nancy Hanks 2:04. Kentucky as the birthplace of 2:07 or better trotters leads off with eight, headed by Nancy Hanks 2:04 by Happy Medium, dam Nancy Lee by Dictator, followed by Bingen 2:06½ by May King, dam Young Miss by Young Jim; Susie J. 2:06½ by Jay Hawker, dam Millionaire by Norwood; Tommy Britton 2:06½ by Liberty Bell, dam Keepsake by Hancock; Beuzetta 2:06½ by Onward, dam Beular by Harold; Ralph Wilkes 2:06½ by Red Wilkes, dam Mary Mays by Mambrino Patchen, Boralma 2:07 by Boreal, dam Earalma by Earl, and Charley Herr 2:07 by Alfred G., dam Bessie Huntington by Happy Traveler. California has produced four, namely, Azote 2:04½ by Whips, dam Josie by Hambletonian 7:5. Directum 2:05½ by Director, dam Stemwinder by Venture; John A. McKerron 2:05½ by Nutwood Wilkes, dam Ingar by Director, and Dolly Dillon 2:07 by Sidney Dillon, dam Dolly by Electioneer. New York is the birthplace of The Abbot 2:03½ by Chimes, dam Nettle by Mambrino King; Major Delmar 2:05½ by Delmar, dam Expectation by Autograph; Lord Derby 2:05½ by Mambrino King, dam Claribel by Hamlin's Almont; The Monk 2:05½ by Chimes, dam Goldfinch by Mambrino King; Fantasy 2:06 by Chimes, dam Homora by Almonarch, and Lucille 2:07 by Brummell, dam Fanny K. by Major Benton. Illinois produced one in Chain Shot 2:06½ by Red Heart, dam Pique by Kentucky Wilkes. Iowa produced one in Alix 2:03½ by Patronage, dam Atlanta by Attorney. From Ohio comes Cresceus 2:02½ by Robert McGregor, dam Mabel by Mambrino Howard, and from Washington comes Anzella 2:06½ by Antrim, dam Hazel Kirke by Alwood.

I am opposed to the substitution of the dash for the three-in-five system of racing trotters. To me it seems a heresy, with some good men behind it, but mostly backed by those who play the races and want quick action, and who do not care for the stoutness and gameness which have made a distinctive type of the American trotter.

For a hundred years the breeders of runners have sacrificed everything to extreme speed, just as the breeders of bird dogs have done. What is the result? It takes a field full of thoroughbred colts now to get one consistent race horse that can go a long dash or repeat mile heats. Less than ten out of every hundred ever face a starter with credit. The other ninety are a lot of dickey-legged weeds, with nothing but pedigrees. They cannot carry weight enough to be hunters or saddlers. Thus, there is a great loss and waste in breeding the "aristocrats of the animal kingdom." In the case of runners, this is not so very important to the general public, because its members as a rule do not deal in this class of horses. They have come to be a mere incident to gambling, and there are comparatively few gamblers; but, when you come to trotters, the rule is the other way. To be sure, 90 per cent of them do not face a starter; but it is of the highest importance that those that do and those that do not should not only be able to go fast but far, and the dash system, if it comes into general use, will do away with this last qualification, to a considerable extent at least.

A trotter that cannot go the necessary number of mile heats to be a creditable performer in a three-in-five contest is neither a good race horse nor a good road horse. Where is there a race or road driver who, everything else being equal would exchange a horse that can trot a mile in 2:10 for one that can go but a single dash of a quarter in 28 seconds, or a half in one minute, or one that can go a single mile in 2:05 for one that can go several miles in an average of 2:10?

Then again how often it happens that in a big field of starters the best horse in the race draws say fifteenth position and starts in the second or third tier on the outside, and thus is handicapped at the start as compared with an inferior horse who draws the pole. If it is but a single dash, the pole horse is likely to win, and it is not a fair contest. How often it happens under these circumstances that the horse that starts with the handicap is blocked so that he cannot get through the first heat, or even the second, even though he has the speed to win. If it is a heat race he will generally manage to get a position by the end of the second heat, so that he can win the third or some subsequent heat and the race, but if it is a dash race, he is a loser.

I do not wonder that those who play the races favor the dash system. It gives them quick action. But this is unimportant in comparison with the reasons against it.

Under the three-in-five system, the United States has furnished a distinct type of horses, called the American trotter, noted for their good looks, good disposition, fine action, and their ability to go fast and far at the trot. The balance of the world are sending here to get the seed, as much because they are staunch road horses as because they are race horses. Don't do anything that will eliminate any one of these characteristics, especially that of being able to stay, come back again and stay.—*C. E. Wheeler in Spirit of the West.*

### Molasses for Horses.

The New York *Tribune* a few days ago published the fact that about 5000 horses in Brooklyn were being fed on molasses, and in a very elaborate article set forth the method of feeding the saccharine material, the quantity and the results. The *Tribune* pronounces this an "interesting and surprising" fact. It must have been so, as it was given a conspicuous place on the first page. The practice of giving cattle—horses included—molasses in their food is not by any means new. It was commenced in Great Britain after the abolition of the sugar duties thirty-three years ago. Horses thrive remarkably well on molasses. It has a great influence in laying on fat, and is a powerful addition to both cattle and horse feed. It has been used with good results for getting horses into good condition for sale and also for wintering colts in the yard. In rearing colts there is a risk of their suffering from stoppage of the bowels if fed entirely on dry food, and to avoid this many farmers and breeders give molasses. The way is to dilute the molasses and pour it over the food, taking care that it is well mixed. To induce horses that are a little off their feed, or to cause them to eat food they otherwise reject, sugar or molasses may be very useful. A horse has a great fondness for sweets. This natural taste has often been the means of conquering intractable and vicious animals.—*Exchange.*

## THOROUGHBRED DEPARTMENT.

In the realms of jockeyship "the father question" seems to be the topic of the hour. It has been made so at this time by the action of Jockey Redfern's father at New Orleans recently in making charges against a stable for which his boy had ridden. It may be true that the boy is father to the man, but it scarcely can be said that the father is the creator of the jockey. In the prominent cases known to the turf of the last decade the father, when intimately associated with his boy, seems to have been a handicap rather than a help, and never so conspicuously so as when the boy began to attain greatness. Winnie O'Connor's father always kept a pretty close eye on him, and Maher's father always was watchful of the interests of his boy, but in neither of these cases was there any conspicuous instance of the father having interfered in any way between the boy and his employer, or of his making charges of any kind. This also was so in the case of Lyne, although Lyne's father always intrusted the complete guardianship of his boy to the employer and thus saved himself much trouble and may have contributed something to the lad's success. In jockeyship an over-anxious parent is a handicap that a boy never may be able to overcome, and certainly a handicap that is a source of indefinite trouble to the owner or trainer employing the boy.

The "father question" presents a problem which The Jockey Club will have to do with sooner or later, and which in one case last year it took summary action. Of course, it is only natural that the father should be anxious about his boy, that he should seek to conserve his welfare and that he should endeavor to his utmost to guard him against accidents and to enhance his reputation. But there is a point beyond which the father may not go. This point he not only reaches but passes when he assumes to give orders contrary to those which the boy has received from the owner or trainer employing him, and from whom he receives a large salary for his services. The parent also oversteps his privileges when he assumes that he has the right to criticize any riding orders that may be given his boy. That is a privilege which is reserved exclusively for the trainer and the owner of the stable, and with which he has not and cannot have concern of any kind. If there be anything wrong about such orders the stewards of the meeting are the men to investigate them and to deal with them. Nor has the father of a jockey any more or any better right to bring charges about the riding or running of any race in which his boy may have ridden than has the smallest bettor at the course. In this connection it would be well for fathers of jockeys, budding or otherwise, to remember that the stewards have full and complete power to deal with the man who prefers charges that have nothing stronger than suspicion to support them, and that, in fact, are groundless. A recollection of this fact possibly might act as a restraint upon some over-zealous fathers, and could do no injury to the turf. When a man makes a charge of fraud he should be prepared to support it or take the consequences.

It is related in a story from New Orleans that the stewards of the Crescent City Jockey Club once deemed it necessary to deny the privileges of the paddock to Jockey Odom's father. It was a matter of common report last fall that the stewards of the Westchester Racing Association denied similar privileges to the father of Jockey Cochran. In each case it was alleged that the father's anxiety for the boy's welfare was a detriment to the boy's employer and interfered with his services to such an extent as to make them well-nigh valueless. In favor of these fathers it should be remembered that in addition to their natural affection they found in their boys their greatest asset—a constantly growing and increasing fortune. In Odom's case the natural care and affection existing between father and son was enhanced by an accident to the boy which happened at the Brighton Beach course in the season of 1900. Odom, then regarded as the best lightweight in the country, had a bad fall and for a long time his life was despaired of. He came around all right, but for more than a year afterwards his excessive timidity proved such a great handicap as to make him practically worthless. Indeed, so pronounced was this timidity at one time that Mr. Clarence H. Mackay, to whom he was under contract, and who was paying him a big salary, deemed it advisable to stand him on the ground and put another boy up in his stead. Last season, however, Odom returned to the turf with all his original courage and rode with a degree of skill and judgment that was not excelled by that of any other boy in the saddle. He passed into winter quarters at the close of the racing season of 1902 with the reputation of being one of the best

boys that the American turf could boast of. In this section of the country it never was alleged that Odom's father ever interfered with him, the boy's timidity being charged against his fall at Brighton, but at that time there were those who believed that but for the great anxiety shown by his father, natural though it was, he would have returned to his best form much earlier.

Cochran's case is of much more recent date. Although there was some difficulty between the boy's father and John E. Madden, the manager of the stable of Hon. W. C. Whitney, by whom Cochran was employed, the facts did not leak out until the Bennings meeting and then came in the shape of an outburst from the boy's father, who alleged all sorts of things. The case, however, already has been passed upon by the stewards of the Westchester meeting, who not only had denied the privileges of the paddock to the elder Cochran, but had censured him as well. The sequel to the Bennings outburst was a complete retraction of the charges made by the elder Cochran. From that time to this nothing further has been heard of the case, and it may be accepted as a fact that it is a closed incident.

The "father question" in jockeyship now is revived by the Redfern incident in New Orleans, and it is not improbable that it will receive the consideration of the stewards of The Jockey Club before the opening of another racing season. Whether this consideration will result in a rule forbidding anybody but a boy's employer from having anything to do with him during racing hours, or in an unwritten law to the same effect, it would seem that some action of this kind must be taken to avoid a growing and ever-increasing danger of scandal. When the racing day begins the employer of a jockey should have complete and absolute control of him, and that control of him he should retain until after the running of the last race. Many horsemen go further. They contend that when a jockey is under contract for the season he should be the property of the owner holding the contract as absolutely and as completely as is any of the horses in his stable. In England, where jockeyship lines are drawn much more strictly, this would not seem to be much of a hardship, and the American jockey of necessity soon would learn to adapt himself to the custom. Then the "father question" would be eliminated.—John Boden in *Daily America*.

H. E. Hickey writes the BREEDER AND SPORTSMAN from Little Rock, Arkansas, as follows: Barney Schreiber, the prominent Missouri bookmaker and breeder who has a string of twenty of his horses at Clinton Park, will make a strong bid for some of the principal stakes and derbies in the west, next summer. He has entries in all of the events at Memphis, St. Louis, Chicago and the local track. Gehimeiness, that good filly by imp. Sain, is well entered in all of the prominent events, but it is not likely that she will start before the season is well advanced, for she has been on the shelf for several days. Her condition last week was alarming and trainer Brandt sent to New Orleans for Dr. Rexford, one of the most successful vets in the South, to come and attend the horse, which is now out of danger and is able to be out for exercise.

Like a number of other big stables in this country, this one is without a jockey. Booker, who was a fair sort of a boy before he was set down last summer, has been working the horses and helping Brandt about the stable. Last week word was received from the secretary of the Western Jockey Club not to employ or either harbor the boy. Mr. Schreiber has placed another foreign bred sire in his stud at Bridgeton, Mo., this one Sir Hercules he recently purchased from Edward Corrigan. At Woodland Farm he now has a quartet of the best sires in the land namely, imp. Sain, Balgown, Bannockburn and the new acquisition.

Mr. Tom Stevens, who has been spending the winter at Hot Springs while his horses are at Little Rock, has arrived here and will start at once to train them for the rich purses in which they are entered; he, like Mr. Schreiber, has lavishly entered his horses in the western events. The Wheeler Handicap and the other stakes at Lakeside have horses named from this stable while in the Memphis as well as Little Rock events can be seen the names of this stable. The younger division of this stable is as fine a crop as there is anywhere, and a majority of them are by Mr. Stevens' noted sire, Wadsworth. Names have just been given to them and one of the features is that they are not a lot of unpromising words, but are easy and simple. One he calls Walnut Hill after his farm. This animal is the most thought of in the stable and has shown signs of being very fast, so Mr. Stevens has taken this as an opportunity of making the farm famous.

Col. S. M. Apperson, the prominent racing official of this city, has just returned from Philadelphia, where he attended the recent meeting of the United States

Assay Commission, being appointed a member of this body by the president some time ago. The duty of the commission is to meet in Philadelphia and pass upon the fineness of coins submitted by the different mints in the United States. The body will meet at different times during the year but the sessions will only last a few days at a time, this will give Mr. Apperson an opportunity to fill his engagements in the stand at Memphis, Nashville, Worth and Washington Park.

Brigadier, which hung up a mile record at Sheepshead Bay two years ago, and which drifted west last year, is having a variegated career. A short time ago he was on the hospital list and in such a bad way that in order to relieve him of his misery it was decided to shoot him. Just when all hope of saving him had been given up, however, he began to mend, and now he is in such good condition that it has been decided to ship him East and prepare him for a campaign on the New York tracks. Brigadier is by Rayon d'Or-St. Bridget, and was bred by August Belmont. As a two year old and again as a three year old he gave evidence of possessing the very highest class, but in the spring of his four year old career he suffered from an affection of the lungs, which left its mark in the shape of impaired wind. He had hung up a record, but his days of usefulness in the Belmont stable were over, and he was sold to H. C. Schulz, who brought him west and won a small fortune with him. Brigadier, it is said, now is as good as he ever was when at his best, and when at his best he was a stake horse.

Barney Shreiber's new purchase, the stallion Sir Hercules, purchased from Ed. Corrigan, has joined imp. Sain, Foul Shot and the other sires at Woodlands. By Sir Hugo out of a Galopin mare, the horse won four good stakes in England year before last as a five year old. Last season the horse was lame off and on and did not go to a race. Those that have seen the horse pronounce him a grand individual and the genial Tecton, his owner, has the best wishes of all hands for his success. Goodwood and Woodlands in the charming Florissant Valley are two of Missouri's most representative breeding farms.

Willie Shaw is unquestionably the best rider now engaged here. He uses great judgment in placing his horses during the race and takes advantage of the manner in which the race is run. This, together with ability to leave the gate without delay added to strong finishing powers, will easily land him at the head of the list of winning jockeys before the close of the season.

James Neil has acquired possession of Golden Light, having claimed him out of a selling race on Monday last. Ben McDhui also was bid up \$300 above his entered selling price of \$500.

When Ed Corrigan first saw Winkfield in the paddock at New Orleans, last week he said: "See here, now, my young man, I don't want any 'anxious moments' for mine. Isaac Murphy used to do that to me, but the only resemblance you bear to Isaac Murphy is in color. When you've got a horse of mine under you that can win by a couple of lengths I don't want you to stop to think about it at the head of the stretch."

Like all good things, Jackson's Napa Soda has a dozen counterfeits.

### GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and  
positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diptheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sent on receipt of price by express, charges paid, or by mail, if sent by mail, sent for convenience. H. Gombault, Proprietor, THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

system, or with any form of magazine trap, are the following:

**RULE I.** Section 1.—The trap shall be set in a pit properly screened and the shooting scores laid out in a segment of a circle with a radius of 16 yards. The scores (or pegs) shall be 3 or 5 yards apart, and numbered from No. 1 on the left to No. 5 on the right.

Section 2.—Where three traps are arranged, they shall be placed one yard and a half apart behind a suitable screen. Under the *Sergeant system* no shooter should know which trap is to be pulled for him.

**RULE II.**—The trap or traps shall be set to throw targets a distance of not less than 40 yards or more than 60 yards, so that the elevation of the target in its flight at a distance of 10 yards from the traps shall not be less than 6 feet nor more than 12 feet from the ground.

**RULE III.**—If for any reason, after the trap or traps have been properly adjusted, the target should not fly the proper height or distance, it shall be considered a fair target—provided it flies high enough and far enough, in the opinion of the referee, to offer a fair shot to the contestant.

**RULE IV.**—To insure targets being thrown the same distance, three or more pegs should be placed in a semi-circle in front of the trap or traps, at a distance of 50 yards therefrom. If, in the opinion of the referee, the targets are being thrown more than 10 yards beyond or more than 10 yards short of these pegs, the referee shall instruct the trapper to be more careful.

**RULE V.**—In rapid-firing shooting, squads of five men may be formed. Contestants may shoot in rotation, from one to five, and each one may shoot at two targets in a 10, 3 in a 15, 4 in a 20 and 5 in a 25 target event, and then all shall move up one position. In this way each contestant shall shoot at an equal number of targets from each of the different positions.

(Other points are covered by the general rules on target shooting.)

A movement is on foot to organize the Pacific Coast Trap Shooting Association. It was proposed to make the new organization the successor of the California Inanimate Target Association. Membership is to be composed of individual shooters. A constitution and by-laws have been submitted and the preliminary details of organization arranged. It is hardly probable however that anything further will be transacted on these lines until next year, the projectors of the new association deeming that in the light of local contemplated trap shooting tournaments it would be advisable to remain temporarily in abeyance.

The Millwood Gun Club will hold their initial blue rock club shoot and chicken dinner on the well fitted up club grounds at Manzanita Station, Marin county, on Sunday, March 29th, holding each of the five monthly club shoots following on the last Sunday of each month. The regular club event will be a 25 bird shoot. In this event an elegant and valuable medal, donated by the veteran sportsman and expert shooter, John K. Orr, will be contested for. The winners of the medal for each monthly shoot will hold a final contest for the medal at the last club shoot of the season. The high average gun each month will win the beautiful high average button donated by M. O. Feudner; the high average gun of the season will win permanent ownership of the trophy.

The Union Gun Club will shoot on the third Sunday of each month at Ingleside. The club season will consist of seven monthly shoots. The annual election of officers will take place on March 11th.

Harvey McMurchy is due in this city, returning from his Eastern trip, on Monday next.

The Empire and Golden Gate Gun Clubs have not yet announced the program for this year. When these two clubs fall into line the local trap shooting season for 1903 promises to be a lively one.

Insectivorous and song birds are protected in Ohio by statute. Recently a deputy game warden raided stores of several millinery firms and seized the stocks of plumage of birds which were protected by statute. Three of the milliners pleaded guilty to violating the law and were fined \$25—the minimum penalty of the law—and costs. About a half dozen other cases were also made out against several other delinquents. In these latter cases, it was understood that the prosecuted parties would appear in court, acknowledge the validity of the law, pay the minimum fine, and discontinue traffic in the plumage of birds protected by statute in Ohio.

The movement for the protection of song and insectivorous birds is steadily gaining adherents and strength. The Millinery Merchants' Protective Association of New York, it is claimed, have issued circular letters, advising milliners all over the country not to sell or offer for sale the plumage of American birds which state laws protect. The circulars list the foreign and domestic game and tame birds which may be sold, and advises dealing only in those varieties. This in itself is quite a gain. The commercial interests that have combated attempted Federal and state legislation is powerful and has been potent in preventing the adoption of some good laws. The action of the association mentioned foreshadows the final breakdown of commercial and sordid opposition to necessary legislative measures intended for the benefit of the commonwealth. Following the passage and adoption of general laws will come public education as to the value of the birds and enlightenment against cruel, wanton and unneeded destruction of feathered creatures, harmless in their habits and unfitted, or of only paltry value as a game supply as well as insignificant in the eyes of the sportsman.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

## An Indian Hunter's Stratagem Over a White Trapper.

Lake county, Oregon, has long possessed two inhabitants, each being an interesting character in his way. One is Indian John, the hunter, and the other is William Hammersley, the trapper.

Indian John has had his tepee pitched at the mouth of a canyon near Lakeview for many years, and Hammersley, the trapper, was born near Lakeview, and has spent his life thus far in trapping on the Oregon desert.

Indian John lives and supports one or more squaws and a number of children with his rifle. He owns a small cayuse pony, and when his larder begins to run low he will start out at break of day mounted, supplied with provisions and armed and equipped for a hunt. The deer and antelope have been driven back from point to point by the march of civilization, but Indian John keeps tab on them and they never find a field so obscure that he does not immediately locate them.

He may be absent two days, a week or even longer, but when Indian John returns he always brings with him one or more deer or antelope strapped on his cayuse. He trades the hides and enough of the meat for bread and other things to make up his menu and remains in his tepee until they are exhausted.

While Hammersley is known as the trapper of that section of country, he also has the reputation of being a hunter. He has spent his life on the desert and knows every nook and corner of the country. For many years he has left Lakeview in the early fall with his traps and supplies and returns in the early spring with loads of valuable furs. He makes coyotes, marten and wildcats a specialty, though a cougar or mountain lion occasionally falls his victim. He markets his furs in San Francisco and New York and makes a fairly good living at the vocation.

Hammersley is also a noted marksman, and many a deer and antelope have fallen before his unerring aim. In fact, upon an average, Hammersley killed more of this kind of game than did Indian John. John only killed when he had to keep the wolf from the door, while Hammersley killed whenever the opportunity presented itself, and he sometimes went out of his way to get the opportunity.

Indian John looked upon Hammersley's work with silence until the people of Lakeview began to nag him about the trapper's superior ability as a hunter. John could not endure this, so upon the return of the trapper one day with his buckboard loaded with furs and deer and antelope, the Indian approached him and said: "You kill some heap deer and antelope. I can beat you kill 'em."

This challenge was too much for Hammersley, and under the encouragement of friends he accepted the challenge and he and Indian John left a few days later for the desert, agreeing to hunt together, so that neither would have advantage of locality. They went in Hammersley's buckboard and camped out at night together, each entertaining a good fellowship for the other, and it is said that until late at night they swapped stories of their wonderful exploits, and each has had enough adventures to fill a book.

They reached the hunting ground late at night and struck camp. They went to bed early that night so as to get an early start, as next day would settle the honor of superiority. They started out at break of day on foot, the Indian as light in his moccasins as a coyote, while the sturdy young trapper made up in strength for what he lacked in activity. It was nearly noon before they struck a trail, and after following it for a long distance they saw two deer browsing in a canyon a half a mile away. To approach the deer through the canyon was an impossibility, towering perpendicular rimrocks bordered the canyon on either side, and a rough, mountainous country laid behind the rimrocks.

The two experienced men looked at the deer for a moment, each trying to devise a plan of reaching them. Finally the Indian told the trapper that he would climb out among the rimrocks beyond the deer and that should he not get a shot they would run out by the trapper and the latter could "kill 'em." This suited the trapper, as he concluded from the sharp peaks bordering the point at which the deer were browsing that the Indian would never get close enough to shoot them, as Indians are poorer shots than white men, and make up for this defect by always getting at closer range.

The trapper selected a place behind the rocks at the mouth of the canyon where he could observe the game and be prepared for the deer as they came out. Indian John mounted the precipitous rim-rocks like a cat, and soon disappeared among the rugged peaks. An hour passed, two hours, the sun getting low when the trapper, so remarkably patient, became restless. The deer had browsed farther down the canyon and, he noticed, were getting restless as if they were about to leave in the opposite direction. What had become of the Indian? He could have gone beyond them a dozen times since he left the trapper. Hammersley wondered if the Indian had become lost.

He decided to attempt to approach the deer by stealth along the bed of the canyon and had risen to start, when he heard a distant crack of a rifle. He looked immediately toward the deer and saw one had dropped to the ground. The other ran back and forth a few minutes in bewilderment and then there was another rifle shot and this one fell to the ground. The trapper then started down the canyon with true hunter's pride in congratulating his opponent. When he had reached within a few hundred yards of the place he heard a signal, and looking up saw Indian John crouching behind a boulder overlooking the spot where the deer lay.

The Indian signaled him to keep in hiding, and

thinking there were other deer, he obeyed. After another hour cramped behind the rocks until the chill of the approaching night had penetrated every portion of his body, he was glad to hear the signal of the Indian again, who beckoned him to come on.

"Were there other deer, John?" he inquired.

"No, only two; me kill 'em both."

"Why did you want me to wait after you had killed them?" inquired the trapper.

"Oh, that's Indian way. Shoot deer down and rush to him like white man, he may not be dead and jump up and get away. Indian give him time to die, and if he go to get up, Indian shoot him again."

They returned to camp that night and dressed their game according to the Indian's taste and spent two more days in the country without seeing any other game. They returned home with the Indian the acknowledged champion.

It afterwards developed that there were but two deer in that entire section of country and that Indian John was aware of it when he selected the place, and knew where the deer were in the habit of browsing.—*Lakeview Examiner.*

## DOINGS IN DOGDOM.

The Buffalo Kennel Club has decided upon Mr. H. W. Lacy as the all round judge, Mr. W. Fraser, of Toronto, will judge Fox and Scotch Terriers and probably Mr. John Davidson English Setters. The Airedale classification has been increased. Coming after Chicago the Eastern handlers will be able to take in, what promises to be a good show, on the way home.

Affairs go on merrily in Collie lines. O. J. Albee writes us: "Things are pretty lively these days at Oak Grove, thirteen puppies sold and shipped this month. Two go away this week to Oroville and three youngsters go to one party on the 24th inst. I have just received a young bitch, by Ch. Wellsbourne Conqueror, from an Eastern breeder. Queen's Bounty has been sent East to be bred to Ellwyn Astrologer.

The St. Bernard Le King is now in the stud at Nairo Kennels, Mr. Dorian having purchased him this week from Phil G. Meyer.

S. Christenson had the misfortune to lose his good Boston bitch, Coronado Lithia, last Monday, while she was whelping a litter of puppies.

Retrievers are essentially the dog in this State for duck hunting. This breed, however, has not received the attention of sportsmen that it merits. We are pleased to announce that owners of Retriever bitches can get the service of a good dog. See classified "ads" on page 15.

An Oakland subscriber is desirous of procuring a Deerhound or two and expresses his predilection for a dog having the following qualities:

"When still hunting for deer a very useful dog is the one that, when a buck is wounded, will follow the trail or scent of blood and not leave it for any other scent, and assist in finding the animal if dead, and if alive will not chase him fiercely along, running him off. The deer when wounded, if not driven, will not go far. If the dog, under good control, can find him by following directly the blood trail, another shot can usually be made."

We are in receipt of the pleasing information that Mr. Norman J. Stewart will return to California this coming summer with the intention of residing here permanently.

Gabilan Kennels recently purchased from Mr. George C. Thomas, Jr., of Philadelphia, the English Setter bitch Nellie Byers. She is by Donald Bane (Dick Bondhu-Western Belle) out of Gladstone Jess (Dan Gladstone-Bessie Pearl). Nellie is a handsome blue belton and has the following bench and field trial record: Second in the North American Derby 1900, first novice, second limit, first field trial class, Chicago, 1902, and first field trial class New York, 1903. In a report of the W. K. C. show the mention is made, "Nellie Byers, a clever bitch, was at the head of the field trial division, with Sport's Solomon second; Albert's Patch, third."

## Kennel Suggestions.

It is sometimes awkward work carrying a dog through the streets or on the cars, especially a young dog, and any handy contrivance that will do away with the "mussing" of one's clothes, will be appreciated. Any ordinary market basket with a lid and the double handles will answer the purpose. Cut a hole at one end of the lid large enough for the dog's head and neck to come through, bind the edges with some material that will prevent them fraying the dog's neck, shut down the lid and you have a carry-all that will save a lot of bother where it is impossible or inconvenient to lead the dog with a chain. The basket need not be so large as the dog, as only about two-thirds of the animal is enclosed. A good idea for pet dogs, such as Yorkshires and Toy Spaniels, is a cloth or linen bag, the usual lawyer's bag is just the thing; put the legs and body of the dog in the bag, leaving outside the head, then draw the cords and close the mouth of the bag around the dog's neck. One could carry two or three dogs at once in this fashion. We believe baskets are being made similar to the one indicated above, but anyone with a little gumption rig one up and it will repay the trouble. Of these are the traveling bags, the "Glad's" wire side and leather flap to pull over it, but

Concerning the Ram.

It has been said that the ram is half the flock, and no doubt there is a solid grain of truth in the assertion. To have standing at the head of the flock a mongrel-looking creature, half-bred and half-fed, not only means that a sheepman is not up to his job, but that the progeny, if there are any, will be stunted, poor and unprofitable.

One thing is established in the science of breeding, that a debilitated progenitor will not beget vigorous offspring. How largely the ancestral vigor affects the measure of vitality, and hence the value of offspring, is not fully realized by breeders of live stock generally.

Physicians are aware of the large degree in which the ills of one generation are predetermined by the gross habits of ancestral generations. Breeding for the greatest possible speed in the horse genus has impressed upon the students of this art a realization of the intimate relations existing between all members of the body. One of them cannot be diseased or weakened through lack of nourishment without affecting the whole organism, even the organs and germ of procreation.

There is little doubt that the great improvement made in breeds of live stock is due to better nourishment as well as to selection in breeding. It is well known that any improved breed that is allowed to fare poorly for a few generations deteriorates. The English mutton breeds exported to foreign countries and bred under less favorable conditions lose that prize-winning character which we see when they leave British shores. Flocks that are poorly fed lose wool from the face and legs. The features of our domestic animals that have been acquired through the assistance of man—in other words, man manufactured—are less fixed in their original character of the breeds, hence most easily lost.

Lack of sustenance and change of surroundings are not the only influences that destroy the improved characters. Over-taxing the strength of any function of the body leads to the same results. A female kept raising offsprings to an excessive extent will be found to produce inferior animals after the decline in her vigor. A male employed to excess begets less vigorous progeny in the latter period of his service.

High prices for sheep stimulated improvement of the breeds in more ways than one. There was a direct compensation for the time spent with them. A man could afford to manage a ram in service as a stallion is handled. The care in coupling thus insured, together with the saving in the vitality of the ram, had much to do with the rapid improvement made during the flourishing years of the industry.

In very rare cases, now, can it prove profitable to those who conduct breeding; but the ram, for the sake of the offspring, as well as for himself, should be shielded from excessive service. His greatest abuse will be with the first few ewes that receive him. A good plan to obviate it is to watch him when first placed with his flock and either remove him after he has served the ewes then in heat, or remove the ewes from the flock. Where convenient, it is advisable to leave the ram with the flock only a few hours each day, as he will oftentimes neglect to eat if allowed to remain with them all the time, and this should be guarded against.

When this plan seems impossible, place fewer ewes with each ram, then go once a day and feed him with grain. A mixture of grains, including oats, should be given. Some care will have to be exercised at first not to overfeed, if he has not been accustomed to eating grain, but it can be gradually increased until he is eating one pound or more, according to his size.

No definite number of ewes is to be assigned to a ram. Rams differ so greatly in ability that judgment must be used. Study well the constitutional vigor and the age of the ram. I doubt whether it is

advisable to use a ram-lamb, although a strong, six months old ram will serve. When a ram-lamb is used, it usually checks its growth and future usefulness.—*Am. Sheep Breeder.*

Cream should be well stirred twice daily. It will ripen more evenly and prevents white specks showing in the butter.

\$100 Reward

For long years we have offered to pay this amount for any case of Lameness, Curb, Splint, Contracted Cord, Colic, Distemper, etc., which cannot be cured by

Tuttle's Elixir

We have never been obliged to pay the reward for obvious reasons. It's infallible in all cases of Thrush, Cracked and Grease Keel and all forms of Lameness. Tuttle's American Condition Powders—a specific for impure blood and all diseases arising therefrom. Tones up and invigorates the entire system.

Tuttle's Family Elixir is unequalled as a remedy in the home. We send a sample free for 6c in stamps, merely to pay postage. Send at once for our 100-page book "Veterinary Experience," which we mail free.

Tuttle's Elixir Co., 437 O'Farrell St., San Francisco, Cal. Beware of so-called Elixirs—none genuine but Tuttle's. Avoid all blisters; they offer only temporary relief, if any.

Limonero=3=2:15 3=4.

Reg. No. 33389

(A Great Sire of Beauty and Early Speed.)

LIMONERO 2:15 1/2, bred at the Palo Alto Stock Farm, is conceded by all who have seen him to be one of the best stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and individuality ranks with any of them. He has 35 two and three year olds that have never been trained. All of them are handsome, big bays and browns. From their appearance and the predictions of the best judges many of them are sure to be good race horses with every prospect of some star performers. A number of these youngsters are to be seen at the Los Angeles track.

LIMONERO 2:15 1/2 got his record as a three-year old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating a field of six of the greatest three-year-olds of that year, including the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity.

LIMONERO 2:15 1/2 will make the season of 1903 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$50, for a Limited Number of Good Mares.

Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

**HARRISON G. ARMS, Owner.**

## Poultry Experiments.

The Cornell Experiment Station of New York at Ithaca took the investigation of some of the egg production experiments last winter.

The experiments began on December 1st and continued seventeen weeks to March 29th.

There were 2123 hens and pullets included in the experiments.

The intention was to determine the food cost of eggs during the winter months.

The results are figured on the basis of each hundred hens so as to make them plainer.

The average of one hundred hens in seventeen weeks lay 22½ dozen of eggs, at a cost of 16½ cents per dozen.

The average cost of food was 32½ cents per each 100 fowls, and the seventeen-weeks' profit on each 100 fowls was \$23.92.

According to this, the average earnings of 100 hens for an entire year would be \$72.80; but as the hardest time of year was taken for the experiment, it is safe to say that 100 hens in New York State will pay the farmer cash for all food consumed and a profit besides of \$100 per year.

Although considerable differences existed in profits of different lots, it was not a breed test.

Although the average of eggs laid by each 100 hens was 22.5 dozen, they varied from 9.3 dozen to 36.1 dozen.

The food cost of eggs ranged from 8.7 cents to 33.9 cents per dozen.

The profits ranged from \$1.80 to \$62.10

per 100 hens for the period of seventeen weeks.

The hens that laid the most eggs produced them at the least cost per dozen.

Those which lay the most eggs did not cost so much to feed.

The lot of pullets laying 36.1 dozen eggs cost the same to feed as a lot of hens that lay but 9.3 dozen eggs.

In the results the pullets outlay the hens, outranking them in profits, in some cases six and seven to one.

A lot of White Leghorn hens made a total profit of \$8.88 for the 100 hens in seventeen weeks. Three lots of White Leghorn pullets made profits amounting to \$38.77, \$43.98 and \$62.10.

The entire experiment was in favor of early hatched pullets.

Strike!—if they don't give you Jackson's Napa Soda.

## A CHANCE TO GET GOOD ONES

At FRED H. CHASE & CO.'S Salesyard, 1732 Market Street, San Francisco, during the second week in March.

THIRTY HEAD of High Class Road and Business Horses, consigned by Geo. A. Davis, Rancho del Valle, Pleasanton, Cal.

These horses are from 5 to 8 years old and are by such stallions as Direct 2:05 1/4, Poscora Hayward, Ione Boy and others, and are out of well-bred mares. They are broke single and double, are gentle for anyone to drive, and are all solid colors.

There are three great prospects in this consignment—Lee Direct, black gelding by Direct 2:05 1/4, dam Moscowine by Sidney, has been a quarter in 1:54 seconds. Miss Lee, bay mare by Monroe Chief out of Midget by Inca. Rowena, black mare by California Black Hawk out of mare by Poscora Hayward.

The same evening will be sold, by order of T. A. Nufer, the two prize-winning Clydesdale stallions, CLYDE BOY seven years old and PRINCE S. three years old, both sired by imported Pollock.

FRED H. CHASE & CO.,  
1732 Market Street, San Francisco.

Every feature connected with the PALACE HOTEL was designed and introduced for a double purpose—surrounding guests with comforts, conveniences and entertainment, and adding to the popularity and reputation of

California's  
Colossal  
Caravansary.

In the center of the hotel is the famous court and off of this are the equally famous grill rooms. For your convenience telephone and telegraph offices, writing and reading rooms, barber shop, billiard parlor, carriage office, news stand and typewriter offices are directly off the court. Outside the whole-sale and shopping district, theaters, clubs, banks and railroad offices are a step from the entrance

## Grease Heel, Scratches,

## MUD FEVER, HOOF ROT, SPEED

CRACKS—Cases where ulcerations extend, with transverse cracks which open at every step and often bleed, no matter how complex, aggravated, deep seated or chronic, if treated according to directions, as given on circular with every box, positively cured with

## Veterinary Pixine

After Blistering, Veterinary Pixine is the very best application that could be indicated. It absorbs all inflammatory exudate and hastens the reparatory process. Will heal the most severe cases without scar, and will prevent loss of hair. As a Preventive—If a light application of Veterinary Pixine is used before speeding, driving in wet, muddy or slushy weather, or in the snow, your horse will never have speed cracks, scratches or grease heel.

For Hoofs—It will keep the hoofs healthy, soft and in perfect form.

For Old and Chronic Sores, Etc.—Veterinary Pixine heals collar and saddle galls, bobbie chafes, abscesses, inflammatory swellings, sores and all skin disease. In cases of emergency it is invaluable.

This penetrating, stimulating, soothing absorbing, antiseptic healing ointment heals from beneath the surface by disinfecting the parts, subduing inflammation and stimulating healthy granulation, not by drying and scabbing.

2 oz., 25c; 8 oz., 50c, 5-lb pkg., \$4.00.

At all druggists and dealers or sent prepaid.

TROY CHEMICAL CO., TROY, N. Y.

D. E. NEWELL, Pacific Coast Agent, 519 Mission Street, San Francisco.

## High Class Roadsters For Sale.

YELLOW JACKET 2:20 1-2, pacing (only beaten a head in 2:12) The handsomest roadster in California. Chestnut with Boxen mane and tail, and a perfect horse. Fine driver, sound, kind and gentle; has been driven by a lady. Get his fellow and he will attract attention on the park roads or speedway.

Double-gaited Grey Gelding excellent road horse, single or double; sound, fast and a great weight puller. Never trained, but paced a mile in 2:27, last quarter in 34 seconds. A good prospect for the track, and a high class roadster anywhere. For prices and particulars address

A. B. RODMAN, Woodland, Cal.

## Standard Stallion For Sale.

ATHAMAX 36927. One of the best bred young stallions in California. He is 16 hands and will weigh when matured 1500 lbs. He is by Ath adon (sire of Sue 2:12 1/4, Listerine 2:13 1/4, Dakon D. 2:10 1/4, Donnatrine 2:26 1/4 by Matadon 3:32, son of Oward 141). His dam is Lustrine (dam of Listerine 2:13 1/4, Donnatrine 2:26 1/4) by the great Onward 141. Absolutely sound, a grand individual, and in condition to train for a low mark this year. Only reason for selling is that owner has not time to devote to him.

For further information address BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco.

EARLY CLOSING PURSES FOR ITS

### GRAND CIRCUIT WEEK

August 17, 18, 19, 20, 21 and 22, 1903

No. 1. \$20,000—THE BONNER MEMORIAL, 2:12 Class Trotting.

(Horses to be named August 10)

No. 2. 5,000—THE HIRAM WOODRUFF, 2:20 Class Trotting.

No. 3. 5,000—THE JOHN H. SHULTS, 4-yr-olds, 2:25 Class Trotting

No. 4. 5,000—THE METROPOLITAN, 2:20 Class Pacing.

No. 5. 10,000—THE BRIGHTON, 2:10 Class Pacing.

ENTRIES CLOSE SATURDAY, MARCH 7, 1903.

#### CONDITIONS.

Rules of the National Trotting Association, of which this Association is a member to govern, except:

(1) In all events a horse must win a heat in 3 or go to the stable.  
(2) Hopples are not barred, except for horses without standard records.  
Purses divided 50, 25, 15 and 10 per cent. Where four horses start the full purse will be paid; horse distancing the field, or any part of it, to be benefited.

All the above events best 3 in 5 heats.  
Entrance 5 per cent of purse, 5 per cent additional from winner of each division of same. Nominators liable for full amount unless written notice of withdrawal is sent bearing post-mark on or before date when a payment is due.

Payments to be made March 7, May 7, July 7 and August 10, as follows:

Purse No. 1—\$50, \$150, \$300, \$500

Purses Nos. 2, 3 and 4—\$15, \$35, \$75, \$125.

Purse No. 5—\$25, \$75, \$150, \$250.

In Purses Nos. 1 and 5 horses to be named August 10 that were eligible March 7.

In Purses Nos. 2, 3 and 4 horses to be named with first payment March 7, and three may be named from the same stable; the selection to start to be made on or before August 10. Where nominator fails to make selection in time, the first horse originally named by him will be selected by this Association.

C. A. McCULLY, Secretary,

215 MONTAGUE STREET, BROOKLYN, N. Y.

## "SAVE-THE-HORSE" —TRADE MARK— SPAVIN CURE.

FROM A WELL-KNOWN TRAINER.

Dec 22nd 1902  
Troy Chemical Co.  
Troy, N.Y.  
Bento

I used "Save-the-Horse" all the past season. First, on a bad splint close up to knee; horse very lame after fast work; could see decided improvement after a few days' use, and in a week's time lameness all disappeared. Used with equal success on a bowed tendon. At present am treating a horse that bowed a tendon three years ago; was a bad case; was fired and blistered but still went lame. Have used a bottle and am still using "Save the-Horse." The enlargement has gone down almost one-half, horse going sound, and I firmly believe will race again. A friend of mine had a horse that bowed a tendon last spring; by the use of your remedy kept him racing all fall, gave him a record better than 2:05; Tendon is straight and sound as ever was. Think it the greatest remedy on earth for a bad leg of any description.

Respectfully yours  
L. D. Shafer  
Harris Trainer  
Box 209

No man in Northern New Jersey, or horseman in New York City and Long Island, can doubt this man's statement.—(Reproduced from New York Herald).

Newark, N. J., Jan 27, 1903

I used one bottle of "Save-the-Horse" and completely removed a thoroughpin. Horse was not lame, but it was a bad eyesore. No blemish or sign of the growth remains.

GEORGE STENGEL.

FROM A PROMINENT STOCK FARM OWNER.

Shrub Oak, N. Y.

This is to certify that I have used "Save-the-Horse" for splints and wind puffs with great success. In fact, it is a great remedy.

C. W. CARPENTER

Sunnyside Farm.

Horse can be worked with either shin or ankle boots, as no harm can possibly come by either destruction of hair or scalding of the limb.

TROY CHEMICAL COMPANY, TROY, NEW YORK.

D. E. NEWELL, Pacific Coast Agent, 519 MISSION STREET, SAN FRANCISCO.

"Save-the-Horse" can be applied in all conditions and extremes of weather—hot or cold.

POSITIVELY AND PERMANENTLY CURES Bone and Bog Spavin, Ringbone, Curb, Thoroughpin, Splint, Capped Hock, Shoe Boil, Weak and Strained Tendons and all Lameness. Contains no arsenic, corrosive sublimate or other forms of mercury, or any injurious ingredient. Cures without scar, blemish or loss of hair.

\$5.00 PER BOTTLE

Written guarantee with every bottle, constructed to convince and protect you fully. The need of second bottle is almost impossible except in rarest cases. Guarantee covers effectiveness of one bottle. Copy of guarantee sent upon application.

\$5.00, all druggists and dealers, or sent prepaid.

## KENTUCKY'S FUTURITY \$22,000 FOR FOALS OF 1903

(ONLY \$5 TO NOMINATE MARE)

Nominations Close March 16, 1903

The Kentucky Trotting Horse Breeders Association

Offers the above purse to Foals of 1903 (Colts, Fillies and Geldings), the produce of Mares nominated March 16, 1903, or their substitutes, as provided for hereafter.

\$5000 for TWO-YEAR-OLD TROTTERS at Annual Meeting, 1905.

Divided:—\$3000 to winner; \$1000 to second; \$500 to third; \$300 to fourth; \$150 to nominator of dam winner; \$75 to nominator of dam of second; \$50 to nominator of dam of third; \$25 to nominator of dam of fourth.

\$3000 for THREE-YEAR-OLD PACERS at Annual Meeting, 1906.

Divided:—\$2000 to winner; \$600 to second; \$350 to third; \$150 to fourth.

\$14,000 for THREE-YEAR-OLD TROTTERS at Annual Meeting, 1906.

Divided:—\$10,000 to winner; \$3000 to second; \$1000 to third; \$500 to fourth; \$300 to nominator of dam of winner; \$100 to nominator of dam of second; \$75 to nominator of dam of third; \$25 to nominator of dam of fourth.

Entrance as follows: \$5 to nominate mare March 16, 1903. \$10 December 1, 1903, when color and sex of foal must be given. NOTHING MORE TILL JUNE 1ST OF YEAR OF RACE, and all foals on which payments (of \$10 each) are made December 1, 1903, will be eligible to start either as two-year-olds or three-year-olds, or in both years (if conditions that follow are complied with), NO PAYMENT BEING DUE IN 1905 FROM THOSE NOT WISHING TO START TILL 1906.

Those expecting to start two-year-olds must, on June 1, 1905, name and describe their entries and pay on each a forfeit of \$25 (and as many may be named as the owner desires to keep in); thirty days before meeting (September 1st) \$30 must be paid on each entry then kept in; on starters \$100 must be paid by 7 o'clock of evening before race.

Those desiring to start three-year-olds must, on June 1, 1906, name and describe as in the two-year-old event and pay on each a forfeit of \$50; thirty days prior to the meeting (September 1st) those who desire to start in the trotting race shall pay \$50 and in the pacing race \$25, on each entry they then keep in. On starters in trotting race \$250, and on starters in pacing race \$50, must be paid by 7 o'clock of evening before race.

THE TWO-YEAR-OLD RACE WILL BE MILE HEATS. TWO IN THREE; THE THREE-YEAR-OLDS WILL TROT AND PACE MILE HEATS. THREE IN FIVE.

A distanced horse's money will go to the first horse; but if fewer than four start in a race, those starting and the placed horses' dams will receive only what each would have received had four been placed.

Rules of National Trotting Association (of which this Association is a member), in force when races are called, to govern, with above exceptions. No hopped horse allowed to start.

IF A NOMINATED MARE HAS NO LIVING FOAL ON DECEMBER 1, 1903, HER NOMINATOR MAY SUBSTITUTE ANOTHER MARE AND FOAL, REGARDLESS OF OWNERSHIP; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries the name, color and pedigree of mare must be given, also the name of the horse to which she was bred in 1902.

Address nominations to Secretary and mail same on or before March 16, 1903.

R. P. STOLL, President.

E. W. SHANKLIN, Secretary, Lexington, Ky.

Two small payments amounting to one-fourteenth of one per cent carries entry to Year 1st of year of race, and there is no heavy payment till just before the race.

About \$50,000 in fixed events will close June 1st. Write in May for Entry Blanks.

## Trotting Horse Breeders' Association BOSTON, MASS.

(MEMBER OF NATIONAL TROTTING ASSOCIATION).

## Grand Circuit Meeting

AUGUST 24-28, 1903

READVILLE TROTTING PARK

EARLY CLOSING PURSES.

- No. 1. \$5,000. The Blue Hill, 2:30 class, Trotting.
- No. 2. 15,000. The Massachusetts, 2:12 class, Trotting.
- No. 3. 3,000. 2:16 class, Trotting.
- No. 4. 2,000. Three-year-olds, 2:25 class, Trotting.
- No. 5. 5,000. The Norfolk, 2:24 class, Pacing.
- No. 6. 3,000. The Neponset, 2:10 class, Pacing.

CONDITIONS—National Trotting Association rules to govern, except that, in three-in-five races not finished in three heats, all horses not standing for any part of the purse will be ruled out. Hopples will be barred.

ENTRANCE—Five per cent of purse and five per cent additional from the winners of each division of the purse, but nominators will not be held for forfeits falling due after they have declared out in writing.

FORFEITS will be due March 11, April 11, May 11, June 11, July 11 and August 11, and in amounts as follows:

Classes Nos. 1 and 5—\$10, \$20, \$30, \$40, \$70, \$80.

Class No. 2—\$125, \$125, \$125, \$125, \$125, \$125.

Classes Nos. 3 and 6—\$0, \$15, \$20, \$25, \$35, \$45.

Class No. 4—\$10, \$10, \$10, \$20, \$25, \$25.

TERMS OF ENTRY—Except in class No. 2, the Massachusetts event, horses to be named at time of first payment. In class No. 2, to be named August 11th, and have been eligible March 11th. In the other classes, Nos. 1, 3, 4, 5 and 6, more than one may be named as one entry, providing they are in the same stable. In case where two or more horses have been named as one entry, and any horses have been separated from the stable from which they were originally entered, and such separation have been met according to conditions, upon the payment of forfeits which fell due before said separation.

Entries Close Wednesday, March 11, 1903.

Applications for entry blanks, requests for information, and all entries to be made to the Secretary.

C. M. JEWETT, Secretary,

JOHN E. THAYER, President,

READVILLE, MASS.

Supt. Menlo Stock Farm,  
Portola, San Mateo County, Cal.

## STAM B. 2:11 1-4

(TROTTER.)

REG. NO. 23444.

3-YEAR-OLD RECORD, 2:15 1-2  
(Timed second in 2:13 1/2)  
4-YEAR-OLD RECORD, 2:11 1-4  
(Timed second in 2:09 1/2, 2:09)  
2-YEAR-OLD TRIAL, - - 2:26

STAM B., by that show horse king, Stamboul 2:07 1/2, father of 47 from 2:10 1/4 to 2:30; 24 sons and  
daughters produced from 2:07 1/4 to 2:27. Stamboul is the only trotting bred stallion that ever sold  
twice for over \$40,000, and sired a daughter for whose son, Wiggins (two-year-old 2:19 1/2), \$40,000 was  
offered. Stamboul's dam is the granddam of Oakland Baron 2:09 1/4, for which \$50,000 was later refused,  
showing that men with money and brains appreciate this blood. STAM B.'s first dam, Belle Me-  
dium 2:30 (dam of 3 from 2:11 1/4 to 2:30) by Happy Medium sire of Nancy Hanks 2:04. No son of Ham-  
bletonian 10 ever produced such speed and she sold for \$40,000.

Second dam Argenta, dam of one in 2:20, by Almont Lightning, sire of dams of Zombro (five years  
old 2:11) and King Princes 2:15, by Almont 33.

Third dam Mary Adams by Mambrino Patchen, sire of dams of Guy Wilkes 2:15 1/2, Baron Wilkes  
2:18, Patchen Wilkes 2:39. Fourth dam Maubribo Belle by Mambrino Chief, sire of Lady Thorn and  
dam of Director and Onward. Fifth dam by Mason Whip, a thoroughbred. No stallion now doing  
public service ever represented such champions of the turf, show ring and top notchers at private and  
public sales. He is a handsome horse (a typical Morgan in form), and tried race horse, and game,  
tippy road horse.

STAM B is a bay, two white hind ankles, 15 hands 2 3/4 inches high, weight 1090 lbs., of good  
stamina and muscular development.

Will Make the Season of 1903 at Pleasanton, Cal.

**Terms \$40** SPOT CASH before mare is removed. I will try and take good care of mares and  
foals, but will not be responsible for accidents or escapes. (No agents on arrival of  
trains at depot.) For further particulars address

**SAMUEL GAMBLE, Pleasanton, Cal.**

Breed to Extreme Speed.

## CHAS. DERBY 4907, rec. 2:20 \$50 the Season

SIRE OF MUCH BETTER 2:07 1/4, DERBY PRINCESS 2:08 1/4, DIABLO 2:09 1/4, OWYHEE  
2:11, LITTLE BETTER 2:11 1/4, CIBOLO 2:13 1/2, and many other fast and game racehorses.

Terms for young stallions and pasturage on application. Developed Trotters and Pacers for  
sale at reasonable prices Address

**OAKWOOD PARK STOCK FARM,**

Danville, Contra Costa Co., Cal.

## SEARCHLIGHT 2:03 1/4

THE FASTEST STALLION BY THE RECORDS EVER  
OFFERED FOR SERVICE ON THE PACIFIC COAST.

He still holds the World's Records for 4-year-old (2:04 1/2) and for 5-year-old (2:03 1/4).

SEARCHLIGHT is one of the fastest and gamest horses that ever raced on the Grand Circuit.  
He is a horse of rare individuality and is one of the most perfect specimens of horseflesh ever foaled.  
He has repeatedly beaten one minute to the half-mile pole in his work and has pulled the heavy cart  
in which he now takes his exercise a half in 58 seconds with a dozen watches held on him.

Few stallions that ever stood for service in California have such royal blood lines. Darknight,  
the sire of SEARCHLIGHT, was like the great McKinney, a son of Alcione, and is a sire of extreme  
speed, having four 2:10 performers to his credit. The dam of SEARCHLIGHT is one of the great  
brood mares, having four with standard records and his grandam and great grandam are both in the  
great brood mare list. His oldest colts, now two years old, show that he imparts these qualities to  
his get, and he is certain to be a producer of early and extreme speed as well as size and good looks.

**Terms for the Season, \$75.**

## LECCO 2:09 3/4 The Blood that pro- duced Dan Patch 1:59 1/2

LECCO 2:09 3/4 is a very handsome black stallion, a square trotter and as game a racehorse as ever  
looked through a bridle. He is by Bonnie Boy, one of the best producing sons of Patchen Wilkes, sire  
of the great Joe Patchen 2:01 1/4, that in turn is the sire of the unbeaten Dan Patch 1:59 1/2. The dam of  
LECCO is a great brood mare by Homer, and his second dam is a producing mare by Rochester and  
his third dam is a producing mare by Clark Chief. For four generations in the pedigree of LECCO  
there is not a sire or dam but is a producer of standard speed.

LECCO made a campaign through the Grand Circuit in 1899 that shows his wonderful speed and  
gameness. He met the best horses out that year and in seven starts won four first moneys, two sec-  
onds and was but once unplaced. His action is perfect and he cannot help siring a family of high  
class, handsome, fast and game trotters.

**\$50 for the Season.**

The above horses will stand at the **PLEASANTON RACE TRACK**, and all mares not proving  
with foal may be returned free next year, or in case the horse is not in California the service fee will  
be returned. It is the intention of the owner however, to keep both SEARCHLIGHT and LECCO  
in this State for the next four or five years. Due care taken to prevent accidents or escapes, but no  
responsibility assumed should any occur. Good pasturage provided at \$4 per month, and all bills  
payable before mare is removed from my possession.

For further particulars and tabulated pedigrees address

**EDW. MILLS, Rose Hotel, Pleasanton, Cal.**

## NUSHAGAK

Reg. No. 25939

Black Horse 15-2 1/4 hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15 1/4, Sabina 2:15 1/4, Sabledale  
(at 2 years) 2:18 1/4, Burlington (at 2 years) 2:20 1/4, and 36 others in 2:30 list. Dam, Fidelia (trial 2:36 at  
2 years), dam of Fidelia 2:38 1/2, dam of Mary Celeste (at 2 years) 2:17 1/4, by Director, sire of Directum  
2:05 1/4, Direct 2:05 1/4, Nathan Straus 2:05 1/4, Direction 2:08 1/4, etc. Second dam by Reavis' Blackbird  
2:32, sire of Mamie Griffin 2:12, Vic H 2:13 1/4, etc. Third dam by Lancet, son of McCracken's Black-  
hawk 767.

NUSHAGAK'S sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro  
Wilkes 2:11 was one of the gamest colts that ever raced down the Grand Circuit. The Wilkes and  
Director blood is a successful cross as it has produced John A. McKerron 2:05 1/4, Nathan Straus 2:05 1/4,  
Ozannam 2:06, Dollade Wilkes 2:10 1/4, Oro Wilkes 2:11, Evangeline 2:11 1/4, Mary Celeste (at 2 years)  
2:17 1/4, etc. Fidelia, NUSHAGAK'S dam, is in the great broodmare list and she would have been a  
very fast trotter if given an opportunity, as with very little training she trotted a mile in 2:35 as a  
two-year-old. Mr. Corbett purchased her from Mr. Goldsmith for a broodmare, consequently her  
training was discontinued. The get of Reavis' Blackbird, the sire of NUSHAGAK'S second dam,  
were noted for their remarkable gameness and vigorous constitutions. His two noted daughters,  
Mamie Griffin 2:12 and Vic H 2:13 1/4, were exceedingly game. NUSHAGAK has only got eighteen or  
twenty foals older than yearlings; of that number only three have ever had a full season's training,  
namely, Aristo (3) 2:17 1/4, Majella B. (2) 2:29 (trial at 4 years 2:13 1/2), and The Boquet (trial at 3 years)  
2:31. His other colts that have been handled some are: Brown filly, 4 years old in 1902, showed trial  
of 2:20 1/4 with three and one-half months' work; blk g, 3 years old in 1902, with three months' handling  
showed mile in 2:35 1/2, last quarter in 35 1/2 seconds. His son Aristo (at 3 years) 2:17 1/4 took sick with  
distemper the latter part of July and from the seventh day of August until the twenty-ninth had  
practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake.  
Before taking sick we felt confident that Aristo would trot a mile close to 2:10 in his three-year-old  
form; the way he raced after being sick made us feel satisfied that we had made no mistake in our  
estimate of him. His third heat in 2:17 1/4 was equal to 2:13 1/2 or 2:14 over the Woodland, Santa Rosa or  
Stockton tracks.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February  
15th and ending July 1st.

Limited to 40 outside mares, at \$50 the Season,

with usual return privilege if mare proves not with foal. Money due at time of service or upon  
removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed should  
any occur. First-class pasturage for mares, \$3 per month; no barbed wire. Address

**WALNUT GROVE STOCK FARM,**

Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation  
Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in  
care of Morshead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be  
reshipped to Walnut Grove.

WILLIAM MURRAY, Woodland, Cal.

Breed for Size, Disposition, Style and Speed.

SECRETARY

Son of the great Director and a mare by Volunteer,

Will make the Season of 1903

AT ALAMEDA.

SECRETARY is a black horse, 16 hands high, a model of symmetry and conformation. His disposition is perfect and he can show as much natural speed as any trotting stallion in California. He sires speed, quality, substance and splendid dispositions, and his produce are always in demand.

FEE \$40 THE SEASON.

For card containing tabulated pedigree and other information address

Telephone: Eagle 627. ELIAS WILLIAMS,  
Cor. Arbor Street and Eagle Ave., Alameda, Cal.

BAYSWATER WILKES 2:25¼

Son of Sable Wilkes 2:18  
and Fanny Bayswater

Sire of KELLY BRIGGS 2:10¼

WILL MAKE THE SEASON OF 1903 AT

WINTERS, YOLO CO., CAL. FEE \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. The only two year and three year olds of his get to start last year were race winners. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of last year's winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices. Excellent pasturage for mares \$3.50 per month. For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

# RACING

EVERY WEEK DAY  
RAIN OR SHINE.

New California Jockey Club  
INGLESIDE TRACK

SIX OR MORE RACES DAILY

RACES START AT 2 P. M. SHARP.

Reached by street cars from any part of the city. Trains leave Third and Townsend streets at 12:45 and 1:15 p. m., and leave the track immediately after the last race.

THOMAS H. WILLIAMS, President.

PERCY W. TREAT, Secretary.

To cure a Bruise or Strain quickly, proceed as follows: Wring out a sponge in boiling hot water and hold on the affected part, keeping the sponge hot by repeating the operation, for from 15 to 30 minutes. Rub dry and apply

ABSORBINE

rubbing it in well. Use the hot water steaming process once a day and apply the Absorbine from three to four times a day. One or two days usually cures fresh cases. Absorbine is unequalled in removing bunnies caused by a bruise or strain from animal or mankind. Vet. size \$2 per bottle, for mankind \$1 per bottle, delivered or furnished by regular dealers. Write for pamphlets. Manufactured by W. F. YOUNG, P. D. F. Springfield, Mass.

For sale by Mack & Co., Langley & Michaels Co., Redington & Co., J. O'Kane, and J. A. McKerron all of San Francisco.

Iran Alto 2:12¼

Sire of Dr. Frasse 2:12¼  
Thomas R. 2:15  
Vendome 2:18¼  
Dr. Frasse's Sister, 2:25¼

By PALO ALTO 2:08¼ (world's stallion record to high-wheel sulky), sire of IRAN ALTO 2:12¼, Pasonte (4) 2:13, Palita 2:16, Rio Alto 2:16¼, Palatine 2:18, and 11 others in 2:30 list.  
Dam ELAINE 2:20 (world's 3 and 4 year old records in 1877 and 1878), dam of Norlaine, yearling record 2:31¼, and of 3 in 2:30 list, and the dams of 6 in 2:30 list.  
Second Dam GREEN MOUNTAIN MAID, dam of Electioneer 125 (one of the world's greatest sires), 9 in 2:30 list; sons produced over 300 standard performers.

IRAN ALTO 2:12¼ is not only royally bred, but has proven himself a racehorse and a sire of speed. He is a splendid individual and has all the most desirable qualifications for a great stallion. Breed to him and you will get the kind of colts you are looking for.

Will Make the Season, 1903, at his home

THE VENDOME STOCK FARM, SAN JOSE.

Fee \$50. Usual return privilege. Good pasturage and mares well cared for. For Tabulated Pedigree address

JAMES W. REA, San Jose, Cal.

## Books for Stallion Owners.

### 1. HOOVER'S STALLION SERVICE RECORD.

The most complete book for recording stallion service ever placed before breeders. Not a pocket edition. No more disputing of sires. No more mixing of dams where this book is used. There is space for entering 100 mares, giving their full breeding description, dates of service, dates of foaling, with a page for tabulating pedigree of stallion in use, etc., etc., with index complete; size 10x7 1/2. Each book is handsomely and substantially bound. Can be used for any kind of pedigreed stock.....\$2.00

### 2. THE STANDARD STALLION SERVICE BOOK.

The neatest Service Book published, containing space for entering 100 mares, giving space for full description, pedigree, dates of services and refusals, date of foaling, etc., with index complete, neatly bound in leatherene, suitable for pocket use. Can be used for any kind of pedigreed stock.....\$1.00

### 3. BREEDER'S NOTE AND CERTIFICATE BOOK

AND STALLION SERVICE BOOK COMBINED.

This book contains 75 blank certificates to be given to owners of mares certifying that said mare has been bred to a certain stallion. Also 75 notes suitable for owner of mare giving to owner of stallion on account of stallion service fee. This book is well bound, and makes a book like No. 2, after certificates and notes have been removed. Can be used for any kind of pedigreed stock.....\$1.00

Sent by mail prepaid on receipt of price.

BREEDER AND SPORTSMAN.

San Francisco, Cal.

## Tales of the Turf

By William B. Fasig.

Trotting horsemen the world over knew the late W. B. Fasig and that he was in a class of his own as an instructive, interesting and humorous writer of trotting horse subjects. W. H. Gocher, secretary of the National Trotting Association, has put Mr. Fasig's writings in book form, adding much of interest thereto, and the book is now ready for delivery.

The table of contents includes the following:

TRITTING TRACKS. How to build and manage them, with plates showing how to lay out a half mile track, a mile track and a kite-shaped track. This article is one that a race track official needs in his business.

THE SECRETARY. His trials and tribulations in the merry days of racing. On the other side of Jordan he may find rest; there is nothing for him here but advice.

THE SANDPIPER. How the Dutchman did not balance his bill for gravel while the little man in brown stood put and those who had the real sure thing well, they lost, as usual.

A STRANGE LAND. How a shipwrecked Buick eye made a stir in another racing world. Utopian, unique and if you do not believe it, you can say it is untrue.

McWELL. How the best green horse in Missouri broke into fast history. He won the Transylvania. That is a fact. If you were there you know why.

STRANGER. A lightening pace of Northern Ohio, whose history was a patch of romance looked on to it.

ANDY AND I. What the old down fair learned in France and England after the hotel clerk checked the ship baggage. They could not part for you.

RIDE OF A LIFETIME. How Flyer Jib put a crimp in the boss trotter on the speed drive at Wagon Park.

IMM. SHANK. Someone said he was a colt breaker, but he broke the wise when the thyrer combination and Eloise won at Detroit well, and this valuable book from a new pre on to the sending two new subscriptions to BREEDER AND SPORTSMAN at \$3 each, or for the book alone, postpaid, on receipt of \$3.

BREEDER AND SPORTSMAN,

## THE BEST WAGON IN THE WORLD

WEIGHT 48 to 65 Lbs.

## THE BENJAMIN RACING WAGON

### ITS GOOD POINTS.

entirely new. It is absolutely noiseless and positively prevents the axle from swinging. Our Axles are the strongest that can be made and are in a continuous piece. Wheels. We make our own wood and wire wheels complete. Our Ball Bearings are the best made and are water and dust proof. The Shafts are handsome and strong and can be instantly removed. They are steel plated top and bottom, free from bolts in any part of them, and so attached to the wagon they cannot rattle, as they have no springs, catches or traps to get out of order. The cross pieces are steel plated and trussed, making them very light and stiff. The Whiffletree is held by our own device and cannot rattle and when desired can be quickly removed. We manufacture truss poles and neck yokes. Our Truss Poles are very attractive and are free from braces to bend and rattle. Should any accident happen it can not snap off like an ordinary pole. The neck yoke presents a handsome appearance, is light and strong, and like the pole cannot snap off. The pole passes through the neck yoke, which holds it securely and carries it several inches higher than an ordinary kind. Tubing is not used on our wagons, as it is unreliable. Send for prices and catalogue.

# GIBBS' CELEBRATED PROCESS OF RAPID TAXIDERMY

In Practical Use Over Twenty-Five Years.

Used Everywhere in America. Hundreds of Testimonials. Try and Be Convinced.  
Start a Class. Money in It. Be Your Own Taxidermist.

Naturalists, Collectors, Gunners, Anglers, Outers, Boys, Girls, and all others interested in nature  
and anxious to preserve the specimens taken in wood and field, have all felt the need of a simple  
method of preservation, which is free from intricacies and inexpensive.

There is a method of rapid taxidermy now in extensive use, which meets the requirements of all  
amateurs who wish a practical and inexpensive method of preserving the trophies of the outing and  
collecting trip. This is not the old system of so-called stuffing, so expensive, laborious and disap-  
pointing, but is a rapid system, which anyone can learn at once and which is guaranteed to give  
satisfaction.

By this process you may preserve the beautiful plumage of the grouse and woodcock, or the pike's  
or buck's head, or the showy feathers of the tanager. Boys, girls and all others can do good work and  
may make money, as mounted heads and birds find a ready sale, and besides you may teach your  
friends and decorate the school-room, office and dining-room with native birds and other attractions.  
If you are in doubt, then get your friends to go in with you and start a class, for when several work  
together there is an advantage and the expense is next to nothing.

On the receipt of \$1, cash or stamps, I will send full printed instructions for mounting birds,  
heads, mammals, etc., and all materials for mounting and preserving specimens—including prepared  
compound, together with full directions for dressing skins with the hair on for rugs and robes, so that  
you will not be to the expense of one cent.

Remember, I Guarantee Satisfaction or Money Refunded.

# KENTUCKY'S FUTURITY

## \$22,000

### FOR FOALS OF 1903

(ONLY \$5 TO NOMINATE MARE)

Nominations Close March 16, 1903

The Kentucky Trotting Horse Breeders Association

Offers the above purse to Foals of 1903 (Colts, Fillies and Geldings), the produce of Mares nominated March 16, 1903, or their substitutes, as provided for hereafter.

**\$5000 for TWO-YEAR-OLD TROTTERS at Annual Meeting, 1905.**

Divided:—\$3000 to winner; \$1000 to second; \$500 to third; \$300 to fourth; \$150 to nominator of dam winner; \$75 to nominator of dam of second; \$50 to nominator of dam of third; \$25 to nominator of dam of fourth.

**\$3000 for THREE-YEAR-OLD PACERS at Annual Meeting, 1906.**

Divided:—\$2000 to winner; \$800 to second; \$350 to third; \$150 to fourth.

**\$14,000 for THREE-YEAR-OLD TROTTERS at Annual Meeting, 1906.**

Divided:—\$10,000 to winner; \$3000 to second; \$1000 to third; \$500 to fourth; \$300 to nominator of dam of winner; \$100 to nominator of dam of second; \$75 to nominator of dam of third; \$25 to nominator of dam of fourth.

Entrance as follows: \$5 to nominate mare March 16, 1903. \$10 December 1, 1903, when color and sex of foal must be given. NOTHING MORE TILL JUNE 1ST OF YEAR OF RACE, and all foals on which payments (of \$10 each) are made December 1, 1903, will be eligible to start either as two-year-olds or three-year-olds, or in both years (if conditions that follow are complied with), NO PAYMENT BEING DUE IN 1905 FROM THOSE NOT WISHING TO START TILL 1906.

Those expecting to start two-year-olds must, on June 1, 1905, name and describe their entries and pay on each a forfeit of \$25 (and as many may be named as the owner desires to keep in); thirty days before meeting (September 1st) \$50 must be paid on each entry then kept in; on starters \$100 must be paid by 7 o'clock of evening before race.

Those desiring to start three-year-olds must, on June 1, 1906, name and describe as in the two-year-old event and pay on each a forfeit of \$50; thirty days prior to the meeting (September 1st) those who desire to start in the trotting race shall pay \$50, and in the pacing race \$25, on each entry they then keep in. On starters in trotting race \$250, and on starters in pacing race \$50, must be paid by 7 o'clock of evening before race.

THE TWO-YEAR-OLD RACE WILL BE MILE HEATS, TWO IN THREE; THE THREE-YEAR-OLDS WILL TROT AND PACE MILE HEATS, THREE IN FIVE.

A distanced horse's money will go to the first horse; but if fewer than four start in a race, those starting and the placed horses' dams will receive only what each would have received had four been placed.

Rules of National Trotting Association (of which this Association is a member), in force when races are called, to govern, with above exceptions. No hopped horse allowed to start.

IF A NOMINATED MARE HAS NO LIVING FOAL ON DECEMBER 1, 1903, HER NOMINATOR MAY SUBSTITUTE ANOTHER MARE AND FOAL, REGARDLESS OF OWNERSHIP; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries the name, color and pedigree of mare must be given, also the name of the horse to which she was bred in 1902.

Address nominations to Secretary and mail same on or before March 16, 1903.

R. P. STOLL, President.

E. W. SHANKLIN, Secretary, Lexington, Ky.

Two small payments amounting to one-fourteenth of one per cent carries entry to June 1st of year of race, and there is no heavy payment till just before the race.

About \$50,000 in fixed events will close June 1st. Write in May for Entry Blanks.

## CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY. It is a quick and sure cure for those troublesome skin cracks under the fetlocks which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

Read our "ad." on Campbell's Horse Foot Remedy in next issue of this paper.

| No. 6. | 3,000.   | The Neponset, 2:10 class, Pacing.        |

CONDITIONS—National Trotting Association rules to govern, except that, in three-in-five races not finished in three heats, all horses not standing for any part of the purse will be ruled out. Hops will be barred.

ENTRANCE—Five per cent of purse and five per cent additional from the winners of each division of the purse, but nominators will not be held for forfeits falling due after they have declared out in writing.

FORFEITS will be due March 11, April 11, May 11, June 11, July 11 and August 11, and in amounts as follows:

Classes Nos. 1 and 5—\$10, \$20, \$30, \$40, \$70, \$80.

Classes Nos. 3 and 6—\$10, \$15, \$20, \$25, \$35, \$45.

Class No. 4—\$10, \$10, \$10, \$20, \$25, \$25.

TERMS OF ENTRY—Except in class No. 2, the Massachusetts event, horses to be named at time of first payment. In class No. 2, to be named August 11th, and have been eligible March 10th. In the other classes, Nos. 1, 3, 4, 5 and 6, more than one may be named as one entry, providing they are in the same stable. In case where two or more horses have been named as one entry, and any horses have been separated from the stable from which they were originally entered, and such separation made according to rule, they shall be eligible to start in the race (if forfeits falling due after such separation have been met according to conditions), upon the payment of forfeits which fell due before said separation.

### Entries Close Wednesday, March 11, 1903.

Applications for entry blanks, requests for information, and all entries to be made to the Secretary.

SIR GIBBIE 2d.....James McDonnell, Portola, San Mateo Co

THE RIDICULOUS STATEMENT was recently made by a Redding paper that the salary paid the Secretary of the California State Agricultural Society, is a piece of extravagance as the duties of the office can "be well performed by a \$60 a month bookkeeper." The Sacramento Bee makes answer to this statement as follows:

That is nonsensical. Without entering into controversy as to who would or would not make a good, reliable, able, go-ahead and up-to-date Secretary for the State Board of Agriculture, it might be said that such a man when found will be easily worth \$250 a month; and it will be economy to get the right man at even a higher salary rather than to put the State Fair at the mercy of a \$60 bookkeeper. For the Secretary of the State Board of Agriculture can either make or mar the State Fairs. Every man at all conversant with these annual exhibitions knows that the Secretary of the State Board of Agriculture should be far more than a bookkeeper. He needs to be a man well acquainted with California from one end to another, and particularly with its agriculture, horticulture, viticulture, viciaultural, stock-raising, etc. Beyond that, he should be a man of original ideas, a man of system, a man with the knack of devising schemes for making the State Fair popular, and getting the exhibitors and the people all over California interested. In fine, he should be a well equipped and a many-sided man, besides being one of indefatigable industry. The right man for Secretary of the State Board of Agriculture is easily worth \$250 per month. The wrong man would be dear at \$60.

There is much truth in the Bee's remarks. The salary attached to the office of Secretary of the State Agricultural Society is none too much for a good man. There seems to be a wide-spread opinion among those who should know better that a Secretary of the State organization is a mere bookkeeper, and that his duties begin a few weeks before the fair and end a week or two thereafter. The truth is, there is work and plenty of it for a Secretary to do every working day in the year. There is not an industry relating to agriculture, horticulture, stock breeding, etc., that he should not be in close touch with, and the amount of correspondence he has to take care of is enormous. The Society, when properly managed, has much to do with inducing the importation of the best breeds of live stock, the improvement of dairy and beef products and thousands of other things that are of great benefit to the State. It is the same with the district associations,

and if the Secretaries of these organizations were paid by the year and required to devote their entire time to the advancement of the agricultural and other interests of their districts, the State would get better value for the district appropriations.

THE MOST ELABORATE CATALOGUE that has been seen at this office for many years is the Directum catalogue issued by the International Stock Food Company. It contains many handsome half tone engravings of the great trotter and a number of his get, besides a large amount of valuable information about them. The International Stock Food Company owns the three fastest stallions ever owned by one farm, viz.: Directum 2:05 1/4, Dan Patch 1:59 1/4 and Roy Wilkes 2:06 1/4. Mr. Savage writes: "We have unbounded confidence in Directum as a sire, and feel sure that he has world's champions on the way. Minnesota climate has agreed with him, and he is in an extra strong and vigorous condition."

MR. JOHN A. MCKERRON is back at his place of business on Mason street after several weeks in the hospital, where he underwent a severe surgical operation. Mr. McKerron has been, we are pleased to state, fully restored to health, and we hope will continue in that condition for many years to come, as he is among those whom the community can ill afford to lose.

THE OAKWOOD PARK SALE will be held at the Occidental Horse Exchange March 26th. Catalogues will be out next week. Thirty head will be sold.

THE COLORADO CIRCUIT advertisement will be found on the 6th page. Big money is offered. Purses for harness horses range from \$500 to \$1500.

## The Greatest of Trotting Futurities.

The announcement of the thirteenth renewal of Kentucky's Futurity (\$22,000 for foals of 1903) has created no end of interest amongst breeders and horse-men generally. Although the renewal of this "Derby" of harness horse events was positively expected by everyone, still its absolute necessity to the prosperity and welfare of the "American gentlemen's sport" has been so firmly established that each year its conditions excite more and more interest.

So much has been said and written in reference to futurities that the mere announcement of the date upon which nominations will close would, we believe, be all that is necessary to bring the most enthusiastic support to this the oldest, richest, best and most liberal of not only all futurities, but all harness races.

No subject connected with the harness horse has been discussed to greater length, by the ablest writers and most practical horsemen, than the question of futurities, and we have yet to see one line or hear one word but that was the most favorable commendation; a proposition so universally recommended to all breeders must be one of great merit.

It is true that a few breeders have not been regular patrons of the various futurities, but they are one by one joining the ranks of those who realize and appreciate the many benefits of such engagements for their youngsters, and we do not recall a single instance of a nominator in one of the Kentucky Futurities who failed to support subsequent renewals of this race, for they had had practical experience and demonstration of the benefits derived therefrom, not only in the increased sale value of their colts and fillies so engaged, but appreciated the chance of acquiring a small fortune for the mere nominal entrance fees required.

The Kentucky Trotting Horse Breeders Association was founded in 1873 for the sole purpose of advancing the interest of the light harness horse and has adhered strictly to this policy throughout its thirty years of existence; it has never declared a dividend upon its capital stock and has never sought to accumulate a profit for its own benefit, it has never failed to pay promptly 100 cents upon the dollar, and such profits as may have been derived from its various meetings have been used to provide additional conveniences for its patrons and in offering larger purses with more liberal conditions: an evidence of this can be found in the renewals of its futurities from year to year, which has been gradually increased in amount, yet nomination fees and subsequent payments remain unchanged except in the fewer minor instances.

The futurity for foals of 1903 is for \$22,000, and but the small sum of \$5 is required to nominate each mare. Entries close on Monday, March 16, 1903, with E. W. Shanklin, Secretary, Lexington, Ky.

A lot of McMurray carts just received. You need one right now to work your colts in this winter. Call at the Kenney Manufacturing Company, 531 Valencia street and take a look at these carts and other first-class vehicles they have for sale.

## A Sire of Size, Good Looks and Speed.

Few stallions have attracted as much attention by reason of the high class of their produce as Seymour Wilkes 2:08 1/4, whose memorable campaign through the California Circuit is remembered by all horsemen. The first crop of foals by Seymour Wilkes were the talk of this portion of the State when they reached their three year old form, by reason of their uniform good looks and size. There was not one but measured close to sixteen hands in height, and all were fast, although but one was trained for the track, and he took a record of 2:22. The oldest of Seymour Wilkes' get are now six years old, and a few five and four year olds are being worked. A few months ago Monroe Salisbury paid \$1000 for a green gelding by Seymour Wilkes that is now in training at Pleasanton and considered one of the greatest prospects at that famous track. He worked a mile in 2:18 last year, which is no measure of his speed. Mr. F. Gomet, of this city, owns a filly by Seymour Wilkes that is one of the best youngsters in California and will take a low record this year to a certainty. These are not the only ones of the get of this horse that show speed. There are many others—in fact, nearly all his colts and fillies that have been worked at all show speed at either the pace or the trot, and the majority of them are square trotters. For size, solid colors and fine styled horses, Seymour Wilkes is one of the great sires of this State. He earned his record in a race and a hard fought one at that, and was considered one of the gamest of race horses. His sire, Guy Wilkes, is one of the greatest sons of Geo. Wilkes, having sired no less than nineteen in the 2:15 list, nearly every one of which was a high class race horse. On his dam's side, he carries blood that is noted for producing good looks and size. His dam, Early Bird, was by Playmail; second dam by Odd Fellow, third dam by Williamson's Belmont and fourth dam by Black Hawk 7:07. Seymour Wilkes weighs 1200 pounds, stands full sixteen hands and is one of the most symmetrical horses in California. At \$30 the season he is a bargain for breeders. Read his advertisement in this issue of this journal.

## Two Sons of McKinney in the Stud.

Over at Alameda race track the well known horseman, P. Foley, has two well bred sons of the great McKinney 2:11 1/4 in the stud. The older of the two is Montesol, a five year old that stands 15 1/4 hands high and weighs 1100 pounds. His dam is the registered mare Igo by Antevolo, son of Electioneer; second dam Daisy May by Nutwood, and third dam the Ralston's mare by Alexander's Abdallah. There are the four great families of Wilkes, Electioneer, Nutwood and Abdallah 15 represented in Montesol, who is a fine individual and a horse with speed and fine action.

The other stallion is Pole Star, a three year old by McKinney out of Mountain Hare by Young Venture. This is a very handsome individual and he will be permitted to serve five mares this year, but they must be of approved breeding.

Mr. Foley will be pleased to show these young stallions to anyone who may visit his place at the Alameda track, where he has quite a number of horses in training, there being eight McKinneys among them.

## Breeding of Diablo and Strathway.

One of our regular readers writes and asks us to give the breeding of Diablo 2:09 1/4 and Strathway 2:19.

Diablo is by Charles Derby 2:20, (son of Steinway and Katy G. by Electioneer). His dam is the great mare Bertha (dam of Don Derby 2:06, Diablo 2:09 1/4, Elf 2:12 1/2, Ed. Lafferty 2:16 1/2 and Jay Eff Bee yearling record 2:26 1/2), by Alcantara, son of Geo. Wilkes and Alma Mater. His second dam is Barcena a great broodmare by Bayard 53; his third dam is another great broodmare Blandina by Mambrino Chief 11. and his fourth dam another great broodmare, the Burch mare by Parker's Brown Pilot.

Strathway is by Steinway, son of Strathmore and Abbess by Albion. His dam is Countess (dam also of Dawn 2:18 1/4) by Hambletonian 725, and his second dam Fly whose pedigree is untraced.

## Training Department, Bitter Root Farm.

In the Grand Circuit, Sept. 4, 1898.

Spohn's Distemper and Cough Cure is what every owner and handler of horses everywhere should have. I have used it for the various forms of contagious diseases, and the throat affections of horses with the most gratifying results. It is a safeguard against exposure of horses to all sorts of distempers, pink eye, and the like.

Respy. JOE REA, Trainer.

The \$1000 filly, Pleasant Thought, by Prodigal 2:16, out of Extasy 2:11 1/4, has been sent to Charles Marvin for development. She is owned by Gen. Brayton Ives, of New York city.

Strike!—if they don't give you Jack.

## JOTTINGS.

THE LIVERMORE HORSE SHOW drew about two thousand people to that pretty little town in Alameda county last Saturday and the horse breeders and owners did their best to make the show a success, but it was not an impressive demonstration by any means. The demand for good horses of the draft breeds has almost depleted the country around Livermore of the stock which made it ten years ago the leading draft horse breeding section of the State. There have been horse shows there at which a dozen or more high-class imported and native stallions of the Percheron and Clydesdale breeds were led in the parade, but these have all been sold or died, and the exhibit Saturday was made up principally of grade descendants of these horses. The show was very good considering the stock of horses that had to be drawn on to make the exhibition, and there was much interest shown, but it was the general expression that there will have to be a large importation of new blood if the country intends to keep in the draft horse breeding ranks at all.

While the display of horses was not up to former shows at Livermore, the management was excellent and everything in connection with the exhibition was well carried out. Frank Fennon acted as Marshall of the day and was assisted by County Treasurer A. W. Fielder, Robert Mann and Charles Moody. The parade started soon after 1 o'clock and moved along the principal streets to the reviewing stand where William McDonald announced the name and breeding of every animal in line. Mr. McDonald has a wonderful acquaintance with the horses owned in that section of the country as well as a knowledge of horse pedigrees in general, and his manner of presenting the necessary facts about each animal that was halted in front of the stand interested the large crowd and kept it intact until the last one was led past.

There were not many standard bred animals in line. A good looking colt by Diablo, owned by N. D. Dutcher and a handsome black stallion by Richard's Elector out of the dam of Directum 2:05½, owned by H. E. Green of Dublin, attracted the most attention. A Wilder of Byron showed a good looking youngster by Comet Wilkes out of a mare by Stonewall Jackson. The stallion Warren by Walker 2:23 was shown with one of his get.

The horse that drew the most attention in the parade was an Oldenburg coach stallion owned by William A. French of Stockton, who led him in the parade. Outside of the fact that this horse, Y. Adonis, was a little too highly "gingered," he made a fine showing and is really a very stylish and handsome horse.

There was quite a large display of the draft breeds but few were in show condition and the majority were grades and cross bred horses. Several fair looking jacks were paraded, and there was a hairy pony driven by a couple of pretty little girls and a team of pinto ponies exhibited by D. McNally. The committee in charge of the show consisted of Andrew Block, N. D. Dutcher, H. M. Christensen, John Myer, Chester Young and S. Bordes. The Livermore band enlivened the occasion with music and as the day was a perfect one as far as weather conditions were concerned, it was highly enjoyable for all who attended.

One of the best prospects that I have seen lately for a race horse of the kind that will go out and trot any number of heats required of him, is the three year old brother to Iloilo 2:16½ that Farmer Bunch is training at Pleasanton for the Meek Estate. This son of Welcome 2:10½ is built like one that will go all day and rest up during the night for another full day. He is only a colt and has had but very little work, but he is learning so fast that he looks like the real article already. He stepped a quarter in 34½ seconds over the Pleasanton track last Saturday at the end of a mile in 2:30 and acted as if he liked the sport. He is one of the playful kind and feels so well when taken on the track that he wants to cut up all sorts of didos, but a sharp cut with the whip brings him to a realization that work is wanted of him and he goes to trotting like a campaigner. Look out for this fellow when the races begin.

Another fast one by Welcome is a five year old pacer. He is out of a full sister to Cricket 2:10 and stepped a quarter in 31½ seconds last Saturday. Welcome is just as sure to make his mark as a sire of extreme speed as his produce are trained. Not only is he a wonderfully handsome stallion, standing 16.1 and weighing 1300 pounds, but he was a very fast one. His mark should be two or three seconds better than that of 2:10½. Then he has a head that is

full of brains and few stallions live that have as much good common horse sense. The racing instinct was born in him and he is transmitting it. He comes from producing families on both sides. His sire Arthur Wilkes has produced wonderfully well for his opportunities and Welcome's dam, Lettie, is not only one of the great broodmares herself, but is the daughter of one of the greatest progenitors of speed that ever lived, old Mary by Flaxtail, whose descendants in the 2:15 list are growing more numerous every year. Lettie has produced Welcome 2:10½, Wayland W. 2:12½ and Maud Singleton 2:28½. The first and only one of Welcome's get to start in a race is Iloilo 2:16½ a good race horse. Wayland W. has three in the 2:15 list, viz: Arthur W. 2:11½, John A. 2:12½ and Forrest W. 2:14½. Maud Singleton has one in the 2:15 list—Silver King 2:14½. Mary, the dam of Lettie is the dam of Apex 2:26, Sterling the sire of five in 2:30, Gazelle the grandam of Kelly Briggs 2:10½, Ripple the grandam of Sir Albert S. 2:03½ and she is also the dam of that great mare Grace, that has produced Daedalion 2:11, Eagle 2:19½ and Creole 2:15, the sire of Javelin 2:08½. If there is anything in the broodmare theory, Welcome will sire extreme speed when mated with good mares and I look to see him have a 2:10 performer before the end of the year.

Pleasanton track was in tip-top shape last Saturday. Geo. A. Kelly, who manages the property for the owner, Thos. Ronan, is a practical horseman and realizes the fact that water in proper quantity and at the proper time is an absolute necessity to keep this famous track in shape. Too much rain has never yet fallen on the Pleasanton oval, but too little moisture has often been the complaint. Mr. Ronan made a contract with the Pleasanton Water Co. last week by which the track will be fully supplied at all seasons of the year. The excellent well at the track will be utilized as formerly but it will be supplemented by the city water and there will be no growling about a hard and dusty track this year if Mr. Kelly can help it. The former owners of the property laid water pipes all round the track, but never had the water turned on. With plenty of water the Pleasanton track has no equal in the country as an all year training ground.

Col Kirkpatrick had Ed Tipton of New York as his guest at his Pleasanton bungalow during the latter part of last week and the eastern gentleman saw quite a lot of speed at the track. James Thompson drove the Colonel's pacer Thornway by Steinway a half in 1:03 on Saturday and worked some of the Palo Alto bred colts fast eighths and quarters. Ben Walker drove the Monroe Salisbury's pacer "Mush" by Lottery Ticket out of a Dexter Prince mare a half in 1:04. William Cecil drove the trotter Mamie R., own sister to John A. McKerron 2:05½, a quarter in 34½ seconds, and Mr. Tipton remarked that if she could show a fast half at Cleveland just before the Blue Ribbon sale there would be no telling what price she would bring.

Mr. Tipton will have a grand consignment from California to that sale in May. The Santa Rosa Stock Farm's string alone with Anzella 2:06½, Dolly Dillon 2:07, Sir Albert S. 2:03½, Bonsilene 2:14½ and that great green mare Lou Dillon (trial 2:08½) are in themselves enough to create a sensation among the buyers who want high class racing material, but there will be quite a lot of high class horses consigned from other California breeding farms. Mr. Chas Griffiths will send a grand lot of youngsters and there will be quite a number of owners who will consign from one to three or four that will be able to show speed of a high order at the Cleveland track. There is no doubt but the sale will be one of the best ever held at Cleveland as there is a big demand over there at present for horses that can do the Missouri act, as the boys call it.

William G. Layng, formerly editor of this paper, but now owner and manager of the Occidental Horse Exchange on Third street, in this city, sent me word last Tuesday that he had just received news from the Fair ranch at Newark that the stallion Gossiper 2:14½ had died there two weeks previous. Gossiper was bred by W. H. Wilson, of Cynthiana, Kentucky, and was purchased and brought to California by Chas. A. Durfee at the same time he brought McKinney here. Mr. Durfee campaigned him through California and gave him his record at Los Angeles in 1893, when Gossiper was eight years old. Mr. Durfee has told me many times that Gossiper was the fastest horse he ever drove and but for his inability to stick to the trot would have had a much lower mark. He was lightning fast, but did not have the race horse head that McKinney possessed. The year he took his record he started nine times. At Santa Barbara, in August, he won two races in straight heats, best time 2:23. The next week at Hueneme, he won again after losing the first heat to the bay mare Flora. The fastest heat of his race was 2:23. At the State Fair that year he

started twice but failed to win, getting third money in the 2:27 class won by Mary Caldwell and was behind the money in the 2:30 trot won by Iago. This was a seven heat race, Iago by Tempest, Fallacy by Falls and Hattie B. by Alex Button being the heat winners. The next week at Stockton Gossiper won in straight heats, beating Fallacy and others and lowered his mark to 2:17½. At Santa Ana, in October, he met Challenger Chief and others in the 2:20 class trot. After winning the second and third heats in 2:19 and 2:15½, he was beaten by the Chief in the next two heats in 2:17½ and 2:17½. The circuit wound up at Los Angeles. Here he again met Challenger Chief and the race was a duel between them. Gossiper took the first heat in 2:19, Challenger Chief the second in 2:17½ and then Gossiper won the third in 2:14½, the fastest heat of his career. Challenger Chief took the next two and the race in 2:18½ and 2:18. Three days later he won the 2:27 class trot in straight heats, the best time being 2:19½. The following year Gossiper started four times, but only won one heat, which was at Woodland in a race where he met Shylock and Adelaide McGregor. This heat was in 2:15½, the fastest of the race. That was his last year on the turf and he was retired to the stud, where he has been fairly successful, being the sire of Gazelle 2:11½, Miss Jessie 2:15½, Ketcham 2:16½, Lady Fair 2:17½ and several others. His daughters are highly prized as broodmares and it is as a broodmare sire that he will doubtless achieve his greatest reputation. Among his daughters are the dams of Zolock 2:10½, Zephyr 2:11, and the three year old Cuete 2:18. Gossiper was sired by Simmons 2:28, his dam Lady Bryan by the old champion, Smuggler 2:15½; second dam by a son of Mambrino Patchen. He was not a large horse, but was a beautiful type, having a handsome head, nicely arched neck and a fine barrel and set of legs. One of his ears was frost bitten when a colt and lopped so as to detract from an otherwise perfect head. For speed and gameness he had few equals. I saw him last at the Haywards horse show last year and he looked thin and out of condition, but stepped along as proud as the proudest and attracted much attention. Gossiper mares should be bred to good stallions, as they are almost certain to produce extreme speed.

Mr. M. A. Murphy, now connected with the Tesla Coal Company, but formerly of Colton, California, has had pretty good luck breeding trotters, although he has never gone into the business on a large scale. He bred the mare Ella Madison, that took a record of 2:12½, and several others, and he has now in Walter Maben's hands at Los Angeles two three year olds by Zombro 2:11 that are considered about the best trotters of their age in Southern California. One is a bay filly and has already stepped a half in 1:13½, last quarter in 34 seconds. The other is a black gelding called Peter Zombro and brother to Lord Kitchener 2:19½. Peter stepped a half in 1:12½ the other day, coming the last quarter in 34½ seconds. If not sold soon these three year olds will doubtless be shipped East and started in the rich stakes in which they are engaged. As the speed they have shown was done with but sixty days' work, they are considered excellent prospects. Mr. Murphy has his great broodmare Nellie Bly in foal to Zombro and will soon own a full sister or brother to Julia M., the green trotter that trotted a trial of 2:12 last year and is expected to beat 2:10 this year.

## Owners Not Infallible.

Some writer, in referring to the danger attending the process of getting into racing condition a horse that has been given a winter's let-up from training, has said that owners, by their eagerness, ruin more horses than trainers do, and there is a lot of truth in the saying. I have known many instances in which a trainer has been forced to show a fast mile with a horse because the owner demanded it, and when he did so, after making a vigorous protest, was later on blamed for the reversal of form shown by the horse, says the *Horse World*. It is not uncommon for a trainer to hear an owner remark, when he protests against driving a horse a fast mile when he knows his condition does not warrant it, "He is my horse and I am paying the bills." Yet that same owner will kick vigorously when his bill is presented, if on account of his unreasonable demand to see a fast mile his horse's chances for racing were spoiled for the season. There are some owners who know more about training than some trainers do, but, as a rule, such men also know enough to place their horses in the hands of some trainer who, they feel confident, knows how to train and drive them without any assistance from them. It is the owner who really knows nothing of the practical work entailed in training and fitting a horse for racing who causes trouble for his trainer. If such men would put their horses in the hands of competent trainers, and let them have their own way, there would be fewer dissatisfied owners.

## Sale of Fashionably Bred Stock in San Bernardino County.

SAN BERNARDINO, Feb. 26, 1903.

John A. Cole has this day sold eight head of fashionably bred horses as can be found anywhere to J. K. Wheat of Phoenix, Ariz. Mr. J. K. Wheat is no new man or adventurer in the horse business, as the breeding and form of the animals he purchased stamps him a horseman of mature judgment, buying as he did:

**BULLET NECK**, bay colt by Zombro 2:11, first dam Belle Raymon, full sister to Ed Winship 2:15; second dam Gypsy, dam of Gazelle 2:11; third dam Echo Belle, grandam of Conn 2:15. This colt is large and a model of beauty, reflecting the high form of both sire and dam, and should make a sire that will add thousands of dollars to the value of horse interests of Arizona.

**LADY RIVERS**, dam of Sweet Marie, matinee record 2:11, by Carr's Mambrino; first dam by Volunteer 55, second dam by Owen Dale, thoroughbred. Lady Rivers is now safely in foal to McKinney.

**LEONORE MCKINNEY** by McKinney 2:11½, first dam Leonor by Dashwood. This mare is a full sister to Jennie Mac 2:09, Dr. Book 2:10, and half sister to Miss Jessie 2:13 and Judge 2:24.

**SALLY POINTER** by Sky Pointer, full brother to Star Pointer 1:59½. Bay filly, three years old, 16 hands high; first dam Sister 2:20 by McKinney, second dam Allen 2:25 by Anteeo, third dam Lou Medium, dam of Lou Dillon, trotted at Memphis last fall 2:08, and Red Wood 2:21.

**LILLIAN WELBORN**, bay mare by St. Vincent, first dam Make Bell by Bell Boy, second dam Brown Bell by Baron Wilkes, third dam by Alcantara.

**BLACK FILLY** by McKinney 2:11½, dam strictly thoroughbred. This filly, though thoroughbred on her dam's side, is as perfectly gaited as any McKinney ever sired.

**BYSTANDER** by Zolock 2:10½. Bay colt, 16 hands; first dam by Bob Mason Jr., second dam thoroughbred. **ROSALIND**, bay mare by Stam B. 2:11½, first dam Klicat Maid 2:18 by Altamont. Rosalind has trotted a mile in 2:15.

Mr. Cole has many more equally well-bred animals which, as to breeding, form and pedigree, compare favorably with those this day sold. His black colt Prince Valentine is without doubt as perfect a specimen of horseflesh as can be found anywhere, and barring accidents he will yet stand on the tan bark of Madison Square, a king among kings, in form and breeding, he being sired by Monbells, he by Electioneer, first dam Nordica 2:19½, Nordica being the dam of three in the list; second dam Sally Benton, she being the dam of four in the list; third dam Son-tag Mohawk, she the dam of eight in the list.

**NEAR KINNEY**, by Neernut 2:12½ out of Leonor McKinney by McKinney, second dam Leonor by Dashwood; that is the dam of Jennie Mac 2:09 and Dr. Book 2:10.

**ROSEBUD**, bay filly by Charleston 2:12, first dam Grace Wood two year old record 2:26 by Nutwood 600; second dam Grace Cuyler by Cuyler 100.

**BROWN COLT** by Zolock 2:10½, first dam Berinda dam of Roan Wilkes 2:12½ as a three year old, by Berlin. This is a pacer of undoubted merit, being already entered in over \$12,000 worth of stakes.

This article could be carried along for several columns in your paper but my brief stay at the hospitable home of Mr. Cole only permitted me to view the animals nearest the barns and corrals. The fillies in this county by McKinney 2:11½, Zombro 2:11, Zolock 2:10½, Stanton Wilkes 2:10 are surely the base of a great trotting foundation. There is a good chance for a first-class Electioneer or Baron Wilkes stallion here as the blood of these two branches of the Hambletonian family are not represented in this county by a trotting horse.

In my next I will tell you of our young animals in training here.

ALCANTELLUM.

## Sweeney Cured.

Norwalk, Cal., Nov. 7, 1901.

The Lawrence-Williams Co., Cleveland, O.: Yours of September 25th at hand. The case of Sweeney I cured is as follows: It was a young horse, 4 years old, had been sweeneyed on a gang plow. I had seen your advertisement in *Hoar's Dairy-man* and concluded to try "Gombault's Caustic Balsam." I read and concluded that it came with the bottle and applied it the directions on Sweeney that I had applied it again, but the horse would not stand as much rubbing. In five days there was a scurf, or scaling off of hair and skin. I cleaned it as well as I could and applied the Balsam again. That was the last time. I did not use any grease or other medicine or lotion. The shoulder is as even and looks as nice as it did before the injury.

FRANK M. WARNER.

Hunter, Greene Co., N. Y., Aug. 29, 1902.

W. F. Young, Springfield, Mass.

Dear Sir:—The bottle of Absorbine arrived safely and, having tried the same for a few days, I like the preparation very much, as it is so easy to apply, does not remove hair and there is no disagreeable odor. The bunion on the horse seems to be decreasing. I have much faith in your Absorbine.

Yours truly,  
ERNEST F. STOTZ.

California favorite hot weather drink—Jackson's Napa Soda.

## Passing of the Horse.

Every little while they tell us that the horse has got to go: First the trolly was invented, 'cause the horses went so slow; And they told us that we'd better not keep raisin' colts no more; When the street cars got to motting that the horses pulled before I thought it was all over for Fan and Doll and Kit, S'posed the horse was up and done for!

But he ain't went yit.

When the bike craze first got started people told us right away, As you probably remember, that the horse had saw his day. People put away their buggies and when kitin' round on wheels: There were lots and lots of horses didn't even earn their meals. I used to stand and watch 'em, with their bloomers as they'd sit, And I thought the horse was goin'.

But he ain't went yit.

Then they got the horseless carriage, and they said the horse was done, And the story's been repeated twenty times by Edison: Every time he gets another of his batteries to go, He comes whoopin' out to tell us that the horse don't stand a show, And you'd think, to see those chauffeurs, as they do a-chauffin', it Was good-by to Mr. Dobbin.

But he ain't went yit.

When the people git to flyin' in the air, I s'pose they'll say, As we long have been a-sayin', that the horse has had his day. And I s'pose that some old feller jist about like me'll stand Where it's safe and watch the horses haulin' stuff across the land, And he'll meebly think as I do while the crowds above him flit, "Oh, they say the horse is done for,

But he ain't went yit."

—Philadelphia Journal of Comparative Medicine and Veterinary Archives.

## George H. Ketcham.

The owner and trainer of the champion trotter Cresceus 2:02½, has a striking personality, and this is the way he condenses history for the *Turf, Field and Farm*: "I am a Quaker by birth, a civil engineer by profession, am engaged in the theatrical and brokerage business, have 700 men on my payroll, am a farmer by occupation, and a horseman from choice and for fun. I do not go to church, but know every preacher and a few of the Sisters in the county because all call upon me for a donation. Have handled and driven trotters for twenty years with pleasure and profit, and in all this time have managed to pay my debts, and with the aid of my wife, occupy a fairly respectable position in the community. I have trained and driven to their records and raced successfully Miss Lida 2:10½, Lurline McGregor 2:11½, Angelina 2:11½, Rhoda Farren 2:11½, Nyanza 2:12½, and about twenty more with slower records, including Charley Friel, Pierron, Katie Earl, Lucy B., Annie Trevilian, Mr. Middlemay and Spinaway. To this list must be added Cresceus, the champion trotter of the world, and practically, I may say that I am the only trainer who practically holds all the trotting records. Incidentally, I may say that I am the only trainer who has ever been fool enough to start a horse year after year on January 1st and race him until December 31st, and while doing so kept the horse sound and in winning order, and to escape with the goods."

## Horses Scarce in the South.

Horses are scarce in the South, good horses, indifferent horses, in fact all kinds of horses, but especially good ones of the market sorts, says the *National Live Stock Reporter*. Naturally, then they are also high, and the prices that are in offer for high class steppers, drivers and cobs and saddle horses have never been equalled. A trotter or pacer must be a very fast one indeed, if without a record, he will bring as much money as is being offered for good individuals of the kind described. Very many prize winning high actors and cobs have been foaled in the South, particularly in Kentucky and Tennessee, and a few years ago these States had quite a stock on hand. These, however, were picked up quickly and now they are few and far between. The agents of wealthy Eastern men are to be found scattered all over the likely territory, searching diligently for the animals they want, but most of them are forced to return empty handed or at least without as many as they desired to take with them.

## Treatments Worth Knowing.

If your horse has heel cracks clean thoroughly, after which apply Campbell's Iodoform Gail Cure. A quick and permanent cure will result. If your horse has scratches, wash with warm water and caustic soap. When dry, paint lightly with Campbell's Horse Foot Remedy, and in a day or so as soon as the deep seated germs are killed, apply Campbell's Iodoform Gail Cure. This treatment is a positive cure. If your horse is calked or cut by barbed wire, or receives any other similar injury, you can prevent blood poisoning and heal the wounds by using either Campbell's Horse Foot Remedy or Campbell's Iodoform Gail Cure. Both are powerful antiseptic remedies, and never fail to cure such wounds.

## More About Selling Races.

Frederick Watson of New York who, together with H. S. Hogoboom of California, is an earnest and persistent advocate of selling races, writes as follows in the *American Horse Breeder*:

Some little time ago I wrote an article about selling races which met the approval of that very enthusiastic reformer of harness racing methods, Mr. Francis M. Ware, but he very kindly gives me a pointer that, while my suggestions regarding selling races are good, and would do good for the sport of harness racing, I did not need to stop at suggesting selling races for classified horses only. And as he very ably puts it, "Why classify by records at all? Why not classify in true selling race manner by cash value only?" The idea is such a good one that I feel it opportune to use it.

In my previous article, which appeared in our issue of January 20th, I suggested that owners of extra good horses would not enter them in these selling races, because they stood such a chance of having them bid up on them, if they won, or claimed on them if non-winners, and that, therefore, it would be the means of bringing the horses of a class much nearer together. It is just as Mr. Ware suggests, there is no real need in the majority of cases of making any classification by records. Open a class, a selling race for a purse of \$500, winner to be sold for \$500. No matter what the horse's record is, he is not actually worth any more for racing purposes than the horse without any record at all, if he cannot beat the no-record horse. The owner of a trotter that could step in 2:20 would not want to enter in a free for all race, but if he was willing to sell his horse for \$500 and first money, he certainly would have no objection against starting against a horse with a record of 2:06 that was owned by a man who was willing to sell for \$500 and first money. It is a genuine case of the leveling influence of cash values.

Then look at the opportunities it would give owners of absolutely outclassed horses to start their horses in a race and possibly get rid of them at their legitimate value. Some one owns an outclassed pacer with a record of 2:15½ that he is willing to sell for \$300, there is a selling race, purse \$250, winner to be sold for \$200. Naturally this would only draw a lot of "cheap skates," and the 2:15½ pacer might have a chance to win it in 2:25 or thereabout, perhaps slower. It is actually his legitimate class, \$300 skates; his record was his class at the time it was made, but he has lost "class" since, and it is only in such selling races where he would get a chance to race that he actually belongs now.

One selling race each day could be given at a meeting for a small purse, and it need cost the association but little and yet be a feature of the day's sport. Many an owner would welcome the chance of entering his horses where by being willing to sell a bit cheaper he could have a bit of the handicap that his horse's record made against him taken off.

## News From the North.

[Portland Rural Spirit.]

L. C. McCormick will make a season with his McKinney stallion, Harry McC., in Portland this year.

Fifty-two entries in the Oregon stakes this year, indicates its popularity among breeders and insures a great deal of interest in colt training.

Herman Metsker, of this city, has taken the contract to supply the government with 300 cavalry horses at \$117 per head. The contract is to be filled within 50 days.

Capt. Jones, the well bred son of the great sire McKinney, is in better condition this spring than ever. He has improved in every way and is now a well developed and muscular horse of fine finish.

W. O. Trine's string of horses are in fine condition at the State Fair grounds. Oregon Bull is taking his work in old-time form and somebody will know that they have been to the races when they beat him.

W. H. Bradford has a Bonner N. B. filly 16 hands, high and still a-growing, that he hopes to see spread herself before the season is over. She promises to be a very high actor and may do to take to Madison Square.

R. Britts passed through Portland this week, in charge of the stallion The Commonwealth 2:18½, on his way to La Grande, where he will be delivered to his new owner, N. K. West, who recently purchased the horse from J. W. Zibble, of Fresno, Cal.

The Washington Legislature has appropriated \$15,000 for the maintenance of the State Fair at North Yakima the next two years. This is \$7500 a year or an increase of \$2500 over former appropriations. With this sum of money Washington should hold an up-to-date fair and we predict they will.

Sober up on Jackson's Napa Soda.

## Hints on Track Building.

A correspondent wishes to know how many acres are necessary for a mile track, also how best to lay one out. This information may be useful to many of our readers, so the answers given prominence.

As to the necessary acreage this must entirely depend on the surroundings desired. To merely contain a mile track sixty feet wide, a space 750 yards long by 100 yards wide is necessary. The area of this will exceed fifty acres by only 121 square yards. Having laid out a parallelogram of the above dimensions, bisect it longitudinally, and twenty yards eighteen inches from each end of the dividing line drive stakes, 139 yards apart, these stakes drive others. Between the latter you will have a base line exactly a quarter of a mile

long. On each side of this at a distance of 139 yards draw lines parallel to it and the same length.

Now attach a cord, or, better still, a fine wire, as that is less liable to stretch, to the pegs at the ends of your central base line, and describe a semicircle from each, driving frequent stakes. If your measurements are accurate the tangents of these half circles will exactly coincide with the pegs set near the extremities of the dividing line, and the ends of the two lines equal and parallel to the base. If you place your inside fence on the outer side of these semicircles and the parallel lines they join, you will have a track exactly a mile around measuring three feet from the inside of the rail, while if you place your outer fence just inside the containing lines and semicircles drawn through

the bisecting points from the ends of the base line, the radii of which will be 159½ yards, you will have a running ground a trifle over sixty feet wide. The turns on a track of this width may safely be thrown up a couple of feet.

It may interest you to note that the area of the running ground you will have to care for on a track of such dimensions will be nearly eight acres. Each yard you increase the width of the track will add two-fifths of an acre to your task. To keep a strip twenty-five feet wide along the inner rail in order, you must till three acres. The area of your infield will be thirty-eight acres, in each corner you will have a vacant space exceeding an acre by 300 square yards.—Chicago Horseman.

# LAST CALL ENTRIES IN EARLY CLOSING EVENTS ON Colorado Racing Circuit Close March 15th

## Horsemen, Mail Your Entries at Once.

Entries must be mailed for these events Not Later than MARCH 16th. Nominations Transferable until May 15th. FIVE WEEKS' RACING from JUNE 1st to JULY 4th.

### THE DENVER OVERLAND RACING ASSOCIATION.

Racing at Overland Park, Denver, the fastest mile track in the West. June 20th to July 4th. \$40,000 in purses and specials. Two Harness Races every day. The harness races at this track for which entries close March 15th are: No. 3, 2:20 Pace, \$1000; No. 4, Three-year-old Trot, \$500; No. 7, Free-for-all Pace to wagon, prize; No. 8, Free-for-all Trot to wagon, prize; No. 13, 2:15 Pace, \$1000; No. 16, 2:25 Trot, \$1000; No. 17, Three-year-old Pace, \$500; No. 20, Two-year-old Trot, \$500; No. 21, Special Pace to wagon, prize; No. 22, Special Trot to wagon, prize.

The other harness events on this track, for which entries close May 15th, are: No. 1, 2:32 Pace, \$500; No. 2, 2:20 Trot, \$500; No. 5, 2:08 Pace, \$500; No. 6, 2:35 Trot, \$500; No. 9, 2:27 Pace, \$500; No. 10, 2:14 Trot, \$500; No. 11, 2:40 Pace, \$500; No. 12, 2:27 Trot, \$500; No. 14, Free-for-all Trot, \$500; No. 15, 2:23 Pace, \$500; No. 18, 2:17 Trot, \$500; No. 19, 2:11 Pace, \$500; No. 23, 2:17 Pace, \$500; No. 24, 2:10 Trot, \$500; No. 25, Free-for-all Pace, \$500; No. 26, 2:30 Trot, \$500.

In addition to the harness events there will be FOUR or MORE Running Races each day.

The Colorado Derby for runners will be run Derby Day, the opening day of the meeting.

Open betting will prevail at Denver.

Mail entries to

E. A. COLBURN, Pres.

G. A. WAHLGREEN, Secy. and Treas.

G. A. WAHLGREEN, Secretary.

1748 Stout St., Denver, Colo.

Five Weeks' Racing on the Colorado Racing Association Tracks, from June 1st to July 4th, \$75,000 in Purses and Specials.

G. A. WAHLGREEN, Circuit President.

S. M. Bush, Circuit Secretary.

The programs of the Trinidad, Pueblo and Colorado Springs meetings, for which entries in the STAKE RACES close March 15th, are as follows:

### HORSEMEN, MAIL YOUR ENTRIES AT ONCE.

#### The Elks Racing Association

OFFERS \$7000 IN PURSES  
Trinidad, Colo., June 2-3-4-5.

Purse No. 1-2:14 Trot	\$ 500
Purse No. 2-2:15 Pace (The Phillip Schneider Brewing Co. Stake)	1000
Purse No. 3-1:25 Trot and Pace to Wagon	Prizes
Purse No. 4-2:35 Pace	500
Purse No. 5-2:20 Trot	500
Purse No. 6-2:25 Trot (The Merchants' Stake)	1000
Purse No. 7-2:19 Pace	500
Purse No. 8-1:15 Trot and Pace to Wagon	Prizes
Purse No. 9-Free-for-All Pace	500
Purse No. 10-2:40 Trot	500

ENTRIES TO STAKE RACES CLOSE MARCH 15, but are transferable to May 15, when horses must be named. Entries to class races close MAY 15.

In addition to the above there will be two or more running races each day.

Mail entries to

JOHN HUMPHREYS, Sec'y, Trinidad, Colo.

#### ThPblo, Colorado,

#### State Fair Association OFFERS.

\$7500 IN PURSES AND SPECIALS

June 8 to 11 Inclusive.

No. 1-2:14 Trot	\$ 500
No. 2-2:35 Pace	500
No. 3-2:20 Trot	500
No. 4-2:15 Pace (Merchants' and Bankers' Stake)	1000

# \$23,000 DETROIT DRIVING CLUB \$23,000

ANNOUNCES THE FOLLOWING EARLY CLOSING EVENTS TO BE COMPETED FOR AT THE

## Great Blue Ribbon Meeting

JULY 20, 21, 22, 23, 24, 1903.

### ENTRIES CLOSE MONDAY, MARCH 23d

No. 1—\$10,000, Merchants' & Manufacturers' Stake	2:24 class trotting	No. 4—\$2,000, Purse	2:09 class pacing
No. 2—\$5,000, Chamber of Commerce Stake	2:24 class pacing	No. 5—\$2,000, Purse	2:20 class trotting
No. 3—\$2,000, Purse	2:12 class trotting	No. 6—\$2,000, Purse	2:17 class pacing

#### CONDITIONS.

Entries close Monday, March 23d when horses must be named. No nomination will be accepted beyond the amount paid. A written notice of withdrawal is required by the Club at the 30th day payment day. The main race of the Merchants' and Manufacturers' Stake will be divided as follows: The first three horses will be divided pro rata among the winners of the Main Race. Nomination therein, upon payment of 2½% additional, shall have the right up to July 6th, to substitute in the place of the horse named, any horse eligible at the date of the closing of the Stake.

The Chamber of Commerce Stake will be divided as follows: \$250 to the first horse, \$1000 to the second, and \$750 to the third. \$200 for a Consolation Race, open only to horses that start and win no part of the Main Race. To be paid three days from the date of the closing of the Stake. In the event of there being less than three horses eligible to the Consolation Race, there shall be paid to the fourth horse in the Main Race the sum of \$500 to the

being less than three horses eligible to the Consolation Race, there will be paid to the fourth horse in the Main Race, the sum of \$1000, to the 14th horse \$250, and the remaining money divided pro rata among the first three horses. Should it amount to more than the sum mentioned, the surplus will be divided pro rata among the winners of the Main Race. Nomination therein, upon payment of 2½% additional, shall have the right up to July 6th, to substitute in the place of the horse named, any horse eligible at the date of the closing of the Stake.

The Chamber of Commerce Stake will be divided as follows: \$250 to the first horse, \$1000 to the second, and \$750 to the third. \$200 for a Consolation Race, open only to horses that start and win no part of the Main Race. To be paid three days from the date of the closing of the Stake. In the event of there being less than three horses eligible to the Consolation Race, there shall be paid to the fourth horse in the Main Race the sum of \$500 to the

fifth \$375, and the remaining money divided pro rata among the first three horses. Should it amount to more than the sum mentioned, the surplus will be divided pro rata among the winners of the Main Race. Nomination therein, upon payment of 2½% additional, shall have the right up to July 6th, to substitute in place of the horse named, any horse eligible at the date of the closing of the Stake.

Purse Races will be divided 50% to the first horse, 25% to the second, 15% to the third and 10% to the fourth.

Entrance Fees 5%, with an additional 5% from winners, excepting winners in the Consolation Races, from whom no additional fee will be charged. But should there be no Consolation Race, an additional fee of 5% will be charged to the winner of fourth money. This Club is a member of the American Trotting Association, and the rules of that Association will govern, except where otherwise provided.

Stake No. 1—\$50 March 23d; \$50 May 1st; \$150 June 1st and \$250 July 6th.

Stakes in Purses Nos. 2, 3, 4, 5 and 6—\$10 March 23d; \$15 May 1st; \$25 June 1st; \$50 July 6th.

In the foregoing events, the Club will probably offer Purses for the following classes:

2:12 Pacing. All of which will be mile heats, best two in three to harness.

Payments in Stake No. 2—\$25 March 23d; \$25 May 1st; \$75 June 1st; \$125 July 6th.

For Entry Blanks and all information address

J. B. PETIT, Secretary, Room 19 Campau Bldg, Detroit, Mich.

CAMPAU, President.

## Notes and News.

Enter in the stakes and keep in.

Don't miss the Haywards Horse Show to-day.

F. E. March, proprietor of Grattan Stock Farm, Illinois, is in California on a visit.

Kentucky Futurity for foals of 1903 has a value of \$22,000. Entries close March 16th.

Mr. G. F. Leonard, Boston, Mass., has lost the Palo Alto bred mare Carrie Caswell, foaled 1896, by Altivo 2:18½, dam America.

If the Governor signs the district fair appropriation bill, the Secretaries should get busy the next day and announce dates for their fairs.

Nutwood Stock Farm's mare, Georgie B. 2:12½ by Nutwood Wilkes, is heavy in foal to Zolock 2:10½ and will be bred to Searchlight 2:03½ this year.

Chas. Davis, formerly of Palo Alto Stock Farm, has accepted the position of superintendent of Mr. E. J. Molero's breeding farm in Monterey county.

At the Combination sale of trotting bred horses held at Lexington, Kentucky, February 18th and 19th, 221 head were sold for \$53,440, an average of \$240.

Goshen Jim 2:10½ has been showing up well on the ice. At Minneapolis he paced three half mile heats over the frozen surface in 1:07, 1:05½ and 1:05½.

Barondale's season is starting in well and quite a number of mares have been bred to him already. Mr. James has a great horse in this son of Baron Wilkes.

Second payment of \$5 will be due April 1st from those making nominations in Pacific Breeders Futurity No. 3, which closed last December for mares bred in 1902.

If the trotters Billy Buck 2:16½ and Eddie Conners fail to prove big money winners in the hands of E. F. Geers the coming season, somebody will be greatly disappointed.

Send to Mills & Sanders for one of the Searchlight cards giving his list of races. It is a wonderful showing and shows what a great race horse the son of Darknight is.

Al. Proctor, the Canadian reinsman who marked Harold H. 2:04, drove Looking Glass 2:19½, in his two winning races at Ottawa in which he defeated De Veras 2:11½, and other good ones.

The Eastern paper keep referring to Mr. J. W. Gardner's fast pacer in William Cecil's string as a brother to Coney. The three year old is by Nutwood Wilkes out of a sister to Coney.

E. D. Dudley, of Dixon, has sent his mare Bee by Sterling out of Flash by Egmont to be bred to Searchlight 2:03½. She has a fine looking colt by Diablo at her side. Bee is the dam of Monroe B. 2:18½.

The youngsters that Chas. L. Griffith will send to the Cleveland sale will show speed of the race winning kind. The two year old filly by Direct and the three year old colt by Steinway are as good prospects as were ever bred in California.

A gentleman who saw the McKinney stallion By Mack the other day tells us that he is one of the best individuals he ever saw. He is out of By By, the \$10,000 daughter of Nutwood. Quite a number of high-class mares have been booked to him.

The Charles Derby's are uniformly large and handsome horses, as well as fast, and breeders should not overlook the fact that this son of Steinway is standing for public service at Oakwood Park Farm this year. He is the sire of four in the 2:10 list.

Sam Hoy of Winters is booking mares every day to his stallion Baywater Wilkes, one of the greatest bred horses in California and a sure sire of speed. The sire of Kelly Briggs 2:10½ will have quite a number of new representatives in the standard list this year.

Mr. E. H. Harriman announces that he will retire permanently from the turf May 1, when his lease of the Orange County Driving Park, at Goshen, expires. Ex-Senator John McCarty, owner of Joe Patchen 2:10½ and proprietor of Parkville Farm, will succeed him at the park.

Nushagak, sire of last years biggest money winner on the California circuit, the colt Aristo 2:17½ winner of the Occident and Stanford Stakes, is in the stud at the Walnut Grove Stock Farm and should not be overlooked by breeders. He will be one of California's greatest sires with proper opportunities.

Grace Kaiser, the dam of Coney 2:02, McZeus 2:13 and other fast ones, has a filly foal by Nutwood Wilkes and will be bred to him again in the hopes that her next foal will be a colt. Her owner, Mr. J. W. Gardner, thinks a stallion of this breeding would be about the real thing, and he is not far from correct.

There never was as good prospects for big entry lists on the California circuit as this year, provided we have a circuit. What association will be the first to announce a date?

Lou Dillon (trial 2:08½ last year) will probably be entered in the M. and M. by Santa Rosa Stock Farm, She is to go under the hammer at the Blue Ribbon sale at Cleveland in May.

There is a trotter by Seymour Wilkes out at Pat Farrell's place that the veteran is very much taken with and says is a sure fast trotter. The get of Seymour Wilkes are rapidly coming to the front.

Scott Hudson considers Chase 2:07½ a 2:05 prospect, if report is correct, and considering how well the horse performed last season it would seem that he had good reasons to believe him capable of trotting that fast in a race the coming season.

Entries for the great Seaside meeting at Brighton Beach close to-day. There are five very rich purses offered. The \$20,000 Bonner Memorial for 2:12 class trotters is the biggest purse offered in America for aged trotters. The 2:10 pacers are given a purse of \$10,000. There are three \$5000 purses. Read the advertisement in this issue.

James Berryman, who went to Haywards with his horses when the Alameda track was too wet to work on a few weeks ago, has returned and has three horses at work. He has them stalled in the Lapham row. Mr. Berryman says the Alameda track is now one of the best he ever drove a horse over and that it is being kept in fine shape.

It is reported that Mr. E. D. Morgan, the wealthy New Yorker who has been on a visit to Kentucky, last week offered owner Jesse Turney, of Paris, \$25,000 for his famous blind horse Rhythmic, and that the offer was declined. Mr. Morgan is on the lookout for one of the best horses that can be bought and expects, eventually, to secure one.

Don't overlook the fact that entries for the New England Trotting Horse Breeders Grand Circuit meeting close on Wednesday next, March 11th. The Massachusetts for 2:12 class trotters is worth \$15,000, The Blue Hill for 2:30 class trotters has a value of \$5000, and The Norfolk for 2:24 class pacers is worth \$5000. There are several \$3000 stakes.

J. W. Marshall, of Dixon, has sent two mares to be bred to Bonnie Direct. One is the mare Sophia by Robert McGregor that he purchased at the Griffith sale last November, at which time she was with foal by Bonnie Direct. Unfortunately she lost this foal, which was a fine bay colt. The other mare he will breed to Bonnie Direct is Miss Glenn by Algona.

When Owyhee 2:11 is shown at the Melbourne, Australia, horse show, which is to be held shortly he will wear one of the handomest and best made sets of harness that ever adorned a California bred trotter. It was made for him by John A. McKerron of this city, who is the leading harness maker in the world and has the gold medals that prove this statement.

W. E. Crowder & Co., of Laurens, Iowa, have just purchased from McLaughlin Bros. the imported Percheron stallion Orangiste for \$5500. This is the highest price ever paid by an American for a draft stallion. Orangiste won first prize at the International Live Stock Exposition at Chicago in December, 1902, and was the undefeated champion of France before he was imported.

J. C. Bray, of Butte, Montana, who has been in California for the past few weeks selecting a carload of driving horses, will leave Sacramento about the 15th inst. with a dozen or more good ones that he has picked up in different parts of the State. Besides the driving horses he will take along the stallions G. W. Archer by Allerton and A. A. Moore by Director, purchased by him during the past month.

The Detroit Driving Club announces its early closing purses for July meeting in this issue. Entries will close Monday, March 23d. The M. & M. is \$10,000 for trotters of the 2:24 class. The Chamber of Commerce is for 2:24 class pacers and the value is \$5000. All the other purses are \$2000 each. Don't fail to read the advertisement over carefully if you intend racing over east, and if you have a good one for sale enter him in his class.

The General Appropriation Bill, which contains the appropriation for the State and District fairs, passed the Assembly last Wednesday by a unanimous vote. The appropriation is the same as two years ago. A few members made a fight against the bill, but none of their amendments were adopted and on the final vote there was no opposition. The Senate will very likely pass the bill with the appropriation for fairs intact and it will then go to the Governor, who has the right to cut out any portion of it that he does not approve.

From a photograph received at this office from M. W. Savage, owner of the champion Dan Patch 1:59½, the great sidewheeler must be one of the best dispositioned stallions on earth. In the picture he is shown hitched to a cutter for a drive on the snow and the sleigh is filled with children. Harold Savage, the eight year old son of the horse's owner, holds the reins over Dan Patch, three little girls of about the same age are in the conveyance with him, and three or four young Americans are hooked on behind with their hand sleds. The photograph was taken February 2d, this year, at Minneapolis.

The three year old colt by Steinway out of Nola by Nutwood in the Griffith string at Pleasanton, paced a half in 1:04 at the Pleasanton track last Monday. He is consigned to the Blue Ribbon sale at Cleveland.

An error was made in the announcement of the stallion Limonero 2:15½ last week. Instead of his service fee being \$50 as stated it will be but \$25. At this figure he should do a large business, as for his breeding, performances and individuality, \$25 is a mere trifle. Next year his fee will be larger.

Caid 2:07½ is making the season at Wola Stud, in Krzeszowice, near Krakau, in Austrian Galicia. His fee is 600 kronen—about \$150. Greenbrino 2:10½ (Austrian record 2:10) winner of the European Championship race last year, commands the same fee, and stands at Donaudorf, some fifty miles west of Vienna. Que Allen 2:08½, the European record holder, stands for 800 kronen (\$200) at Kagran, a few miles out of Vienna.

Mr. P. W. Bellingall drove his stallion Secretary a mile in 2:27 over the Alameda track one day last week. As Secretary has been in the stud for years and has had no training whatever until Mr. Bellingall began giving him road work two months ago, this is surprising speed for a sixteen year old horse. Secretary has not looked so well for years as he does now. He sires handsome and fast horses, and they all sell readily.

Alta Vela 2:11½ will make the season of 1903 at the San Jose race track. He was shipped there last Thursday in charge of Hans Frelson. Mr. F. Gomet, owner of Alta Vela, has decided to race the stallion this year and has therefore limited his services to ten mares at \$50 each. Mr. Gomet sent with Alta Vela three other horses that will be trained by Frelson at San Jose. These are Little Jib and Verona 2:18½ by Nutwood Wilkes and Miss Gomet by Seymour Wilkes.

Catalogues for the sale of the Oakwood Park Farm horses are being eagerly looked for by horsemen and there will be a big crowd at the sale, which comes off this month at the Occidental Horse Exchange. As all know, Oakwood Park Farm is one of the great speed producing farms of America, and this consignment will represent the very best blood on the place. There will be sons and daughters of McKinney 2:11½, Direct 2:05½, Owyhee 2:11, Chas. Derby 2:20, Steinway 2:25½ and James Madison 2:17½ in the consignment.

A ten-months old filly by McKinney 2:11½ is offered for sale by a Los Angeles advertiser. She is seal brown without a white hair, large and well developed. Her dam, Miss Kaiser, is by Kaiser, the same horse that sired Grace Kaiser, dam of Coney 2:02, McZeus 2:13 and others. Mr. Durfee purchased Miss Kaiser in Kentucky at the same time he bought McKinney and sold her at auction as a yearling for \$800. A filly bred like Coney and McZeus should be worth considerable and as her owner does not ask an unreasonable price for her should meet with ready sale.

Tom Bonner, who for eight years was superintendent of the Santa Rosa Stock Farm, and who now lives in San Francisco, took a trip up to his former home one day last week and says the best three year old he ever saw in his life he saw at the Rosedale Stock Farm. It is a bay stallion by St. Whips, son of Whips, sire of Azote 2:04½. The colt's dam is by Daly 2:15, its second dam Cygnet by Steinway and third dam Leah by Woodford Mambrino. This young stallion is not only handsome in form and color, but he is fast, as he has already worked a quarter at the trot in 35 seconds.

When the system of timing harness races was inaugurated upward of half a century ago the quarter-second rule was adopted. In timing athletes and running horses the fifth-second split is in use. Trotting horsemen are discussing the desirability of adopting the fifth-second rule. The mathematical difference between the two systems is one-twentieth of a second, a narrow fraction of time, but sufficient to show a difference in the finish of over two feet. This split would be sufficient to clearly establish a difference between two horses of upward of a head in finishing a heat. The discussion of the two systems arose from the technicality of Dan Patch's performance at Readville when he paced a mile in 1:59½ in an effort to beat the same record held by Star Pointer. If Dan Patch had started to beat his own record of 1:59½ it is contended that the performance would have constituted a record. Many horsemen timed the mile in 1:59 1-5 with fifth-second chronometers and if this had been the standard method of timing harness performances the pacing record would stand 1:59 1-5, to the credit of Dan Patch.

Captain C. H. Williams, of Redwood City, who purchased the black filly Alta Nola at the sale of Chas. Griffiths' horses in this city last November, paying the ridiculously low price of \$115 for her, has come to the conclusion that he has a crackerjack. Alta Nola was foaled in 1898 and is by Altamont out of Nola (the dam of Phoenix 2:15½) by Nutwood. She produced a foal by Bonnie Direct in 1902 and was stunted to Steinway, but did not get in foal. Captain Williams has been driving her on the road lately, but has given her no regular training, and one day last week took her to the Mayfield track and drove her a half-mile in 1:20. She is one of the best-gaited pacers imaginable and will get a low record if trained. Captain Williams will breed her to Bonnie Direct this year. His black pacer, Del Oro by Oro Wilkes out of Net 2:34 (dam of Leonel 2:17½) by Magic, son of Elmo '91, is in fine shape and will be raced this year if there is a California circuit. He has paced miles in 2:15. Captain Williams owns his dam and has a two year old by Nutwood Wilkes from her that is not only a very handsome, but a very fast pacer. Net is now in foal to McKinney 2:11½.

## Plans for East View Farm.

Sam C. Freeman writes the following interesting gossip in the last issue of the *Trotter and Pacer*:
